APPENDIX

TO

SECOND SERIES OF LOCAL REPORTS RELATIVE TO VALUATIONS FOR
POOR RATES, AND TO THE REGISTERED ELECTIVE FRANCHISE IN
IRELAND.

BANBRIDGE UNION.

Extracts from Minute-book of Board of Guardians.

APPENDIX.

Banbridge.

April 8, 1839.

Resolved,—That the following Committee be appointed to report to the Poor Law Commissioners upon the steps which they consider necessary to be adopted relative to the valuation, and making a rate for the relief of the poor, according to the Act of Parliament, viz. :—

Mr. Hunt.	Mr. Lindsay.
Mr. C. R. Brush.	Mr. Wm. Waugh.
Mr. Scott.	Mr. Wm. R. McGinnis.
Mr. Reilly.	Captain Bowen.

Resolved—That the Committee meet on Monday, the 15th instant, at 11 o'clock, and that Mr. Whyte be chairman of the Committee, and that three members be a quorum.

At a meeting of the Board of Guardians held the 22nd of April, 1839, Nicholas C. Whyte, Esq., in the chair—Present

Thomas Crawford, Esq., <i>ex officio</i> .	Mr. John M'Clelland.
John Lindsay, Esq., <i>ex officio</i> .	Mr. Andrew M'Clelland.
Francis Charles Beers, Esq., <i>ex officio</i> .	Mr. Porter.
Mr. Clibborn.	Mr. Reilly.
Mr. Stoney.	Mr. Hamilton.
Mr. Scott.	Mr. Bell.
Mr. A. M'Clelland.	Mr. O'Hagan.

Resolved,—That the Report of the Rating Committee be received and adopted, and forwarded to the Commissioners as the Report of the Board of Guardians.

Report of Valuation Committee.

Report of Rating Committee.—The Committee appointed to inquire and report from time to time upon all matters relating to a rate, have, in proceeding to ascertain “whether any, and what surveys or valuations of hereditaments in the Union, appear to be available and sufficient for the purpose of estimating the net annual value of such hereditaments as are liable to be rated under the Act,” considered it their duty, first to ascertain as a preliminary step what are the hereditaments corporeal and incorporeal comprised within the Union, before they could form any opinion as to the existence of surveys, valuations, or estimates thereof; and so far as your Committee can ascertain, these hereditaments, in addition to lands and tenements, consist of tolls arising out of the Newry navigation, the turnpike road, the Bann reservoir, and from the market towns of Banbridge, Dromore, and Tanderagee; and as to all these, your Committee are of opinion that the accounts kept by the respective corporations and proprietors in pursuance of the provisions of the sixty-seventh section of the Poor Law Act, will be sufficient to enable your Board to estimate the net annual value so as to make a rate thereon. With respect to lands and tenements, and the rent and tithe arising therefrom, your Committee are of opinion that the Ordnance Survey will be available, and amply sufficient, for the purpose of ascertaining the bounds and contents of the Union, and the different sub-denominations thereof, parishes, electoral divisions, and townlands, and, together with it, the town-land applotment for the collection of the county cess may be made available for the purpose of ascertaining the quantity in the occupation of each individual.

Previous surveys and valuations.

Ordnance survey.

County cess applotment.

As to a valuation, your Committee fear there does not exist any sufficient to answer the purpose, but are of opinion the valuation made in pursuance of the 6th and 7th Will. IV. cap. 84, commonly called “Griffith’s,” combined with the books of Tithe Composition Valuation, as lodged with the incumbents of their respective parishes, may be made available to make a fair and equitable rate in the first instance, if properly digested, revised, and corrected by skilful and professional persons; and to these may be called in aid the valuations of the towns of Banbridge, Tanderagee, and Dromore for the purpose of local taxation, under the 9 Geo. IV. cap. 92.

Griffith’s valuation.
Tithe composition.

Town valuations.

(Signed) MANDEVILLE.

May 6, 1839.

Present 5 *ex officio* and 13 elected guardians.

Resolved,—That the Valuation Committee be instructed to obtain copies of all valuations which they consider may be made in any degree available, and such other information as they consider desirable and attainable for the purpose of assisting in making a valuation of the property within the Union, in accordance with the Act of Parliament; and having obtained these that they be instructed to call in the assistance of such professional valuers as they consider necessary to enable them to report to the Board, upon the best and most economical mode of perfecting a fair valuation upon which to make the rate for the relief of the poor.

Valuation Committee.

Professional assistance.

May 20, 1839.

Present 3 *ex officio* and 12 elected guardians.

A letter from the clerk to the clergymen of the several parishes in the Union was read, and

APPENDIX.

Banbridge.

replies from all save three; some offering to produce the books, and others declining to do so, principally upon the grounds of the books being the property of the parish.

Resolved,—That the guardians of the several electoral divisions of the Union be requested before Monday, the 3rd June, to furnish the names of such valuers as they think are fit and proper persons to assist the Board of Guardians in making a valuation of the property in the Union, and the lowest charge per day at which each valuator would afford such assistance as might be required of him.

Resolved,—That when these names of the valuers be received by the Valuation Committee, they fix upon such as they think best calculated to perform the duty subject to the consent of the Commissioners, to whom the clerk is to send the proposal, as recommended by the Commissioners.

June 3, 1839.

Present 7 *ex officio* and 18 elected guardians.

Letters to bodies corporate.

Resolved,—That the clerk be instructed to notice every body corporate, and every company of proprietors, and joint stock company associated by authority of Parliament, or by royal charter, or by letters-patent, referring them to the sixty-seventh section of the Poor Law Act, which requires the proprietors who shall be entitled to any tolls or profits from or on account of the use of any canal navigation, railway, right of way, or other easement, to cause to be kept accounts showing the gross amount of the monthly receipts in respect of such tolls and profits received in every year from and after the passing of the said Act, and also the amount of the expenditure in every such year, as the guardians of the poor are fully authorised to inspect the same during the months of October and April in every year.

Resolved,—That in the opinion of this Board Mr. Griffith's valuation should be adhered to as a basis for a new valuation, as relates to all property valued by him; and that an advertisement be inserted, inviting offers from valuers for the completion of the valuation, according to the Act.

Advertisement for valuers.

One valuator for entire Union.

Resolved,—That in the opinion of this Board one valuator only ought to be appointed to complete and be responsible for the completion of the valuation of the whole Union, allowing to such valuator such assistance as he may require, subject to the approval of the Board of Guardians.

Resolved,—That the following advertisement be inserted :—

TO VALUATORS,—The Board of Guardians of the Banbridge Union desire to obtain the services of a competent valuator to complete the valuation of all property within the Union, according to the Act of Parliament for the Relief of the Poor. The Board of Guardians have resolved to adopt Mr. Griffith's valuation of all property valued by him; and the valuator will be held responsible for the equal valuation of the whole, but he will be allowed to have such assistant valuers at his own expense, as he may require, subject to the approbation of the Board. The person offering must state the sum per day, the sum per acre, and a gross sum at which he is willing to undertake the work. The valuation should be completed by March next; and the person engaging will be required to find sureties in the amount of the contract. The Union contains about 100,000 acres.

June 17, 1839.

Resolved,—That Mr. Wilson be the person chosen as valuator, subject to the approbation of the Poor Law Commissioners, at the sum of 2*l.* per thousand acres.

July 29, 1839.

Present 3 *ex officio* and 5 elected guardians; valuator's securities executed.

Ordered,—That the valuator, Mr. Wilson, be instructed to proceed upon the valuation forthwith, and that he be directed to adhere to Mr. Griffith's County Valuation, for the land valued by him; and that he be directed to add one-third to the value of all houses valued by Mr. Griffith, and to value all other houses on the same principle and in like proportions.

August 12, 1839.

Present 1 *ex officio* and 9 elected guardians.

Resolved,—That it is the opinion of this Board that it is the meaning and intention of the Board in the resolution of the last meeting, relative to the valuation, that Mr. Wilson is to restore the one-third to Mr. Griffith's original valuation of the houses; and that the remainder of the houses be valued on the same principle, and that Mr. Wilson be instructed accordingly.

Of the guardians present at the passing of the foregoing resolution, three only were present at the passing of the resolution of the 29th July, 1839.

April 20, 1840.

Present 5 *ex officio*, and 21 elected guardians.

Resolved,—That the following gentlemen be appointed to assist the valuator; to superintend the progress of the valuation, and to report thereon from time to time, as to them appears necessary; and they are recommended by the Board to call upon the valuator to deliver in his valuation by electoral divisions in a complete form, so that the valuation of each division may be examined by the Committee; the clerk to give notice to the guardian or guardians of each division, in order that they may attend the revision of the valuation of their respective electoral districts as they are examined, viz.

Mr. E. Hill Trevor.

Mr. Massey.

Mr. Crawford.

Mr. Abraham M'Clelland.

Mr. Harrison.

Mr. Hunt.

Mr. John Lindsay.

With the Chairman, Vice-chairman, and Deputy Vice-chairman.

Resolved unanimously,—That the valuator be instructed to proceed with the valuation upon his own judgment and responsibility, adhering to the Government valuation as far as he is

Valuation Committee.

Instructions to valuator.

able; but in every case making the valuation in such a manner as to be able to uphold the same in every particular in Court in case of appeal.

Resolved,—That the valuator be instructed to deliver in the valuation by electoral divisions, as fast as he can complete the same, in order that they may be examined by the Valuation Committee.

August 10, 1840.

Present 3 *ex officio*, and 8 elected guardians.

Mr. Wilson, the valuator, being in attendance at the meeting, and having submitted his valuation for the following electoral divisions, viz. Annaclone, Balloolymore, Garvaghy, Tir-kelly, and Ballybrick,

Resolved,—That as far as the guardians are at present aware the valuations are satisfactory, but that as trifling errors will doubtless require correction, a time be fixed when the valuation is complete, for the guardians and the valuator to attend in each electoral division, to receive any objections which appear necessary, and to revise the valuation; full notice of such times and places to be given beforehand.

Valuation declared satisfactory, as far as it had gone.
Mode of revision.

October 12, 1840.

Present, 29 elected guardians.

Resolved,—That the names of John Walsh, F. C. Beers, and George W. Porter, Esqrs., be added to the Valuation Committee.

That the Valuation Committee meet for the purpose of examining the valuation as delivered in by the valuator.

November 2, 1840.

Present, 5 *ex officio* and 19 elected guardians.

Resolved,—That the following gentlemen be a committee to examine the valuation, as delivered in by Mr. Wilson, and that they call the attention of the valuator to any apparent error or discrepancy which appears to exist in it, with the view of his examining and reconsidering such portions of the valuation as the Committee consider to be necessary, before laying it open for public inspection, according to the 69th section of the Act, five to be a quorum; viz., Messrs. Harden, Beers, Patton, Loftie, Adams, John Lindsay, Welsh, Porter, D. Lindsay, Waugh, Massey, Hamilton, A. McClelland, John Milligan, Arbuthnot.

Committee of Revision.

Resolved,—That the clerk be instructed to make out a copy of the valuation of the several electoral divisions, as delivered by Mr. Wilson for the use of the guardians.

December 14, 1840.

Present, 4 *ex officio* and 23 elected guardians.

The valuator having this day brought forward his valuation, and the clerk having copied it, and many complaints having been made of errors and omissions,

Resolved,—That the valuation cannot be received in its present state, and that in order to correct the valuation, the valuator, Mr. Wilson, be required to attend at such times and at such places as may be convenient before the next meeting of the guardians, when the guardians and other persons interested may attend and bring forward their objections, and state any errors within their own knowledge, in order that they may be corrected as far as circumstances may warrant. The valuator is to give four days notice to the clerk and to the guardians of the respective divisions, of the day and place at which he will attend in each division for the purpose; so that in every case the guardians and other gentlemen may attend, and assist in the examination. The *ex officio* guardians, and the elective guardians of the respective electoral divisions, to form a Board, before whom the objections shall be made. No guardian to sit on his own individual case.

Valuation revised.

The valuator having, in the valuation of houses, taken Mr. Griffith's Government valuation as a basis, and having added 50 per cent. to the said Government valuation,

Valuation of houses.

Moved by Mr. Harrison, seconded by Mr. Cromie:—

Resolved,—That the addition of 50 per cent. appears to this Board more than is warranted by the Act of Parliament, considering the expenses of repairs and insurance; and that in the correction of the valuation, it be an instruction to the valuator that the addition of 25 per cent. on the Government valuation be added instead of 50 per cent., as it now stands, so far as the same can be made applicable under the 54th section of the Act of Parliament, which imperatively fixes the actual fair letting value as the estimate to be made where the tenant does repairs.

Motion to reduce valuation of houses.

Amendment moved by James Harden, seconded by W. Adams:—

That no general instructions be given to the valuator in regard to houses, but that each complaint be decided by the Board upon its general merits, under the former resolution relative to the correction of the valuation.

Negatived.

Whereupon the original resolution was lost, and the above amendment carried.

January 11, 1841.

Present, 3 *ex officio* and 15 elected guardians.

The valuator attended the meeting of guardians this day, and stated that he had attended according to the instructions of the Board in several of the electoral divisions of the Union, for the purpose of correcting the valuation, and it appearing to this Board that such meetings had been attended with considerable advantage, and had been satisfactory to guardians and rate-payers interested, it is ordered that the valuator be instructed to continue his progress throughout the Union in the same way as speedily as possible; and it is requested that the guardians of the several Unions report to the meeting of guardians the result of their respective meetings in the divisions, so that the valuation may be completed and a rate made thereon at the earliest possible period, and the valuation is expected to be brought complete and perfect to the next meeting.

APPENDIX.

Banbridge.

On the 22nd February, 1841, the valuator delivered in his valuation, and a resolution was passed of the intention of the guardians to make a rate, and that the valuation was to lie for inspection from the 25th February to the 20th day of March, both days inclusive.

Evidence.

Mr. Wilson,
Valuator.

His previous experience.

Mr. JOHN WILSON, valuator.

Has been engaged in valuing land and farming since 1833. Valued several parishes; two in this Union under the Composition Act. Valued the estate of Marcus Synnot, Esq., last year; that lies in the Newry Union.

Holds between 50 and 60 acres of land within this Union, under Lord Downshire.

The only instructions given to him by the Board on commencing his valuation, were the resolutions of the 29th July, 1839 and 12th August, 1839.

Documents furnished.

They furnished him with the tithe applotments wherever they obtained them, but merely the acreable contents; they refused to allow the values to be given.

The county cess is now levied by Griffith's valuation, whenever competent persons have been found to applot the amount charged on each townland upon the several tenant's properties. Got the ordnance maps, but the red lines were not marked on them. Got a copy of "Griffith's Valuation," and his "Instructions to Valuers," and acted principally upon them in his valuation, because they accorded with his own ideas.

Got from the landlords in some cases the acreable contents, but not the rent paid; is unable to state the exact number from whom that was got; thinks in about one half the instances.

Use made of Griffith's valuation.

In ascertaining the contents was guided by Griffith's valuation as near as he could approach, but sometimes the landlords' rentals did not correspond with it; when the latter were near Griffith's valuation he let it stand; the landlord's returns are generally more correct. When there was any serious difference, endeavoured to find out where the land was, and charged the occupiers accordingly. Was guided by Griffith's valuation in the description of the different qualities of soil; took the qualities of the soil from that and his own observation; sometimes differed from it, and acted on his own opinion where there was a difference; was not guided by Griffith's valuation in estimating the value but used it as a test; made his assistants state their reasons for differing from Griffith's valuation when they did so. In valuing houses in towns referred principally to Griffith's valuation. In every instance compared his valuation of each townland with Griffith's valuation, but made a distinct estimate of the value of each tenement in the townland without reference to Griffith's. When there was a difference, examined both carefully to find out the cause of the difference. In most cases his estimate differed from Griffith's, because he valued no houses under 5*l*. The addition of those tenements to Griffith's valuation would bring the two nearly to a level.

As a test, not as a guide.

Generally inquired as to the rent; in cases of recent lettings marked the answers in his field-books. Was not guided by the rent paid, because where land is let by small proprietors it is generally let for more than the reasonable value.

Result, why different from Griffith's.

Inquired as to rent. Small proprietors.

Assistants.

Employed three assistants; either himself or one of his assistants inspected each tenement. The assistants were John M'Krink, William M'Gill; the third, Patrick Little, did very little for him when he was dismissed; was assisted also by his son. The assistants were surveyors, but had no experience in valuing land before. Took them with him for about a month each, and instructed them in his mode of valuing. Took their field notes, and either walked or rode over certain portions of their work; took in fact a general view of it by riding or walking through all the townlands and considered whether their value was correct or not. Instructed them to affix certain marks in their field-books to each tenement, denoting the qualities of the soil; whenever they differed from Griffith's statement of qualities they were desired to state their reasons for so doing; witness then selected certain portions of each townland, and examined the correctness of their judgment. Seldom differed from them; when he did, altered the valuation accordingly. They judged of the qualities of the soil merely by walking over the farm.

Mode of valuation.

Inquired on the premises the name of the owner, and put down that name in the book; sometimes the occupiers would not tell the name, but in general they gave the information, and their information was correct.

Prices of produce considered.

Mode of calculation.

In valuing, considered what rent the farm should fairly be let for, considering the prices of produce for the last five or six years. Generally considered that a farm well tilled should have one-fifth in pasture, one-fifth in green crops, one-fifth in white crop, one-fifth in oats, one-fifth either in hay or clover. Considered how much each farm would produce tilled in that way. Formed an actual numerical calculation of the produce of each farm. Considered the value of the produce according to the average prices for the last five years. Considered the cost of raising the produce.

1. The value of the seed.—2. The labour.—3. County cess and tithe.

Allowed landlord one-fourth for rent, which he set down as the net value.

Allowed three-fourths of the gross produce to the farmer to pay those expenses, and remunerate himself, and the remaining one-fourth to the landlord as rent, and the one-fourth allowed to the landlord constituted the net value of the farm. In that statement refers merely to land occupied by farmers. Where there were valuable houses that would set high, valued accordingly.

Large and small farms.

Small tenements, how valued.

Valuation frequently equal to actual rent paid, but always less than rack rent. Definition of rack rent.

Generally applied the same standard to large and small farms, but in some cases it was inapplicable, that is, where the holdings were very small, and houses had been built on them, in which cases the entire would set for more than the value of the land. It could be applied generally in all farms containing from six Irish acres upwards. Valued the small tenements at what would be a reasonable rent according to the course of the country.

In many cases his estimate of the value coincided with the rent actually paid, that is, where the land was the property of noblemen and large landed proprietors. In every instance his

Poverty of small farmers.

Farms generally under 20 acres. Mode of life. Great competition for land. High rents, how paid.

Rent of best land.

House and land valued distinctly.

Followed Griffith's principle, but with modification. Valuation of houses.

Found his valuation too high.

Reduced it 10 per cent.

Leases now seldom granted. Reason for that.

County cess 13d. per 1l. Tithe 1s. to 2s. per Irish acre.

Columns in rate-book—how filled.

Gross value how obtained.

Valuation grumbled at, but approved by a majority of the guardians.

Meetings for revision.

Valuation objected to as too high.

estimate was less than the "rack-rent." Understands by "rack-rent," rent over what a tenant is able to pay and live comfortably, and meet his landlord upon the gale day with the rent. Means by living comfortably that the tenant should have good food and clothing, and support his family. Very often in the small farms of from five or six Irish acres down, the tenants do not eat meat once in three weeks.

Twenty Irish acres are considered a good sized farm, and the generality of farms in his country are smaller. A tenant holding such a farm at a reasonable rent in this country, would feed himself and family upon strabout and milk in the morning, with sometimes fish and sometimes meat for dinner; the third meal is generally potatoes and milk; sometimes they drink tea. Any rent that would not allow a tenant to live in that manner, out of twenty acres of good land, he would consider a rack-rent. Competition for land is great; and a higher rent could be obtained than he valued the land at. The tenants would continue to pay it by denying themselves the comforts specified above, rather than want the land.

In most cases the owners could get 27s. or 28s. for the best land in this neighbourhood. many instances the tenants have continued to pay it, but with great exertions.

Was furnished with the Commissioners' circulars on valuation and rating.

Thinks the test prescribed by them was what the land would let for reasonably between man and man, but not the rack-rent.

Formed a distinct estimate of the value of house and land and entered them in his field notes, but made no separate estimate in the rate-book. Valued farm-houses principally on Griffith's principle, but made a separate estimate himself independent of Griffith's valuation. The resolution of the Board directed him to value all houses upon Griffith's principle, adding one-third. Understood by that that he was to add 50l. per cent. of Griffith's valuation, but the Board thought differently for a time, but after about six months they coincided in his view. Proceeded upon that principle in valuing all houses. The Board then found that was too high, and they then framed a new resolution on the 14th December, 1840, leaving him to his own discretion. He proceeded upon the same principle all through the Union, because any alteration would have rendered a new valuation necessary. Found when the entire was finished, that his estimate of the entire Union was too high, because, adding the value of the houses obtained in that way to the value of the land, it brought the value of the entire tenement above the reasonable letting value, and he then reduced the entire by 10l. per cent. both in houses and lands; and his reason for reducing the value in houses in towns was that that species of property has decreased in value, on account of the reduction in trade. The common tenure here in recent lettings on Lord Downshire's estate is for one life. Cannot tell what proportion of the tenements in the Union are held by lease. In recent lettings leases are seldom granted; gentlemen are not willing to lease their estates until they see how the Poor Law will operate.

The county cess is about 13d. per pound in this barony (Upper Iveagh); this is the cheapest barony in the county.

The tithe varies very much, from 1s. to 2s. per Irish acre; and valued independently of tithes and ministers' money, that is, the land should be worth the net value and the tithe beside. The contents are estimated by the English acre in the rate-book.

Filled up the columns "Landlords' and Tenants' Rates," in this Union, at 1s. in the pound, which he divided equally between them. "Landlords' Taxes" are blank; there are none such. The column, "Tenants' Taxes," was filled up with the county cess, calculated at 10l. per cent. on the net value. "Landlords' Repairs and Insurance" is generally blank, in not one case in fifty is there any such thing. "Tenants' Repairs and Insurance" was filled up with 5l. per cent. on the net value. "Landlords' other Expenses" was also blank. "Tenants' other Expenses" was also blank. The gross value was obtained by adding those amounts to the amount of the net.

The Board did not alter his valuation. The Valuation Committee never met but once, but he laid the valuation of each electoral division before the Board. Some members of the Board disapproved of it; they were principally tenants. They considered it too high; their own resolution respecting Griffith's valuation was principally the cause of it. Even after the reduction some still grumble at it as too high, but the majority of the Board approve of the valuation as it stands. Cannot say in general whether the landlords not on the Board are satisfied with it; some have expressed their satisfaction with it, but cannot speak as to the rest. A portion of the tenants are dissatisfied with it as being too high, that is, those who were valued low by Mr. Griffith.

The valuation has been adopted by the Board, and is now lying for the inspection of the rate-payers.

Did not ascertain the rent in more than two or three instances in each townland, and sometimes not in any one instance. Ascertained them from the occupiers, and their returns cannot be depended on.

From his general knowledge of the country can tell what are the rents paid on almost every townland in the Union, and what the land in each would be let for if out of lease.

Attended in pursuance of the resolution of the 14th December, 1840, at the meetings held. Two meetings were held in Dromore for Keagh, Dromore, and Quilley; two in Banbridge for Magherally, Tullylish, and Banbridge; two in Annaclone for Annaclone; one in Ballyloolymore for Ballyloolymore; one in Garvaghy for Garvaghy; one in Dromara for Crossgar and Artanagh; two in Tanderagee for Tanderagee, Ballyshiel, Mullabrack, and Mullahead; two in Glaskernmore for Glaskernmore; three in Ballybrick and Terkelly for those divisions; one in Scarvaghy.

At those meetings the guardians were to furnish correct lists of the occupiers in each townland, and the contents of each holding. In all the electoral divisions but three, Ballyward,

APPENDIX.

Banbridge.

Moneyslane, and Leitrim, the guardians attended, and corrected any error in quantity or comparative value. There were a good many objections as to value, on the ground of the value being too high. The guardians referred the objections to the valuator, recommending him to revise it when they thought it reasonable; those were very few; all the others were disallowed. Those which the guardians recommended him to revise were reconsidered. There were only three instances in which he altered his original estimate.

In the three divisions mentioned before, four meetings were held; at the first none of the guardians attended; at the second one guardian attended; at the third and fourth none attended. At those meetings they went over the contents of some of the holdings, but no objections as to value were gone into, on account of the non-attendance of the guardians. Those are mountainous districts; no surveys exist, and it is impossible to ascertain the contents exactly.

Valuation complained of by occupiers; otherwise satisfactory.

The occupiers complain of the valuation because the lands were valued lower by Griffith; but they have not sent in any objections since the books were open for inspection. They intend to appeal. In the rest of the Union there is general satisfaction with the valuation.

Mr. McClelland,
Guardian.

Mr. ABRAHAM McCLELLAND, Guardian for Annaclone,

Was member of Committee of Valuation and Rating. Mr. Wilson furnished the committee with the valuation of the different divisions as they were completed, and they took a copy of each division. They then called meetings of the rate-payers in each electoral division for correcting mistakes in quantities and values. Held two meetings in his division; the meetings were numerously attended; many objections were made, both as to contents and value. The errors in the contents were corrected.

Objections to valuation of small holdings.

The most numerous objections were against the valuations of the small holdings, which were valued higher than the large ones, because the houses on small farms are generally as good as on the larger; and a separate estimate having been made of the value of the houses, the addition of that to the value of the smaller farms raised them beyond the level of the larger farms. Witness thought the valuator wrong in making a separate estimate.

Board considered town houses to be over valued. Valuation reduced 10 per cent.

The resolution of the Board respecting the valuation of the houses was not intended by some of the members to apply to all houses, but only to houses in towns. Except the correction of mistakes the only alteration was the reduction of 10% per cent.

N. C. Whyte, Esq.,
Chairman of Board
of Guardians.

NICHOLAS C. WHYTE, Esq., Chairman of the Board of Guardians.

Is acquainted with the value of land. Was not a member of the Valuation Committee. The intention of the Board in the resolutions of the 9th July and 12th August, was, that the valuator should adopt Griffith's valuation of the land.

Valuation too high.

The valuation when first given in they were obliged to return as inaccurate. They considered the valuation too high, both landlords and tenants; and there were many mistakes in consequence of the valuator leaving the work to his assistants. The time for completing the valuation was then extended, and he altered it: supposes it was then the reduction of 10% per cent. was made.

Valuation not yet finally adopted.

The valuation has not been finally adopted by the Board yet. There are a great many complaints still against it as being too high, and thinks they will have a great deal of trouble before a rate can be struck. The resolution of the 10th August, 1840, was before the entire valuation was submitted. The appointment of the committee, 2nd November, 1840, was in consequence of the errors in the valuation. The committee found the valuation so incorrect that they returned it altogether to the valuator. The Board or the committee have not interfered with it.

Valuation not above letting value.

Looked at the valuation of his own neighbourhood, which he did not complain of; but many of his tenants are complaining, residing on different other townlands. Some of the landlords think it still too high, but none that are known of think it too low. Does not think it higher than the letting value. There is no difference of opinion between the landlords and tenants, as a body, about it.

Average price of land 25s. to 30s. per acre.

On Monday next the valuation will be brought before the Board. Anticipates a great many objections on the ground of over value. The average price of land is from 25s. to 30s. per acre; the townland of Greenan is let at 3*l.* 3*s.*, and no rents are better paid.

VALUATION of £10. COUNTY ELECTORS (registered 1833 to 1840), so far as ascertained.

COUNTY ARMAGH.

BANBRIDGE UNION.

LISBURN UNION.

Extracts from Minute Book of Board of Guardians.

APPENDIX.

Lisburn.

At a full meeting of the guardians, held on the 20th February, 1839, it was resolved, That the following gentlemen be appointed a Committee, to consider and report upon the existing valuations and surveys according to the orders of the Poor Law Commissioners, and that the report be laid before the Board of Guardians at their next meeting, viz. :—Andrew Durham, William Caldbeck, and William Graham, Esquires.

March 19, 1839.

Present, 5 *ex-officio* and 22 elected guardians.

The following report of the Committee on survey and valuation was read and received.

Report of Committee
of Valuation.

The Committee appointed by the Board of Guardians, held on February 20, 1839, to inquire if any survey or valuation exists within the Union which might be made available for ascertaining the annual value of property liable to be rated under this Act, report as follows:—

First, That there is not any survey or valuation existing within the Union which is sufficient for the purpose of declaring a rate under this Act, and are of opinion that a new survey and valuation should be made; that a land surveyor and two valuers should be appointed, who would receive much assistance from Mr. Griffith's valuation, and surveys and valuations made for different landed proprietors within the Union, also from those made by the Tithe Commissioners.

Existing surveys
and valuations.

Secondly, the Committee would suggest that the valuation of the whole Union should be made by the same persons, so that a uniform system might be pursued: they would recommend that there should be three persons employed, who should all be present when the valuation was making; that one of these persons should be from the county of Antrim, one from the county of Down, and it would be desirable that the third, as well as being qualified in other respects, should be a land surveyor.

Valuation to be made
by the same three
persons.

Finally, the Committee would concur with the suggestion of the Committee of the Belfast Union in submitting for the consideration of the Board, whether it would be advisable to move the Commissioners of Poor Law to impress upon Government the advantage that would probably arise to the public from having one uniform valuation for county and poor-rate, and probably parish-rates. It is understood there is to be an amendment of the Grand Jury Act this session, and if the property for taxation under it were made to agree with that under the Poor Law, and the county treasurer enabled to declare a poundage-rate instead of the clumsy machinery of applotting at present existing, a simple and uniform mode of operation would be established which could not fail of being satisfactory to the public.

Uniform valuation.

It was proposed by Mr. Lamb, and seconded by Mr. Scott (both elected guardians), and resolved by a division of 18 to 5, that the following amendment be adopted, viz. :—

The Board of Guardians, however, desire to impress upon the Commissioners their opinion, that Mr. Griffith's valuation may be made so far available as to prevent the necessity of a new one, except for such property as is not included in it, and which should be rated under this Act. The Board of Guardians also wish to express to the Commissioners their opinion that it is particularly desirable to avoid the expense of a new valuation, and that the report with such amendment be forwarded to the Commissioners.

Griffith's valuation to
be made available.

April 16, 1839.

Present, 4 *ex-officio* and 22 elected guardians.

Resolved, That the following gentlemen be appointed a Committee to consider and report to the Board upon the best mode of proceeding to obtain a correct list of the occupiers, and of all rateable property within this Union, and the value of each, upon which to found the rate for the relief of the poor; the Committee to consult and remunerate any surveyors, valuers, or applotters they shall think necessary to enable them to arrive at a definite opinion, and to report upon the requisite proceedings to be adopted relative to the laying on of the rate:—W. Coldbeck, A. Durham, R. Batt, W. Blackwood, W. Graham, and W. Stewart, Esquires, and Messrs. Lamb, Scott, Hunter, Kirkpatrick, Simpson, and Watson.

Committee on Surveys
and Valuations
appointed.

May 14, 1839.

Present, 3 *ex-officio* and 16 elected guardians.

The following report of the Committee on surveys and valuations was read and received, viz. :—

Report of Committee

That they met on the 23d April, and directed a circular to be addressed to each of the landlords in the Union, requesting of them to furnish by next meeting on 7th May a list of tenants' names, with the number of acres held by each.

That they again met on the 7th May, when Mr. Stephenson, the surveyor, attended by their desire. Returns were sent in from several landlords, on comparing which the Committee considered that a new survey was not necessary, and could be avoided,

It was then moved and carried (with one dissenting voice), that Mr. Griffith's valuation shall be taken as a standard and be adopted, adding to it such property as is not included by him and liable to be rated.

that Griffith's
valuation be taken as
the standard.

It was proposed by A. Durham, Esq., seconded by Major Stewart, that the following amendment be adopted:—

APPENDIX.

Lisburn.

That Mr. Griffith's valuation of this Union is inaccurate both relatively and actually. This motion was negatived by a majority of 12 to 2. The report of the Committee was then adopted by the Board.

May 28, 1839.

Appointment of
valuator.

A resolution was passed to advertise for valuers, and on the 2d July, 1839, a resolution that Mr. John M'Arthur, surveyor to Earl O'Neill, should be recommended by the Board to the Commissioners as the valuator of the Union agreeably to his proposal; and on the 16th July, Mr. M'Arthur was appointed.

April 7, 1840.

Mr. M'Arthur, the valuator, appeared to explain to the guardians what progress he was making respecting the valuation. He stated that the county cess book, and other means furnished him of determining the number of acres in farms did not agree with the aggregate of town lands as found in the Ordnance survey, nor with each other; a considerable difficulty occurs of determining the quantity of land held by individuals,

Resolved, That application be made to Mr. Gulson, with the view of ascertaining what measures should be taken to ascertain the true measurement, and the valuator be authorized to write to the Commissioners on the subject.

June 2, 1840.

Present, 4 *ex-officio* and 23 elected guardians.

Mr. M'Arthur appeared, and stated it was impossible for him to proceed with the valuation of the Union according to Mr. Griffith's valuation as hitherto instructed, and support the same in a court of justice.

Valuator to proceed
on his own responsi-
bility.

Resolved, That the valuation of the Union be made upon the sole responsibility of the valuator, taking Mr. Griffith's valuation so far as it can be made available as an assistance.

It was then proposed that Mr. M'Arthur be appointed the valuator agreeable to the foregoing resolution, and an amendment was moved and seconded that a person should be appointed to go along with Mr. M'Arthur to assist him. Mr. M'Arthur being called in explained that he had already two competent persons to assist him, whereupon the amendment was withdrawn, and it was

Resolved, That Mr. M'Arthur be allowed to complete the valuation on his own responsibility on the terms formerly agreed with him.

Extension of time
for valuation refused.

On the 25th August, 1840, a communication from Mr. M'Arthur was read, wishing to have the time extended for giving in the valuation, when it was,

Resolved, That the same cannot be granted, it being necessary that the valuation be given in at the time agreed on, for the purpose of fixing a rate.

September 29, 1840.

Present, 5 *ex-officio* and 23 elected guardians.

Committee to receive
valuation.

Resolved, That a Committee of 3 *ex-officio* and 9 elected guardians be appointed to receive the valuation, and that they meet on Monday the 5th October for the examination of 14 divisions named, and that the guardians of those divisions be requested to meet at the same time, and be present and assist at the examination, and have the same finished prior to the 13th October, when the Committee are again to meet with the remaining guardians, and have the other divisions examined without delay, so that all be completed, and a report made to a general meeting of the guardians on 20th October.

October 20, 1840.

Present 4 *ex-officio*, and 12 elected guardians.

The Valuation Committee reported—

That they met on the 5th October, when Mr. M'Arthur gave in the rate-books of nine electoral divisions, when it was resolved that the same be received, and that generally, as far as the Committee can judge, they consider the same correct, with some little exceptions and corrections, which they have pointed out to the valuator for his alteration, and returned them to him for that purpose till 13th October.

That they again met on 13th October for the purpose of receiving the remaining rate-books, Richard Nevin, Esq., in the chair. A letter was read from Mr. M'Arthur to the Board on the subject of his valuation, a copy of which the clerk was directed to send to Mr. Gulson, and to state to him that Mr. M'Arthur confidently expects to have all the electoral divisions lodged with the Board, at their meeting of the 20th October instant.

Valuation handed in.

Mr. M'Arthur handed in his valuation.

December 1, 1840.

Mr. M'Arthur read over the notices of appeals, with his observations on such as he had visited; he stated that he had gone to the farms of several who complained of having more land charged than they held; that he had arranged and settled with them, and that he would have all the others inspected before Tuesday, the 15th instant.

Valuation books re-
ported correct.
Rate struck.

On 29th December, 1840, a Committee of three guardians was appointed to examine the valuation books, and on the 2nd January, 1841, the Committee having reported that they had examined the valuation books and considered they were then correct, the rate-books were signed by three guardians and the clerk of the Union, and a rate struck at 5d. per pound.

Evidence.

MR. JOHN M'ARTHUR.

Mr. M'Arthur,
valuator.
His qualifications.

Is a surveyor and valuator by profession. Has a yearly salary from Lord O'Neill as surveyor and valuator on his estates. Has had experience in the valuation of lands under his

father, who was a valuator, and for the last five or six years has been acting as a valuator on his own account. Was appointed valuator of the Union by the Board of Guardians in June, 1839.

He was furnished by the Board with lists of the occupiers, Griffith's valuation maps and field-books, county cess applotments, and with lists of the tenants' names and acreable contents of the farms on several of the estates in the Union.

The Board adopted Mr. Griffith's valuation, and directed him to subdivide Mr. Griffith's valuation on the different occupiers, and to value all other rateable property in the Union, not included in Griffith's valuation.

In pursuance of those directions, he, with his assistants, five in number, viz.: his brother, Francis M'Arthur, surveyor, Robert Thompson, surveyor, Francis Bell, surveyor, Alexander Montgomery, one of the valutors of Belfast, and John Clark, who had valued under the tithe composition, all of whom had been more or less concerned in the valuation of lands, proceeded to subdivide the lands valued by Mr. Griffith, and to put a value on property not included in his valuation according to his mode of ascertaining it.

In June, 1840, he complained to the Board of Guardians that he could not proceed with the valuation according to Mr. Griffith's valuation, as he would not be able to sustain it in a court of justice, and the Board directed him to proceed with the valuation on his own responsibility.

He then commenced the valuation of the Union anew; his intention in proceeding on the second valuation was to proceed on such a scale of valuation as neither landlord nor tenant could justly appeal against. He at first took his assistants with him, and afterwards sent them out to separate districts, and then he himself tested and revised the valuations made by his assistants, by taking two or more farms in the district which each assistant had valued, and thereby forming his own opinion of the scale of value, and by reference to Griffith's valuation. Throughout the valuation of the Union his plan was to form his own opinion on the value, by classifying the quantity of land in each farm according to the character of the soil, whether good, middling, or poor or boggy, and then to strike an average on the entire. He then valued the houses on the farm, *generally* adopting Mr. Griffith's valuation of them, and adding their value to the value of the land, ascertained the rateable value of the entire farm. He then referred to Griffith's valuation as a check. He valued each class of land as if he were sent out to value it as between landlord and tenant, at a fair rent, not putting it to a rack-rent and valuing in the manner he is in the habit of doing when employed by landlords to value their estates, but he did not put on such a rent as could be obtained on competition for the land, as many persons would on competition undertake to pay considerably more than the value. What he means by the value is what a solvent tenant could afford to pay as a rent for the land. A solvent tenant is one who would pay the rent he would undertake to pay to his landlord without being in arrear, and living comfortably. A solvent tenant of 10 or 20 acres getting the land at a fair rent should be enabled out of the produce of his farm to clothe himself and his family comfortably, to feed himself and his family with potatoes and milk, to have occasionally eggs, and meat once or twice a-week. His estimate of a fair rent is what would be payable whether the tenant was to get a lease or not, and he therefore estimated the value according to what the place would let for, whether on lease or from year to year, but not as if it were to be let for a single year only. He valued large and small farms on the same principle, although smaller farms would, by reason of the greater competition for them, bring more on a letting than large ones; but in valuing them he did not take that consideration into account more particularly than others, but valued all on the same principle, namely, what a solvent tenant could pay. He did not generally institute any comparison between the rents paid and the value which he put on the lands; but in some very few cases he did make inquiries as to the rent paid. Those cases were where the tenant in occupation had purchased the former tenant's interest. There is much competition for land in the Union. No tenant leaves his farm without getting a sum for the purchase of his interest. The purchase money varies from 5*l.* to 10*l.*, and sometimes amounts to 15*l.* an acre, including the improvements. He did not take such competition into his consideration in valuing the land, as he considered it would be raising it up to a rack-rent value. He believes that persons who pay so much for the tenant's interest as from 5*l.* to 15*l.* per acre, generally speaking, contrive to pay the landlord's rent, and to get a reasonably comfortable livelihood out of the farm. In the few cases in which he made a comparison of the rent paid with his valuation, he found that by adding interest at the rate of 6 per cent. on the money paid by the tenant for the out-going tenant's interest to the rent payable out of the land, his valuation was always under the amount of the actual rent and the interest of the money. The farms in the Union are not of large extent, generally from 10 to 20 acres; seldom exceeding 30 acres. On the 10 to 20 acre farms he did not consider that the value put on the land by him would enable the tenant to realize much profit to himself after payment of his rent and the support of himself and his family in a manner a solvent tenant should do. In the larger farms of 30 acres and upwards the tenant might make a profit of in or about 1*l.* an acre, if he held the land at the rent at which he valued it.

In valuing houses in towns he proceeded on the principle of putting an occupation rent on the house, the tenant keeping it in its then present state of repair. He considered the advantages of situation in estimating the value, and the greater demand for smaller houses than for larger ones. His valuation of the houses in towns is in general under the rents actually paid, and is from 40 to 50 per cent. higher than Griffith's valuation on the small houses, and from 30 to 40 per cent. higher on the 10*l.* houses.

Parts of the Hertford estate are let on lease on which fines have been taken, other parts are

Documents furnished.

Griffith's valuation adopted by Board.

Valuator and his assistants' mode of proceeding with valuation.

Ordered to value on his own responsibility.

Commenced valuation anew.

Mode of proceeding with new valuation.

Valued land at a fair rent between landlord and tenant.

Meaning of a solvent tenant.

Meaning of a fair rent.

Large and small farms valued on the same principle.

Comparison of rent and rate.

Competition for land.

Purchase-money of tenant's interest.

Extent of farms.

Valuation of houses in towns.

In general under the rents paid.

valued.

Houses in towns not
valued at rack-rent.

Calculations of rate
and taxes.

Leases of holdings.

Reasons for departing
from Griffith's valua-
tion.

Mr. Gregg,
Guardian.

Valuation a fair one.

But little difference
between rentals and
valuation.
Board satisfied with
valuation.
Disposition of Board
to have valuation an
under valuation.

let at will. As to those parts let on lease, he considers his valuation is somewhat higher than the rents payable, and as to those let at will his valuation is somewhat lower.

On the Downshire estates his valuation is, as far as he can learn, about the same as the rents payable by the tenants. In some of the smaller properties the valuation is under the rent paid. When he had the valuation of a few of the electoral divisions finished he laid them before the Board. The guardians of each division examined the valuation, and seemed to consider the valuation satisfactory, with the exception of some inaccuracies which were corrected. The objections were principally relating to mistakes in the quantity of the land charged, and partly as to land being too highly valued. Where objections were made he attended on the ground, and either satisfied the parties that he was correct or amended his valuation, where he found an error. There was but one appeal to the quarter sessions lodged, and that was afterwards withdrawn.

Valued about a fifth of the Union himself. The assistants accompanied him only for a few days; explained to them his mode of valuing just in the same manner as he explained it now; drew up a set of written instructions for them upon which they acted; those instructions were made just after the change in the system. Each of his assistants valued at least 10,000 acres, and some of them more. Each electoral division was valued by the same person, except that Mr. Bell valued portions of the divisions that witness himself went over. Valued Lissue, Malone, Lisburn, himself, and part of Magheramesk, Magheragall, Knocknadona, Blaris, Drumbeg, and Derryaghy. The remaining parts of those were valued by Mr. Bell. Mr. Bell valued Island Kelly entirely.

Compared their work always with Griffith's valuation to see the proportion it bore. Thinks an addition of 25 per cent to Griffith's valuation would bring the entire to a reasonable letting value: that is when there were no particular circumstances to account for a greater difference. Griffith's valuation did not put more than a nominal value upon turf bogs, and they are valued very high under the Poor Law, being very scarce now. Some kilns also were not included in Griffith's valuation. With those exceptions, wherever the valuation of his assistants was 25 per cent., or nearly so, over Griffith's valuation; he let it stand without any further inquiry. Had not, in fact, time to do more. Wherever there was a considerable difference, corrected it as far as time and circumstances would admit. Was very much pressed as to time, and therefore was unable to make the valuation as satisfactory as he otherwise would have done. Made no personal inspection of the Townland, in which there was such difference, but altered the valuation by bringing it to near 25 $\frac{1}{2}$ per cent. over Griffith's valuation, and that was the way in which he kept the valuation uniform. Had no other means of keeping up an uniform scale of value, the time being so very short in which he had to return the valuation; but wherever a complaint was made, visited the premises or tenement. The complaints related both to his own work and that of his assistants. A great many of the complaints as to value were groundless, but whenever he saw it was necessary he did not hesitate to alter his own estimate or that of his assistants.

The classification of soils was made by putting a price on them.—Judged of the qualities of the soil by inspection; had not time to make as accurate an examination as for a rent value.

The houses included in Griffith's valuation he let stand—that is in the rural districts. The houses on the smaller farms are generally so inferior, that he added very little to the value of the land on account of them; and on that account his valuation of them might be considered lower than it should be, compared with other farms having good houses. Refers in the last answer to houses not included in Griffith's valuation.

Even in valuing houses in towns did not go to the rack rent, but thinks his valuation of them is nearer the letting value than his valuation of lands in the country. In the towns there are more landlords, and therefore greater difference in the mode of letting.

Filled up the columns by dividing the poor-rate, calculated at 10 $\frac{1}{2}$ d. in the pound, equally between landlord and tenant. The tenants' taxes in the country consist altogether of county cess, and that he calculated at 1s. in the pound. All the other columns he left blank, not considering them material.

On the Hertford estate the term is usually for lives and years. A great many of the holdings are held merely from year to year. The proprietors are rather anxious to give leases than the contrary. Cannot tell what proportion of the tenements are held by lease.

His reasons for departing from Griffith's valuation were, that it was too low, and that however just it might be between different townlands, yet he differed from the estimate made in Griffith's valuation, and could not support it upon an appeal; and there were several districts which had been improved since Griffith's valuation, but did not consider himself at liberty to alter it until he would be authorized to make a new valuation independent of Mr. Griffith's.

Mr. GREGG, one of the Guardians of the Union.

Considers the valuation is a fair one; thinks the valuation is fully equal to the rents payable by the tenants to the landlords. The Marquis of Hertford's estates are 72,000 acres; there are no middle men on the estates, with the exception of two or three cases. Thinks that if the landlords were to produce their rentals there would be found very little difference between them and the valuator's estimates. The objections made did not exceed above 80, and they were all settled upon explanation. The Board of Guardians were perfectly satisfied with the valuation; does not think that on a large scale anything could be more satisfactory. The Board did not express any decided wish as to whether the rate ought to be a low or high rate, but their general disposition was that the valuation should be if anything rather an under than an over valuation.

NEWTOWN LIMAVADY.

Extracts from Minute Book of Board of Guardians.

At the first meeting of the Board, held on the 16th of October, 1839, present 8 ex-officio and 23 elected Guardians.

The best means of obtaining a fair valuation of the rateable property was taken into consideration, and underwent considerable discussion.

Resolved,—That as a doubt is generally felt throughout the Union relative to the equableness of the Government valuation, it is desirable to advertise for a competent person or persons to undertake a new valuation of the rateable property within the Union, and that, as soon as the sanction of the Commissioners is obtained to this course, the Clerk do issue an advertisement.

That the valuator be furnished with the maps of the Ordnance Survey, copies of the county cess applotments, and with such other documents as can be obtained from landlords that may be considered useful or desirable. That the tenders be taken into consideration at the next meeting of the Board.

On Monday, the 25th of November, tenders from valutors were opened and read, and it was resolved, on a division by 23 to 6, that Mr. Fisher (whose tender was the lowest in amount) be the valuator of this Union; and that he enter into security for the due performance of the valuation of the Union within the space of nine months, he to receive 240*l.* for the work when finished.

Resolved,—That it is desirable that the valuator proceed in his work by Electoral Divisions, and deliver in the same to the Guardians according as each Division may be finished.

Resolved,—That a Valuation Committee, consisting of five Guardians, be appointed to superintend the proceedings of the valuator, and procure such documents for him as may be considered desirable; and that Marcus M'Causland, Connolly Gage, Robert Ogilvey, Arthur Sampson, and John B. Beresford be the Committee.

Resolved,—That it is the opinion of this Board that it is highly desirable to obtain the assistance of landlords in furnishing to the valuator any documents in their possession that may be useful; and that in order to obtain them, a circular, according to a form agreed on, be printed and circulated as may be directed by the Committee.

At a meeting held on the 7th September, 1840,

Ordered,—That the valutors attend with the valuation of the divisions of Newtown-Limavady, Myroe, Aghanloo, Ballykelly, Drum, Foreglen, Keady, and Highlands, that they may be compared on the next day of meeting, which is to be ascertained as soon as an answer can be received from the Assistant Commissioners appointing the day.

At a meeting of the Board held the 14th September, 1840,

A letter was read from the Assistant Commissioner, stating that he could not name any day to attend, but recommending the Guardians to meet on Monday the 21st, to examine the valuation.

Ordered,—That Mr. Fisher get notice to attend on Monday the 21st, and the Guardians be notified if it be found that Mr. Fisher be ready with the valuation.

At a meeting of the Board held on the 21st of September, 1840, present 6 ex-officio and 17 elected Guardians,

The valuation of the divisions of Aghanloo and Ballykelly were compared and examined by Mr. Sampson, Mr. Dunn, Mr. Given, and Mr. James Stuart, and found to be done on a fair scale.

The Divisions of Newtown-Limavady, and Myroe, were compared by Mr. Ogilvey, Mr. Colner, Mr. Martin, and Mr. Boyle, and found to be done on a fair relative scale.

The divisions of Foreglen and Drum were compared by Mr. Kidd, Mr. Thomas Ross, Mr. S. Craig, and Mr. Douglas, and found to be done on a fair relative scale.

The divisions of Keady and Highlands were compared by Mr. Gage, Mr. Canning, Mr. Martin, Mr. Sampson, and Mr. Given, and found to be done on a fair relative scale.

The divisions of Benone and Bellarena were compared by Mr. Reynolds and Mr. M'Clurdy, and found to be done on a fair relative scale.

At a meeting of the Board, held on the 21st of December, 1840, present 7 ex-officio and 20 elected Guardians,

The valuator having handed in the valuation books for all the Electoral Divisions, it was proposed that a Committee be appointed to examine the relative valuation of Mr. Fisher and Mr. Kavanagh, so as to ascertain if the valuation is on the same scale, and to report the result to the Guardians at the next meeting.

Resolved that Mr. M'Causland (ex-officio), Mr. C. Gage (ex-officio), Mr. Beresford (ex-officio), Mr. Bruce, Mr. Sampson, Mr. M. Ross, Mr. Colner (ex-officio), Mr. Martin, Mr. John Stevenson, Mr. Ogilvey (ex-officio), Mr. James Stevenson, and Mr. Douglas be the Committee to carry the above into effect, and that they meet on Monday the 28th, and five of such Committee be a quorum.

At a meeting of the Board held on the 18th of January, 1841,

Read the Report of the Committee appointed to examine the valuation, who have directed

mittee.

Circular to land-
lords.

APPENDIX.

*Newton,
Limavady.*Extracts from
Minute Book.

Mr. Fisher to examine the valuation generally, and to be prepared on the 8th of February to lay the same before the Board, having made such corrections therein as may be found necessary by him.

At a meeting of the Board, held the 8th of February, 1841, present 7 *ex-officio*, and 18 elected Guardians.

Mr. Fisher handed in his valuation of the several Electoral Divisions of the Union. Upon examination, it appeared that the valuation of two or three of the divisions was not quite complete.

Ordered,—That the books be made quite complete by Mr. Fisher, and that the Clerk do then issue notices of their exposure for the general inspection of the rate-payers.

Resolved,—That any person objecting to the valuation do send a statement of such objection, in writing, to the Clerk, before the expiration of the time given for the exposure of the valuation; after which the Guardians will determine the course to be adopted in respect of such objection.

Evidence.

*Evidence.*Mr. Fisher,
valuator.

Mr. ARCHIBALD FISHER, appointed Valuator in 1839.

Valued several parishes under the Composition Act; was also engaged in valuations for private persons; is a valuator by profession; holds land, but not within the Union.

Documents fur-
nished.

The only documents furnished him were the private maps of the landlords; did not get the ordnance survey; ascertained the contents from the documents furnished by the landlords and the Tithe Composition applotments. Sometimes there appeared more acres in the Government Survey than on the documents furnished him; and when that was the case, made up the difference by the addition of the roads and rivers; and when that did not account for the difference, distributed it proportionally amongst the occupiers. Was not furnished with the rentals, but inquired of the occupiers the rents paid, and had also the tithe applotments and Griffith's valuation; employed an assistant, Mr. Kavanagh, with the permission of the Board; divided the Union between them; witness valued ten divisions, Straw, Faughinvale, Highlands. Foreglen, Ballykelly, Owenreagh, Feeny, Myroe, Bellerena, and Benone, and Mr. Kavanagh valued the rest.

Compared tithe
applotment, and
Griffith's survey.

Compared the tithe applotments and Griffith's valuation in order to see whether they had gone upon a fair scale; found a great difference between the applotments and Griffith's survey; thought the applotments more correct in stating the qualities of the soil; one of the parishes that he had valued under the Composition Act was within the Union (Myroe and Highlands). In some places within that parish found his valuation under the Composition Act 100% higher upon a single townland than Griffith's. Made separate entries in his field-books of the value of houses, and put down the acreable value of the land according to the distinction of soil.

Ascertained the
rent.

Compared his valuation with the rent, as ascertained by his inquiries; made an entry of the rent in pencil. In most cases the rent was equal to his valuation, but in a great many it was higher. In Faughinvale the rent in a great many cases was above his valuation; for on an average the recent letting are at a fair value, and his valuation was near the rent; but all depends upon the landlord. In Faughinvale found the tithe applotment above the letting value. His valuation was seldom lower than the rent, except in cases of old leases; went as near as he could to a fair letting value, so that a solvent tenant could afford to pay the rent for his farm.

But was not guided
by it unless when
reasonable.

Was not guided however by the rent paid unless he thought it reasonable; was not guided either by Griffith's valuation or by the tithe applotment, for he differed from both. The comparison spoken of was merely for his own satisfaction. The government valuation is considered erroneous, and was not adopted by the Board. It is thought unequal. This was the first place valued, and the government valuers improved as they went on. Went himself over every holding in the divisions valued by him. He and Kavanagh went together at first over three or four townlands, and formed a scale of value; and afterwards Kavanagh went into some parts of his (witness's) divisions, and he into Kavanagh's, to see if the scale was kept up; witness thought Kavanagh went rather higher by about 1s. an acre, and both agreed on a reduction of about that amount in all the divisions valued by him.

Standard adopted.

They went into the best land in Myroe, which is the best land in the Union, except the town parks, and considered what it would produce on an average of five years, according to a rotation of crops, that is, potatoes, oats, wheat, barley, clover and grass; and considered what each crop would cost, and the gross value of it, and ascertained the average cost for five years and the average produce for that time; and the difference between the two formed their estimate of the value of that land. The average cost of labour would be 1*l.* per acre. The cost of seed would be about another 1*l.* per acre.

Gross produce.

The average price of the gross produce would be 4*l.* 10*s.* per acre; made other deductions which he is unable at present to specify, but which brought it to about 1*l.* 7*s.* 6*d.* per acre.

That land formed their standard of comparison, together with the rents paid by those who could pay their rents and live comfortably; and when the landlords looked over their books they thought it a reasonable value. Made the calculation specified above only in one townland.

Mountain lands.

In mountain lands considered what the occupiers could get for the grass of a cow, and how many cows it would graze. In those lands Griffith's valuation was higher than his, though on the entire it is lower.

Arable lands.

In the arable lands they considered if the best land in Myroe was worth so much, what they would be worth, and compared it with the rents paid for other farms by tenants who lived

comfortably. From his youth he has been practised in surveying and valuation, and so has Kavanagh; and both have lived in this county, witness for thirteen or fourteen years, and Kavanagh for twenty years, and both know the different qualities of soil well. Kavanagh is permanent surveyor of Lord Waterford's estates.

Never went up to the rack-rent; considers every rent a rack-rent where a tenant could barely get a subsistence. His estimate of a fair letting value is the rent which a tenant is able to pay regularly as it becomes due, and live comfortably out of the land. His idea of a comfortable living is that a tenant should be able to feed himself and his children upon potatoes, stirabout, and milk once a-day, meat in the middle of the day, or sometimes fish and potatoes, and milk again in the evening. Sometimes the farmers and their wives take tea for breakfast and flummery for supper. A tenant could live in that way upon from twenty to thirty Irish acres of the average arable land in this Union. His valuation is what a tenant could pay for so much land living in the manner described. In the smaller farms, from four to eight or ten acres, where there was a good house on them, the value of that raised the valuation of the entire. In some cases valued the smaller farms by about 3*d.* per acre higher than the large, because there are several who would take them when they would not take a larger place, and they would pay a little more for them. They would be let somewhat higher in proportion, because the people taking them would have other employments, by which they would support themselves; and there is greater demand for the smaller farms. Found that the rents of those farms would be as well paid and be a little higher than those of larger farms, and went a little higher in his valuation in consequence. Did not go to a rack-rent even in them, but was from 3*d.* to 6*d.* an acre over the large farms. That was but in few instances. It was generally the value of the house that made them appear higher than the large farms. The cases in which he went higher were when the farms were near a town, and the occupiers could get work. With those exceptions valued the large and small farms upon the same scale, although the latter would let higher on account of their being small, and greater numbers are looking for them. The competition for the large farms is not as great because they require capital.

The farms here average from 15 to 20 Irish acres. They are generally let on lease. The custom of this country is to let on lease, usually for 21 years. Average size of farms.

The Poor Rate was divided equally between landlord and tenant.

"Landlords' Taxes" was left blank. "Tenants' Taxes" is composed of the county cess; it averaged about 18*s.* to 20*s.* per acre.

"Landlords' Repairs and Insurance" was left blank.

"Tenants' Repairs and Insurance" was filled with a 1*s.* in the pound, upon the net value. "Tenants' other expenses" was left blank. The gross value was also left blank until the Rate shall be declared. In valuing farm-houses, considered what the farm would be worth more to a solvent tenant with the house and buildings on it than if there were none. Put that sum down in his field-books as the value of the houses. Farm houses.

Submitted the valuation to the Board as it was completed, by Electoral Divisions; they distributed them among the Guardians, as they were best acquainted with the neighbourhood.

They chose one or two farms in each division, and compared them with each other, and found them correct; that was on the 7th September, and comprised the divisions mentioned in the Minute Book.

When the whole valuation was completed, they appointed a committee. They considered Mr. Kavanagh's valuation rather higher than his, and they directed witness to look over Mr. Kavanagh's books, and it was then the reduction mentioned by witness took place. The valuation of two Electoral Divisions, Glenshane and Dungiven, is not complete, because he has not got the maps from Mr. Ogilvey, the landlord of those places, to subdivide the value of the entire between the several occupiers.

There was no other interference of the Board but that mentioned above. Mr. Kavanagh holds land within the Union, about 10 acres.

The landlords generally approve of the valuation, and such of the Guardians as are tenants seem to approve of it. Has heard of no complaints: since the reduction made by him there has been no complaint. The Drum, Faughinvale, Glenshane, and Dungiven divisions were those which were principally complained of, that is, by the Guardians; that was before the reduction. The reduction was confined principally to these four; does not remember any reduction in the others valued by Kavanagh. None was made in those valued by witness. The reduction was not an acreable reduction, though it averaged about 1*s.* per acre. They, that is, witness and Kavanagh, went over every tenement in the Faughinvale and Drum divisions, and reduced the amount of the value by what they considered that Kavanagh had exceeded the scale laid down by them. It was from about 1*s.* to 1*s.* 6*d.* in the pound. In the Glenshane and Dungiven Divisions named, the gross amount was about 1*s.* to 1*s.* 6*d.* in the pound. Valuations satisfactory to landlords.

In the Highland Division did not get the maps, and ascertained the contents by the Tithe Applotments, and the county cess, that is, by the applotments for the county cess. Where those and the Tithe Applotments agreed, put down the amount; they differed only in cases of change of ownership, and then took the contents from the county cess.

The Tithe Rent charge he considered payable by the landlord; the net value includes the amount of it. It varies in different parishes; it averages about 2*s.* in the pound, through the entire Union. Tithe rent charge.

It is the custom of this country for a tenant to get money for his interest, though but holding from year to year. A tenant leaving would get 5*l.* or 6*l.* per acre for his interest, and sometimes more. Tenant's interest.

Did not take that into account in his valuation; made no estimate of any return for capital or interest of money. Tenants take land to live by it, and valued accordingly.

evidence.

Definition of rack-
rent; and of fair
letting value.

APPENDIX.

Newtown,
Limavady.

Mr. JAMES BARTHOLOMEW KAVANAGH, examined—

Mr. Cavanagh.

Is permanent Valuator on Lord Waterford's Estate.

Standard adopted.

The greater part of that lies within the Union. Has been upwards of twenty years in this country and during that time has been principally engaged in valuations; holds land himself, about 40 or 50 acres; was engaged as assistant to Mr. Fisher in his valuation; valued nine Electoral Divisions, including the towns of Newtown and Dungiven.

Mountain land.

Took the best land in Myroe in order to form a standard; took the scale of prices furnished to the Government valuers, and compared it with the present prices, and found that the prices were higher, then assuming the correctness of the Government survey, which valued that land at 24s., he increased in proportion to the increase in the prices, which made the value of that land about 27s. They then took a couple of Mountain Divisions, and took a Townland or two in each, and compared each other's valuations with those, and agreed upon a scale of value for the mountain land; formed his scale of that in the same manner, by reference to the Government survey and the present scale of prices; compared the present prices, that is, what he would consider reasonable remuneration for a tenant at present prices with the Government valuation and the present letting; knew what the Government valuers had done upon a scale furnished to them, and finding the present prices higher, valued higher in consequence. Ascertained the rents in several cases, when he knew there had been underlettings. Received no instructions from the Guardians, but referred to the Act, and finding that they were directed by that to take the rent at which the tenement would let at from year to year, the tenant keeping the same in repair, went higher than he thinks the valuers did in other Unions. Understood by the 64th section, "A reasonable rent," such as a good common-sense man would offer, and such as they conceived he would be able to pay. Adopted the same scale as if valuing for Lord Waterford, where no lease was to be given: his Lordship gives no lease on small farms. Lord Waterford and Mr. Ogilvey of Dungiven, and the Fishmongers' Company, are the principal proprietors in the Union; and there is no lease on the Dungiven estate. There are a few on the Fishmongers' estate.

Ascertained the rents.

His scale was higher than he would have gone for Lord Waterford when he is giving a lease; he seldom gives a lease except for the purpose of registry, and makes the rent lower in consequence; such rents would not be a fair criterion of the letting value, or of the real value:—means the same by the two expressions.

Reasonable remuneration for tenants; one-fourth of produce.
On inferior soils one-third.

Considers that in arable farms of a good quality a fourth of the gross produce would be reasonable remuneration for a tenant.

Allowed the occupier an interest in the land.

In inferior soils, does not think that sufficient, because the labour is greater, the seed the same, and the produce less; thinks that a third should be sought for by the tenant; about the same proportion should go to the landlord in both cases—that is, a fourth; that formed one of the ingredients in his scale of value, the market price of the land formed another; did not, however, go to the rack-rent; but when he found that good land would fetch 32s. per statute acre, and he put 27s. or 28s. on it, conceived he was acting fairly by the occupier in giving him an interest in it; and such was his valuation. Thinks that in prime land his valuation was 5s. per acre below the highest or upset price; went so low in valuing arable land as 10s., and thinks he was 3s. below the highest price; at the intermediate quantities was about 25 per cent. below the highest price; the inquiries made about the rents were merely in a few instances, and made no entry of them; generally knew the rents himself.

Where land held at will, rent and valuation nearly the same.

Upon Lord Waterford's estate, when the land is held at will, the rents and the valuation are nearly the same; when there is a registry there is a difference; in fact, deducting the value of the house and the tenant's improvements, such as orchards, &c., which liberal landlords do not take advantage of, from the valuation, it is nearly the same as the rents on the estates of large proprietors; upon the estates of small proprietors the valuation is rather under their lettings; the "market price" which he speaks of is not the rent at which large proprietors let their land: the smaller class of farms, of from five to eight acres, would let higher on account of the density of the population, and the consequent greater competition for them. In his valuation of those farms, made very little difference in consequence of the competition; but the addition of the value of the house, made the acreable value of those farms greater in proportion, and that made the principal difference. Valued the farm-houses at a fair yearly letting as farm-houses; considered them not as separate tenements, but as houses to be occupied along with the farm. It would be very comfortable farm-houses that he would put more than 40s. on, that is, thatched houses; the highest was about 50s., and went so low as 15s.; conceived they added that much to the value of the farm, and thought himself bound to put it on. Some of the best class of farm-houses went as high as 8l.

Made little allowance for competition.

Farm houses.

Towns and town parks.

In the towns of Newtown and Dungiven, and the town parks adjoining, assumed a different scale of value; first as to the houses, inquired into the letting value of every one, that is, the rent paid by the occupiers where they were at will, and in most cases was rather under the letting value; thinks he was about 10l. or 15l. per cent. under; thinks the houses would let right well at his valuation, that is, well for the tenant. As to the town parks, did not adopt any scale of prices or fixed standard, because these have a peculiar value; but thinks that his valuation is about 20l. per cent. under the upset letting.

Made separate entries in his rough field-books of the value of the houses; but not in the books furnished to the Guardians. Before they gave in their valuations, he and Fisher went over their valuations, and witness thought that he had gone higher than Fisher in four divisions, Newtown, Faughinvale, Drum, and Dungiven, and both agreed that it was better to lower witness's valuation than to raise Fisher's; informed the guardians of his opinions; they

thought at first there was no difference, but afterwards agreed with him. Fisher and he then made a reduction of about 1s. or 1s. 3d. in the pound on those four divisions, and thinks they are now on an uniform scale. The valuation has not been adopted by the Board yet.

There is a great deal of church land here, and the occupiers have only got 19 years. On Lord Waterford's estate the usual term is 21 years and a life, concurrent.

For the smaller class of tenements—from five to ten acres—leases are seldom granted; the great desire is to increase the farms.

APPENDIX.

Newtown
Limavady.

JOHN GIVEN, Esq., ex-officio Guardian, Under Agent for Lord Waterford's estates in this County, examined.

John Given, Esq.,
ex-officio Guardian.

A great part of his lordship's estate lies within this Union. Is well acquainted with the letting value of land in this county. Has looked into the valuation; thinks it is rather higher than the rent paid on Lord Waterford's estates; but thinks that the tithe and the value of the houses would account for the difference. In letting the farm, the house is not taken into account. The valuation of the freeholders upon Lord Waterford's estates was higher than their rents; their rents are lower than those of the other tenants; their rents or those on the estate generally would not be on a criterion of the letting value of land in this district, as they are lower than those on the other estates in the county. When they came to let farms they considered the registry, and were disposed to keep up an interest in the county. Cannot form an opinion as to the proportion between the rents and rating on other estates. The valuation is approved of by the Guardians who are proprietors: cannot speak as to the opinions of the tenants.

Valuation higher
than rent on Lord
Waterford's estate.

In letting farms
considered the
registry.

The Guardians did not select Mr. Fisher solely because of his being the lowest tender, though that, of course, had its weight. Thinks the valuation here is higher than in Derry or Coleraine, but had no opportunity of judging of those; speaks merely from what he has heard. Does not know whether the Government valuation is considered higher here than in other places, but it is certainly considered unequal. Knows one townland in a mountain district where the government valuation is higher than Lord Waterford's letting on a recent lease, and another townland where the tenant would get a considerable sum for his interest, and the government valuation is lower than the rent paid on an old lease.

Valuation higher
than in Derry or
Coleraine.

The Board never sanctioned Mr. Fisher's employment of an assistant; they knew of his doing so, and did not express any disapprobation of it.

The Board have substantially adopted the valuation, and the only reason for not submitting it to the inspection of the rate payers is, that two divisions are not yet subdivided; cannot say what proportion of the tenements are held by lease; but certainly the majority are not held by lease. Thinks the prevalent disposition is not to grant a lease; landlords not anxious to create a parliamentary interest are not disposed to grant leases; does not think there is any anxiety in the tenantry, on Lord Waterford's estate, to get a lease; their interest would sell for as much without as with a lease.

Indisposition to
grant leases.
Tenants indifferent
about it; their in-
terest as valuable
without.

On estates where the landlords are disposed to make the most of them, the rents of smaller farms would probably be raised, but on large estates, it would not be looked to; thinks it probable that leases exist in a greater proportion among large holdings than small; but cannot speak from his own knowledge.

DAVID CATHER, Esq., ex-officio Guardian.

David Cather, Esq.,
ex-officio Guardian.

Has looked over several of the valuation-books, and is acquainted with the letting value of land; has land in his own occupation, in two of the divisions, and is owner of land in another; thinks the valuation rather higher than the rents; holds land from the Fishmongers' Company, and the valuation is higher than the rent paid by him to the Company. In Faughinvale division, the rents are nearly on a level with the valuation; thinks the valuation of his land held from the Company higher than the rest of the valuation; with that exception thinks the Poor Law valuation is nearly on a level; thinks the rents on Lord Waterford's estates are lower than those on the other lands in the Union, except the Fishmongers' Company. Does not know whether they are lower than the Fishmongers'. Compared the valuation of their estates with their rental, and they are nearly equal; and understands from the agent of the Company that there is very little difference between the two.

Valuation higher
than rent on estates
of Fishmongers'
Company.

The rents of the Fishmongers' estate are lower than those of other proprietors, but not lower certainly than Lord Waterford's.

The tenants, however, think them high enough, but witness thinks them fair rents between landlord and tenant. They were let about twenty years since. On the Fishmongers' estate almost all the tenants hold by lease—the larger farms for a life, and the smaller ones for twenty-one years; there were a good many of the tenants registered on that estate in 1832; but they have not renewed, though they could have done so. It was not in consequence of any objections on the part of the Company, but the tenants thought it useless, as there was no chance of ejecting the present members. On the Dungiven estate there are but few leases. There were fourteen or fifteen townlands that fell out of lease at the late Mr. Ogilvey's death, and they were not renewed.

Estates of Fish-
mongers' Company.

In the town of Newtown, which is held from Mr. Ogilvey, by old leases for lives, renewable for ever, scarcely one occupier out of three has a lease from the intermediate landlord; did not hear any objection made by such of the Guardians as are tenants, but the valuation has not yet been submitted to the inspection of the rate-payers.

APPENDIX.

Mr. JOHN CANNING, elected Guardian for Keady Electoral Division.

Newtown
Limavady.

Mr. Canning,
elected Guardian.

Looked over the valuation of his own division : thinks the valuation of that very high ; it is higher than the rents ; pays 40*l.* himself, and they have valued him at 62*l.* 10*s.*, though the rent is as high as he can give : holds under Lord Waterford. Compared the valuation of other holdings with the rents, and it is higher than the rents ; and those are recent lettings, and the land could not be let higher. All the Keady division but two or three townlands belongs to Lord Waterford. The cases in which he compared the valuation were on Lord Waterford's estate ; they are held by lease, but his own holding is not under lease ; registered a freehold out of Newtown.

Guardians opposed
to a valuation above
the rent.

All the elected Guardians that he spoke to thought it too high a valuation ; they think the valuation ought not to go higher than the rent ; the rent would be a fair valuation. Looked over most of the divisions, they are all on an even scale, but too high.

The large farms are mostly all held by lease, but very few leases exist in farms under ten acres. The landlords do not give leases where the rent is under 5*l.*

In general, the farms held by lease are from twenty to thirty acres.

There is no objection on Lord Waterford's part to give leases when the farm is large enough to allow the tenant to register out of it ; he wishes them to register. Mr. M'Causland, who owns some townlands in Keady, has not granted leases for some time, and is not going to give any more ; cannot speak as to other landlords.

Lord Waterford sets his land rather lower than others ; he is not disposed to give leases on small holdings ; he generally encourages holders of small farms to sell one to another to make a good large farm.

Mr. Hunter,
elected Guardian.
Houses valued
high ; as high as
the rents.

Mr. JOHN HUNTER, elected Guardian for Newtown Limavady Electoral Division.

Holds lands within the Union.

Has looked over the valuation of Newtown ; thinks the houses were all valued high—as high as the rents ; thinks it ought to be a little lower because an allowance should be made for repairs ; has not looked at the valuation of the land. The rents he speaks of are those paid by tenants from year to year ; the principal part of the houses are held from year to year. In general the landlord repairs those houses, though in many instances the tenant repairs them. The valuation is as high as the rents paid, even by those who keep the houses in repair. Those rents are not lower than the others, because where the house is in a good situation the landlord pays very little attention to the repairs. The best houses in the town are held by leases for lives ; thinks 8*l.* per cent. ought to be allowed for repairs, and that the valuation is too high by that amount ; does not know what the other inhabitants of the town think of the valuation, but thinks there will be a good many complaints when the books are opened for inspection.

LONDONDERRY UNION.

*Extracts from Minute Book of Board of Guardians.*Extracts from
Minute Book.

At a meeting held on the 8th of April, 1839—present, 7 ex-officio and 19 elected guardians—

Resolved, That the following Committee be a Committee to report as soon as practicable, the best mode of ascertaining on the most moderate terms the net annual value of the several hereditaments to be rated under the Poor Law, in conformity to the third section of the Instructions of the Commissioners.

Valuation Com-
mittee.

[Here follow the names of the Committee, of which the chairman and vice-chairman of the Board were afterwards made members ex-officio.]

At a meeting of the Board held on the 1st of July, 1839—present, 5 ex-officio guardians, 13 elected,—

The Report of the Valuation Committee (No. 4) being read, a lengthened discussion arose. The Assistant-Commissioner entered into an explanation, and pointed out what had been done in other Unions more advanced: when the following resolution was moved by Sir George Hill, Bart., and seconded by Samuel M'Clintock, Esq.:—

Report of Com-
mittee presented.

“That advertisements be put in the different newspapers for tenders to value by townlands closely all property rateable in the Londonderry Union, for the purposes of Poor Law taxation.”

An amendment was put and passed without a division.

Resolved, That the Report (No. 4) of the Valuation Committee be adopted but that it is the opinion of the Board, that to adapt the Government valuation to the purposes of the Poor Law, a mere valuation, and not a survey, of six townlands will be sufficient.

Report adopted.

Resolved, That the Report of the Valuation Committee, together with the above resolution, be submitted for the approval of the Commissioners.

REPORT of the Committee referred to in the above Extract.

After the best consideration that your Committee can give the subject, there appears to them but two ways of proceeding; namely, either by a correct valuation of each holding made on a close survey, or by adopting the Ordnance survey as a basis for a new valuation.

Report of Valuation
Committee.

The first of these modes of proceeding would certainly be the most correct; but as it would cost a very large sum of money, your Committee hesitate to recommend it to the Board.

The second mode we have mentioned could be accomplished at much less expense, and, we believe, with sufficient correctness; in which opinion we are confirmed by the views of professional men with whom we consulted on the subject.

Should this plan be adopted, it will be necessary to raise the Ordnance valuation to the net value by a close survey of at least one townland in each electoral division, from which the percentage necessary to raise the Ordnance valuation through the whole Union could be determined.

The Ordnance value being thus raised to the true, the value of each townland would then be ascertained; after which it would be necessary to fix the value of each holding, the name, &c.; and this your Committee think might be done by the employment of a properly qualified person.

Your Committee are of opinion that a new and separate valuation of the houses in rural districts is necessary, in fact, a valuation of the houses, save such as are used exclusively for public purposes, and consequently exempted by law from taxation, the Ordnance survey being useless as to the value of houses.

The parties employed to make this valuation should also value the other objects of taxation under the Act, such as bog from which turf is sold, fisheries, &c.

It is very difficult to ascertain exactly the cost of either of the modes of valuation referred to in this Report, but your Committee are informed that the first, or an entirely new valuation of the whole Union would cost about 1000*l.*, and a new valuation upon the basis of the Ordnance survey about 600*l.*

The foregoing estimates have referred only to the valuation of the houses and land of the country parts of the Union, and do not include the expense of valuing other objects of taxation.

The valuation of the City of Derry your Committee have reason to believe would be attended with very little trouble or expense, in consequence of the existence of recent and correct valuations for the purposes of local taxation.

In conclusion your Committee recommend that the plan of valuation, as now explained by them, be that adopted by the Board, and that advertisements be forthwith issued for parties to make tenders for carrying the valuation into effect on said principle.

At a meeting of the Board, held on the 8th July, 1839—present, 6 ex-officio and 10 elected Guardians—read the Poor Law Commissioners' communications on valuation and rating (Nos. 19 and 20 A), informing the Guardians on valuation and rating—a lengthened discussion ensued on the practicability of arriving at a fair and equitable ratio, by which the Government valuation should be raised, when it was

to value on the
basis of the Govern-
ment valuation.

Appointment of
Messrs. Lithgow
and Thompson as
Valuators.

Documents ordered
for the Valuators.

Second Report of
Valuation Com-
mittee adopted.

Second Report.

Resolved, That advertisements be issued for persons to value the townlands of the Union upon the basis of the Government survey; and that in order to effect this the valuator be required to value as many townlands as are necessary to afford a correct valuation (six at least); and that upon this valuation should be founded the general valuation of the Union; and that the Valuation Committee be authorised to issue advertisements forthwith to that effect.

At a meeting of the Board held on the 21st of July, 1839—present, 6 ex-officio and 11 elected Guardians—the method of proceeding at the election of a valuator was then brought before the Board, when the following resolution was agreed to. [Here follows a resolution respecting the mode of electing a valuator.]

The tenders were then opened and read. [*The tender of Messrs. Lithgow and Thompson appeared to be the lowest.*]

Resolved unanimously,—That the terms proposed by Messrs. Lithgow and Thompson being 280*l.* for completing the valuation of the Union, according to the provisions of the Act and the instructions of the Commissioners be accepted; and that the Valuation Committee do arrange with Messrs. Lithgow and Thompson as soon as possible for completing the articles of agreement and bond for the due performance of the work according to the forms prescribed by the Poor Law Commissioners.

Resolved, That the Valuation Committee do take steps for procuring, at the least possible expense, a copy of the field-books used in making Mr. Griffiths's county valuation, copies of the Ordnance maps, with the lines marked to which these books refer, and whatever forms and books are necessary for the performance of the work by the Union valuator.

At a meeting of the Board, held on the 1st of August, 1839—present, 4 ex-officio and 8 elected Guardians—read the Report of the Valuation Committee, No. 5, which was adopted unanimously.

REPORT, No. 5.

(After some recommendations respecting the amount to be paid to the valutors for re-adjusting their valuation according to the changes of property, the Report proceeds):—

“Your Committee deem it expedient that the valutors should be furnished with copies of Mr. Griffiths's valuation, and with the townland maps, marked with the red lines, denoting the qualities of each portion of land, and copies of the field-books corresponding thereto. Secondly, with lists of occupiers from the tithe valuation, and the contents of their occupations. Thirdly, with blank forms of the schedule of valuation, together with the field-books approved of by the Poor Law Commissioners; and, fourthly, with such other information and documents as may be obtained from the landlords, which may tend to assist in determining the equitable valuation designed by law.”

[*Here follow recommendations as to the best mode of procuring the several documents.*]

Your Committee have ascertained that they may be procured upon reasonable terms, but the arrangement is not yet sufficiently complete.

With respect to the information last adverted to your Committee desire to express their decided opinion that upon the assistance afforded by the landlords and other persons interested depends the success of the work now about to be undertaken. It is a point upon which all are interested, because upon the completion of an equitable valuation the cheerful payment of the amount levied upon each individual will be secured; appeals will be avoided, and all additional expense thereby guarded against. A circular well adapted to secure the cordial co-operation so desirable, and pointing out the information required, having been laid before us by the Assistant-Commissioner, we beg leave to submit it to your consideration, and to recommend that the following course be adopted:—

That a Valuation Committee be appointed, with full powers to superintend the progress of the valuation, and report to the Board from time to time, as they see fit.

That the valuator be required to proceed in the valuation by electoral divisions, and give in the same to the Committee according as they are completed; that previous to entering upon an electoral division the clerk should issue the circular above recommended to all persons interested, and that when the valuation of an electoral division is completed, the Committee, acting as a Committee of Division, should take into consideration such complaints as are made, and determine upon those that should be sent to your Board to be considered finally in the presence of the valutors.

We have communicated this plan of proceeding to Messrs. Lithgow and Thompson and they have expressed themselves perfectly satisfied with it, and are ready to undertake the duty in the manner prescribed by the Board.

(Signed)

J. SCOTT.

Valuation of Seven
Townlands present-
ed to the Board.

At a meeting of the Board, held on the 26th of September, 1839, the new valuation of seven townlands was laid before the Board, read, and compared with Mr. Griffiths's field-books. The valutors requested permission from the Board to put the same per-centage of rise in value on townlands of similar character to those now submitted by them.

Resolved, That the Board will not in any way interfere with the valutors in fixing a per-centage by which they should raise Griffiths's valuation.

Valuation laid
before the Board.

At a meeting of the Board, held on the 1st of July, 1840, Mr. Thompson laid the valuation of the entire Union before the Board.

At a meeting of their Board, held on the 12th of August, 1840—present, the Assistant-Commissioners and 17 Guardians:—

Consideration of
objections.

Resolved, That the Board do now proceed to consider the objections to the valuation; and that the clerk do attend at the court-house, from 10 till 1 o'clock each Wednesday

APPENDIX.

Londonderry.

—
 Extracts from
 Minute Book.
 Valuation of
 Machinery in
 Manufactories.

and Saturday, to exhibit the valuation books, and receive notices of objections, till the 26th instant: and after that day the Board will not hear any further objections.

Ordered, That the clerk be directed to the Poor Law Commissioners, requesting them to inform the Board, for the instruction of the valutors, whether mills, distilleries, and such like manufactories, are to be valued as they are found by the valutors, with the machinery therein, or merely taken at the value of the building, without such machinery, with the facility for such trade from the flow of water, &c., to the premises.

Resolved, That the Board do meet on each Wednesday and Saturday, at 12 o'clock, for considering objections to the valuation; and the usual notices for meetings be dispensed with during such meetings.

Adjourned meeting, held the 19th of August, 1840—present, 18 Guardians—the Board considered objections from the country parts of the Union this day.

Adjourned meeting, held on the 22nd of August, 1840—present, the Assistant-Commissioner and 18 Guardians:—

The Board, having discussed the valuation of the city of Derry, resolved, That the net value, as filled up by the valuator, be filled up as it purports to be on the face of the valuation books; and that the Board will correct the same according to the individual cases brought before them; provided such objections are furnished to their clerk, in writing, on or before Wednesday next, at 1 o'clock.

Read an objection from Sir R. A. Ferguson, relative to the manner in which the columns of the rate-books are filled up; viz., that the instructions of the Committee of Valuation, of the 10th of September, which directed the valutors to place the allowance for repairs and insurance in the column for tenants' repairs and insurance, and to leave that blank, may, if implicitly followed, occasion injury to individuals in reference to the municipal franchise.

Resolved, That the Board will receive objections, on the ground that the repairs and insurance have been placed in the wrong column, that may be lodged with the clerk prior to the 1st of September.

Resolved, That notice be given in the Derry Journal, that, on and after Wednesday next, the Board will sit from day to day, and decide the objections to the valuation, in the order they are entered in the books.

Adjourned meeting, on Wednesday, the 26th of August, 1840—present, the Assistant-Commissioners and 23 Guardians:—

The valuation of a flax-mill having been objected to, the Board fully discussed the principle of rating moveable machinery, and examined evidence as to what parts of flax-mills might be considered moveable, when it appeared that a reduction of 25l. per cent. would be an equivalent for the machinery not subject to be rated.

Resolved, on a division of 15 to 2, That a like reduction of 25l. per cent. be made on the valuation of all flax-mills not appealed against.

Resolved, for the reason stated above, That a like per centage be taken off all corn-mills not appealed against.

The agent of Lesley Alexander, Esq., having objected to the valuation of certain townlands on his estate, as being too high, evidence was examined regarding the valuation of Artnagalvin, in Waterside division:—

Resolved, That it be postponed till Monday.

At an adjourned meeting, held on the 29th of August, 1840—present, the Assistant-Commissioner and 7 Guardians—

An appeal having been under the consideration of the Board, from Mr. N. Watt, against the valuation of his distillery, and it appearing that a portion of the moveable machinery was taken into account when the valuation was made,—

Resolved, That this valuation be reduced 25l. per cent., as an equivalent for the moveable machinery included in the valuation of those premises: and resolved, That a similar reduction be made on all distilleries in the Union not appealed against.

At an adjourned meeting, held on Saturday, the 5th of September, 1840—present the Assistant-Commissioner and 11 Guardians,—

The valuation of the townland of Artnagalvin, brought under the consideration of the Board by Mr. Knox, the agent of Lesley Alexander, Esq., who brought forward the evidence of Mr. R. H. Nolan, surveyor and valuator, and of A. Symth, Esq., the former agent of the estate. This evidence went to prove that the entire value of land and houses should not exceed 309l. 14s. Reduced to 309l. 14s. The valuation of the other townlands appealed against by Mr. Knox was then confirmed.

Adjourned meeting, held on Monday, the 7th of September, 1840—present, 7 Guardians. Read over the list of objections to the valuation, and decided on the remaining ones.

At a meeting of the Board, held on the 14th of October, 1840—present, the Assistant-Commissioner and 12 Guardians:—

Resolved, That a rate of 6d. in the pound on the valuation of this Union be now made, and the rate-book signed.

At a meeting of the Board, held on the 23rd of January, 1841—present, the Assistant-Commissioner and 13 Guardians—Mr. Lithgow was called in and informed that there were great errors both in the valuation and in the names; and the Guardians, having considered that these should be amended before he is paid in full, and Mr. Lithgow having stated his readiness to give every assistance in rendering it complete:—

Ordered, that a notice be given that the rate-payers who may think themselves aggrieved will be heard by the valutors and collectors, at the workhouse, on days to be fixed as soon as the collector's books are received.

At a meeting of the Board, held on the 6th March, 1841—present, 14 Guardians—a

tion Committee.
Selection of Town-
lands to be valued.

At a meeting of the Valuation Committee, held on the 10th August, 1839—present, Sir R. A. Ferguson, and 3 other members of the Committee—

The valuator, Messrs. Lithgow and Thompson, attended the Committee; and the following townlands were chosen by the Committee, out of which the Committee are to select 6 for re-valuation.

[Here follows a list of 17 townlands.]

After the valuator have completed the valuation of 6 of the above townlands, they are directed to lay the same before the Valuation Committee.

That the valuation of the town be proceeded with as far as the Net Annual Value Column.

(Signed) R. A. FERGUSON.

At a meeting of the Valuation Committee, held on the 23rd September, 1839—present, 2 members of the Committee—

The valuator handed in a new valuation upon Mr. Griffiths's field-books and maps of 7 townlands, for consideration of the Committee.

At a meeting of the Valuation Committee, held after the meeting of the Board of Guardians, on the 18th December, 1839—present, Mr. Assistant-Commissioner and 3 members of the Committee—

Ordered, That the clerk be directed to post notices that he will show the valuation of the several electoral divisions at the mayor's private office, from 12 till 2 o'clock on Wednesdays and Saturdays in each week, when he will receive written objections from the rate-payers, and submit them to the Valuation Committee for their decision.

Ordered, That the electoral divisions of the city and suburbs, the waterside, and the Upper and Lower Liberties, be so submitted during 4 weeks in the month of January.

(Signed) R. A. FERGUSON.

Objections to the
Valuation.

At a meeting of the Valuation Committee, held on the 3rd February, 1840, for the purpose of hearing objections to the valuation of the city and suburbs, the Upper and Lower Liberties, and the waterside electoral divisions—present, 5 members of the Committee.

No. 1. House and office.

To be looked over by the valuator, with a view of reporting if they should be reduced.

No. 2. House.

To be looked over by the valuator, with the view of reporting if it should be reduced.

No. 3. House.

To be looked by the valuator, with the view of lowering the value.

Occupiers in Tarn-
namore.

No. 4. That permission be given to the occupiers in Tarnnamore to appoint two men to subdivide the land; such subdivision to be subject to the approval of Messrs. Lithgow and Thompson; or if they procure a close survey, the valuator will be directed to view the separate valuations.

No. 5. Diocesan School.

To be referred to the Poor Law Commissioners.

No. 6. House and demesne.

That the valuator be requested to re-value the following properties in Ballynuseloge, viz., Broom Hall, Brook Hall, the Farm, Thornhill, on the Government maps, and to deduct their values from the rest of the townland.

Gas Company.

No. 7. Buildings and works.

That the valuation of the Gas Company's works be left over for the present; and that Mr. Clements be requested to give it his attention when in Derry.

(Signed) P. GILMORE.

Instructions to
Valuator as to
filling Columns of
Rate-book in the
City.

At a meeting of the Valuation Committee, on the 11th September, 1839—present, the Assistant-Commissioner, and 5 members of the Committee—

Ordered, That the valuator be directed to fill the columns of the rate-book for the city and suburbs as follows:—

Nos. 8 and 9. Divide a poor-rate of 10*d.* in the pound equally between the landlord and the tenant.

No. 10. Blank.

No. 11. Charge the tenant with county-cess at 2*s.* 6*d.* in the pound on all property above 5*l.* value; with police-tax, not below 10*l.*, at 1*s.* in the pound; with water-tax, at 6*d.* in the pound.

No. 12. Blank.

No. 13. Tenants' repairs, 2*s.* per pound on the net annual value; insurance, ten times the net annual value, to be taken as the cost in calculating the insurance; dwelling-houses to be insured at 4*s.* per 100*l.*; stores, 6*s.* ditto; corn-mills and distilleries, 15*s.* 0*d.* per ditto; spinning-mills, 20*s.* per ditto.

Nos. 14 and 15. Blank.

(Signed) R. A. FERGUSON.

Valuation Committee.
Their proceedings.

Mode of settling
Objections to the
Valuation.

Was ex-officio a member of the Committee of Valuation.

The Police Committee in the city are chosen by the occupiers of houses in the city, subject to the tax, and they again appoint applotters to value the houses, and distribute proportionally the sum necessary for the expenses of the force. That Committee is elected annually, and there is an annual valuation, with an appeal to the Committee.

An impression existed among the Board that that was a high valuation, because, being limited to a per-centage to be levied, and their expenses being nearly equal to the amount which they are authorised to levy, the valuation was higher in consequence.

The county-cess applotters are chosen by the rate-payers at a public meeting after each assizes. They include in such valuation houses at 5%. There is very little difference between the two, but the county-cess is rather lower. The Poor Law valuation was principally founded upon the police valuation as a guide; there is very little difference between the two.

The Board selected Messrs. Lithgow and Thompson because they were thought as competent as the other candidates, and their tender was the lowest. Does not think any instructions were given to the valuers except those as to filling up the columns of the rate-book. Compared their valuation of the rural districts with some townlands held under himself, and thinks they had valued those at a fair value, but thinks they valued the land at this side of the river adjoining the city under the letting value; that includes a circle of nearly a mile round the city, land used as town parks. Has property about three miles from the city, and thinks they had gone up to the fair letting value. These are let on lease, and they are higher than the rents; but those are not a fair criterion, having been let on lease some years ago. Thinks that on lands recently let they have gone up to the rent, but knows an estate of Mr. Ferguson, about five miles from Derry in the county of Donegal, which has been let on lease for about 1550%, and the valuation is about 6% or 7% per cent under the rent, and knows that the electoral division of Burt has been rated by the valuers considerably below the sum at which it was let at lease a few years ago. The farms in that division are large, and sell at a premium usually of from 8 to 10 years' purchase. The addition of the houses in the country should, in his opinion, bring the valuation above the rents, because the landlord does not take the house into account. An impression existed among the Board that the value of the entire farm should not go beyond the fair letting value of the farm, and that the additional charge should be made for the house in any case where the house was not better than was necessary for the farm.

On the 5th Sept. 1840, an objection was made by the agent of Lesley Alexander, Esq., against the valuation of the townland of Artnagalvin, the evidence of Mr. Nolan, surveyor and valuator, and J. Acheson Smith, Esq., the former agent of the estate, went to prove that the entire value of land and houses should not exceed 309% 14s., and it was reduced to that amount. In that instance the Board acted on that impression, contrary to the evidence of their own valuator, which was taken at considerable length.

The Board thought that the Government valuation was unequal; that it had gone too high upon the mountain lands, and too low upon the good lands: but they thought that by ascertaining in a few instances what per-centage should be added to the Government valuation, an entirely new valuation could be dispensed with; and for the purpose of trying that they selected seven townlands in order to see what the per-centage should be; but upon examination they found it vary so much that they declined to authorise the valuers to put on any per-centage. They in fact adopted the survey and rejected the valuation.

A Valuation Committee was appointed, and as each electoral division was valued it was directed to be referred to the Committee and the Guardians of that division; the valuations of the city and suburbs, and three adjoining divisions, were submitted to the inspection of the rate-payers; the objections were received by the Committee, and they directed the valuers to reconsider those cases; but, after those four divisions were so dealt with, the system was abandoned because very few objections were made. The Committee then did not examine the valuations of the other electoral divisions: it was then submitted, when completed, to the inspection of the rate-payers. The Board sat at first for two days in the week, and latterly from day to day, to hear appeals. There were a good many objections made, chiefly, as to the valuation of houses in the city and in the country, to the subdivision of the amount on the different holdings within the separate townlands. There were a few objections as to the value; there were a good many objections as to the houses in town. They examined the valuator, compared the other valuations, and heard evidence from the party objecting; reduced the valuation in a good many instances. In the cases of complaints as to the subdivision, if the parties objecting thought they could make a better subdivision, the Board allowed them to do so, provided they satisfied the valuers as to its correctness, and then if the valuers thought it correct the Board approved of it. The meetings which the valuers were directed to hold in the different electoral divisions referred to the new rate. The Board had agreed with the valuers for the correction of the valuation from time to time; and it was to remedy errors in the first those meetings were held.

Comparison
between them and
the Poor Law
Valuation.

The Board referred the question as to the valuation of flax and corn mills and distilleries to the Commissioners, and on receiving their answer reduced the original valuation by 25 $\frac{1}{2}$ per cent. That was the only alteration made in the valuation except the changes made on the hearing of the objections.

In this Union one-half, or perhaps three-fourths, of the land is held by lease, and the leases are generally for 21 or 31 years. The preference in this Union on the part of the landlords and tenants is to grant new leases when the old expire. The proportion of leases is greater on the large farms of from 40 to 50 acres; the landlords are not disposed to grant leases of farms of 5 or 10 acres.

The Committee gave general directions to the valuers to place the allowance for repairs and insurance in the columns for tenants' repairs and insurance, without making inquiry whether the house was held by lease or not, in order to save them time on a matter which then appeared immaterial. The Municipal Bill passed in the mean time, and fearing that it might occasion injury to the occupiers of houses valued at 9 $\frac{1}{2}$ l., he brought it before the Board, and they resolved on hearing appeals from those who might consider themselves injured in that respect, but there were very few, if any.

There was no difference of opinion between landlords and tenants on the Board about the valuation. There is some impression among the people in the city that the valuation of it was higher in proportion than the valuation of the county. That did not arise from any feeling that the valuation had been made higher for any political purpose; thought himself that it was too high, but the Board resolved that it was not too high, without a division; conceived that it had gone too near the police valuation.

MESSRS. JOHN LITHGOW and WILLIAM THOMPSON, appointed valuers of the entire Union on the 26th July, 1839.

Mr. Lithgow is a valuator by profession; was previously engaged in valuation. Has been in the employment of the Marquis of Donegal, and is still in his employment as valuator. Valued 4 parishes under the Composition Act; none of those parishes was in the Union. Was under-agent to Lord Donegal for several years. Always valued the farms when the tenants wanted to take new leases. Still acts as valuator on Lord Donegal's estate.

Mr. Thompson was previously engaged in valuing under the Tithe Composition Act. Valued the parish of Killea, in this Union, jointly with another. There was very little difference between his valuation of Killea under the Composition and the valuation of it under the Poor Law: compared both, and thinks the last was higher, but is not sure. The former was made on a close survey; the latter (the Poor Law valuation) upon the Government maps. There was no other difference.

Mr. Lithgow holds land within the Union, nearly 100 statute acres. Mr. Thompson holds a large farm of about 130 acres, 4 miles from Derry. Each valued the other's farm.

Understood by the Resolution of the Board of the 8th July, 1839, nothing more than that they were to take the quantities and the qualities of the soil from the Ordnance maps. Did not understand that they were to take the values of the townlands from Griffith's valuation. Think the meaning of that resolution was, that whatever per-centage the valuers increased Griffith's valuation by, they were to increase every other townland in like proportion. Valued 8 townlands: that valuation was laid before the Board, and they found it would not be right to put the same per-centage on all the townlands. The valuation of those 8 townlands differed from Griffith's in various amounts, from 7 $\frac{1}{2}$ to 20 per cent. Informed the Board, then, that they would rather make a new valuation of the Union.

The Board gave no directions as to the principle of valuation. They were furnished with the Ordnance maps; and Mr. Clements, the Assistant-Commissioner, got the red lines put on, in order to show the different qualities of the soil: were furnished, also, with the Tithe Applotment Books. Took the quantities of the holdings from those, but did not regard them as to value. They were not very correct, even as to quantities,—there had been so many changes since. The farmers themselves generally were able to put them to rights. Think the statements of contents given by the occupiers were generally correct: the result agreed with the Ordnance maps. Were not furnished with the rentals: any information from the landlord was merely respecting the contents of the different holdings. Sometimes inquired about the rent, that is, in the city, but they were very few, and were never guided by the rents paid: whatever they thought the house worth they would put on it. Cannot state whether the rents are in general higher or lower than their valuation. They always went together: began with the city; generally went into the halls of the houses, and into the yards, to see what extent they had to the rear, and what kind of offices they had: made no further inspection. Never measured the houses, nor considered the time they had been built; judged from the appearance of each. There is a committee of the citizens that make a valuation every six months for the county-cess, and another committee value every year for the police-rate.

The county-cess valuation does not include houses below 5 $\frac{1}{2}$ l., and the police valuation does not go below 10 $\frac{1}{2}$ l. Were guided by them in the valuation in a great measure: differed from them, however, in a great many cases; cannot say how many; when they differed, were generally lower. Think the committees valued entirely by the frontage; and they often found that there was much difference in the rears of houses having the same frontage, and that was principally the cause of the difference between them. Do

not think that they differed much from them in other cases: cannot say whether they did at all or not. Formed a separate valuation of their own. Carried the police and county valuations along with them. When they looked over each house, they then looked at what it had been valued at in the police and county-cess valuations: if they thought the house worth more they raised, and if less they lowered, the value. The county-cess and police valuations differ very much: they are made by different people, and sometimes one is higher than the other. Looked at both very often; there was a great difference. Thinks the county-cess valuation more correct. Had no fixed standard of value for houses. Knew nothing of the rents paid: valued each house at what they thought it would let for. Did not go to the "rack-rent," but put a moderate fair rent between landlord and tenant. Do not think that the houses would let for more than they valued them at.

Consider the rack-rent of a house the highest that a man could possibly pay for it, a rent that a man could not pay for a continuance of 10 or 15 years. Cannot say whether there are many would offer more for the houses valued by them than the amount they valued at.

Always allowed for repairs according to a scale given by the Guardians—that is, in filling up the other columns of the rate-book. Their estimate of the net value was independent of the expense of repairs. Their estimate proceeded always upon the supposition that the tenant kept it in repair.

All the columns were filled according to the scale furnished by the Board. That only applied to the city.

In the county valuation began with the Water-side division. Did not go over every farm. Went over every townland, and valued the entire. Made no distinct valuation of each tenement at first. Then, if the occupiers of the townland wished to subdivide the amount among themselves they allowed them to do so, if not they divided according to the last applotment of the county-cess.

There are two applotters appointed in each townland, and subdivided according to their applotment. In about one-half of the townlands the tenants subdivided the amount themselves. In other cases the tenants corrected their subdivision.

In some of the townlands went over the entire. Cannot say how many.

In the mountainous districts the Government valuation was as high as they thought it ought to be. Judged of that quality of land, by looking at it from the arable; but there was scarcely any of the arable that they did not walk over.

Took the quality of the soil from the appearance of it, not from the Ordnance maps: took only the contents from the Ordnance maps. Took no other means of ascertaining the quality of the soil but by walking over it. Considered what the land would let for—that is, what a tenant could fairly pay.

Never went to the "rack-rent." Consider a rack-rent too high a rent for a tenant to pay. Made no calculation of the produce of the land. In estimating what rent a tenant could fairly pay, judged merely by their own opinion. Had no fixed standard. Considered what a farmer taking the land to live by it could fairly pay. Farms in this country vary very much, from 1 acre to 100 acres. Very few are over 100 acres; generally they are from 20 to 40 acres. A tenant of 20 or 30 acres of good land, at a fair rent, would have stirabout and milk in the morning, potatoes and fish, and sometimes meat, for dinner, and flummary or potatoes.

Very few farmers of from 20 to 30 acres can afford to have a beef cow at November: that is, at the rents they pay. Does not think they could afford to have it, even if they held their land at a valuation. They might have beef now and again. Their idea of a "fair rent" is what would allow the tenants to live in that way. On a 60-acre farm the tenant holding at their valuation ought to have a beef cow in November. Think they could have it at the present rents.

Their valuation is sometimes higher and sometimes lower than the rents. Cannot form any opinion whether it is in general higher or lower.

Formed a separate estimate of the value of the houses only where they were out of proportion to the farm. Where the house was just good enough for a man to live in and labour the farm, put no additional value upon it on account of the house. Where the house was better than they thought necessary for a man to live in and work the farm, they charged for it. The majority of the houses they did not charge for. Do not think there was a fourth of the entire number charged. In valuing those houses that they did charge, they allowed the farm to have a house good enough for a man to live and work in, and charged what the house was worth over that. Made separate entries in their field-books.

The columns in the rate-book were filled after the valuation was complete by a Mr. Kearney, a clerk employed by them: allowed 2s. in the pound of the net value for repairs of farm and house—made no allowances for insurance in the country. Allowed 2s. 6d. in the pound for the county-cess: that was the only item in filling up the column "tenants' taxes." Divided the poor-rate equally between landlord and tenant at 10d. in the pound.

When the city valuation was done it was submitted to the Committee. The Committee did nothing with it but receive objections. It was then submitted to the inspection of the rate-payers. There were only eight objections made, and they directed the valuers to reconsider those cases. When the entire valuation was completed, it was submitted to the Board.

After the first rate was collected, they were directed by the Board to hold meetings of the rate-payers; and hand-bills were sent about, calling on the people to meet the valuers. The meetings were for the purpose of hearing if there were any complaints. Very few were made; in the city and suburbs there were only seven objections to their valuation; they were objections to the amount of valuation. They have gone over part of them, and refused to change the valuation.

APPENDIX.

Londonderry.

Evidence.

Messrs. Lithgow and Thompson, Valuers.

How far guided by them.

Had no fixed Standard for Valuing Houses.

Did not go to the "Rack-Rent."

Their idea of a Rack-Rent of Houses.

Repairs, how allowed for.

Columns of Rate-book, how filled up.

Valuation of the County Districts.

Valued each Townland at an entire Sum.

Their mode of subdividing that Sum on each Tenement.

Went over most of the Arable Land, but not the Mountain.

Judged of the Quality of the Soil by its appearance.

Their mode of estimating the value of the Land.

Size of Farms.

Mode of Living of Tenants of 20 or 30 Acres, at a fair Rent.

Their idea of a "Fair Rent."

Their mode of Valuing Houses in the Country.

Columns in Rate-book, how filled up.

Their Valuation, how dealt with by the Valuation Committee.

Valuers directed, after the collection of the first Rate, to hold Meetings in each Division, for the correction of errors.

APPENDIX.

Londonderry.

Evidence.
John Lithgow and
William Thompson,
Valuators.
Comparison of
Rated Value with
Rent.

In the country the objections were to the subdivision of the entire value. There is only one townland in which an objection was made to the amount of value; and they are to go over it again: that is the townland of Carnamaddy, in the division of Burt.

Did not compare the valuation of that townland with the rents paid. A great part of the Union has been let about forty years ago, and they are over the rents there. The estate of the Grocer's Company has fallen out of lease, and been lately let, and their valuation is very near the rents paid. After they made the valuation of that estate, they got the rental, in order to subdivide the amount, and on the whole there is very little difference between the two. Think that estate is let at a fair rent.

On Mr. Alexander's estate there has been a valuation made for the purpose of selling it; and it is very near their valuation. Do not know the rents paid on that estate. Some parts of that estate are held by old leases granted 70 years since.

Lord Templemore's agent informed them that their valuation of his estate in Donegal was lower than the rents: think that that estate is let rather high. The tenants have hitherto paid the rents, but they have not taken it long. Lord Templemore's estate is in the division of Burt. Do not know whether the leases are at a premium or not. Mr. Thompson knows something of the rents of Sir R. Bateson's estate in Donegal—lives adjoining it—and their valuation is lower than the rents paid; considers all the lately let land on that estate let too high.

An objection has been made by Sir R. Ferguson to their valuation of a townland in his own hands: have gone over it again, and do not intend to reduce it.

Mr. Thompson knows the estate of Lord Wicklow, in the Union, and, as far as he knows the rents paid on late lettings, they are very near his valuation: that estate is in the county Donegal.

Proportion of
Farms held by
Lease.

In Donegal four-fifths of the farms are held by lease. On Lord Donegal's estate the lands are held by leases for lives, renewable for ever, for which fines were given. They are held at about one-fourth of the value.

Disposition of
Landlords not to
grant Leases.

On Lord Wicklow's and Sir R. Bateson's estates the tenants generally hold by lease or agreement. On Lord Templemore's estate there are no leases: the tenants had agreed for leases, which were not executed when the late lord died. In Derry, on the Grocer's estate, there are no leases. On Mr. Ogilvy's estate the leases are expiring and not renewed. On Mr. Alexander's estate the old leases are also expiring, and no new leases are granted. Think the landlords are disposed to let from year to year rather than grant leases. There are eight townlands in the Union held under the Ecclesiastical Commissioners; the tenants of these have purchased the perpetuity.

The tenants in the Union think the valuation will be injurious to them; because they think the landlords will be guided by it in letting their land hereafter. They think the valuation is up to the letting value, and would wish it to be lower, for the reason stated.

Mr. Kearney,
Collector.
Acted as Assistant
in the Valuation of
the City.
Use made of the
former Valuations.

Mr. WILLIAM KEARNEY, Collector of Police-Tax, and Deputy Collector of County-Cess.

Was employed by Mr. Lithgow in consequence of his acquaintance with the town; has collected the police-tax since 1836. Was in the habit of accompanying the applotters in their valuation.

Poor Law
Valuation more
accurate than
either.

In accompanying Messrs. Lithgow and Thompson, referred to both the valuations.

Compared them as they went along. After viewing the premises, referred to the two other valuations, and then made the new valuation.

The houses and premises were far more minutely inspected under this than under any other valuation. More pains were taken with this.

Mode of effecting
the former
Valuations.

In some of the houses, on minutely inspecting them, they found they were overcharged in the former valuations, others again they found to have been undervalued. Cannot say in how many cases they differed. There is a vestry held twice a-year to appoint applotters for the county-cess, and the valutors for the police-tax are appointed once a-year by the Police Committee.

The valutors are generally different every time, because they are not paid for it, and it would be a hardship to impose the trouble twice upon the same people. They generally adopt the valuation for the preceding year, unless some change has taken place in the interval. The two taxes are still levied in the same manner: they consider what the premises would let for to a solvent tenant; they go upon the letting value.

Poor Law
Valuation the
lowest.
But the difference
is very small.

Thinks the Poor Law valuation is the lowest of the three. Thinks the Poor Law valutors adopted a lower scale; but still if the houses under 5*l.* were deducted from the Poor Law valuation there would be little difference between the two; and if houses under 10*l.* were deducted from it there would not be more difference between it and the police valuation.

The valutors for the police and county-cess seldom go into the houses. They include only the city and suburbs; but they include all lands and buildings within those limits. The county-cess omits all unoccupied houses in order to save the trouble of applying to the grand jury to represent for these. No allowance is made in either for repairs or insurance.

The police-tax amounts to 1*s.* in the pound for the last three years.

Amount of Police
Tax and County-
Cess.

The county-cess was never higher than 11*d.* in the pound on houses half yearly, and the lowest he ever knew it was 9*d.* On lands it varies from 11*d.* to 13*d.* per pound half yearly. Mills and manufactures are valued at the letting price of the building.

The Police Committee are chosen by those rated to the tax every year, at a meeting held for that purpose.

VALUATION of £10 CITY ELECTORS (registered 1833 to 1840), so far as ascertained.

CITY OF LONDONDERRY.

LONDONDERRY UNION.

Barony.	Names of £10 Electors whose Tenements are situate in the above Union.	Date of Registry, as in Clerk of Peace's List.	Description of Property rated as stated in Rate Book.	Name or Situation of Property as stated in Rate Book.	Net Annual Value as in Rate Book.	OBSERVATIONS.

COLERAINE UNION.

APPENDIX.

*Extracts from Minute Book of Board of Guardians.**Coleraine.*

Resolution to effect a new valuation.

Copies of Ordnance Maps and Field-Books to be furnished.

Appointment of Messrs. Cathcart and Arthur as Valuers

Valuation Committee.

Guardians of each division to be members of Committee pending valuation of their own division.

At the first meeting of the Board, held on the 4th of January, 1840,

Present 9 ex-officio and 27 elected Guardians,

Resolved,—That in order to obtain a proper valuation of all rateable property within the Union, it is desirable that a new valuation by a competent person be entered on, and that copies of the Government valuation maps, with the lines denoting the quality of each description of soil, and the field-books corresponding thereto, be furnished for his information.

That as soon as the sanction of the Commissioners to this course be obtained, an advertisement be issued.

At a meeting held on the 1st of February, 1840,

Present 8 ex-officio and 26 elected Guardians,

Tenders from Valuers were opened, and the various candidates having been called in and questioned as to their capabilities, Messrs. Cathcart and Arthur were duly elected by a majority of 27 to 7.

At a meeting of the Board, held on the 28th of March, 1840,

Number present not stated,

Resolved,—That the following Guardians be appointed a Committee of Valuation for the Union: Mr. Samuel Orr, Mr. Trail, Mr. M'Afee, Mr. John Boyd, Mr. James Moore, Mr. John Watson, Mr. James Wilson. (Three to be a quorum.)

At a meeting of the Board, held on the 4th of April, 1840,

Present 5 ex-officio and 14 elected Guardians,

A discussion of the duties of the Valuation Committee having been entered into,

Resolved,—That the Valuation Committee be instructed to assist the Valuers as much as possible in obtaining the co-operation of landlords, referred to in their printed circulars, especially the lists of occupiers, with the contents of their respective holdings.

That they have full power to order such forms for the use of the Valuers as may be required, and that they be requested to report to the Board from time to time, as they see fit, if any improper proceedings on the part of the Valuers should come to their knowledge.

Resolved,—That the Valuers be required to hand in the valuation of each electoral division to the Committee as they are completed.

Resolved,—That pending the valuation of each electoral division, the Guardian or Guardians representing that division shall be ex-officio members of the Committee.

At a Meeting of the Board, held on the 2nd of May, 1840,

Present 4 ex-officio, and 19 elected Guardians,

Handed in the valuation of the Somerset division, in order to have the opinion of the Board thereon.

Resolved that the Valuation Committee be appointed to meet previously to the next meeting of the Board, in order to give their opinion of the work done.

At a meeting of the Valuation Committee on the 9th of May, 1840,

The valuation of the Somerset division having been brought under the consideration of the Committee, and Mr. Cathcart, one of the Valuers, being present,

Resolved,—That the Valuers be required to re-examine the following:—

Robert Barr's farm, Carndougan.

Captain Dalrymple's, Gills Lower.

James and John Brewster's, Glenhall.

Henry Richardson, Esq., Somerset.

John Heny's, Cool Glebe Upper.

John Martin's, Ballyness.

Richard Bennett, Esq., Ballyness.

Resolved,—That the Valuers be required to bring forward their valuation of the Somerset electoral division on the 30th of May, in order that it may be laid before the Board at their meeting on that day.

(Signed)

SAMUEL ORR, Chairman.

At a meeting of the Board, held on the 30th of May, 1840,

Present, 4 ex-officio and 12 elected Guardians,

The Valuers having handed in their valuation of the Somerset division, revised in pursuance of the instructions of the Valuation Committee, at their meeting, on the 9th of May, 1840,

Resolved and ordered,—That the clerk take charge of the book of the valuation of the Somerset electoral division.

At a meeting of the Board, held on the 11th of July, 1840,

Present, 8 ex-officio and 21 elected Guardians,

The Assistant Commissioner (Mr. Clements) next proceeded to give his opinion on the mode of valuation that might be adopted; and Mr. Cathcart, one of the Valuers, explained to the meeting the principles upon which they acted.

Opinion given by Assistant Commissioner on mode of valuation.

At a meeting of the Board, held on the 15th of August, 1840,
Read a letter from Mr. Clements relative to the valuation of the rateable property of the Union.

Resolved,—That the Valuators be furnished with a copy of Clement's Letter on Valuation.

(A Copy.)

SIR,

Money more, August 14, 1840.

I have deferred making any comment on the summary of the Somerset and Aghadowey Divisions* received from you, till I had an opportunity of examining the valuation of other Unions. This I have now done, and with one exception I find them generally above Mr. Griffith's valuation, with one-fourth added to the land, and a third to the houses. This tends to strengthen the generally received opinion, which has also been confirmed by Mr. Griffith himself, that the land might be considered to be valued by him on an average at one-fourth below the letting value. The valuation of Messrs. Cathcart and Arthur, being considerably below this, it must be presumed to be too low. It is unnecessary to enter into a description of the principles on which Mr. Griffith has been conducted; suffice it to say, that it is more of a corn-rent, than a valuation for the rental of the country; and the eighth to which you allude as having been deducted in the field-book, has reference to the previous average price of produce, and not, as you suppose, to the rent of occupiers. It must be borne in mind that Mr. Griffith's valuation was furnished to Messrs. Cathcart and Arthur to assist them in ascertaining the different qualities of the soil. They are not bound by it, but they are bound to give a fair and correct valuation of each hereditament according to the net annual value as explained by the Poor Relief Act. Now what is that value? It is clearly laid down in Section 64 of the Act to be an estimate of the *rent* of which one year with another the hereditament might in its actual state be reasonably expected to let from year to year. It is not what Messrs. Cathcart and Arthur, or any other valuator, conceive to be a fair letting value, but the rent which from the general letting throughout the Union may be reasonably expected.

If, therefore, the rateable property throughout the Union is generally valued below that point, the landlord will of course appeal; for it is not to be expected that they will submit, without appeal, to pay a greater share of the Poor-rates than the law requires.

The evidence in their power to adduce must be conclusive, that the valuation is generally, and with but few exceptions, under the rent paid, that there are always persons found anxious to pay a large premium for tenant right, thereby showing that it is a rent which can be *reasonably expected*. The result of the appeal would be the quashing of the rate, and the Valuators being required to revise the valuation without any further payment, or, not having fulfilled their engagement, their sureties might be called on for the amount of their bond.

The Guardians would have no other alternative, and would be required by the Commissioners to take one or other of these courses. I mention the subject, that all concerned may be perfectly aware of the case, and because I think it is for the interest of all, and especially the valuator, that the error which they appear to have fallen into should be remedied as soon as possible. I can easily imagine its having occurred, because it has hitherto been the custom to make all public valuations, a certain proportion of the net value, and Messrs. Cathcart and Arthur have probably been influenced by this. I would suggest that the Guardians should examine the valuation, as far as they have hitherto gone, with a view to ascertain whether the error to be apprehended by the comparison contained in the two summaries which I herewith return, exists, in order that the Valuators may be warned of the consequence to be apprehended by continuing the valuation on what appears to be too low a scale.

(Signed)

C. S. CLEMENTS.

At a meeting of the Valuation Committee, held on the 22nd of August, 1840,

Present, five Members of the Committee,

Resolved,—That we consider the valuation of bleach-greens within the Aghadowey division to be on too high a scale, owing to the failure of the linen trade, and that the Valuators be requested to re-consider their valuation of them; and of Drumacrone, which we consider to be too high, when compared with Lisboy adjoining to it.

At a meeting of the Valuation Committee, held on the 21st of November, 1840,

Present nine Guardians,

Resolved,—That the Valuators be requested to re-consider their valuation of the following:—

In the Borough division, the mills of Messrs. Jameson, Milliken, and Wallace, that of Mr. Jameson being considered too high when compared with Messrs. Milliken and Wallace.

Resolved,—That this meeting do adjourn to the 5th of December, in order that the Guardians of the divisions handed in may have time to inspect the work done.

At a meeting of the Valuation Committee, held on the 5th of December, 1840,

Present nine Guardians,

Resolved unanimously,—That the following valuations in the divisions herein named, be handed over to the Valuators for reconsideration.

Here follows a specification of several tenements:—

26 in Drumacrone.

7 in Articlane.

16 in Bannbrook.

At a meeting of the Board, held on the 19th of December, 1840,

Present, 4 ex-officio Guardians and 16 elected,

The Valuation Committee having approved of the valuation of seven electoral divisions of the Union,

APPENDIX.

Coleraine

Assistant Commissioner's letter furnished to Valuators

Valuation of bleach-greens in Aghadowey division declared too high by the Committee.

Consideration of valuation by Committee.

Further consideration of valuation by Committee.

APPENDIX.

Coleraine.

Further consideration
of valuation by Com-
mittee.

Resolved,—That the Valuers be paid 50*l.* on account.

At a meeting of the Valuation Committee, held on the 16th of January, 1841, to examine the valuation of the Ringsend, Letterloan, and Agivey divisions, and also to examine the divisions of Glenkeen and Garvagh.

Present, eight Guardians,

Resolved,—That the Valuers be requested to examine their valuation of the following—

Here follows a detail of the particular tenements of which—

Seventeen were in the division of Letterloan, and of these

8 were declared by the Committee to be too low.

7, including the townland of Carnsteen were declared to be too high.

2, to be mistakes.

Five were in the division of Aginey, and of these

2, including the townland of Lesaghmon were declared too high.

3 were cases of error in the quantity of land.

1 a townland not subdivided.

Thirty-three were in the Ringsend division, of which

22 were declared by the Committee too low.

7 were declared too high.

4 declared to be mistakes.

Nine in the Glensheen division, all of which were declared too high.

Twelve in the Garvagh division, of which

6 were declared too high.

3 were declared too low.

3, errors in the quantity of land.

At a meeting of the Valuation Committee, held on the 6th of March, 1841,

Present, six Guardians,

Resolved,—That the Valuers be requested to re-consider their valuation of the following—

Then follow a detail of several tenements, of which—

Sixty-nine were in the division of Portstewart.

39 of which were declared too high.

24 were declared too low.

6 were errors in contents.

Twenty-four were in Beardville division, and of these

2 townlands were declared too high.

2 townlands too low

8 tenements too low, and

12 were errors in the contents.

Fourteen were in Ballilagan division, and of these

6 were declared too high.

4 tenements, and

1 townland declared too low

3 were errors in the contents.

Thirty-six were in the division of Knockentern, and of these

7 were declared too high.

21, including three entire townlands were declared too low

8 were errors in the quantity.

them square with
Griffith's valuation.
Were generally below
his contents.

Mr. ALEXANDER CATHCART, Valuator, *examined.*

Was appointed on the 1st of February, 1840; was never previously engaged in the valuation of land. Has been always a farmer; held land within the Union, about 90 acres, but has sold it since his appointment. Did not value under the Composition Act; was appointed in conjunction with James Arthur; he is a surveyor and valuator; values land for private proprietors, and also under the tithe composition; valued one parish within the Union, the Grange of Keldalagh. He holds no land within the Union, but does in the Union of Ballymony; got the Commissioners' Circulars on Valuation and Rating, and a copy of the Act; got directions also from Mr. Clements, the Assistant Commissioner. He explained the instructions of the Commissioners; the valuers got no instructions from other Board or Committee, but were left to the instructions from the Commissioners, and their own judgment. Were furnished with Griffith's maps and field-books, and also his valuations; generally got the tithe composition in every parish, and in most cases took the contents from them. The landlords gave every facility, but very few of them had correct surveys; they generally let their land according to old surveys, and have made no change; got but one correct survey from the landlords, and took the contents from that in that instance; in general took the contents from the tithe composition. When they went upon each townland they called upon some respectable inhabitant and got from him an account of how the land had been subdivided since the tithe applotment was made; where the occupiers of farms subdivided since, did not agree upon the contents of their holdings, they took it so, and if not, took them either from persons not interested, or from an estimate formed by themselves. Were instructed by Mr. Clements to make their statements of the contents of each townland square with the contents in Griffith's valuation; except where there was bog found it very difficult to do so; in 19 cases out of 20 were below the amount of Griffith's survey, and then they allowed as much as they could for roads and waste, and whatever

could not be accounted for in that way was distributed proportionally among the different holdings; the reason why it was easy to do so where there was bog, was, that the occupiers of the adjoining land generally encroached upon the bog. Were furnished with the rental of the whole Clothworkers' estate; got from Mr. Ogilvy the rental of three or four townlands of Lord Garvagh's; got from Mr. McAfee the rental of some mountain townlands of Mr. Richardson's; got the rental of the glebe lands in the parish of Dunboe; does not recollect any other. Were not guided by the rentals; valued quite independently of them; where there was a great disparity between the two, tried to ascertain the cause of the difference; where there did not appear any satisfactory reason, they altered their valuation, but that was very seldom; did not use the rentals as a guide; made very little use of them. Did not take the quality of the soil from Griffith's valuation in any case. Got the boundaries of the townlands from the ordnance maps; that was the principal use made of them; and to ascertain the quantity of deep bog. In the mountain townlands generally referred to Griffith's valuation, and when they were much above it, thought they had not allowed enough for climate, and in that case reduced about from 1*s.* to 2*s.* in the pound.⁶ When they had advanced some way in the valuation, an impression existed among some of the landed proprietors, that they had gone too low, and a copy of a letter of Mr. Clements was sent to the Board, intimating that they ought to be one-fourth above Griffith's valuation, as his was that much below the letting value; refused to adopt that standard, as it would not then be their own valuation, and made no change in consequence, but did not send any answer to Mr. Clements. Compared their valuation with Griffith's; in the good land were in almost all cases above it; in the poor soils were but a shade above him, sometimes not at all; in some cases were below him; those were not mountain lands, but bad arable. In several divisions most of the townlands were between his printed valuation which is called the minimum, and the valuation before it was reduced by one-eighth, which is called the maximum. The percentage that they were above him varied very much.

Both valuers went almost always together, but sometimes when they went upon a townland they would value different farms separately, and afterwards consider them together; in 99 cases out of 100 went together. In several they both valued different farms separately, and afterwards compared them, when there was very little difference. Went over every tenement and into almost every field; put down the different qualities of the soil in their field-books; ascertained the qualities merely by walking over the land. Never dug; had not time to do so. Put a different value upon each different quality of the soil, and sometimes had 10 or 12 different items in the same farm; in one farm of 30 acres had eight different items, the highest in that farm was 35*s.*, and the lowest 10*s.*, all arable land. Wherever the house was only good enough to accommodate a farm, made no increase on the value of the farm in consequence. Considered the house as necessary for the use of the farm, and wherever the house was better than was necessary for that, they made some additional charge for it. Where the house was a poor, mean one, made some deductions from the value of the land in consequence. In mountain farms did not consider the house at all, as there are seldom any on them, except a herds-house. Considered the house with reference to the size of the farms; seldom put any charge on thatched houses, except on farms of from six to ten acres; when the house was better than was necessary for such a holding, which was seldom the case; tried to ascertain how much house room would be necessary to accommodate each farm, and charged for any thing more. On Mr. Richardson's demesne of 300 acres, (Conyngham measure,) allowed houses for 10 farms, and charged for what he had more than was necessary for those, and valued all demesnes in the same way. Their valuation of Mr. Richardson's demesne was considered by himself too low, that was on their own account; least it might be thought they favoured him, went over it again and raised it about 15*l.*

Went over first his (witness's) own farm, which he knew the value of, and then over all the land in his neighbourhood, with which he was well acquainted, and considered what the land was *bona fide* worth to a solvent tenant, and used that as a sort of key in the valuation of other lands. Considers that on a farm of from 20 to 40 acres what it is worth to a solvent tenant is the rent that he could pay, after supporting a family respectably.

There are several districts of the country where the tenants live on potatoes and buttermilk, and could not consider the rent paid by them as a fair value of the land; but that is not the general rule here. In those townlands their valuation is from one-third to one-fourth below the rents paid; those do not belong to any of the large landed proprietors; does not mean that in every case where their valuation is lower than the rent, the diet of the tenants is such as he described. In many such cases their mode of living is better, and does not know how they can pay the rent they are subject to; in a high letting neighbourhood found it very easy to satisfy the tenants, because the valuation is lower than the rents; but in a low letting neighbourhood find it very difficult because they are generally above the rents. On Mr. Richardson's estate the tenants can live very respectably, they make a respectable appearance as to clothing, except those who have very small spots of land; they ride to market, and can pay their rents with ease, and some, but very few of them, have money laid by. It was a saying of one of the Richardson family that his tenants should have good clothes and a good horse, and it has been acted on by the family; it is the same on other estates.

They took their estimate of what a solvent tenant could afford to pay from the rents paid by those tenants. Valued the large and small farms upon the same scale, except when they found a house better in proportion to the farm, in which case they made it a shade higher because it would let higher. Cannot say how much higher they went, but not much; the owners of the smaller holdings complain a good deal of it.

Made no calculation of the probable amount of produce of the land, or of any return for capital; it could not be done here; the tenants take the land to get a living out of it; con-

Mode of living of tenants on Mr. Richardson's estate.

Rents paid by those tenants guided their estimate of value.

APPENDIX.

Coleraine.

	sidered the rents paid by those who lived in the way described, as one criterion of letting value. Their food is generally stirabout for breakfast, animal food for dinner, and potatoes and milk, and sometimes flummery, for supper. The farms here are generally small, they very seldom exceed 40 acres, and seldom come up to that quantity. On the Clothworkers' estate there are no leases, nor on the Ironmongers', nor the Mercers'. The leases expired and were not renewed; the London companies are indisposed to grant leases, because they wish to have the farms large, and to have more influence over their tenants. Thinks the Poor Law has had some effect in preventing the granting of leases. Does not know of any other objection to granting leases. Thinks that landlords are not disposed to grant leases of small holdings, particularly since the 10<i>l</i>. franchise. The landlords are anxious that their tenants should register. They have in some cases reduced the rents for the purpose. Filled up the columns, "Landlords and Tenants' Rates," by dividing a rate of 1<i>s</i>. in the pound equally between landlord and tenant; "Tenants' Taxes," with 2<i>s</i>. in the pound for county cess, which they ascertained to be very near it. The column for "Tenants' Repairs and Insurance" was filled with 2<i>s</i>. in the pound on the net value; and "Tenants' other Expenses" with 6<i>d</i>. in the pound. Made no allowance for insurance in the country. There are four villages in the Union, Garvagh, Port Rush, Port Stewart, and Bush Mills, and the town of Coleraine. In Coleraine they took several houses in the best part of the town, and ascertained their rents, and measured their length and height in front, and number of stories; and inspected the rear, to see what accommodation they had; and then deducted 20<i>l</i>. per cent. from the letting value for repairs and insurance, and the residue constituted the net value. Measured the houses in the other parts of the town, and ascertained the rents paid for some houses in each neighbourhood, which, except there were particular circumstances, they took as the criterion letting value, and judged of the letting value of the other houses in the same neighbourhood by comparison with those of which the rents were ascertained, and made the same deduction of 20<i>l</i>. per cent. to come at the net value. Did the same in the other towns and villages. Got a copy of the valuation of the Commissioners of Lighting and Watching for Coleraine, which includes all houses over 5<i>l</i>., but found they could not go by it; but after they had valued the town, went over their valuation, and compared it with the other valuation, and wherever there was a great difference between the two endeavoured to find out the cause. Those were few instances—about 50 in the whole town, and in some cases altered them. The other valuation was made by three inhabitants, and given in on oath. The inhabitants think that valuation is above the letting value, but they do not object as the scale is even. The reason given for that is, that the houses have fallen since the first valuation, and they have generally adhered to their first valuation. Thinks there has been a fall of at least 20 per cent. in the value of that species of property. They allow nothing for repairs, but thinks even with that allowance theirs is below it. The Coleraine division has not been given in, because some quantities have not been ascertained, but all the rest have. As soon as the valuation of each division was complete it was handed in to the committee. The Guardian of that division then took whatever course he thought proper to ascertain the objections, and at the next meeting of the committee they were told of the objections, and directed to reconsider them. Considered that that left them at perfect liberty to adhere to or alter their original valuation. The committee sometimes expressed their opinion, but left them at perfect liberty to act upon their own judgment. All the entries in the Minute Book do not contain the opinion of the committee, but merely express the objection. Does not think the Port Stewart division is valued higher than the rest. The land is good, and the climate good, and Mr. Orr is mistaken in thinking it higher than the other divisions. Thinks that a solvent tenant could afford to pay the amount of their valuation for all the land in it. Part of it is within one mile of Coleraine. There is no other complaint that one division is higher than the rest. The landlords are disposed to set their land at the valuation, and think it has an influence with the occupiers in saying that the valuation is too high. The opinion of people as to its being high or low varies with their condition: what a landlord or agent would consider low a farmer would consider too high. Mr. John Walton, one of the Guardians, who is a holder of land and well acquainted with its value, better than most people, thinks that the valuation is a shade too high. Some of the landlords think the valuation is too low. Mr. Cromie, Captain Hanna, and Mr. Lyle, think it is too low.
Existence of leases.	
Mode of filling columns in Rate Book.	
Valuation of houses in towns. Letting value in different localities ascertained. And 20 <i>l</i> . per cent. deducted for repairs and insurance. Houses measured.	
Comparison of their valuation of Coleraine with the valuation by the Commissioners of Lighting and Paving.	
Each division submitted to the Valuation Committee. Committee left them at liberty to alter their valuation of holdings objected to or not.	
Port Stewart division not valued higher than the others.	
Opinion as to the valuation varies with the situation of people.	
Mr. Arthur, valuator.	Mr. JAMES ARTHUR, Valuator, <i>examined</i> .
Instructions given by the Assistant Commissioner.	The instructions from Mr. Clements were verbal. They were to find out the letting price of land in the neighbourhood, and thereby ascertain the average letting price of lands throughout the Union; then to exercise their judgment to ascertain the fair letting value, what a solvent tenant could afford to pay, and not a rack-rent, and to put that as the net value upon the land. Got no written instructions from Mr. Clements but the printed circular. Understood by those instructions what a landlord ought to let his lands at, was to be their standard of value. Compared his present valuation with his valuation under the Tithe Composition Act, and except where there had been changes subsequently either by improvement or deterioration of the land, the two agreed. In some cases got a regular account of rents; compared their valuation occasionally with the rent on those estates of which
Comparison of his present valuation with the applotment under the tithe composition. Comparison with rentals furnished to them.	

they got the rental, and where there was a great difference inquired the cause to see that they were not mistaken. On one of the estates their valuation was generally below the rent, not very much, not more than 10% per cent. and sometimes less. Their valuation was not influenced by the rent, it was made out before they received an account of the rents. After the division of Somerset was finished, Mr. Clements' letter was sent to them. It had been alleged before the Valuation Committee that they had valued too low. The person who made that allegation was agent to a landlord. Mr. Clements' letter was to the effect that they should not put an ideal value on the land, but ascertain the letting value of land in each neighbourhood as far as possible, and to take that into consideration. If the land was more valuable in one neighbourhood than another, they were of course to look to that. Did not understand by that letter that they were to be guided by the letting value altogether, but that if land in one neighbourhood would let for more than in another, they were to put a higher value on it. Did not understand that they were to take the rent that would be paid for land as a criterion of value. Understood that they were to take the reasonable letting value as their standard throughout. Made no change in their mode of valuation in consequence of that letter. One of the landlords in the Union objected lately to their valuation of his own estate as too low, and they went over the land again in consequence of his observation. Valued it the second time without taking their former field-notes with them, and the second valuation was nearly the same as the first, and finding they agreed so nearly made no change. That is the only observation by a landlord, that he remembers for being too low.

Thinks about one-third of the produce would be a reasonable rent, that is in good land, but in poor soils the proportion of the produce would be less, because there would be greater labour. Thinks there are some lands within the Union where more than a third of the produce would be a reasonable letting value. There is not much of that description of land within the Union, scarcely a twentieth. There is a great deal of land where less than a third of the produce would be a reasonable letting value. There is about a tenth of the entire of that quality. There are nearly 3000 acres in the Union that cannot be used for any purpose.

There are about 10,000 acres of mountain pasture. Ascertained the value of that by finding out the quantity of cattle that it would graze, and the price generally paid for that, which varies according to the quality of the pasture; reserved about two-thirds of that price for the rents, and put that down as the net value. That sort of land would average 2s. 6d. per acre. Thinks that on recent lettings of that land the rent is higher than the "net value."

There were some complaints from the tenants of those lands that they had gone too high. In some cases they said the valuation was above their rents, which they considered high enough. In others where it was lower than their rents, they said the rents were too high. Generally speaking there were not many complaints from the tenants of the Union. As far as he has had an opportunity of judging, it is considered pretty fair.

Was not guided altogether by the calculation spoken of about the third of the produce in judging of the reasonable value; was guided by his former experience in valuing land for private proprietors. Generally, his estimate of the value came very near the third of the produce, but it varied with the quality of the land. Thinks that on the average of the arable land in this Union, his estimate of the net value is very near the third of the produce. But was guided by his knowledge of the rents that tenants had been able to pay for certain qualities of land, and referred to them as a guide. Some of those tenants held from year to year, and some by lease. What they paid were considered fair rents. In many cases the rents had been fixed according to his valuation. Thinks that generally speaking they are equal to one-third of the produce. In some cases they exceed it. Those farms vary in size from about ten to forty acres. The tenants of the larger farms who have capital to stock and crop them, and skill to manage them, live very comfortable. They are substantially fed and comfortably clothed, and have the means of giving a fair education to their children, and their rent is paid regularly. There is a good deal of land in the Union let at higher rents than those paid by the tenants referred to by him, but that is chiefly on the estates of small proprietors; but would not consider these rents as a fair criterion of letting value. Those rents are, in many cases, paid, but the people are obliged to make extraordinary exertions, and live very poorly.

Thinks about two-thirds of the land in the Union is held from year to year, but cannot speak positively. For some years back the landlords seem not to wish to grant leases; has heard that it was on account of the Poor Law, that they did not wish to grant leases until it was settled, and also that it was because they expected land to rise in value, but it is only conjecture. There is no objection on the part of the landlords to the tenants' registering votes. There has been some anxiety shown by the landlords that they should register. Has known some reduce their rents in order to enable their tenants to register.

SAMUEL ORR, Esq., elected Guardian for Port Stewart Division, *examined.*

Is a member of the Valuation Committee; has taken an active part in the proceedings of it. No instructions were given to the Valuers by the Board or the Committee. One of the Valuers, Mr. Arthur, is a valuator by profession, and the other is a farmer.

The Committee read over the valuation of the Somerset Division, which was the first valued, and they read it over in the presence of the Guardian for that Division. The book was then given to the Guardian, who kept it for ten days or a fortnight. He consulted the rate-payers upon it, and any objections made by them were submitted to the Committee, who ordered them to be re-considered by the Valuers.

APPENDIX.

Coleraine.

Allegation that they had valued too low. Mr. Clements' letter in consequence.

Their interpretation of that letter.

No change in their valuation in consequence of that letter.

His idea of a "reasonable" rent.

Quantity of mountain pasture in the Union. Mode of valuing that.

Valuation generally approved of by the tenants.

Did not adopt the one-third of the produce as the net value. Qualified it by his experience. Was guided by the rents paid by tenants who held at "fair rents". Size of their farms.

Their mode of living.

Proportion of leases. Practice latterly not to grant leases.

Samuel Orr, Esq., elected Guardian.

Proceedings of the Committee respecting the valuation of the Somerset Division.

APPENDIX.

Coleraine.

Mode of proceeding
with other Divisions.

Valuation of each
submitted to the Rate-
payers.

Meetings attended by
landlords and tenants.

Thinks valuation of
Port Stewart division
higher than the rest.

His opinion of the
proper standard of
value.

Majority of landlords
satisfied with the
valuation.
Valuator's scale of
value a fair one.

The Committee did not intend by that to convey any instruction to the Valuers that they were either to raise or lower the value in those cases where objections were made. The valuers were left entirely to their own discretion. The Committee were in general ignorant of the circumstances of each case, except the Guardian of the Division, who was *ex officio* a member of it, and he expressed his opinion: but the Committee gave no opinion, and the Valuers acted entirely according to their own judgment. All the objections in the Somerset Division are stated in the book. They are not more than half a dozen.

In the other Divisions, after the valuation was submitted to the Committee, the Guardians of each Division got the Book, and held meetings of the rate-payers, of which public notice was given. The valuation was there read over to the rate-payers, and objections were received from each person not only as to his own holding, but as to the comparative valuation of his neighbours. The objections were then submitted to the Committee, and entered by the clerk in the book. The Committee then merely directed the Valuers to reconsider them, and if they, that is, the Valuers, thought fit, to alter them, if not they were to stand.

The landlords or their agents generally attended those meetings, and the valuation was discussed in the presence of them and their tenants.

There were a good many objections by the landlords on the ground of the valuation being lower. In some cases objected to by the landlords, the valuation was raised; in others they were let stand. The valuation of Port Stewart was submitted to the rate-payers in the way described. There were a good many objections to the valuations of individual tenements. They are all entered in the book.

Thinks the valuation of that division higher in proportion than the other divisions. In fact in most of the cases it comes up to the letting value, allowing for repairs, which is not the case on some of the others. Intends to object to the valuation of the entire division on that ground.

The soil there is light, but the people are very industrious, and the land looks very well. The Valuers judged in general of the quality of the soil merely by the appearance of the soil, though he believes, in some instances, they dug for that purpose. They took a great deal of pains, and thinks their valuation will prove satisfactory. In Articlane, Drumboe, and Kilowen, which have been recently let, the valuation is as high as the letting value. Cannot speak as to the other divisions. The rents are lower in those divisions than in Port Stewart, which is let at a rack-rent, and is not capable of improvement. The interest of the tenants is much greater in those places than in Port Stewart.

Means by the "letting value" the rents actually paid. Does not think that when the Valuator comes upon the land, he should consider the rent paid, but what the land is actually worth. Means by what it is actually worth to a tenant living by it, and thinks that a tenant holding 20 or 30 acres should derive a support and benefit from it. The rent paid depends in fact upon the landlord, who can get whatever he chooses to put on the land. Thinks the Valuator should not be guided by the rent paid, unless it was a fair rent. That is his understanding of the words of the Act. Cannot speak precisely as to the opinion of the landlords, as there is a great difference of opinion, some wishing for a high and some for a low valuation; but on the whole thinks the majority are satisfied with it. Thinks the scale adopted by the Valuers is a fair one. The objections on both sides are about equal value, which shows the scale is a fair one. In Port Stewart thinks they referred too much to the letting value, and also to the tithe composition, which is a high one there, being a tenth of what it was valued at.

The Borough valuation has not yet been brought before the Committee.

Henry Richardson,
Esq., Chairman of
Board.

Valuation not much
before the Board.

Comparison of the
valuation of his own
property with his
rental.

Majority of farms in
Derry held from year
to year.

Does not grant leases
himself.

HENRY RICHARDSON, Esq. Chairman of the Board, *examined.*

The valuation has not been brought much before the Board; it has been confined almost entirely to the Committee.

Has looked into the valuation of the divisions containing his own property. Thinks it was rather low in some cases, that is under the rents paid by the tenants. In others it came within a very few shillings of the rent. Does not recollect any case in which it had gone beyond the rent, but there may be many such. Thinks on the whole the valuation was lower than his rental, but cannot speak positively, as the townlands are not added. The difference between his rental and the valuation when there were no leases, was very trifling. In his own demesne they were at first either at or below Griffith's valuation. They were sent back by the Committee, and altered it a little. Cannot state what proportion it bears to the rents on other properties. Does not think it has gone lower than tenants ought to get their land; where there were leases, the difference was of course considerable.

Thinks the majority of farms now in Londonderry are held from year to year. Several large estates have lately fallen out of lease, and no new leases have been granted. Thinks that where the tenants have confidence in their landlord, they do not care much about leases. Does not know of any general objection to granting leases, but does not grant leases himself. Cannot say which is more general, tenancy from year to year, or tenancy by lease. Did not attend any of the meetings of the rate payers. Was not a member of the Valuation Committee. Has not had any opportunity of ascertaining the opinions of the tenants respecting the valuation.

* Vide letter of Mr. Clements, Assistant Poor Law Commissioner, Appendix, ante, page 59 b.

ARMAGH UNION.

Extracts from Minute Book of Board of Guardians.

June 4, 1839.

Resolved, That the following Committee, viz :—Mr. Prentice, Mr. Paton, and Mr. Armstrong, be appointed to consider and to draw up a report to be laid before the next meeting of the valuation, in conformity with the orders of the Poor Law Commissioners.

July 2, 1839.

Resolved, That Mr. Algeo be added to the Valuation Committee.

July 9, 1839.

The Valuation Committee being called on for their report, submitted the following :—

"To the Chairman and Board of Guardians of the Armagh Union, for the relief of the poor.

"It having been referred to us as a Committee of the Guardians in the above Union, to inquire and report upon the means most desirable to adopt in order to obtain a correct valuation of the property therein, with a view to the levy of poor-rates; and whether to any and to what extent the valuation of the county Armagh, by Richard Griffith, Esq., for the more equitable applotment of county cess, can be made available for taxation, under the 1st and 2d Vict. chap. 56.

"We, the undersigned, beg leave to report as follows :—

"Having fully considered the subject referred to us, we are of opinion that the valuation of Richard Griffith, Esq., affords the best basis on which to construct a valuation of property liable to poor-rates in the Union of Armagh.

"We have ascertained, from Mr. Griffith, that by adding one-third to the value of the townlands, and one-half to the value of the houses in the Union, you have at once the fair and liberal letting value thereon, with the following exceptions, viz. :—

"The letting value of houses under the value of 5*l.* per annum. The value of tolls derived from rights of way. The value of rights of fisheries, canals, navigations, if any. The net annual value derived from turbaries and mines within the Union; and the letting value of mills, manufactories, and other buildings, including the machinery, which latter does not appear to be embraced by the provisions of the 6th and 7th William IV., chap. 84, for the more equitable applotment of county cess. Then, having a fair value of all the townlands in the Union, as compared with each other, a most important work remains to be completed, namely, to ascertain distinctly the portion of such valuation, attaching to the tenements or holdings in each townland respectively; and as the future levy of county cess, as well as of poor-rates, will be a poundage-rate, and not an acreable assessment as heretofore, your Committee recommend the guardians to advertise for a competent person or persons to undertake the correction and completion of the Government valuation; to whom copies of the maps, with Mr. Griffith's red lines, denoting the quality of each portion of land, and copies of the field books corresponding thereto should be furnished, by which means two most desirable ends will be accomplished, and a satisfactory basis afforded hereafter, as well for the levy of poor-rates as for that of county cess. All which your Committee respectfully submit as their report thereon.

"J. K. ARMSTRONG,
HENRY L. PRENTICE."

Resolved unanimously, That this report of the Committee be received and adopted.

Resolved, That the Poor Law Commissioners be applied to for a copy of Mr. Griffith's book of instructions to the valuers, together with the table for ascertaining the value of houses by measurement.

Resolved, That in the interim between this and the next meeting the guardians shall make inquiries, each in his own district, with a view to ascertain what surveys of property can be made available to the working out of Mr. Griffith's valuation, which has been adopted as the basis for this Union.

July 23, 1839.

A resolution was adopted to publish advertisements for valuers.

The Board furnished the valuers with copies of the field books and townland maps, marked with Mr. Griffith's red lines.

August 20, 1839.

Mr. Morton declared the valuator.

September 3, 1839.

It was moved by Mr. Lindsay, in accordance with his previous notice of motion, seconded by Mr. Pringle, and carried, That the resolution of 9th July relative to valuation, shall be rescinded, so far as relates to adding one-third to the lands, and one-half to the houses; and that the valuator be instructed to proceed in his valuation on the following principles, viz. :—

1st, All property not valued by Mr. Griffith to be valued according to the scale laid down by Mr. Griffith.

2nd, Mr. Griffith's valuation, as lodged with the county-treasurer, shall, so far as it goes, be adhered to by the valuator as a basis, and when the valuator makes his final report, it shall then be for the consideration of the Board, whether any or what addition thereto may be necessary, to bring the valuation to the net annual value.

October 1, 1839.

Mr. Morton, the valuator appointed by the Board of Guardians, having appeared and stated that the contract and bond which he is required by the Commissioners to enter into,

APPENDIX.

Armagh.

Minute Book.

Valuation committee.

Report of Valuation
committee.

Committee consider
Griffith's best basis
for poor law valuation.

Exceptions.

Recommend appointment
of a valuator.
To be furnished with
documents.

Report adopted.

Resolved to apply to
Poor Law Commissioners
for documents.

Guardians to enquire
where Griffith's valuation
may be made available.

Documents furnished
valuator.

Appointment of
valuator.

Principles on which
valuator must proceed.

Resolved, that valuator
act on his own
responsibility.

APPENDIX.

Armagh.

are in some degree at variance with the resolution of the Board, binding him to adhere to Mr. Griffith's valuation, it was unanimously resolved, That the valuator should proceed upon his own responsibility, in such a manner as the Act of Parliament points out, viz., to value each property at the net annual value, according to the 64th section of the Act.

October 29, 1839.

Mr. Morton, the valuator, having sent in a communication to the Board, requesting their sanction of his appointment of certain assistants, it was resolved, That the clerk be instructed to acknowledge the receipt of said communication, and to inform Mr. Morton, that the Board, holding him alone responsible for the due performance of his duties, do not wish to interfere with any arrangements he may make with reference thereto.

November 26, 1839.

Second valuation
committee.

Resolved, That the following gentlemen, viz., Messrs. Paton, Algeo, Scott, Vogan, and McKinsty, be appointed a Committee, to whom the valuator may refer, through the clerk, for advice, assistance, or instruction, between the meetings of the Board.

February 25, 1840.

Letter of Assistant
Commissioner read.

The clerk read a copy of a letter from Mr. Gulson to the valuator, on some points of difficulty, which the valuator represented as obstructing his progress, and the Board fully concurred in the views of the Assistant Commissioner.

March 31, 1840.

The clerk having read a letter from Mr. Gulson, in reference to the valuation, resolved, That the attention of the Valuation Committee be called thereto.

June 23, 1840.

Mr. Morton appeared at the Board this day, and submitted the rate-book, as far as he had completed it, for the inspection of the Board.

February 22, 1841.

Limit of time for com-
pletion of valuation.

Mr. Morton appeared before the Board, and solicited an extension of time for completing his work; resolved, That he be allowed till the last of April, by which time it is expected the valuation books will be required.

Evidence.

Mr. Morton,
Valuator.

Appointment and
Qualification of the
Valuator.

Directed to adopt
Griffith's valuation.

Documents furnished
to him by the Board.

System of applotting
Griffith's valuation
abandoned.

Mode of proceeding
with the valuation.
Quality of soil—how
ascertained.

Evidence.

MR. JOHN B. MORTON, Valuator, *examined.*

Was appointed the 20th day of August, 1839; was not previously employed in the valuation of land, except in a very few instances, but was employed as a surveyor. Never valued under the Composition Act. Was bound as an apprentice to one of the engineers engaged in the Ordnance Survey for seven years, and served for a year and a half after his apprenticeship expired. Was engaged for that period on the survey, but not on the valuation. His engagement there expired in 1834, and he has been since occupied in surveying on his own account. Is one of the assistant-surveyors of the County Armagh. Has passed an examination for the office of county engineer.

Was directed by the Board, at first, to adopt Mr. Griffith's valuation of the land, and to add the one-third that he had deducted from the houses.

All property not included in that he was to value on his own responsibility. The whole amount was then to be applotted by him upon each tenement, according to the best of his judgment. It was then considered to be a mere office work, except the addition of the houses.

Was furnished with Mr. Griffith's valuation. Got also the field-books and the Ordnance maps, with the red lines on them, part of which maps had been done by himself, in the course of his services upon the Ordnance survey. Was promised the tithe applotments, but did not get them. Got from the landlords any documents of theirs which he asked for. The documents that he asked from them related chiefly to the acres. Got no rentals. Tried the system of applotting Griffith's valuation for about a month; found no difficulty in carrying it into effect, but thinks it would have been difficult to have done it without going on the ground, for want of maps of many of the estates.

After about a month, the Board changed their system; they decided then that he should value the entire Union on his own responsibility, taking Griffith's valuation as a basis. The change arose from a difference of opinion among the Board. The landed proprietors thought that Griffith's valuation was too low. There was a difference of opinion between the landlords and tenants upon the subject; the landlords and their agents thought the valuation would be too low, and it was for the purpose of correcting that that they altered the system; to bring it in fact nearer to a fair letting value.

Understood by the direction as to adopting Griffith's valuation, that he was to take the different qualities of the soil from it, and that he was to consider what per centage was to be added to each different quality, if any. Had not gone over more than half a division when the change was made.

Prepared the copies of Griffith's valuation, and copies of his maps, marking the red lines upon them. Took them then to the ground, and compared them with the situation and soil, and sometimes, when not satisfied, examined the sub-soil; means by comparing them with the soil, that he examined the soil itself, either by digging or by following the plough. Ascertained the sub-soil about three or four times in a townland, sometimes not so often; considered the valuation put upon each space included within the red lines, in the Ordnance maps, as an average of the entire, and then apportioned the different qualities among the different persons as well as he could.

Generally ascertained the quantity of each person's tenement from the cess applotments, which he found to be the most correct. The objection to the landlords' surveys was, that they did not come down to the present time. The cess applotments are done by two persons in each townland, appointed half-yearly, and are brought down to the present time.

Frequently ascertained the rent paid by the tenant, by inquiring from the tenant; entered the answers to those inquiries in his field-books. Did not make such entries in more than three or four cases in a townland.

They are unwilling to tell their rents, and there are few whose information is to be depended on; compared his valuation with the rents.

The rents of an entire townland are generally the same, although there are great differences in situation and climate; and that occasions great differences between his valuation and the rent; some parts of the same townland are 5s. an acre better than another, although they are let at the same rate. Put a separate valuation on each townland according to its situation and climate.

There was little difference between his valuation and the rents of the large proprietors, such as Lord Charlemont, Lord Gosford, &c.; but the rents of small proprietors were in general higher than his valuation.

Valued each separate tenements separately. Went into every farm, and to every house. In each farm looked at the surface soil, but not the sub-soil; time would not allow it; but where there was a variation in the appearance of the surface soil, frequently examined it again, if he found that Mr. Griffith's valuation did not go along with him. Generally, in ascertaining the surface soil, looked where there was digging or ploughing. In some instances differed from Mr. Griffith's estimate of the qualities of the soil; that was not in many instances. It was generally in depth of soil that he did so, and in flooded soils. In those cases where he differed from Mr. Griffith, made more minute inquiry; ascertained in those cases both the soil and sub-soil. Knows some of the persons by whom the valuation had been effected, and there were some from whom he seldom differed in the qualities of the soil.

In estimating the value of each tenement, made a calculation of the average price of grain, and the price of labour. Allowed the farmer wages for himself and his family, and considered the average cost of raising the produce, and the average price of the produce itself, and the difference between the two formed his estimate of the net value. Took the average prices of grain for the last five years, and the ordinary wages of labour in this district.

The wages of labour vary materially in the different parishes. Formed no average of the prices of labour; had to make a different calculation in each parish, and to make different allowances, such as nearness to bog, and conveniency to market.

Allowed a fourth or fifth of the produce to the farmer in addition to the wages of his labour.

The expences of raising the produce would amount on the average of the land having ordinary facilities, such as roads, &c., to 16s. per acre; and the average price would be of oats 4l. 10s. per acre; wheat 7l. 10s.; and barley about 7l. The labour of these would be about 16s. per acre. Allowed that amount for the labour, and allowed the farmer a fourth or fifth of the produce besides. The expense of seed would vary very much. Then, in some places, an allowance should be made for lime, where there was no convenient mode of getting it. There was no other deduction to be made from the gross produce.

The balance, after making those several deductions, formed the net value of the tenement. In estimating the allowance to be made to the farmer, did not calculate particularly whether it was a fourth or a fifth that was to be deducted, but did not exceed the one or go lower than the other.

Did not make this calculation of produce and cost of raising it in every case, but merely as a guide at first setting out. By that means formed a standard of value. Took the opinion of farmers frequently, as to the value of the land, without telling them his own, and found that they generally agreed.

Thinks that a larger proportion should be allowed as a reasonable remuneration for the farmer on inferior qualities of soil. The calculation as to labour would hold good on an average.

Made no calculation respecting capital, or any return for capital.

Found that standard easily applicable to all cases of arable land; that was what he would consider a reasonable rent, in the medium quality of soil, and acted on it throughout; this is almost altogether an arable district, there is very little waste land in it. In comparing this valuation with the rents, found that when a small proprietor would let the land for 30s., his valuation would amount to about 20s.; and sometimes found that a farmer would sub-let land for 2l., which he had himself at 1l. from his landlord; did not consider those rents as a fair standard of letting value; did not consider that "it would pay," and was told so by those who lived on the land; they said it was merely for convenience that they took it, and that they did not live by land. Many persons who hold land to live by it pay higher rents than the valuation, but not so high as those he has spoken of; there is in some instances a difference of a few shillings an acre between them; those persons that take land from the smaller proprietors take land to live by it, but then he generally found them in great poverty except they had some other mode of living than land, such as weaving or dealing in cattle; and frequently found that proprietors who let their land in that way, lost more than if they had let their land reasonably. Did not apply the same standard of value to the large farms as to the small; when there was a farm of 20 acres and one of 5 acres of the same quality of soil,

Inquiries as to rent.

Difficulty of ascertaining it.

Comparison of valuation with rent.

Visited each tenement.

Examination made as to soil.

Mode of estimating value.

Average cost of raising produce.

Average prices of produce.

Average price of labour.

A fourth or fifth of the surplus allowed to the farmer.

The balance formed the net value of the farm.

No calculation made of return for capital.

APPENDIX.

Armagh.

Valued large farms higher in proportion than small.

Average size of farms.

Separate valuation of houses—how effected. Judged of the fair letting value.

Adopted Griffith's valuation of large houses.

Added the one-third in towns but not in the country.

Considered the fair letting value of houses. Was generally below the rents paid.

Demesnes considered as pasture.

Valuation of Armagh

7½ per cent. allowed for repairs and insurance. Columns of rate-book, how filled up.

Extent of valuation. Proceedings of valuation committee.

Majority of tenements not held by lease.

Fewer leases granted latterly. Reasons for that.

valued the large farm at a higher amount per acre; there would be a greater proportion of profit arising from an equal proportion of labour and attention to it; does not think the smaller farms would let for a larger amount in proportion than the large one. The demand among a certain class of people, that is the poorer class, might be greater than the richer, but the latter would not take the small farms at all; thinks that a large farm would let for a higher proportional amount than a small one; valued them all on the same scale, but made a deduction from the smaller ones; as the farm diminished in size below 30 acres, would deduct something, that is, 6d., 1s., or 2s. an acre, as the farm decreased. The average size of farms in this county is about 12 acres; they vary between 3 or 4, and 30 or 40 acres. There are very few farmers who do not unite some other dealing with farming, some weaving, others dealing in flax.

They would give a higher price for land in consequence of having other occupations, for what they themselves call an accommodation; did not put a higher value on the land in consequence of the higher rent which they would give for it; considered what was a fair letting value without reference to either the rent paid by the tenant, or their occupation.

His estimate of a fair letting value was founded upon the calculation as to the price of labour, and the proportion of produce mentioned above.

Valued houses separately; considered what the houses would let for if let separately from the farm; made a separate entry of those values in his field-book, then added the amount of their value to the acreable value of the land. The houses of farmers holding farms of 12 acres would be about 2l. to 2l. 10s.; and where the farm was smaller, made a deduction from the value of the house for every building that he considered unnecessary for the accommodation of the farm.

Allowed then about a third of the net annual value of the house for repairs and insurance. Found, on a calculation of the actual expense, that that was very near it, and allowed it as a general rate.

In large farm-houses and gentlemen's houses, generally adopted Griffith's valuation; consulted the owner then, and if he were satisfied with it let it stand, if not, measured them over again.

Did not add the one-third deducted by Griffith, in the country; found it necessary in towns to add the one-third to Griffith's valuation. In the country there was no necessity for it; in towns added the one-third to Griffith's valuation, and instituted a comparison between it and the rents paid.

Considered what would be a fair letting value for each house to a good solvent tenant.—Did not go to the rents paid for those houses, was generally below them. Could not say by what per centage it was below the rents.

Measured the houses not valued by Griffith, both those below his scale and those subsequently built. Made a scale of value for them by measuring some of those valued by Griffith.

Took into consideration the time it had been built, and the situation of each house.

Demesne lands he considered as pasture, considering their facility as to enclosures.

Valued pasture land according to the price for milch cattle and their proximity to town; but there is very little in the Union except in demesnes.

The only towns of any size in the Union, that he has been in yet, are Armagh and Markethill; and in Armagh he added the one-third to Griffith's valuation, and then deducted 10 per cent., and that amount formed the net value. The deduction of 10 per cent. was necessary to bring the valuation of the houses to a fair letting value, and allowed for repairs and insurance independently of that.

Allowed about 7½ per cent. in the towns for repairs and insurance.

Filled the column of "landlords' and tenants' rates" with 10d. in the pound, divided equally between them. Where he found the landlord repaired, placed an allowance for repairs and insurance in the landlord's column; where that was not the case, placed it in the tenant's. There are no landlords' taxes. The column of "tenants' taxes" was filled with the county cess merely in the country; in the boroughs it was filled up with the county cess and corporation cess. Ascertained the amount from the high constable's books, and put that amount down.

Nearly three-fourths of the Union is valued, but the calculations are not made out.

The Valuation Committee never interfered in any way with his valuation; has submitted about seven divisions to the Committee. Does not know as yet how they have dealt with it, but he has had the opportunity of knowing the opinions of some of them, who think that it is a fair valuation. They are tenants and not landlords. Has not ascertained the opinion of any of the landlords. There is very little difference between the valuation and the rents on Lord Gosford's and Lord Charlemont's estates. Those estates, the Primate's, Lord Cremorne's, Colonel Verner's, Colonel Close's, Mr. Cope's, Sir Thomas Molyneux's, Lord Caledon's, and Sir James Strong, are set at about the same scale. There are some small proprietors, too, who set their lands equally reasonably, but in general the large proprietors let their estates more reasonably.

Cannot form any opinion as to the proportion of tenements in the Union that are held by lease, but thinks the majority are not held by lease. There are more let latterly from year to year.

They are granting fewer leases latterly than they formerly did.

Does not think the Poor Law has had any effect in preventing the granting of leases; does not know from what cause it proceeds, but thinks there is an indisposition on the part of the landlords to grant leases. His reason for thinking so is, the frequent complaints by the tenants of their not having a lease. Cannot say whether it arises from any political objection.

VALUATION OF £10 BOROUGH ELECTORS, (registered 1833 to 1840) so far as ascertained.

DUNGANNON UNION.

APPENDIX.

*Dungannon**Extracts from Minute Book of Board of Guardians.*

Extracts from
Minute Book.
Appointment of
Committee to in-
quire respecting
valuation.

At the first meeting of the Board of Guardians, held on the 29th August, 1839,
Present 6 ex officio and 24 elected guardians, it was
Resolved,—That a committee be appointed to inquire into and report their opinion, as
soon as possible, upon the best means to adopt for obtaining the valuation required by law
of all the rateable property within the Union; this committee to be,—

John G. Burgess, Esq., Chairman.

Edward Evans, Esq.

Henry Pole, Esq., ex officio.

Alexander M'Kenzie, Esq., ex officio.

Charles Magee, Esq.

David R. Goodcattle, Esq.

Mr. James M'Neill.

George D. Crawford, Esq.

William Greer, Esq., ex officio.

Henry King, Esq.

Of whom five to be a quorum.

5th September, 1839.

Present 4 ex officio and 16 elected Guardians.

Report of Com-
mittee adopted.

The chairman of the valuation committee presented their Report, which was read and
considered.

Resolved unanimously,—That this Report be adopted, and a copy entered on the minutes.

Report.

"Having considered the subject matter referred to them, your Committee are of opinion
that the Government valuation may safely be taken as the basis on which to found the valuation,
adding to it such property not found to be included in it, and which must be rated
according to the law. Your committee recommend, that advertisement be made according
to one of the subjoined forms, for a competent valuator or valutors to undertake the revision,
correction, and completion of the same, so that each occupier's holding should be properly
set forth in the manner prescribed by the law. To effect this, your committee recommend
that the following course be adopted:—

"That the valuator be furnished, first, with the townland maps marked with Mr. Griffiths' red lines, denoting the quality of each lot, together with the field books corresponding thereto.

"Secondly, with list of occupiers from the county cess applotments, or from the rentals of
landlords, together with the contents of each holding, and any other information that the
landlords may think proper to furnish.

"Thirdly, with blank forms of valuation sheets and field-books, as approved by the Commissioners.

"Your committee believe that the first-named documents can be obtained from the barony
collectors upon proper guarantee for their safe custody, or, at all events, may be copied upon
moderate terms, an offer of which is herewith appended. With respect to the second-named
documents, your committee conceive that the clerk should be directed to make copies from
the county cess applotments where the required information cannot be obtained from the
landlords; but your committee desire to express their earnest hope that the landlords of the
Union will give every information required, so as to secure the satisfactory completion of this
important work.

"In order to secure this, your committee recommend that a circular, according to the form
annexed, be issued previous to the valuation of each electoral division. That a valuation
committee be appointed, with full power to superintend the progress of the valuation, and
report to the Board from time to time as they see fit.

"That the valuator be required to proceed in the valuation by electoral divisions, and give
in the same to the committee according as they are completed.

"That previous to entering upon an electoral division, the clerk should issue the circulars
above recommended to all persons interested; and that where the valuation of an electoral
division is complete, the committee, acting as a committee of revision, should take into con-
sideration such complaints as are made, and determine upon them, which should be sent to
your Board, to be considered finally in presence of the valutors.

(Signed) "EDWARD EVANS."

Maximum of remuneration to Valua-
tors fixed.

That as soon as the sanction of the Commissioners be obtained to the course proposed to
be adopted, the clerk do issue the advertisement fixing 2*l.* per thousand acres as the maxi-
mum of remuneration to be allowed.

26th September, 1839.

Present 7 ex officio, 19 elected Guardians.

Read the letter from the Commissioners approving of the Report of the valuation com-
mittee of the 9th September, 1839.

Appointment of
Mr. Wilson as
valuator.

The Board next proceeded to open tenders from valutors, when the following appeared:—
Mr. Robert Wilson Benburb; Mr. Andrew, Dilwork; Mr. Robert Kelly, Killyglass; Mr.

Robert Barnes, Caledon; Mr. Thomas Fulton, Killyman; Mr. William Wilson, Newcastle. The respective merits of the different candidates having been considered, Mr. Robert Wilson was unanimously elected the valuator.

APPENDIX.

Dungannon.

Resolved,—That he be required to find security for the due performance of the work, in a joint and several bond, with two sureties for 200*l*.

That the rate of remuneration when he shall be required to revise any part of the valuation, by any change having taken place in the parcels of land held by one or more occupiers, shall be 10*s*. per day: and in case of appeals wherein the rate shall not be quashed or amended through his error, 10*s*. per day: and where the rate shall be quashed or amended, 5*s*. per day.

Resolved,—That in the event of the barony collectors furnishing this Board, for the use of the valuator, with the maps and field-books in their charge, the Board of Guardians will hold themselves responsible for their safe custody, and will make good any damage that may accrue to them.

Resolved,—That a committee be appointed, according to the recommendation of the former valuation committee adopted by this Board at their last meeting; that the committee have full power to superintend the proceedings of the valuator, and to procure such forms as may be required. That this committee be,

Appointment of valuation committee.

John G. Burgess, Esq.

Alexander M'Kenzie, Esq.

John Halls, Esq.

William J. Greer, Esq.

Henry Poole, Esq.

Of whom three to be a quorum.

Pending the valuation of the division, the Guardian or Guardians for that division shall be ex officio members of the Committee.

Guardians of each division to be members pending the valuation of it.

Resolved,—That the committee be empowered to add to their number at any time they see fit.

Mr. Wilson having been called into the room, he proposed for his sureties, Alexander M'Kenzie, Esq., and Mr. Richardson Bell, who were approved of by the Board of Guardians.

On the 3rd October, 1839, a letter was read from the Commissioners, approving of the appointment of Mr. Robert Wilson as valuator, and Mr. Wilson attended and entered into the necessary bond and agreement with the Guardians.

28th November, 1839.

Present 5 ex officio and 21 elected Guardians.

It was proposed by Mr. James Oliver, and seconded by Mr. Morgan O'Brien, both elected Guardians, that any Guardian wishing to meet with the valuation committee at any of their meetings, be a member of such committee.

On a division of 15 to 6 the above proposition was negatived.

19th October, 1840.

Present 2 ex officio and 17 elected Guardians.

Mr. Wilson handed over the books of the valuation of the Union, it having been completed.

Valuation handed in.

17th December, 1840.

Present 2 ex officio and 7 elected Guardians.

It appearing that an error has been made in the manner of setting down the valuation of bogs where turf is cut for sale,

Resolved,—That the valuator be instructed to rectify the same, so that the lessor of turf bogs in small lots set off by the year should be the person rated.

Ordered,—That as soon as this has been completed, the clerk do issue notice for exposing the valuation for public inspection for 21 days.

Resolved,—That pending the exposure of the valuation, Mr. Wilson, the valuator, be empowered to alter, upon his own responsibility, any portion of the valuation which appears to him to be erroneous.

Valuator empowered to alter valuation pending its exposure to the rate-payers.

11th February, 1841.

Present 2 ex officio and 13 elected Guardians.

The Board proceeded to take into consideration the objections made to the valuation of the Union.

Consideration of objections to valuation.

Mr. James Oliver, the Guardian for the electoral division of Minterburn, laid before the Board a number of objections in his district: these cases underwent a long consideration. Mr. Wilson, the valuator, being called upon, stated that he could not in justice make any alteration in the above objections; the Board decided that the valuation be let remain.

Mr. Robert Smith objected to his limestone quarry in Killymeal being rated, on the grounds that the stone had run out, and consequently can no longer be worked.

Resolved,—That Mr. Wilson be empowered to alter the valuation in the above case.

The clerk presented to the Board a number of objections which he had received relative to machinery in mills, open quarries, &c., being rated not according to law; the Board decided that they not being acquainted with the liability of such machinery, &c. to be rated, that the clerk should write to the Poor Law Commissioners, and request their opinion thereon.

Reference of valuation of machinery to Poor Law Commissioners.

4th March, 1841.

Present four elected Guardians.

Read a letter from the Commissioners, of the 26th February, 1841, relative to the different kinds of machinery, quarries, &c. being rateable, and the clerk of the Union was desired to have the opinion of the valuator thereon.

(No further entry appears on the face of the Minute Book.)

APPENDIX.

Dungannon.

Valuation Committee.

A notice, dated the 1st day of January, 1841, signed by the clerk of the Union, was published, declaring that the books would lie open from the 4th to the 27th January, 1841.

Valuation Committee

There does not appear to have been any Minute Book kept of the proceedings of the committee. The following are copies of the only documents relating to the proceedings of the committee to be found in the office of the clerk of the Union.

*To the Committee of Valuation,
Dungannon Union.*

Report of valuator to valuation committee.

GENTLEMEN,

IN laying my first Report before you I beg respectfully to state, that I have been actively engaged in the valuation since my appointment to that office, during which time I have completed the field-work of the first four electoral divisions, and a portion of the fifth; namely, Dungannon, Donaghmore, Cross Dermot, Altmore, and a part of Clousvaddy, comprising about 21,800 acres. I have, in many instances, had much difficulty in procuring contents, those in the hands of landlords being generally incorrect, in consequence of subdivisions that have been made since the last surveys.

Much facility has been afforded me by cess returns, which the barony constable of this district, Mr. Henry Brown, was pleased to hand me; they are, generally speaking, the most correct contents I can procure: however, even in these frequent corrections are necessary. I find the occupiers in the inland districts very willing to afford every information in their power, but certainly not always so in mountain districts. To guard against leading me astray, I found it necessary to use the utmost precaution, and depend little on their statements. I have had recourse in these cases to landlords' rentals, where I found contents of the original tenure, which I took good care to have made up among the present occupiers. I confidently expect to have the valuation completed in the given time.

I would beg respectfully to request of the Commission and committee to allow me to proceed with the Benburb, Bantry, and Moy electoral divisions, during the short winter days, they being in the vicinity of my residence. This would be a matter of great importance to me, and would, I expect, facilitate the work, and be convenient to my health. I beg to lay before you the field-book of the Dungannon electoral division for your inspection.

I have the honour, &c.

ROBERT WILSON,
Valuator, Dungannon Union.

28th November, 1839.

At a meeting of the valuation committee, held on the 28th November, 1839,

Present, John Burgess, Esq., John Halls, Esq., William J. Greer, Esq.

Mr. Wilson, the valuator, laid before the Committee his Report, which was most satisfactory.

Resolved,—That the valuator be at liberty to commence the valuation of any electoral division within the Union that may be most convenient to himself.

The committee next considered which was the best means of making known to the occupiers of rateable property within the Union the valuation of their holdings.

Resolved,—That the clerk get a number of notices printed, and have them distributed throughout the electoral division which at the time may be lying in his hands for inspection, stating the time and place where such valuation may be seen.

The valuation of the electoral division of Dungannon being complete, the clerk was ordered to give notice of such, and to let it lie open for inspection at his office from 12 to 2 o'clock on every Tuesday and Saturday during the month of December.

Resolved,—That Joseph Greer, Esq., James Eyre Jackson, Esq., and Mr. James Beatty, be added to the valuation committee.

(Signed) JOHN G. BURGESS.

At a meeting of the valuation committee, held on Thursday, the 27th August, 1840.

Present, John Burgess, Esq., Joseph Greer, Esq., Mr. David Beatty.

Mr. Robert Wilson, the valuator, attended the committee, and stated, that in a few of the electoral divisions, namely, Ballymagran, Clonaneese, Drumnasple, and Tullyniskin, he had been unable to obtain the contents of many townlands and turf bogs, and requested that the committee would assist him in procuring them, and that they would extend the time allotted for the completion of the valuation, until such contents can be obtained.

Resolved,—That the committee recommend that the time for completing the valuation of the Union be extended for one month from the next meeting of the Board, for the purpose of allowing time to obtain the contents required; and in order to assist in procuring them, your committee have ordered the clerk to write to the persons who have it in their power to give such contents, requesting that they may have them given to the valuator without delay, as the want of such contents is the only thing preventing the valuator from having the valuation completed in the proper time.

(Signed) JOHN G. BURGESS, Chairman.

At a meeting of the valuation committee of the Board of Guardians of the Dungannon Union, held on Thursday, the 15th October, 1840,

Present, Alexander M'Kenzie and Henry Pole, Esqrs., and Mr. David Beatty.

It appearing to the committee that the contents of three townlands in the electoral division of Ballynagram, namely, Liscanduff, Carntree, and Annaghbeg, have not been furnished to the valuator, whereby the valuation has not been completed in the given time,

Valuation of Dungannon division submitted to inspection of rate-payers.

Recommendation to extend the time for completing the valuation.

It was resolved,—That the committee give power to the valuator to estimate, as well as he can, the contents of each man's holding in the above towns, and that they recommend the Board of Guardians to take such computation as the only contents obtainable.

(Signed)

ALEXANDER M'KENZIE.

HENRY POLE.

DAVID BEATTY.

APPENDIX.

Dungannon.

Evidence

Evidence.

HENRY POOLE, Esq., Deputy Vice Chairman of the Board of Guardians, *examined*.

Is agent to Earl Ranfurly, whose estates are principally within the Union.

Henry Poole, Esq.,
Guardian.

Was a member of the valuation committee, and concurred in the Report of the committee, that Mr. Griffiths' valuation should be taken as the basis of the valuation of the valuator.

In adopting that Report it was not his opinion, nor that of the Board, that the valuator was to be bound down by Griffiths' valuation, but that the valuator should exercise his own discretion as to adopting or altering, or adding to that valuation, as his judgment should dictate.

Valuator not to be
bound by Griffiths'
valuation.

The committee did not further interfere with Mr. Wilson in his valuation. Does not think the committee gave any directions to the valuator as to the principle on which he should value, except what appears by the Report.

Believes the valuator did, in fact, inspect each farm and valued it at what he considered a fair rent, as between landlord and tenant.

Believes valuator
valued at the fair
rent as between
landlord and
tenant.

Earl Ranfurly's property in the Union comprises between 10,000 and 12,000 acres; nearly two-thirds of which are held by the tenants without leases.

The other principal proprietors of property within the Union are, Lord Powerscourt, Lord Caledon, Lord Charlemont, Colonel Verner, and others.

Has lately had an opportunity of meeting and speaking with the landed proprietors and agents to properties within the Union, and considers that the valuation has given the utmost satisfaction to the landlords.

In fact, the best test in his opinion of its being a fair valuation is, that scarcely a single objection to the valuation remains, excepting some relating to a difference in the quantity of land, and to a question about machinery and quarries.

Valuation satis-
factory to landlords.
Test of its being a
fair valuation.
Scarcely an objec-
tion remaining.

The valuator, he believes, obtained rentals from the landlords; or at least the names of the occupiers and the quantity of land held by them.

At all events he had full access to Lord Ranfurly's office to ascertain everything necessary to assist him.

The average rent of land on Lord Ranfurly's estate is about 1*l.* per English acre. The valuation is, in his opinion, somewhat lower than the generality of the rents payable within the Union. On the Ranfurly estate it certainly is below the rents paid.

JOHN FALLS, Esq., an elected Guardian, *examined*.

John Falls, Esq.,
elected Guardian.

Understood the resolution of the Board, that Mr. Griffith's valuation was to be taken as a basis or guide by the valuator; his understanding was, that the valuator was to take, suppose a particular farm, and by inspection of it ascertain whether it was fifty or fifteen per cent, or how much above or below Griffiths' valuation, and then to estimate the value of the rest of the Union by reference to the value of that farm. Believes the valuator did not regard the opinion of the Board on the subject of Griffiths' valuation. The valuation is about the fair moderate letting value of land. It has given satisfaction to the rate-payers.

MR. JAMES M'NEILL, elected Guardian for the Donaghmore Division, *examined*.

Mr. M'Neill,
elected Guardian.

Holds in this Union about 100 acres of land. Is a valuator, and in the constant habit for the last fifteen or twenty years of valuing land. Is the paid valuator of the Earl of Ranfurly, Earl of Castlestewart, and Lord Viscount Powerscourt's estates.

Considers the government valuation, except in the mountain districts, too low; and that in valuing for the poor rates, the fair rent as between landlord and tenant should be the rule. That was the instruction he gave Mr. Wilson.

In valuing for poor-
rate, fair rent should
be the rule.

He valued forty-seven townlands, containing about 8500 or 9000 acres, on Lord Powerscourt's estates about four years ago, for the purpose of his Lordship making lettings on lease.

At the time of Mr. Wilson's valuation he looked into his papers and found a very trifling difference between the two valuations. The difference arose from this, that in valuing for his Lordship and other landlords, he never put an additional value on the farm by reason of the house on it, whilst Mr. Wilson was bound to value all houses as well as the land.

Trifling difference
between his valua-
tion and Mr.
Wilson's.
Cause of difference.

Thinks Mr. Wilson kept his eye to the value of the land always. Means thereby that he looked to the value of the farms as if he were valuing for a fair letting to a solvent tenant. Mr. Wilson's valuation may be somewhat lower than his in the smaller farms, consisting of from two to four acres. A small farmer of from six to twelve acres generally has some manufacture in cloth either for himself or to drapers. Such men live very moderately, seldom having much more than potatoes and milk throughout the year. His value of such a farm of from six to twelve acres, as near as he might come at it, would be to put the rent of 1*l.* per acre on it. In large farms the average rent is about 18*s.* an acre. On Lord Charlemont's estates the lands are let very low. So much as 10*l.* an acre of purchase money has been got by a tenant on the estate where there have been recent improvements. Does not know whether

Value of small
farms 1*l.* per acre.
Large farms 18*s.*
per acre.

APPENDIX.

Dungannon.

Rate-payers satisfied with valuation.

the valuation of the Armagh Union is a higher or lower valuation than Dungannon. Believes it is higher in Armagh than in Dungannon for the same quality of land. Land lets nearly one third higher in the small farms in the county of Armagh than it does in this county. The people there are more numerous and more industrious than in this district.

The rate-payers are perfectly satisfied with the valuation.

MR. GEORGE MOORE, Clerk of the Union, *examined.*

Mr. Moore, Clerk of Union.

The valuator brought in to the Board the field-books of each Electoral Division as he completed the valuation of it. The works lay for inspection with him, and he gave notice to the division that they would lie open for inspection for a month, for two hours each market-day in the week, namely, Monday and Thursday.

Complaints of rate-payers; too much land charged for, and value too high.

A great number of the rate payers attended and inspected the books, particularly the persons, from the mountains, who came in great numbers. A great many complained that there was more land against them than they held, and some that they were too high rated. Most of the complaints were that the value was too high; very few that the value was too high in comparison with the other rate-payers; not half a dozen in the Union; generally the Guardian of the division attended on Thursday, the principal market-day. Where the Guardian stated that the person did not hold the quantity of land charged, or that the valuation was too high, he, the clerk, took down the objection in writing, and gave it to Mr. Wilson the valuator.

Mode of revision.

Mr. Wilson generally met the rate-payers in the office of the clerk of the Union, and disposed of the objections there. Mr. Wilson then took the field-books and made out the rate-books, and laid them before the Board. Some alterations were afterwards made in the books about the turf bogs, and after that, the notice that they would remain open for twenty-one days was given. The whole of the written objections taken down by him or lodged with him by the rate-payers did not exceed 100; about twenty were for over value. Does not know if the committee of valuation gave any particular instructions to Mr. Wilson about the mode he was to value except what appears from the Minute Book and papers which he has produced.

Was a valuator under Paving Act in Dungannon. His valuation of the houses is a shade higher than Mr. Wilson's.

He himself was one of the sworn valutors under the Paving and Lighting Act for the town of Dungannon. His valuation of the houses in the town is a shade higher than Mr. Wilson's. Mr. Wilson made his valuation about September, 1839; his was made in September 1840. He, the witness, valued the houses on a fair letting value, as if they were to be let to a good and solvent tenant from year to year. His valuation is exactly about what is the rent paid. It is in some few instances more than the rent paid, but that is where there are old tenants who hold from Lord Ranfurly, who does not remove an old tenant; but if those houses were to be let, they would bring more than the rent they pay.

Land in the Union let without lease.

Most of the land in the Union is let without lease; it is let on an average at 1*l*. the English acre for good strong ground. The letting of land in the Union does not generally exceed that.

Guardians satisfied with valuation.

The Guardians all expressed themselves perfectly satisfied with the valuation.

Mr. Wilson, Valuator.

MR. ROBERT WILSON, valuator of the Union, *examined.*

Is a valuator and surveyor by profession, and has been so for a number of years.

Holds about fifty acres of land within the Union.

Had previously surveyed greater portion of the Union.

Was appointed valuator of the Union by the Board in October, 1839; was furnished with Griffiths' maps, field-books, and the county-cess applotments. Had the tithe composition of the parish of Drumglass, but made no use of it. Got some few surveys. Had himself within the last ten years surveyed the greater portion of the Union, and had the maps and surveys in his possession. Was not furnished with any return of the rents or copy of the rentals.

Had no assistants.

He had no assistants in the valuation of the land, but afterwards employed persons to make out the calculations.

Did not inquire rents.

He did not inquire from the occupiers the amount of the rents payable by them; he was in a great degree aware of the rents from having been acquainted with most of the tenants in the Union.

Mode of valuation.

He walked over each farm, inspected the appearance of it, and the improvements on it, and put a fair letting value on it.

His mode of estimating the value of a farm is by what it is, from its appearance, likely to produce, and taking into account the convenience of roads, and its distance from the towns lying about it. The quality of the soil is also taken into account by him.

Has not in his valuation of the Union, in any case, made any particular estimate of what quantity of grain or other produce a farm would yield.

Always made an acreable value of the farm. Formed in his mind an estimate of the quantity of each separate quality of land in the farm, and then took an average of the whole, and entered that as the acreable value of the whole farm.

That acreable rent was what he believed a solvent tenant could afford to pay.

Definition of solvent tenant.

Considers a man a solvent tenant who supports himself according to his condition out of the produce of the farm, and pays the rent and the taxes and dues on the farm, and keeps the farm in the state in which he got it, if he does not improve it.

Put no separate value on farm-houses.

He did not put a value on the farm-houses, separately from the lands, but the value he put on the farms was something higher than what he would put on as a rent, if he was valuing the farm as between landlord and tenant, that is, for instance, between such a landlord as

Lord Powerscourt and his tenants. Where he put an increased value on a farm over what he would put as a rent between landlord and tenant was, where the tenant had made improvements to a considerable extent. The reason why he put a greater value on farms in such cases is, that if sent out to value for a landlord,—for instance, Lord Powerscourt,—he would not take into account the value of the buildings, but merely the value of the soil.

That is the rule always followed by valuers in valuing between landlord and tenant in this country. The landlord never charges anything by way of rent for the buildings, but merely puts on the rent returned by the valuator as the value of the soil.

In valuing the Union, he made no difference in the value he put on where the tenant held by lease; he did not inquire whether the tenant had a lease or not.

The value he put on was what he thought a solvent tenant could pay as rent for the land with the improvements on it, as if he were to live all his life on the land.

The value he put on was what a solvent tenant ought to pay for the land and the buildings and improvements on it to a head landlord, not to a middle man: a middle man looks for more than the fair value of the ground.

If a man were to become tenant to a farm in the Union at the value he, witness, has put on it, he would get from 10*l.* to 12*l.* an acre purchase money for his tenant-right. That would be the case on any estate in the Union except in the mountainous districts.

He did not increase his estimate of the value of the farms by reason that so much would be given as purchase money to the tenant. His reason is that he thinks the money so given is beyond the intrinsic value of the land.

The anxiety to get possession of land is so great, that people will give the money for it, though the land be let at the fair rent.

Has a knowledge of the way land is let in the county, and thinks that a very good criterion for a man to judge of the value of land.

Being a farmer, valuator, and surveyor, thinks he has a just notion of the value of land, and can form a good opinion of its value without making a particular calculation of what it is likely to produce for an average number of years. Did depend very much on his general knowledge of land in making his valuation of the lands in the Union.

Got the cess returns from the barony collectors, and in every case allowed the sums actually paid in each case.

He valued the houses in the towns and villages according to what he thought they would fairly let at. At night he generally compared his valuation of the houses with Griffith's, and found his valuation about the same as Griffith's, that is, his valuation would be about the same as Griffith's if one-third were taken off the value.

His valuation of the lands in the Union differs very much from Griffith's, for instance, in the value of the town parks about Dungannon. Does not think Mr. Griffith took into account the situation of such town parks, as they are not rated in Griffith's valuation higher than some spots in the mountains.

A great deal of the land in the Union is held at will. There is no disposition to grant leases; the tenants do not feel much interest about them. That is the case generally in the Union. If a tenant pays his rent, he is never removed.

A farm of ten acres, of fair quality of land with a middling house on it, would bring on an average 18*s.* an acre.

Does not think that a farmer holding only about ten acres of land could do more than support himself and his family, and pay a rent equal to what he has valued the land at.

Thinks the average of the lettings on Lord Charlemont and Lord Powerscourt's estates within the Union is about 17*s.* the English acre. If they thought fit they could get as high as 30*s.* an acre.

Thinks Lord Powerscourt's, Lord Charlemont's, Lord Ranfurly's, Colonel Verner's, and Mr. Grough's properties let at fair rents.

The properties of smaller proprietors and middle men within the Union are let high.

Thinks that if all the rents actually paid by the occupiers in the Union were added together, there would not be much difference between the amount of them and of his valuation.

APPENDIX.

Dungannon.

Landlords do not charge rent for buildings but merely for the soil. Made no difference in his valuation where tenant held by lease.

At his valuation tenant-right would bring 10*l.* to 12*l.* an acre.

Anxiety of people to get possession of land.

Compared his valuation with Griffith's.

His valuation of lands differs from Griffith's.

Much land in the Union held at will.

Average rent of 10 acre farm 18*s.* the English acre.

Average of lettings on Lord Charlemont's and Lord Powerscourt's estates 17*s.* the English acre.

RENT and VALUATION of £10 BOROUGH ELECTORS (registered 1832 to 1840) so far as ascertained.

Marked thus (*) appear to have been registered in 1832, and re-registered at date in column 2.

CASTLEDERG UNION.

APPENDIX.

*Castlederg.*Extracts from
Minute Book.*Extracts from Minute Book of Board of Guardians.*

At the first meeting of the Board of Guardians, held on the 14th day of June, 1839,—present 2 ex-officio, and 14 elected Guardians,—

The best course to pursue for obtaining a fair valuation of the several hereditaments within the Union was brought into consideration.

Appointment of
Committee of valuation.

Resolved,—That a Committee of 7 be appointed to inquire into and report upon the subject as soon as possible.

That Mr. Edward Sproull, Mr. John Barclay, Mr. Robert Sproull,
Mr. John Mathewson, Mr. Andrew Nelson, Mr. Thomas Sproull,
Mr. John Johnston,

be the members of this Committee.

James Anderson, Vice-Chairman.

At a Meeting of the Board of Guardians, held 16th August, 1839,—present 3 ex-officio, and 12 elected Guardians,—

The Chairman of the Valuation Committee having submitted their Report to the Board, the same was read and considered.

Report of the Valuation Committee
adopted.

Resolved,—That the Report of the Valuation Committee be adopted by this Board, and a copy be forwarded to the Commissioners for their approval, upon the receipt of which that the Committee do issue an advertisement in the three Londonderry papers, for tenders from competent valuers.

That the Valuation Committee continue to act in manner recommended in the Report.

At a meeting of the Board of Guardians, held on the 9th September, 1839,—present 1 ex-officio, and 11 elected Guardians,—

Tenders for valuation.

The Board proceeded to open the tenders for the valuation of this Union. One from Cormick Kevun and Thomas M'Hugh; 1*l.* 10*s.* per 1000 acres; time, 6 months. One from James Buchannon, of Lackagh; 6*s.* per day; 18*s.* per 1000 acres; time 12 months; securities, Rev. S. Armour, and Mr. Samuel M'Crossan. One from R. Monteith; 1*l.* 15*s.* per 1000 acres; 16*l.*; time, 12 months.

Fresh advertisement ordered.

Resolved,—That it is most important to secure the services of a competent person or persons to undertake the valuation of this Union, and that fresh advertisements for tenders be inserted in the Londonderry papers, to be considered on Friday, the 4th October.

At a meeting of the Board of Guardians, held on the 4th October, 1839,—present 3 ex-officio, and 10 elected Guardians,—

Further tenders for valuation.

The chairman proceeded to open the tenders for the valuation of the Unions. One from William Noble, of Newton Stewart; 1*l.* 18*s.* per 1000 acres; security, Lieutenant David Love, Milltown, and Mr. Andrew Welsh, of Magheracolton. One from Messrs. Montgomery and Morrow; 1*l.* 15*s.* per 1000 acres; to be completed on the 1st November, 1840; securities, Samuel Rankin, Esq., Strabane, and Mr. C. M'Farland, Gort. One from Cormick Kevun; 1*l.* 10*s.* per 1000 acres; work to be completed in 8 months; and proposed to find an assistant. One from James Wilson Robinson, of Fintona, and James Bucannon; 7*s.* 6*d.* per day; 1*l.* 10*s.* per 1000 acres; total, 138*l.*; time, 12 months; securities, Rev. S. Armour, and Henry M'Crossan. One from J. Lynch; 1*l.* 16*s.* per 1000 acres; gross amount, 165*l.* 12*s.*; time, 14 months; sum per day, 10*s.*; securities to be produced.

Tender of Messrs. Montgomery and Morrow accepted.

Resolved,—That Messrs. Montgomery and Morrow's tender be accepted for the Valuation of the Union, and further, to be allowed 10*s.* per day for revaluing and attending appeals when both attend, and 6*s.* per day when only one attends. When the appeal is lost, to be only allowed half the above sum.

At a meeting of the Board of Guardians, held 11th October, 1839,—present 1 ex-officio, and 4 elected Guardians,—

The bond for the valuers' securities having been laid before the Board duly signed, it was resolved that the same be accepted as the articles of agreement.

The bond having been duly signed by the valuers, W. C. Montgomery, and Henry Morrow, for the due performance of their duties, the same was accepted of by the Board.

Read the letter from the Commissioners of the 7th October, 1839, approving of the appointment of W. C. Montgomery and Henry Morrow as valuers for the Castlederg Union.

At a meeting of the Board of Guardians, held 7th February, 1840,—present 7 elected Guardians,—

The valuation of the Listimore, Magheracreggan, and Killeter divisions, having been laid before the Board by Messrs. Montgomery and Morrow,—

Having found the divisions irregularly made out upon the sheets, it was resolved that instructions be given to Messrs. Montgomery and Morrow to fill the same up regularly for the next meeting of the Board.

At a meeting of the Guardians, held 6th March, 1840,—present 1 *ex-officio*, and 6 elected Guardians,—

Read several letters from Mr. Montgomery respecting the valuation.

Ordered,—That a letter be written to Mr. Montgomery, stating the opinion of the Board on this subject.

At a meeting of the Board of Guardians, held on the 3rd April, 1840,—present 17 members,—

Read a notice from Messrs. Sproull and Craig respecting the valuation of the Union, stating that the Ordnance valuation was the safest valuation for this Union.

After some discussion on the contents of this notice, the motion was withdrawn, and agreed that a meeting of the Committee of Valuation be called, to meet on Saturday, at 11 o'clock, forenoon; and that Messrs. Montgomery and Morrow do attend, and make a return of the field-books used by them as far as the work has been done.

At a meeting of the Board of Guardians, held the 1st May, 1840—6 members present—

Read the Circular from the Commissioners, dated 20th April, 1840, ordering a return to be made of all instructions given by the Board or Valuation Committee to the valuers of this Union.

Referred to the letter in answer to this, inserted in Letter Book.

Ordered, That the clerk do write to Messrs. Morrow and Montgomery, in consequence of non-attendance, as promised by them, to bring in the valuation of a few more of the electoral divisions as soon as they possibly can; and that, on their arrival, the clerk do call a meeting of the Valuation Committee.

At a meeting of the Board of Guardians, held the 7th August, 1840—15 members being present—

The following resolution was proposed by Mr. Sproull:—That it is the opinion of the Board that the valuation of the lands in the Castlederg Union, as far as returned by Messrs. Montgomery and Morrow, is very unequal, frequently too high, in many instances up to a rack-rent value; and that, in their opinion, considerable modification is indispensable.—[This resolution was withdrawn.]

Resolved, That the consideration of the above notice be postponed until the valuations now in progress are all completed.

Resolved, That the valuations already handed in by the valuers be returned to them in order to their being completed. That this Board confidently hope that the whole valuation will be handed in complete by the 4th September, in order that the same may be considered previous to it being laid open for inspection, as the order of the Poor Law Commissioners directs.

At a meeting of the Guardians, of the 4th September, 1840—12 members being present—

Messrs. Montgomery and Morrow handed in their valuation of the Union. Upon inspection, some matters of detail appeared to be required to complete it: this they undertook to have done by Saturday, the 12th instant.

At a meeting of the Guardians, on the 12th September, 1840, for the purpose of receiving from Messrs. Montgomery and Morrow the valuation of the Union—present, Thomas Anderson, Esq., Thomas Sproull, Esq., Andrew Nelson, Esq.—

The valuation of the Union having been handed in by the valuers, the same having been examined, and found all filled up,—

Ordered, That advertisements be made in the Londonderry Journal to that effect.

At a meeting of the Guardians, held the 12th October, 1840—there being 16 members present—

This being the day appointed for taking the objections to the valuation into consideration, it was agreed that the division of Bomackatall be first taken.

1. Henry Rutlege, of Kilmore Irwin, complained that he was too high valued: arranged—William Rutlege, 11*l.* 5*s.*; Charles Rutlege, 6*l.* 15*s.*; Henry Rutlege, 7*l.*

2. Mr. Sproull, of Drumgallon, reduced to 55*l.* land, and 8*l.* house—63*l.*

3. Samuel Peleps, of Kilmore Robinson, reduced to 12*l.*; Kane, 5*l.* 10*s.*; M. Winters, 2*l.* 5*s.*; S. Winters, 2*l.* 5*s.*

4 & 5. Patrick Crossan and John Irwin, Bomackatall, complained of being too high valuation:—confirmed.

6. James Moore, of Edenashaulaght, reduced to 6*l.*

7 & 8. William Moore, 6*l.* 10*s.*; William Irwin, valuation confirmed.

9. Christopher Turner, ordered to send in a correct list of rent; S. and G. Gordon, valuation confirmed; several others in the division having in objections, the whole was confirmed.

In the Drumquin Division, the valuation of the whole was confirmed.

Tully Division was confirmed.

Killen Division was next taken into consideration.

When all the objections to the valuation were taken into consideration, the whole was confirmed.

APPENDIX.

Castlederg.

Notice of Messrs. Sproull and Craig respecting valuation.

Committee of valuation to meet. Valuers to return field-books.

Resolution of Mr. Sproull; the valuation too high.

Postponed.

Valuation handed in. Returned to valuers.

Valuation handed in. Advertisements ordered.

Objections considered: Bomackatall.

Valuation of Drumquin. Valuation of Tully & Killen confirmed.

APPENDIX.

DOOISH.

Castlederg.

Valuation of Dooish.

60 to 69. Messrs. Sproull and M'Conny, valuation confirmed.

Oliver Sproull complained that there was no subdivision between some farms of his (left to be settled by the valuator). Harper Sproull, Henry M'Quade, Richard M'Cuny, Francis M'Carney, and John Beatty's valuation were all confirmed.

1. Owen M'Anable reduced to 16*l*.

2 and 11. Michael M'Carney and John and James Wade, valuation confirmed.

28. Michael M'Wade, reduced to 6*l* 15*s*.

Magheracregan.

MAGHERACREGAN.

The whole valuation of this division was confirmed.

Castlederg.

CASTLEDERG.

67. Rev. S. Hamilton M'Bernard reduced to 60*l*.

Corgary.

CORGARY.

The whole valuation of this division was confirmed except No. 113, John Forsythe, reduced to 70*l*.

Clare.

CLARE.

Several objections to the valuations of this division were opened, when they were all confirmed except

59. John Irwine, Coolnacreeght, reduced to £19 0 0

58. Joseph Orr, ditto ditto 13 0 0

69. John Murtland, ditto ditto 11 0 0

156. Patrick M'Manus, Ardbarren, ditto 8 10 0

Castlegore.

October 13.—The adjourned meeting of this day having been opened, the Division of Castlegore was taken into consideration, when the following arrangements were agreed to:—

164. William Adams, Golan. Adams reduced to £50 0

89. Oliver Sproull . . . £19 96. Robleton . . . 44 0

90. James Scott . . . 16 100. Charles Young . . . 7 0

92. John Thompson . . . 17 101. W. Hamilton . . . 22 0

95. J. Hamilton, sen. & jun. 9 102. C. Henderson. . . 7 10

104. H. Hamilton . . . 13

The following arrangements were then made in Golan:—Sproull from No. 12 to 23; Mill, 6*l* 10*s*.; James Porter, 6*l* 10*s*.; William Porter, 3*l* 5*s*.; Kyle Young, 8*l* 15*s*.; A. Young, 10*l*.; A. Sheils, 9*l*.; John Henderson, 12*l*.; Arthur Sproull, 18*l*.; W. M'Crossan, 14*l* 5*s*.; A. Deery, 17*l*.; M. Sproull, 3*l*.

121 & 122. James Allison, 16*l* 10*s*.; Andrew Allison, 15*l* 10*s*.

128 & 127. Charles Hemphill, 9*l*.; Murray, 4*l* 10*s*.

38, 39, 41, & 42. James Kergan reduced to 6*l* 10*s*. †

Castlederg.

CASTLEDERG DIVISION.

48. Ebenezer Moore reduced to . . . £34

3 & 4. W. M'Hugh 60

30. Factory and tenements 18

127. Matthew Hamilton, of Dactons, reduced to 35

102, 103, 104. Phel. M'Ginchy, of Kileroagh and Partners 35

James Hemphill, of Castlesessagh . . . 33

182. Nehemiah Rolstone, Kilelean . . . 20

176. Francis M'Glinty, Pullyernon . . . 6

Several other objections to the valuations in the division were confirmed.

Lisnacloon.

LISNACLOON DIVISION.

The several objections to the valuations of this division were taken into consideration when all were confirmed except the following, viz:—

38. J. and D. Gallon, Lisland, reduced to . . £17 0 0

83. F. M'Hugh, Legatmegan, do. . . 14 0 0

94. Felix Conolly, do. do. . . 4 10 0

James Lynch and J. M'Cormick, of Carracoughan, complained that they were too high valued; arranged thus:—

J. Johnston, 14*l*.; Lynch, 24*l*.; Dolan, 14*l*.; Doogan, 18*l*.

230. Mark M'Grath, Tiermongan, reduced to 9*l*.

Frederick Kyle, of Mornebey, complains that the whole town is not fairly divided.

Ordered, That they do get the whole town surveyed.

145. T. Mehan, Dreenan, reduced to 5*l*.; Rogers, to 6*l* 10*s*.

George M'Glin, of Mornebey, complained: deferred until a survey of the town be made.

242. William Hamilton, of Laught, valuation confirmed.

243. John Hamilton, of do., raised to . . . £12 0 0

264. Hen. Hamilton, of do., wants a subdivision.

Settled. Michael Morris and Henry Hamilton 7 0 0

Hugh and Henry Hamilton . . . 12 0 0

Killeeta.

KILLETA DIVISION.

When the several objections to the valuation of this division were taken into consideration, the whole was left by themselves and the valuator to the opinion of J. Anderson, Esq., their agent, to make such alterations as he thought proper.

R. A. FERGUSON.

At a meeting of the Guardians, held 12th February, 1841, there being present nine of the members, the Rate-Books having been laid before the Board, with a rate prepared of 12d. in the pound,—

Resolved unanimously, That Messrs. James Anderson, Edward Sproull, and John Johnston, do now sign the Rate-Books of the Union for a rate of twelvepence in the pound.

Extracts from Minute Book of Valuation Committee.

At a meeting of the Committee of Valuation, held on Monday, 12th August, 1839,—present Sir Robert A. Ferguson, Bart., and James Anderson, Esq., ex-officio Guardians; Thomas Sproull, Esq., Mr. John Barclay, Edward Sproull, Esq., Mr. John Johnston, and Mr. Andrew Nelson, Committee:

Report,—Your Committee recommend to the Board of Guardians that an endeavour be made to form a correct Valuation on the basis of the Ordnance Survey.

And, 1st, That copies of the townland maps, marked with red lines (denoting the quality of the land), and copies of the field-books of Mr. Griffith's valuation corresponding thereto, be procured for the valuator to be appointed.

2ndly, That he be also furnished with a list of occupiers from the county-cess applotments, and the contents of their occupations from the tithe valuations, when these last cannot be obtained from the landlords.

3rdly, That blank forms of the Schedule of Valuation, with the columns for rates and arrears, together with field-books, approved by the Poor Law Commissioners; and,

4thly, That such other information or documents as may tend to assist in determining the equitable valuation designed by the law, and can be obtained from the landlords, be procured for the use of the valuator.

With respect to the first-named documents, your Committee find that they can obtain the maps and field-books of the parishes of Termongamorgan, skirts of Urney, and Ardstraw; and we recommend that the maps of the others be procured, and that arrangements be made to put in the red lines and copy the field-books.

With respect to the second and third named documents, that we conceive that the clerk may take copies of that part of the county-cess applotments and tithe-valuation required.

That the forms alluded to be procured from Mr. Thom. With respect to the information last adverted to, your Committee desire to express their decided opinion, that upon the amount of assistance afforded by landlords and other persons interested depends the success of the work now about to be undertaken. It is a point upon which all are interested; because by the completion of an equitable valuation the cheerful payment of the amount to be levied upon each individual will be secured, appeals will be avoided, and all additional expense guarded against.

A circular, well adapted to secure the cordial co-operation required, having been laid before us by the Assistant Commissioner, we beg to submit it to your consideration, and recommend that the following course be adopted:—

That advertisements be issued for persons to value the townlands of the Union upon the basis of the Government survey; and for this purpose a valuator be required to value as many townlands as are necessary to effect a correct valuation.

That eight townlands at least be selected by the Valuation Committee, and that upon this valuation should be founded the general valuation of the Union; and that the Valuation Committee be authorized to issue advertisements forthwith to this effect.

That the Valuation Committee have full power to superintend the progress of the valuation and report to the Board from time to time as they see fit. The valutors be required to proceed in the valuation by electoral divisions, and give in the same to the Committee according as they are completed.

That previous to entering upon an electoral division the clerk should issue a circular to all landowners interested, and that, when the valuation of an electoral division is complete, the Committee acting as a Committee of revision should take into consideration such complaints as are made, and determine upon those which should be sent to your Board, to be considered finally in presence of the valuator.

That the Guardian for the electoral division in progress of valuation should, pending such valuation, be an ex-officio member of the Committee.

All which Committee humbly submit.

At a meeting of the Committee of Valuation, held on Saturday, 11th April, 1840, seven of the members being present,—

Read the letter addressed to Messrs. Montgomery and Morrow, that they should attend this meeting.

Mr. Johnston proposed that the valutors of this Union, Messrs. Montgomery and Morrow, do in future, in all returns now to be made, make a separation in the value of the houses from the value of the land, in a separate column in the field-books. The motion was seconded by Mr. John Barclay and put from the Chair, when there appeared for the motion 3, against it 3. After the division Mr. Johnston withdrew his motion, when it was resolved, That any houses the valutors think more than sufficient for the use of the farms will be shown separate in the field-book.

At a meeting of the Valuation Committee, held on the 15th May, 1840,—present James Anderson, Esq., Thomas Sproull, Esq., Mr. John Johnston, Mr. John Barclay,—

Mr. Henry Morrow laid before the Committee of Valuation the valuation of Killen and Congary Divisions. The same having been examined and considered by the Committee,

APPENDIX.

Castlederg.

Rate declared.

Extracts from Minute Book of Valuation Committee:

Report of Valuation Committee.

Documents to be procured for Valuator. Griffith's maps and field-books.

Lists of occupiers from county-cess book.

Information and documents from landlords and others.

Maps & field-books can be procured.

Circular letter recommended.

Eight townlands to be valued; upon which valuation general valuation to be founded.

Committee to have power to superintend progress of valuation.

Committee to act as a Committee of revision.

Proposal that separation in the value of houses be made.

Motion withdrawn.

Mr. Morrow to cross-value Listimore and Magheracreggan.

APPENDIX.

Castlederg.

the Committee of Valuation recommended it to the Board of Guardians to be taken into consideration at the next meeting. That Mr. Morrow be ordered to cross-value some towns, to be selected from the divisions of Listimore and Magheracreggan.

At a meeting of the Committee of Valuation held on 19th June, 1840,—present James Anderson, Esq., Edward Sproull, Esq., Andrew Nelson, Esq., John Barclay, Esq.,—

Several of the electoral divisions having been returned by the valuers, the same were taken into consideration by the Committee.

Evidence.

Evidence.

Mr. Montgomery,
valuer.Mr. WILLIAM CUNNINGHAM MONTGOMERY, Valuator, *examined*.

Is a valuator and surveyor for the last 28 years. Is constantly in the habit of valuing estates. Is under-agent on Lord Abercorn's property, and had valued large portions of it for letting. Has also valued portions of Lord Castle Stewart's properties.

In October, 1839, was appointed joint valuator of the Union with Mr. Morrow. Mr. Morrow is a surveyor and valuator, and had been previously an assistant to witness.

Witness was well known to the members of the Board, and did not therefore think it necessary to lay testimonials before them. Mr. Morrow had testimonials from gentlemen whose estates he had valued.

Documents fur-
nished to valuers.

Witness and Mr. Morrow got from the Board Griffith's maps and valuations, and the county-cess applotments, but did not get tithe-books nor any tithe information.

Procured surveys and maps of Sir Robert Ferguson's property, of the church-lands of Killeter, and of Lord Castle Stewart's lands.

As under-agent and valuator of Lord Abercorn's estate, witness had in his possession the maps and surveys of that estate.

Did not get return
of rents.

Did not in any instance get a return of the rents payable by the tenants.

Board refused to
furnish particulars
of rents.

Did apply to the Board for a return of the rents payable by the tenants, as he deemed it part of his instructions to inquire into the letting of the lands.

The Board refused to furnish him with the rents, and informed him they wished the valuers to form their own judgment as to the value.

Witness and Mr. Morrow made the entire valuation of the Union themselves. They had no assistants, except for making out the calculations.

Valuers valued
separately, except
in doubtful cases.

Witness and Mr. Morrow generally valued separately, that is, each took distinct portions of the Union, but in cases where the witness or Mr. Morrow had a doubt or difficulty about the value of the land, he brought the other to go over the land, so as to have a uniform scale of valuation.

Intention of the
Board to have va-
luation made on
basis of Griffith's
valuation.

The Board of Guardians first intended that a valuation should be made of one or two townlands in each division, and then to try the value of those by comparison with Griffith's. If the Board found that the valuation of witness and Mr. Morrow was higher or lower than Griffith's valuation of the same townlands, then an average was to be struck on the difference, and a similar average being added to or taken from Griffith's valuation of the entire Union, the amount was to be taken as the valuation; the valuers were then only to apportion the amount amongst the occupiers according to the quantity of land they held.

Witness thought that was the way in which the valuation was to be made at the time he put in his offer for the valuation.

The Board afterwards in-
structed the valuers to
act upon their own judg-
ment.

Afterwards, the Board did not think that the proper way to have the valuation made, and witness and Mr. Morrow received instructions from the Board to act upon their own judgment in the valuation as in the usual mode of valuing property.

Witness had previously
valued Lord Abercorn's
property.

Witness had three years previously valued that part of Lord Abercorn's property lying within the Union, containing about 7000 acres.

Witness and Mr. Morrow first went over several townlands on that property; witness had with him at that time his field-notes of that former valuation; got Mr. Morrow to go over those townlands that lie in the Listimore and Magheracreggan divisions, and from his own opinion of the value, Mr. Morrow's valuation of those townlands very generally concurred with witness's former valuation.

Witness and Mr. Morrow afterwards separated, and went to value different districts of the Union.

In Feb., 1840, valuations
of three divisions handed
in.

In February, 1840, the valuations of Magheracreggan, Listimore, and Killeter were handed in to the Board. Killeter division was valued by Mr. Morrow, the other divisions by witness.

Did not act on the reso-
lution of the Committee
of Valuation of April, 1840.

Witness did not act upon the resolution of the Committee of Valuation of April, 1840, that the valuers should make a separate return of the value of the houses from the value of the lands. The resolution was afterwards set aside by the Committee.

No general cross-valuation was made as recommended by the Committee; but where either valuator had a wish or a doubt about his own valuation, he got the other to go over the lands: that occurred in several instances. The result generally was, that they were both acting on the scale adopted in the valuation of the three first divisions.

Scale of valuation adopted
by valuers.

The scale that witness and Mr. Morrow valued the Union on was that adopted by witness in his previous valuation of the Marquis of Abercorn's property, with the addition of putting a value on the houses, and adding the tithes.

The object of witness and Mr. Morrow in their valuation was to have it made at a moderate letting value, adding to it the value of the houses and the tithes.

In valuation of Lord Aber-

In his previous valuation of the Marquis of Abercorn's property he went on an acreable

valuation; that is, walking the lands, and putting a per acreage value on each quality of the ground. He went into an estimate of the value of the farm by the quality of the soils, localities of the farm, whether inland or outland; whether near a town or more remotely situated; whether highly elevated or low lands. In valuing for landlords, no specific sum is put as a value on the houses separately from the land, but the buildings on the farm generally enhance its value; that is, they make it form one of the considerations of convenience.

In valuing for Lord Abercorn he took into consideration the average price of produce for the previous five or six years, and the probable fluctuations for the coming five or seven years.

There is an ample supply of limestone gratis, and gratis turbary, on the estate. Did not take these advantages into consideration in valuing for Lord Abercorn, because they are boons to the tenants which are sometimes withheld.

During the progress of the valuation for the Union, was employed to value for letting, as between landlord and tenant, a part of Lord Castlestewart's estate, lying within the Union, to the extent of about 1000 acres.

Witness availed himself of his knowledge of his previous valuation of Lord Abercorn's estate, made, his valuation of that and of Lord Castlestewart's property, serve as his valuation for the Union, with the addition of a sum for the value of the houses and for the tithe.

The valuation of Lord Abercorn's property was made by the direction of his agent; his instructions were to value the land so as to give the tenant a good interest in the property and to do justice to the landlord. The interest the tenants have enables them to register votes out of their farms.

In valuing for the Union did go over Lord Abercorn's estate—although he had previously valued it—walked over the several other portions of the Union, which he valued—does not mean to convey that he examined into the value of the other parts of the Union, which he valued with the same minuteness that he valued for Lord Abercorn or Lord Castlestewart. Did not examine into the nature of the soils by digging, excepting in Mr. Sproull's ground, which he did at Mr. Sproull's instance. The valuation was made by a cursory view of the land—such as was afforded by the surface, and the boundary ditches—thinks any man who is in the habit of valuing land will form a very just notion of its value without going through its value in detail.

In valuing for Lord Abercorn did not take into consideration the competition for land, as the agent does not recognise the tenants disposing of his interest in the farm.

There is a tenant-right existing in lands in the Union; that is, that the tenant gets a sum of money for his possession or interest in the farm whether held by lease or not. In valuing for a rent between landlord and tenant, witness does not put an increase of rent on the tenant because he may get a sum of money for the purchase of his interest.

Did not in his valuation of the Union take into his estimate of the value he put on the and the purchase-money which a tenant would get for his interest in the land.

Did not think the utmost rent that could be got was what he was to value the land at, but put down the value at what he considered a fair and moderate rent should be. Took the directions in the field-books as his guide, and generally read the instructions from them to the tenants.

There is much sub-letting in the Union and rack-rents obtained; but witness did not value at the rack-rent.

In ascertaining the value, witness never took into his consideration that a man would hold the land for a year only. There is no instance of in it the country: nor did he consider whether the tenant was to have a lease of the land or not. A tenant at will would promise to give more in the way of rent for land than a lease-holder, because he would be at liberty to quit the land after two or three years, if he found the rent too high.

There is the greatest possible difference in the extent of the farms within the Union. The farms run from 10 to 50 acres in the close parts, and in the mountainous districts 200 acres. The extent of the farms did not therefore enter into his consideration in estimating the value.

He did not make any particular estimate of the profit which the tenant was to make of the farm; but he considers that in small farms, not immediately near towns, of about 100l. produce in the year, the farmer ought to have about 30l. per annum, out of which he would have to support himself, his wife, and children; that is, over and above the support of his servants.

That would be a reasonable remuneration for the farmer. Thinks that is about the value put upon the lands by witness both in his valuation of the estates and of the Union.

The Marquis of Abercorn's rents are fair letting rents; so are Sir Robert Ferguson's and Lord Castlestewart's. The tenants on those estates who have capital must realize profit from the present price of produce.

The rents of those estates were data on which his valuation of the Union was partly made, enhanced by the other considerations of the value of the houses and the tithe. His valuation for Lord Castlestewart gave the highest satisfaction to the agent and the tenants; (produces a letter from Mr. Evans, the agent of Lord Castlestewart, dated 28th September, 1840, expressive of the utmost satisfaction with his valuation both as regards the landlord and the tenant.)

The greater part of Lord Abercorn's property is not leased, and is held at the rent put on it by witness.

APPENDIX.

Castlederg.

corn's estate, went on an acreable valuation. Grounds on which he forms estimate of value.

No specific sum put on the houses.

Average price of produce taken into consideration.

Employed to value land for Lord Castlestewart..

Made his former valuations serve for the valuation of parts of the Union.

Instructions as to valuing land for Lord Abercorn.

In valuing for the Poor Law walked over the lands.

Valuation made on a cursory view.

Tenant-right exists in the Union. In valuations does not put increased rent on tenant by reason of value of tenant-right.

Utmost rent that could be got not the value to be put on the land, but the fair and moderate rent.

Subletting in Union and rack-rents. Did not value according to rack-rent.

Did not consider whether tenant was to have a lease or not.

Extent of farms in the Union.

Made no estimate of the profit tenant was to make.

Profit which tenant ought to have.

The reasonable remuneration to the farmer.

Data in valuation of Union.

APPENDIX.

Castlederg.

Relative proportion of valuation to rents. Valuation of houses in villages at actual letting value.

Did not make particular inquiries as to rents.

His valuation of Scarvaghan is under the rents received.

Explanation of the Board's Minute of 6th March, 1840.

Thinks his valuation is almost a balance on the letting rents on Lord Abercorn's property. Thinks that the valuation of the Union is under the rents of recent lettings of small properties; thinks it to be under a fourth or fifth. His valuation on the larger properties is just about the rent reserved on late lettings.

Witnesses valued the houses in the villages at what was the actual letting value, not with reference to Griffith's valuation.

Did not make particular inquiries as to the rents payable by the tenants; did not make an entry of the rents where he ascertained them. He has an entry of the amount of rent payable out of the townland of Scarvaghan: that property, in his opinion, is let above the value. The rents payable amount to 314*l.*, his valuation is but 262*l.* His valuation is the fair value of those lands; it is on the same scale as that of Lord Abercorn's.

[In explanation of the minute of the Board of Guardians of the 6th March, 1840, directing a letter to be written to witness, he states that he made applications to the Board in the month of February, 1840, respecting the views of the Board relative to the valuation being made on the basis of Griffith's valuation, and for information from the landlords as to surveys; and that he received a letter in reply from the Board, which he produced, dated the 7th March, 1840, apprising him that he was answerable for the completion of a fair and correct valuation of the same, according to the 63rd and 64th section of Poor Relief Act, and that further communication had been directed to be made to the landlords.]

EDWARD SPROULL, Esq., Deputy Vice-Chairman, *examined.*

Edward Sproull, Esq., Deputy Vice-Chairman.

Is not a proprietor in fee, but holds about 240 acres of land within the Union.

Mr. Montgomery, one of the valutors of the Union, is a regularly educated surveyor, and has been engaged as such for many years. Mr. Morrow, the other of the valutors, is also a surveyor and valuator.

Valutors jointly appointed. Were furnished with maps and surveys.

The valutors were jointly appointed by the Board to value the Union.

They were furnished with Griffith's surveys, and with private surveys, as far as they could be obtained from the proprietors of the lands, and with the tithe-composition books and the county-cess applotments.

But not with rentals.

Does not think they got any rentals of property. There is such a variety of tenure in the county, and such old leases within the Union, that the landlord's rentals would not be a guide to the valutors.

The valutors valued separately—they each took a division of the Union and valued it by himself: that was so generally, but in some cases they valued in conjunction, to test each other's rate of value.

The Board at first resolved to have the valuation made on the basis of the Ordnance valuation.

He intended by that, and he believes the Board also intended by it, that if upon examination of a certain number of townlands the valutors considered the Ordnance valuation too high or too low, the valutors were to ascertain the exact difference between it and the net annual value, and make the difference the data for the value of the rest of the Union.

His meaning of net annual value.

He means by the net annual value what the tenant could afford to pay his landlord—what a new solvent tenant could afford to pay, making the allowances pointed out by the Act.

Valuation of three divisions handed in to the Board. Board of opinion that the valuation was a fair one.

In February 1840, the valuation of the three divisions of Listimore, Magheracreggan and Killeter, were laid before the Board. The Board examined the valuation. The Board came to the opinion that the valuation was a fair one, on the ground that the landlord, the Marquis of Abercorn, who is the principal proprietor of the property in the first two divisions, had given leases to the tenants very recently, within the last two or three years, at rents very nearly the same as the valuation. The valuation generally exceeded the landlord's valuation in those divisions.

Valuation exceeded the landlord's rent in those three divisions.

On the two latter divisions, of which he speaks with greater knowledge, the difference was not much—so trifling, that it seemed to him that Mr. Montgomery, who valued those divisions, had availed himself of his previous knowledge, as he had valued the estate for the proprietor about three years previously.

The Board would have been very well pleased to have had the rest of the Union valued after the same scale; the general impression of the Board was that the valuator should go on with the valuation in the same manner.

At the time of the first inspection of the valuation of the three divisions before mentioned, he was under the impression that the valuation had been made according to the basis of Griffith's valuation.

He, however, afterwards found that the valutors did not confine themselves to the Ordnance valuation, but valued the three divisions according to the terms of their bond, which required them to take information from other sources than Griffith's.

He thought that, if that general scale was abandoned, the Union would be liable to the chances of great variations in the scale of value. He, therefore, at a meeting of the Board in April, 1840, brought forward a resolution that the valutors should adhere to the basis that was laid down.

He withdrew that resolution, as he found that the valutors had by that time gone through the half of the Union, and he did not wish to run the chance of having greater inequalities in the valuation by having the remaining half of the Union valued in a different manner from the half that had been already gone through.

The Committee of Valuation seldom met; anything that was done relating to the valuation was almost entirely done at the Board.

The resolution of the Committee of Valuation of the 11th April, 1840 (that the valuator should make, in all future returns, a separation in the value of the houses from the value of the lands), was dropped. It was not acted on either by the Committee or the valuator.

The valuator afterwards sent in the valuation of the townland of Killen and Corgarry. The occupiers of those townlands thought they were more highly valued than those on Magheracreggan and Listimore, and they wished Mr. Morrow, who valued their divisions, should go over the division valued by Mr. Montgomery, so as to see if both divisions were valued on the same scale. The impression on his mind is, that the cross valuation was made as the Committee had ordered, for after the revision all complaints ceased.

When the valuator sent in their books, which was in the month of August, 1840, he looked through them. Had a good knowledge of the part of Castlegore division, and considered the valuation was too high, and that the valuation was unequal. The inequality was that the rent put by the valuator was more than what the land would bring if let by Lord Abercorn. The land was held by an old lease, and underlet to several tenants. The valuation came very nearly to what the land was let to the under-tenants.

The under-tenants could not pay the rents they were under unless they got indulgence. He thought that the rent they were under was not the fair value to be put on by the valuator: for if they valued land let by Lord Abercorn at 15s. an acre, he thought they had no right to value land of the same quality in any other part of the Union at a higher rate.

He thought from the instances he himself knew, that the inequality of the valuation was general throughout the Union, and he therefore brought forward the resolution which appears on the minutes that the valuation was too high and up to a rack-rent.

The objections to the valuation were about fifty or sixty; there were no appeals. Two days were given by the Board to the hearing of the objections, and that settled all and gave satisfaction. The objections being disposed of, is now satisfied that the inequalities have been got rid of as far as it was possible. He is now content with the valuation.

He cannot speak from his own knowledge of the valuation made by Mr. Morrow, but has heard generally from the Guardians that it gives satisfaction.

Thinks the valuation ought to be rather under than over the rent, but still near it.

The valuator examined the nature of the soils on his grounds; believes the valuation was generally a superficial one.

The valuator, as he understands from them, looked to the present letting value without reference to whether there was to be a lease or not. That is the way in which they value as between landlord and tenant. The old leases were for three lives, or thirty-one years; the tenancies latterly are more from year to year. There is a confidence between the landlord and tenant, that if the landlord says the rent is to be so much, and you shall have a lease, the tenant is satisfied. The tenant-right always brings a good sum: the purchase-money varying according to the character of the landlord, and the rent that is on the land. The purchase-money of the tenant-right is not brought into calculation when valuing between landlord and tenant—that is, the rent is not increased in consequence of it.

On the hearing of the objections, allowances were made in the cases which he considered the valuation had been put on the under-tenants' holdings on the rack-rent value. The valuation in those cases was reduced somewhat, but not as low as the rents or the valuation of the other parts of Lord Abercorn's property. Thinks Lord Abercorn's lands are let at rents which solvent tenants can pay, and have a beneficial interest to register. Considers the valuation a fair one, but not so high as would be got in the way of rent from solvent tenants, if the landlords choose to ask it. The competition for land is great in the Union, and in consequence of it the tenant in occupation can always obtain a sum of money for the purchase of his right to the possession.

JAMES ANDERSON, Esq., Vice-Chairman, *examined*.

Compared the valuation of Magheracreggan and Listimore divisions with the rents paid; the only difference between them appeared to be a small per centage, not more than 15s. on each tenement; so that, if that sum be taken from the present valuation, you would have the actual lettings of those divisions. Those two divisions are mostly the property of the Marquis of Abercorn, and have been let on lease within the last two or three years.

The Clare division is valued at its actual letting value. It is let under the Court of Chancery on short leases. In Castlederg division the valuation is pretty near a fair one as regards the rents reserved. The rural parts are valued at what Sir Robert Ferguson actually receives in the way of rent.

The valuation in general is above the rents paid; but thinks the valuation of the Union could afford to have at least 10 per cent. more added to it. Furnishes the amount of rents payable, out of each of several townlands within the Union. (*Vide* Table at end of Local Report on Castlederg Union, p. 186.)

APPENDIX.

Castlederg.

Committee of Valuation seldom met.

Land sublet.
Valuation very nearly same as under-tenants' rents.

Objections disposed of by the Board.

Valuation ought to be rather under than over the rent.

Valuator looked to the present letting value.

The tenancies latterly are from year to year.

Tenant-right brings a good sum.
Purchase-money of tenant-right not brought into calculation when valuing land as between landlord and tenant.

Allowances made where objections on the ground of a rack-rent valuation.

Valuation a fair one: but not as high as could be got in the way of rent. Competition for land is great.

James Anderson, Esq., Vice-Chairman.

Clare division is valued at letting value.
Castlederg division valued at rents-paid.

Valuation above the rents paid: out could afford to be 10 per cent. higher.

VALUATION OF £10 COUNTY ELECTORS (registered 1832 to 1840), so far as ascertained.

COUNTY TYRONE.

* Marked thus, registered in 1832, and re-registered at date in second column.

SLIGO UNION.

APPENDIX.

*Sligo*Extracts from
Minute-book.*Extracts from the Minute Book of the Board of Guardians.*

- At a meeting of the Board 20th August, 1839, present 43 Guardians.
 Resolved—That the Ordnance Survey be sufficient for the purpose of estimating the net annual value of such of the hereditaments as are liable to be rated.
 That there are no valuations of hereditaments in the Union available, or sufficient for the purpose of estimating the net annual value of such hereditaments as are liable to be valued under the Poor Law Act.
- Valuation Committee. That the following gentlemen constitute a Committee of Valuation, viz.—
 The Chairman. Mr. O'Donnell.
 The Vice-Chairman. Mr. Wm. Faussett.
 The Deputy Vice-Chairman, Mr. John Brett.
 Mr. Wood.
- Advertisement for valuers. That an advertisement similar to that for the Naas Union be sent to the "General Advertiser," and the two Sligo papers.
- 21st September, 1839, present 37 Guardians.
- Tenders opened. The tenders from the persons willing to value the Sligo Union, opened.
- Candidates called in. Resolved—That the persons who proposed to value the Union should be called in, which having been done,
- Tenders rejected. Resolved—That the proposals for valuations not being satisfactory, an advertisement similar to the former, be inserted in the two Dublin and the local newspapers, the time limited for receiving proposals to be 19th October.
- 19th October, 1839, present 35 Guardians.
- Valuator to give security. Resolved—That the valuator be required to give in security equal to his contract.
 Tenders were opened.
 William Hughes proposed to value the Union for £350, proposal accepted.
- Mr. Hughes appointed valuator. Resolved unanimously—That William Hughes be appointed valuator of the rateable property within the Union for the sum of £350, not to be paid until the valuation is completed.
- 4th January, 1840, present 15 Guardians.
- Valuator to produce a specimen. Ordered—That the valuator, Mr. Hughes, be requested to attend the next meeting of the Board with a specimen of his valuation.
- 1st February, 1840, present 21 Guardians.
- Valuator seeks instructions as to town applotment. Mr. Hughes, the valuator, attended with a specimen of his valuation, and stated that he wished for instructions as to the use he should make of the applotment book of the Town Commissioners for 1840.
 Resolved—That Mr. Hughes be permitted to refer to the applotment of the Town Commissioners, as an assistance to his valuation for the Electoral Division of Sligo, but, as certain property is exempted from contributing to the town rates, although liable to the poor rates, that he be directed to include all such property, and in case he finds any discrepancy in the applotment of the Town Commissioners, that he make a special Report to the Valuation Committee of all differences between his valuation and the applotment of the Town Commissioners.
- 1st August, 1840, present 18 Guardians.
- Valuation Committee enlarged. Resolved—That we regret the Commissioners feel themselves unable to acquiesce with us in relieving Mr. Hughes from his contract; we therefore beg the Valuation Committee to continue their scrutiny, and render every assistance in their power, in order to have as fair and uniform a valuation as possible. The following were added to the Valuation Committee:—
 Knox Barrett.
 John Delany.
 Henry O'Connor.
- Resolved—That Mr. Hughes be apprised that the Valuation Committee are ready to meet whenever he has an Electoral Division prepared to lay before them.
- SIR, *Poor Law Commissioners' Office, 18th July, 1840.*
- Letter from Poor Law Commissioners. The Poor Law Commissioners having had before them a letter addressed by you to Mr. Hancock, Assistant Commissioner, in which you express a desire to be released from the contract for making a valuation of the rateable property in Sligo Union, have to state that this contract cannot now be annulled, but that you are bound to proceed with the valuation, adhering strictly in all cases to the letter of the law which defines the net annual value required to be estimated
- To William Hughes, Esq., C.E.,
 Valuator of Sligo Union.
- By order of the Board,
 W. STANLEY, Assistant Secretary.

SIR,

Poor Law Commissioners' Office, 23rd July, 1840.

The Poor Law Commissioners desire to state, in reply to your letter of 23rd instant, that in their opinion, it is not competent for the Guardians of the Sligo Union to annul the contract entered into with Mr. Hughes, their valuator, which binds them to pay him a stipulated sum for the valuation of the rateable property in the Union, to be completed in a limited time. But the valuator is on his part bound to value the property in every case, in strict conformity with the 64th Section of the Irish Poor Relief Act. The Commissioners have observed, by your communication, that the valuator has adopted a maximum value for land, they desire to state that they consider any limitation of the kind incompatible with the principle of the Act; and that in every case there must be an estimate made of the rent, which, with reference to the actual state of the hereditament, a solvent tenant might be expected to pay one year with another. The Guardians are bound to see the principle carried out; but if the valuator be prepared to declare that his estimates are in every case conformable to it, on delivering his valuation, the Guardians must necessarily await the result of the public inspection to which the valuation is to be submitted. At the same time, it is the duty of the valuator to explain the grounds on which he has made his estimated actual letting value, in every case where its accuracy may be questioned by the Guardians, and whenever his estimate shall vary considerably from the rent actually paid, substantial grounds for the variance should be stated, such as would be urged by him in support of his valuation in case of an appeal.

By order of the Board,
W. STANLEY, *Assistant Secretary.*

SIR,

Poor Law Commissioners' Office, Dublin, 28th July, 1840.

The Poor Law Commissioners have had under consideration the Resolution adopted at an extraordinary Meeting of the Board of Guardians of the Sligo Union, held on the 25th, representing the necessity of annulling the contract entered into with Mr. Hughes, for a valuation of the Union, and directing attention to the application of Mr. Hughes to be released from the contract. The Commissioners presume that Mr. Hughes does not propose to relinquish the contract, without obtaining compensation for the time he has been engaged in making the valuation, and they consider their power under the 68th Section of the Poor Relief Act, to be so limited that they could not authorize the Guardians to pay for a valuation, or a part of one, which by a resolution of the Valuation Committee, dated 24th instant, has been pronounced to be utterly useless as a standard of value. The contract binds Mr. Hughes to make a valuation of all the rateable hereditaments in strict conformity to the Poor Relief Act; and on the fulfilment of his part of the contract, and not otherwise, the Guardians are to pay him the compensation agreed for. It therefore appears to the Commissioners that the proper course in this case, is for the Guardians to await the completion of Mr. Hughes's valuation, and the result of an inspection of it by the rate-payers, after which, if numerous and well-founded objections shall be made against it, the Guardians may call on Mr. Hughes to revise the valuation, either generally, or in every case in which an objection shall have been made, where the estimated annual value shall not appear to be the rent at which the hereditaments may be reasonably expected to let from year to year. And it appears to the Commissioners, that until Mr. Hughes shall so make the valuation conformable to law, the Guardians will not be warranted in paying him the stipulated compensation. The Commissioners recommend the Guardians, in the meantime, to co-operate cordially with Mr. Hughes in obtaining information for his guidance, and in advising him as to the rents at which various lands and houses have been recently let to solvent tenants, in the several Electoral Divisions of the Union.

It will also be important to require him to compute, for their information, the acreable contents of each enclosure on the towns-land sheets of the Ordnance Survey, this being the most effectual way of ascertaining the extent of the several land tenements to be rated. As a further mode of ascertaining the accuracy of the valuator's statements, the Valuation Committee should be instructed to report on the valuation of each Electoral Division, giving in corresponding numerical order, the estimates of annual value which may be considered too high, or too low, and stating in each case whatever amount shall be considered the reasonable letting value. Possessing this information, the Board and the valuator would probably have no difficulty in agreeing on the actual value of each hereditament.

By order of the Board,
W. STANLEY, *Assistant Secretary.*

At a meeting of the Valuation Committee, December 1st, 1840—

The following Guardians and Wardens inspected the valuation of the Electoral Divisions of Carney and Lissadill, with which they appeared much pleased, and approved of the valuation thereof.

John Gallagher.	}	<i>Guardians.</i>
James Barber.		
John O'Connor.	}	<i>Wardens.</i>
Samuel Lindsay.		

At a meeting of the Valuation Committee, 4th December, 1840—

Resolved—That we approve of the valuation of the Electoral Divisions of Rossinver and Cliffony.

At a meeting of the Valuation Committee, 10th December, 1840—

Resolved—That we approve of the valuation of the Electoral Division of Ballisodare.

March 20th, 1841.

The Board approve of the valuation of the first Electoral Division of Sligo, as now laid before them, remarking that they consider that the town-parks are valued on a higher scale than the land in the rest of the Union, and are entitled to a subsequent reduction of about 15 per cent.

Evidence.

Mr. HUGHES, Valuator of the Sligo Union, *examined.*

Is a civil engineer and valuator.

His tender for the valuation of the Union of Sligo was accepted 19th October, 1840.

Q 2

Letter from Poor Law Commissioners.

Refuse to annul contract with valuator.

A maximum value illegal.

True principle of valuation.
Guardians to see this carried out.

Letter from Poor Law Commissioners.

Cannot authorize Guardians to give valuator compensation.

Guardians should await completion of valuation.

Valuator not to be paid, until valuation in accordance with the 64th Section, 1 and 2 Vic., chap. 56.

Valuation of two Electoral Divisions adopted.

Valuation of one Electoral Division adopted.

Valuation of Sligo Electoral Division adopted, though valued too highly. A reduction to be made.

Mr. Hughes, valuator

APPENDIX.

Sligo.

Documents furnished.	No documents were furnished to him except the Ordnance Survey, and the Town Commissioners' valuation, of which latter he made no use. Used the Ordnance Survey to ascertain areas of town-lands, but as this gave only the contents of the town-lands, and not the sub-divisions, he was obliged to have recourse to the occupiers for the extent of their holdings, and their returns he found on examination to be in almost every instance incorrect.
Information obtained.	Previous to making his valuation, made a circuit of the Union, and by inquiring of competent persons, ascertained the average rent of that description of land; he then divided the land into three qualities, and valued them accordingly for the gross value, he then deducted about 14 per cent. for taxes, repairs, &c., and gave the result as the net value.
Ascertained the average rent of each description of land.	There is a uniform scale of valuation over the Union.
Valuation uniform.	Estimated local advantages and disadvantages.
	Visited each tenement.
	Ascertained name of real occupant.
The test of value.	The test of value he adopted was the rent that could be paid by a solvent tenant, <i>continuing to pay it</i> , leaving him proper remuneration.
Objections to valuation made by those who let their lands at a rack-rent.	His valuation has been adopted by some landlords who at first condemned it.
Average size of farms.	Considers that the outcry against his valuation was raised by those landlords who were in the habit of settling their lands at rack-rents, and who were unwilling that such rents should be placed in contrast with the actual value.
Valuation of houses.	Average extent of farms throughout the Union is from 3 to 5 acres.
	Valued the houses and lands separately. Valued the houses according to the actual state they were in, deducting taxes, insurance, and allowance for repair.
Rate of insurance.	Took the lowest insurance at 5s. in every case, and above £10 to £100 at 7s. 6d., and above that, according to the regular per centage; allowed 7 per cent. for repairs.
Fair remuneration.	In estimating the value of the land, supposed the tenant bound to manage the farm, so as to deliver it up at the end of the year.
One-third of produce.	Allowed a fair remuneration to the tenant.
No reference to value in Registry Court.	Considers one-third of the produce a fair remuneration, allowing one-third for rent, and one-third for outlay.
Great competition for land.	Did not refer to the value set by owners of tenements in the Registry Court, until he had concluded his valuation.
	There is great competition for land; from ten to twenty pounds are given for a 3-acre farm set at a rack-rent, and in many cases applications are made to the landlord by the under-tenants previous to the falling of the lease, to be continued in the holdings at a rack rent.
	Such competition has raised the market price.
	Made no allowance for the effect of competition. Average of county cess, per acre, is about 2s. 6d. Average of tithe, 1s. 5d. per acre.
County cess and tithe.	Nineteen-twentieths of the property in the Union is in the hands of occupiers, who hold under 5 acres of land, and live in a most wretched state.
Small holdings.	The principal landed proprietors in the Union are Lord Palmerston, Major O'Hara, Mr. Cooper, M.P., Sir Robert G. Booth, Mr. Hillas, Sir James Crofton, and Mr. Wynne.
Tenure.	Major O'Hara and Mr. Cooper let their lands generally on lease. Part of Sir R. Booth's estate is let on lease, and part by the year.
Chairman and valuator visited each district for the purpose of revising valuation.	The chairman of the Board of Guardians and the valuator attended each district respecting the valuation of which there was any dispute, and then held a court, three or more Guardians and numbers of countrymen belonging to the district being also present.
Principle of revision.	The principle adopted in the revision, was reducing the rack-rent to a fair value, according to other lands of the same qualities through the Union.
Object, uniformity.	The object of the revision was to have a uniform scale throughout the entire Union.
Amount of both valuations the same.	The total amount of the first and last valuation about the same.
Rate-payer content.	Rate-payers are content with the valuation. The landlords also are.
No notice of appeal.	No notices of appeal lodged.
Desire for uniform valuation.	The disposition generally shewn was to have the valuation equal through the Union.
	Valuation is from 15 to 25 per cent. below the rent.
Wm. Faucett, Esq. Ex-officio Guardian.	WILLIAM FAUCETT, Esq., Ex-officio Guardian and Sovereign of the town of Sligo, <i>examined.</i>
	All houses in the town of Sligo are valued annually by five sworn valutors, pursuant to the provisions of the statutes 40 Geo. III., chap. 49, and 43 Geo. III., chap. 60, excepting houses under £5 value, which are not liable to assessment under those Acts. This valuation is called the town applotment. The last is for the year 1840. Considers that the town applotment is generally under, but near, and in many cases, equal to the actual rent. Land is not valued in the town applotment. Mr. Hughes's valuation of the borough of Sligo has been received and adopted.
Town Applotment.	
Less than the actual rent.	
Major O'Hara, Chairman of Board.	CHARLES KING O'HARA, Esq., Chairman of the Board of Guardians, <i>examined.</i>
Valuator anxious to give up contract.	The Guardians have received and adopted the valuation of fifteen Electoral Divisions, exclusive of the borough of Sligo. The following statements relate to the rural electoral divisions alone, and not to the Sligo electoral division:—Mr. Hughes, the valuator, was anxious to give up his contract, as he considered the remuneration not sufficient. The Guardians objected to Mr. Hughes's valuation, and wished to rescind his contract. The errors were in the acreable contents, the names of occupiers, and also omissions. Witness was most anxious to make the valuation satisfactory to all rate-payers, in order that the Poor Law might have a fair trial. For this purpose he attended with rate-payers in each rural
Errors in contents and names.	
Valuation revised by witness and rate-payers.	

electoral division, and corrected the valuation. The valuation was very much altered. It is at present generally satisfactory to the occupiers, but the landlords consider it too much under the rent paid. Does not think that there will be many appeals.

In revising the valuation, generally adopted that of Mr. Hughes as a basis; but corrected errors in names and acreable contents, and made the value uniform. The object was, not to make the valuation what the Guardians might consider to be the actual value, but to make it uniform throughout the Union. The valuation of the fifteen electoral divisions is, in the opinion of witness, uniform. The valuers who accompanied him were mostly tenants, persons who had made applotments for tithe or county cess. Only corrected, but did not attempt to make a new style of valuation. If the Board of Guardians had valued the Union, they would have valued the holdings at the fair letting value, but not below it. The valuation at present is below the fair letting value. The fair letting value is the rent which a solvent tenant, making a provident arrangement, would give. A solvent tenant is one who would be able to pay the rent out of the produce of the land, and would continue to do so. Considers a rack-rent to be that which is above the rent which would be given by a person who had made a calculation of how much he could continue to pay out of the produce of the land. Is of opinion that the present valuation is about 15 per cent. under the fair letting value. It is from 15 to 25 per cent. under the actual rents. Land lets this year at a higher rent than two years ago, as the demand for agricultural produce is greater. Latterly, land is generally let from year to year. The rents actually paid in some districts are more than the fair or reasonable letting value; this principally arises from the system of sub-letting. In other parts of the Union the land is let at the reasonable value.

Opinion of landlords and occupiers as to valuation.
Mode of revision.

Valuation is uniform.

Valuation below the fair value.
Test of value.

Opinion as to rack-rent.

Valuation 15 per cent. under fair value.
Valuation from 15 to 25 per cent. below actual rents.
Lettings in general, from year to year.
High rents in some districts.

TIPPERARY UNION.

Extracts from Minute-book of Board of Guardians.

APPENDIX.

*Tipperary.*Extracts from
Minute-book.

At the first meeting of the Guardians, held on the 16th March, 1839,
Present 8 ex-officio and 29 elected guardians.

It was resolved that the tithe composition would be sufficient to ascertain the number of Tithe Applotment.
acres chargeable, but that a valuation was necessary.

April 13, 1839,

Present 5 ex-officio and 19 elected guardians.

The clerk was directed to apply to the Poor Law Commissioners for copies of the memorandums on valuation and rating, for distribution among the Guardians.

Advertisement directed to be inserted in the Dublin Evening Mail, Dublin Evening Post, Limerick Chronicle, Tipperary Free Press, and Tipperary Constitution, for a fit and proper person to undertake the valuation of the Union.

March 4, 1839,

Present 9 ex-officio and 24 elected guardians.

Proposals from ten persons for the valuation of the Union having been read, the clerk was directed to inform several persons who had sent in proposals, that they would be taken into consideration on the 25th of May.

May 25, 1839,

Present 8 ex-officio and 26 elected guardians.

Mr. Leahy appointed valuator, and to be under the control of a committee of all the Guardians. Valuator appointed.

August 24, 1839,

Present 4 ex-officio and 14 elected guardians.

Letters to the different clergymen in each electoral division, directed to be written, requesting copies of the applotment-books of the different parishes.

December 7, 1839,

Present 3 ex-officio and 8 elected guardians.

The clerk directed, as soon as the valuator should have completed the valuation of any electoral division, to make two copies of the same, and forward one copy to the Guardian of the division so valued, and keep the other for the inspection of the Guardians.

August 1, 1840,

Present 6 ex-officio and 24 elected guardians.

Mr. Leahy, valuator, having laid before the Board the valuation of the Union, as completed by him,—

Resolved—That copies of each electoral division be given to the Guardians, for the purpose of ascertaining their accuracy, and that the Guardians return same on Saturday the 15th instant, being the next day appointed for the purpose of again inspecting the valuation. Copies of Valuation furnished to Guardians.

August 15, 1840,

Present 7 ex-officio and 17 elected guardians.

A letter from Mr. Hawley, Assistant Commissioner, dated 12th August, 1840, directing the necessary steps to be taken after the completion of the valuation, having been read,—

Mr. Leahy, valuator, having laid before the Board the valuation of the Union, and having entered into certain explanations respecting same,—

Resolved—That this meeting be adjourned to Saturday, the 29th instant, for the inspection and final completion of the valuation.

August 17, 1840,

Present Commissioner Hawley and 8 ex-officio and 25 elected guardians.

Mr. Leahy, valuator, having been called on, stated that the valuation would be finally completed on Saturday, the 29th instant.

Ordered, that the clerk do cause 200 notices, Form B, (stating that the valuation is completed,) to be printed and circulated among the Guardians, to be by them posted in the usual places for posting public notices, and other conspicuous places in their respective districts.

September 23, 1840,

Present 4 ex-officio and 22 elected guardians.

The Board then proceeded to the objections made by rate-payers to the valuation, pursuant to the order of last meeting. The town of Tipperary having been gone into, it was agreed that all objections should be referred to the valuator, to report his opinion thereon at the next meeting. Valuation revised.

Present 2 ex-officio and 10 elected guardians.

The objections to the valuation having been considered and finally arranged, a declaration was signed, stating that the valuation was completed.

APPENDIX.

Tipperary.

Evidence,
Mr. Leahy, Valuator.
Tipperary and Thurles
Unions valued by
same person.
(See Thurles
evidence.)

Thomas Bolton, Esq.,
Elected Guardian.

Valuation has given
satisfaction.

25 per cent. below the
rents of landlords who
are not very exorbitant.
Less below rents on
property for which he
is agent.

Cause.

Value of tenants' in-
terest at fair letting
value, £10 and up-
wards per acre.

Cause of disparity be-
tween marketable
value of large and
small farms.

Landlords generally
indisposed to grant
leases.
Cause.

Mr. James Sadleir,
Mr. Hugh Bradshaw,
and Mr. Michael Ryan,
Elected Guardians.
Concur with Mr. Bol-
ton in his first esti-
mate of beneficial
interest.
Rent 20 to 25 per cent.
above Poor Law
valuation.
Poor Law valuation,
moderate and uniform.

Evidence.

MR. LEAHY, Valuator.

Mr. Leahy, the valuator of the Tipperary Union, having also valued the Union of Thurles, was examined in the latter place touching the valuation of both Unions. (See his evidence; Appendix to Thurles Report.)

THOMAS BOLTON, Esq., Elected Guardian, examined.

Mr. Bolton states, that Mr. Leahy's appointment as valuator was the result of an election, —proposals had been sent in from different valutors. Mr. Leahy's and Mr. Wilson's proposals were equal, and on the question being put to the vote, Mr. Leahy was elected the valuator. He thinks the valuation has given satisfaction; but it is a low valuation, it is 25 per cent. below what landlords who are not considered to exact very exorbitant rents would let at; thinks it is not so much below the letting value of the property for which he is agent (Lord Stanley's), but the disparity is not so much caused by the rents on that property being lower than any other properties, as by the circumstance of the valuation having been done with greater accuracy, as he accompanied the valuator himself.

Thinks that any man who had a farm at a fair letting value, would get £10 an acre and upwards from a solvent tenant for his bargain easily, in the case of large holdings, and a greater sum for small ones, on account of the purchase-money being within the reach of a greater number of persons, and from the great anxiety to get land. The lands in the Union generally are out of lease; there is an indisposition on the part of landlords generally to grant leases; cannot say that leases are withheld on the ground of preventing the tenants from attaining the franchise. It is a principle with the family he is acting for, not to interfere with their tenants, but he thinks that the landlords (of the Union) generally expect the votes of their tenants; the impression that landlords have, that their tenants systematically vote against them, leads them to withhold leases; the tenants are disinclined to register, more especially when the landlords and tenants do not agree on politics.

The valuation in the town of Tipperary is more than 25 per cent. below the letting value.

Thinks that the average profit of farms rated at £5 in the Union, would be £10* to £11; selling everything that grows on the farm, and charging it with all the cost of production, rent, taxes, &c., in the way in which farms of that kind are cultivated in the country, and in cases where the soil is calculated for wheat, the profit would be greater.*

MR. JAMES SADLIER, MR. HUGH BRADSHAW, and MR. MICHAEL RYAN, Elected Guardians, examined.

Mr. James Sadlier, Mr. Hugh Bradshaw, and Mr. Michael Ryan, stated that they concurred with Mr. Bolton in his estimate of the profit of a farm valued at £5 in the rate-books, and Mr. Ryan added, that he considered the calculation if anything low. Mr. James Sadlier and Mr. Ryan stated that the letting value is 20 to 25 per cent. over the Poor Law valuation.

Mr. Richard Sadlier, and Mr. Hugh Bradshaw think the Poor Law valuation a moderate fair valuation, and what is a great merit with them, an uniform one.

* After this statement (which was the result of calculations made at the time, in which Mr. Bolton was assisted by all the Guardians present, who with one exception concurred in it), had been reduced to writing, it was read over to Mr. Bolton, and he then expressed a desire to reconsider the subject, and to go into it more in detail. This I said he might do at his leisure, and a few days afterwards I received from him the following letter and calculations by post.

Ballykesteen,

"DEAR SIR, Tipperary, 30th March, 1841.

I send you a statement of the net profits on a farm valued in the poor-rate books of the Union of Tipperary at £5 5s. 6d. net annual value. I have gone into the calculation with the utmost possible exactitude, and with the assistance of some farmers practically acquainted with all the details, and you will see that the result is very different from that arrived at by the loose calculations we made the other day in Tipperary.

"You may perhaps consider the rate of wages rather too high, but in seed time and in potatoe digging wages generally exceed the rates here given. The different items are a correct representation of the system of culture followed on small farms in this district, with scarcely an exception.

I am, dear Sir,
Your very obedient Servant,
THOMAS BOLTON."

W. P. Leathem, Esq.

"Union of Tipperary, Electoral Division of Solloghedmore.

"Statement of the net profits of a farm of 4a. 3r. 30p., valued in the rate-book of the Union at 5l. 5s. 6d. net annual value.

"4a. 3r. 30p. statute measure = 3a. 0r. 22p. Irish. Allowing the odd perches for waste, there will be, according to the custom of the country, an acre and a half in oats, and an equal quantity in potatoes.

	£.	s.	d.
"Oats.—Produce, 14 barrels to the acre = 21 barrels at 7½d. per stone, or 8s. 9d. per barrel of 14 stone		9	4
Straw, ditto, suppose 4 loads per acre, at 8s.		2	8
Potatoes.—22½ barrels to the quarter of an acre = 135 barrels (of 21 stone) at 4s. per barrel		27	0

Total produce	38	12	9
Deduct total expense of labour, seed, manure, rent, and taxes	36	0	9

Leaves, net annual profit . . . £2 12 0

"Labour and Seed.

APPENDIX.

Tipperary.

Evidence.

OATS.—Seed Oats.—18 stone per acre = 27 stone, at 11d.	1	4	9
Ploughing-in Seed.—2 ploughs = to 1½ acre at 6s.	12s.	0d.	
2 men, at 10d.	1	8	
Harrowing.—1 pair horses equal to nearly 2 acres—say	4	6	
1 man sowing seed	1	0	
Water-furrows	0	10	
7 girls weeding, at 6d.	3	6	
			1 3 6
Reaping.—9 men, at 1s. 6d.	13	6	
5 women binding, at 9d.	3	9	
2 boys stooking, at 6d.	1	0	
Stacking, 1 horse	3	0	
2 men stacking and forking	3	0	
1 boy filling	0	8	
Threshing.—6d. per barrel	10	6	
2 women and 1 man winnowing and sacking	3	0	
Marketing.—Horse-hire, 2 days	6	0	
Man, 2 days	1	8	
			2 6 1
			4 14 4
POTATOES.	£.	s.	d.
—Digging stubbles, 13s. per acre	0	19	6
Ploughing into ridges, 2 ploughs, and 2 men	0	13	8
Settling with spade preparatory to planting seed, 5 men, at 10d.	0	4	2
Seed, 40 stone to the quarter = 240 stone, at 2½d.	2	10	0
6 women cutting, } 21, at 8d.	0	14	0
12 „ sowing, }			
3 „ pounding, }			
3 men to the quarter trenching, at 1s. 3d.	1	2	6
Weeding twice	0	16	0
10 men to the quarter digging-out = 60 at 1s. 3d.	3	15	0
Picking and carrying to pit—1 woman to 5 men, at 8d.	0	9	0
Pitting—included in above 10 men, being done by the diggers			
Manuring 1½ acre, at 12 horse loads per quarter at 2s. 6d.	9	0	0
Carriage—say 5 loads per day = 14 horses, at 3s.	2	2	0
Spreading, 6 men to acre = 9 at 1s.	0	9	0
Shovelling, 4 ditto, 6 at 1s. 3d.	0	7	6
No expense for marketing, potatoes being supposed to be sold at the pit			
Measuring and picking { 6 men at 1s. 6s. }	0	10	0
{ 6 women at 8d. 4s. }			
Stone gaps being in use in lieu of gates, making-up, and levelling same for admission to, and egress from field	0	5	0
			23 17 4
RENT AND TAXES.	£.	s.	d.
*Rent, per Irish acre.	2	2	0
Taxes—County rates.	0	3	6
Poor-rates	0	0	10
			2 6 4
Or on 3a. 0r. 22p.			7 9 1
			£36 0 9"

* "This is not the actual rent, but what I consider a *fair* rent, were the farm now to be let. The value in the rate-book is 1*l.* 15*s.* per acre. The rent actually paid I believe to be nearly 3*l.*"

This statement, it will be seen, differs very materially from the result of the calculations in Tipperary, in which the Guardians present, with the exception of Mr. Richard Sadlier, concurred, and which one of them, Mr. James Ryan, stated to be "if anything low."

It also appears to conflict with the evidence obtained in the neighbouring Union of Roscrea, (*see* evidence of Mr. Scroope), and Cashel, (*see* evidence of Mr. Long), and in the Union of Gorey, county Wexford.

In the latter Union, Mr. Samuel Clarke, one of the assistant valuers, (*see* his evidence), who is an English agriculturist, and has been in this country for a number of years in the capacity of land steward to Lord Courtown, states the profit per acre to be 3*l.* 6*s.* 8*d.*, on land let at 1*l.* 10*s.* per acre, which makes the profit of a farm, valued at 5*l.*, to be in or about 12*l.* per annum. By comparing the calculation made by Mr. Bolton, with the evidence of Mr. Clarke, the profit on oats and potatoes (the crops taken by Mr. Bolton for his calculation), as stated by both, is this:—

Mr. Bolton.

Mr. Clarke.

On Oats.—A profit of 2*l.* 2*s.* 7*d.* per acre.

A profit of 3*l.* per acre.

On Potatoes.—A loss of 7*s.* 10*d.* per acre.

A profit of 5*l.* per acre.

Mr. Clarke's estimate was made after he had taken a night to reflect on the subject, and contained, as he expressed it, on handing it in, the clear profit "from plough to pocket."

RENT and VALUATION of £10 COUNTY ELECTORS, (registered 1833 to 1840), so far as ascertained.

GOREY UNION.

APPENDIX.

Gorey.

Extracts from
Minute-book.No existing surveys,
or valuations adequate
to the purposes of
valuation.*Extracts from Minute Book of Board of Guardians.*

At the first meeting of the Board of Guardians, held on the 24th January, 1840, present, the Right Honourable the Earl of Courtown, five ex-officio Guardians, and 24 elected Guardians, (whose names are given at length in the minute-book.) It was unanimously resolved—That the Earl of Courtown be Chairman of the Board of Guardians.

That Sir Thomas Esmonde be Vice-Chairman, and that Captain Robert Owen be Deputy-Vice-Chairman of the Board.

It was also unanimously resolved—"That there are no existing surveys or valuations adequate to the purposes of valuing the rateable property of the Union; and that it is desirable to entrust the valuation thereof to a competent professional person, or persons; for which purpose the Assistant Commissioner be requested to cause advertisements to be inserted in such public journals as he may think proper, inviting candidates for the valuation to transmit tenders, post-paid, on, or before Tuesday 18th February next, to the Chairman of this Board. The tenders to state a sum for 1000 acres, including all rateable property thereon, or a bulk sum for the entire Union; and to name a period by which it is proposed to complete the valuation, security to be required for the performance of the contract."

At an ordinary meeting of the Guardians held on Thursday, the 20th February, 1840,

Present, the Earl of Courtown, five ex-officio, and 23 elected Guardians, (whose names are given.)

The Right Honourable the Earl of Courtown in the chair.

Tenders were read from the under-mentioned valuator, proposing to value the rateable property of the Union on the following terms:—

Mr. Hanly, at 45s. (per thousand statute acres, to complete by 31st October, 1840). Mr. Smith, at 44s. (per thousand statute acres, to complete in nine months). Messrs. Neville and Son, 44s. (per thousand statute acres, to complete in eight months). Mr. Bolton at £250 for the entire Union, to complete in eight months. Mr. Samuel Hollingsworth, at £450, to complete by 1st October next.

Messrs. Neville and Son
appointed valuator.

Whereupon Captain Owen proposed, and Mr. Cooke seconded—"That the offer of Messrs. Neville and Son, to value the rateable property, be accepted, on condition that no assistant shall be employed by the Messrs. Neville, who shall not previously have been approved of by the Board of Guardians."

This resolution having been agreed to unanimously, Messrs. Neville and Son were declared the valuator of this Union.

At the next meeting, which was held on the 19th March, 1840,—

The Right Honourable the Earl of Courtown in the chair.

Present, three ex-officio, and 21 elected guardians,

Messrs. Neville and Son, the valuator, being in attendance, were called on—they delivered the following letter to the chairman:—

Gorey, 19th March, 1840.

MY LORD,

We propose employing, as our assistants in the Union, Messrs. John Byrne and John Bass together, Fossey Bolton and Samuel Clarke together, and Richard Brassington, late of the Government Valuation Department.—And we have to request the assent of the Board of Guardians thereto.

We are, my Lord,
Your faithful Servants,
NEVILLE and SON.

To the Earl of Courtown,
Chairman, Gorey Union.

On the motion of Colonel Owen, seconded by John Glasscott, Esq., it was resolved, with two dissentients—"That the assent of the Guardians to the above arrangement be given as desired."

At an ordinary meeting of Guardians, 3rd June, 1840,—

Captain Robert Owen in the chair.

Present, two ex-officio and 14 elected Guardians.

Mr. Samuel Irwine
appointed assistant
valuator.

On the motion of Colonel Owen, seconded by Solomon Richards, Esq., it was unanimously resolved—That the application of Mr. Neville to appoint Mr. Samuel Irwine to assist him in the valuation of the Union be agreed to; but at a subsequent meeting held at Gorey, on Wednesday, the 1st July, 1840.

Earl of Courtown, chairman.

Present, five ex-officio and 15 elected Guardians (whose names are given).

Appointment of Mr.
Irvine rescinded.

By an unanimous resolution, the appointment of Samuel Irwine, as assistant valuator, was rescinded.

And it was ordered—That Messrs. Neville be required to lay before the Board at their next meeting, one or more of the Electoral Divisions, the valuation whereof may have been completed at that time.

Sub-committees
appointed to revise
the valuation.

At an ordinary meeting of Guardians, Wednesday, 29th July, 1840,—The Right Honourable the Earl of Courtown in the chair,

Present, six ex-officio and 23 elected Guardians.

On the motion of Captain Owen, seconded by J. G. Richards, Esq., it was agreed unanimously—That the following sub-committees be appointed to revise the valuation of this Union, as given in from time to time by Messrs. Neville, with power to adjourn from day to day.

No. 1.—The elected Guardians of the Gorey, Coolgraney, Courtown, and Wingfield, Electoral Divisions, together with such ex-officio Guardians as reside within these divisions, or may have property therein, to revise the valuation of the four electoral divisions, comprising this district—five to be a quorum.

No. 2.—The Guardians as above, of Ballyellis, Rosmanogue, and Camolin—three to be a quorum.

No. 3.—The Guardians as aforesaid of Ballycanew, Monomolin, and Wells—three to be a quorum. The Chairman, Vice-Chairman, and Deputy, to be members of all Committees ex-officio. The clerk to attend all committees. Should the valuation of any more of the divisions be sent in to the clerk at any time between the ordinary meetings of the Board, he is required to summon the sub-committee to whom the revision of such valuation is entrusted, to meet on the first vacant day. The sub-committees to hold their meetings in the Magistrate's room in the Court House, and to report progress at the ordinary meetings of the Board.

At an ordinary meeting of Guardians, Wednesday, 26th August, 1840,—

The Right Honourable the Earl of Courtown in the chair.

Present, five ex-officio and 16 elected Guardians.

Mr. Neville, the valuator, attended and delivered in the valuation of the Electoral Divisions of Coolgraney, Monomolin, Ballyellis, Ballycanen, and Wingfield, as far as regarded the net annual value of the same.

At an ordinary meeting of Guardians, on Wednesday, 23rd September, 1840,—Captain Owen in the chair,

Present, three ex-officio and 11 elected Guardians.

The Vice-President reported that the sub-committees had revised the valuations of the several electoral divisions of the Union, and had made such suggestions as they thought right.—To most of these revisions the valutors assented, and the opinion of the sub-committee was, that the valuation had, on the whole, been attentively and equably made. When the valutors had not concurred in the suggestions made by the committee, the valutors' work remained untouched.

A letter was read from Mr. Neville, the valuator, stating that the valuations, as completed, would be ready for delivery to the Guardians on Saturday next, and requesting an advance of £100 on account.

Whereupon it was proposed by Mr. Pearson, seconded by Mr. Hugh Redmond, and resolved—That this meeting, at its rising, do adjourn till Monday next, to receive the valuation books from Messrs. Neville.

On the motion of Colonel Owen, seconded by Mr. Glascott, it was resolved unanimously—That an advance be made to Messrs. Neville, the valutors, of £100 on account, and that a draft be drawn on the Treasurer for the amount, which was done accordingly.

At an adjourned meeting of Guardians, on Monday, 28th September, 1840,—Captain Owen in the chair,

Present, three ex-officio and 16 elected Guardians.

Mr. Neville, the valuator, attended and delivered in the valuations, as revised and corrected, of the several electoral divisions of the Union, and the Guardians approving of, and adopting the same, it was

Resolved, on the motion of P. A. Moore, Esq., seconded by Colonel Owen—That the clerk be instructed to give notice according to Form F. in the order of the Poor Law Commissioners, that the Guardians intend to make a rate according to such valuation. And that the said valuation do lie for public inspection for 21 days at the Court House at Gorey, to commence Monday, 5th October, 1840.

At an ordinary meeting of Guardians, on Wednesday, 18th November, 1840—The Right Honourable the Earl of Courtown in the chair,

Present, four ex-officio and 14 elected Guardians.

Mr. Neville, the valuator, was in attendance, and stated that he was now prepared to attend the Board to go into the consideration of the several objections made to the valuation. Whereupon, on the motion of Captain Owen, seconded by Mr. Richards, it was resolved—That this Board do meet here from day to day, commencing on Monday next, the 23rd instant, at 10 o'clock, for the purpose of considering and revising those general objections made to the valuation.

Resolved—That the clerk be instructed to classify the several objections to valuation in electoral divisions, in order to facilitate the proceedings of the Board.

At a meeting of the Board of Guardians, on Monday, 23rd November, and following day,

Present, the Earl of Courtown, chairman, three ex-officio and 17 elected Guardians.

The Board attentively revised and considered the Valuation of the Union, and agreed to the following Resolutions:—

Moved by J. G. Richards, Esq., seconded by Ponsonby A. Moore, Esq., and resolved—

That in revising and adopting the valuation of this Union, by Messrs. Neville, the Board desire to record their full approbation of the care, attention, and judgment which Messrs. Neville have evinced, and at the impartial and satisfactory manner in which they have executed the important duties entrusted to them.

Valuation of Coolgraney, Monomolin, Ballyellis and Wingfield, delivered in by Mr. Neville.

Sub-committee of opinion that the valuation is, on the whole, equitable.

Notice given to the Commissioners, that a rate is about to be made. Valuation books open to public inspection.

The Board meets from day to day, to consider objections to valuation.

The Board express their full approbation of the valuation.

APPENDIX.

Gorey.

Union divided into
collector's districts.

Moved by Robert Doyne, Esq., seconded by Mr. Pearson, and resolved unanimously—
That the clerk of the Union be instructed to transmit a copy of this resolution to the Messrs. Neville, under the seal of the Union.

At an ordinary meeting of Guardians, on Wednesday, the 16th December, 1840,
Present, the Earl of Courtown, chairman, three ex-officio and 14 elected Guardians.
It was resolved—That the Union be divided into three collector's districts.

No. 1.—To consist of the Electoral Divisions of Gorey, Coolgraney, Wingfield, Rossmanouge, and Courtown.

No. 2.—The Electoral Divisions of Ballyellis and Camolin.

No. 3.—The Electoral Divisions of Ballycanew, Monomolin, and Wells.

And the barony collectors, Messrs. Thomas Webster, William Fayle, and George Pounder were appointed to collect the poor-rate, at $2\frac{1}{2}$ per cent.

Thomas Webster, for No. 1 district.

William Fayle, for No. 2 district.

George Pounder, for No. 3 district.

Subject to the approval of the Poor Law Commissioners.

Mr. Neville handed in
revised books of valuation.

Mr. Neville handed in the books, as revised, of the Valuation of the Union, which were read accordingly.

At an ordinary meeting of Guardians, 13th January, 1841,—The Right Honourable the Earl of Courtown in the chair,

Present, five ex-officio and 14 elected Guardians.

Moved by Mr. Richards, seconded by Mr. Doyne, and resolved—That the account of Messrs. Neville, the valuers, amounting to £295. 10s., for the valuation of the Union, be passed and allowed.

Ordered, that the clerk do write to the barony collectors, acquainting them that their appointment has been confirmed by the Commissioners, and requesting them to attend the next meeting of the Guardians, on Wednesday, 10th February next.

On the 10th February, accordingly, the barony collectors attended a meeting of the Guardians, and it was then ordered, that copies of collectors' bonds and sureties should be sent for; and on the 10th March, 1841, the last meeting was held, of which any entry appears in the Minute Book, at which a letter was read from Messrs. Neville, conveying an application for £95. 10s., the balance of their account; and the clerk was desired to reply thereto.

Evidence.

Evidence.

Mr. SAMUEL CLARKE, Valuator, *examined*.

Mr. Samuel Clarke,
assistant valuator.

Valuation 10 per cent.
below usual letting
value, and more for
small holdings.

Value of tenant's in-
terest at valuation, £5
to £7 per acre.

Profit of small hold-
ings £3 per acre.
Corrected statement,
after taking time to
consider, £3. 6s. 8d.
per acre.

Mr. Samuel Clarke was appointed an assistant valuator to Messrs. Neville. Witness and Mr. Bolton (who was also appointed an assistant valuator) valued about 33,000 acres of the Union; their valuation, he thinks, is about 10 per cent. below the usual letting value with good landlords, and in the case of small holdings, something more than 10 per cent.; it is 25 per cent., at least, below the rents where proposals for letting are taken; the houses in the different towns and villages in the Union are valued 20 per cent., on an average, below the letting value; their principle, with regard to the houses in the country, was, to take the value at 3 to $3\frac{1}{2}$ per cent. on the estimated cost of building.

As a general rule, he thinks the different holdings would sell for from £5 to £7 per acre, if let on lease at the Poor Law valuation. Witness's father has come over to this country from England, and taken a farm from Lord Courtown. The part of the Union in which his father's farm is situated was valued by Mr. Neville himself; the valuation is £81, and the rent paid is £190. Witness is an Englishman; was Steward to Lord Courtown for eight years, managing from 150 to 280 acres of tillage land, and is now a tenant of Lord Courtown's, farming 80 statute acres; the usual average profit of small holdings of four acres to eight acres would be £3 an acre for the quality of land let at 30s. an acre; it would not be so much on land let at 14s. to 17s. an acre.

Mr. Clarke said he should like to make this calculation with greater accuracy, and having been told that he might do so in the course of the ensuing day, he handed in the following paper, and in doing so, said it contained a statement of the profit, from the plough to the pocket.

"Acreable profits of corn crops grown on strong clay lands rented at 30s. per acre:—

"Wheat, deducting every expense.	£5
Beans, ditto	4
Oats, ditto	3
Potatoes, ditto	5
Meadowing and after grass	2
Grazing	1

6) 20

"Average profits per acre £3. 6s. 8d.

Land at 15s. per acre would not yield more than two-thirds of the above profits, say £2, averaging seven years' prices and profits."

Mr. JAMES GODKIN, elected Guardian, *examined.*

APPENDIX.

Gorey.

Mr. James Godkin is a tillage farmer, holding 75 Irish acres from Lord Courtown, who does not put his lands to the market; he has a maxim of live and let live. Witness pays a rent of £49 19s., but it is an old take; if it was now to be let, it would be cheap at £75; a person who had a 31-years' lease of it at that rent would get a solvent tenant to give him £600 for his interest, without taking into account the timber growing on the farm, (which witness planted and has registered), but considering it merely as shelter; his valuation for poor-rate is £68.

Mr. James Godkin,
elected guardian.Mr. JOSEPH CRANWELL, Clerk of the Union, *examined.*

Mr. Joseph Cranwell is a middle landlord, is of the class who are badly spoken of; but he does not wish to ask too much from his tenants; would like to see them take their dinners off a different joint from what the pig has; there are some of his tenants to whom he charges no rent, the others pay their rent punctually.

Mr. Joseph Cranwell,
clerk of Union.

Mr. Cranwell at the same time gave a statement of the rents paid by his tenants, showing that his rents are a considerable per centage over the Poor Law valuation.

VALUATION of £10 COUNTY ELECTORS (registered 1833 to 1840) so far as ascertained.

KILKEEL UNION.

APPENDIX.

*Kilkeel.*Extracts from
Minute-book.*Extracts from Minute Book of Board of Guardians.*

September 7, 1839.

First Meeting of the Board—Present, 3 *ex-officio* and 14 elected Guardians.Valuation Committee
appointed.

Valuation Committee appointed, consisting of 10 elected Guardians, to report to the Board of Guardians as early as possible, upon the best mode of proceeding to obtain a fair valuation of the property within the Union.

September 25th, 1839.

Meeting of the Board—Present, 3 *ex-officio* and 15 elected Guardians.Report of the Valuation
Committee.

The Committee appointed to enquire into the best mode of obtaining a fair valuation of the rateable property within the Union, reported as follows:—

"That inasmuch as we consider the valuation of Mr. Griffith too low, and not such as to make all property within the Kilkeel Poor Law Union fairly and equally taxable, we, the Committee appointed by the Guardians of said Union, recommend a new valuation of said Union, so that all property within it should be equally and justly valued at its proper value, in order to carry into effect the intentions of said Act."

Adopted.

Resolved—That the suggestion of the Committee be adopted, and that means be taken by the said Committee to carry this object into effect, and report thereon to the next meeting of the Board.

October 16th, 1839.

Meeting of the Board—Present, 3 *ex-officio* and 12 elected Guardians.

The Guardians received a communication from the Poor Law Commissioners, approving of the course proposed of having a new valuation.

Proposals by valuers.

An advertisement having been inserted in the papers for a competent person to value the Union, two tenders were received, one from Mr. John Wilson, on the following terms, viz., £2 per thousand acres for arable, and £1 for mountain land, to exclude all property liable to be rated thereon, and to be supplied with Mr. Griffith's maps, and field-books to correspond.

The other from Mr. John Edgar, who proposed to value all rateable property within the Union at the following rate, £2 per thousand acres for arable and 10s. for mountain land.

Mr. Edgar's proposal was at first accepted: but when the contract was explained to him, he declined to enter into it, and Mr. Wilson's proposal was accepted.

June 8th, 1840.

Meeting of the Board—Present, 1 *ex-officio* and 6 elected Guardians.

A communication was received from the Poor Law Commissioners, approving of the appointment of Mr. Wilson.

June 8th, 1840.

Meeting of the Board—Present, 1 *ex-officio* and 5 elected Guardians.

The valuator applied for money in advance, but his application was refused until he should have completed at least one electoral division.

September 20th, 1840.

Meeting of the Board—Present, 1 *ex-officio* and 9 elected Guardians.Valuator gives in the
valuation of two electoral
divisions.

Mr. Wilson, the valuator, attended the Board and delivered the valuation of Mourne Park and Fofanny in a complete form, and promised to have the remaining portion of the valuation ready to lay before the Board on that day month.

Resolved—That the two divisions of Mourne Park and Fofanny, which were perfected, should be examined by the Valuation Committee; and that the Guardians of the several divisions be informed from time to time of the days fixed for the Committee, to meet and examine the valuation of the several divisions, in order that they may attend.

October 28th, 1840.

Meeting of the Board—Present, 1 *ex-officio*, and 13 elected Guardians.Valuator gives in the
valuation of four divisions.

The Valuator having delivered in the valuation of the divisions of Greencastle, Mullartown, Bryansford, and Maghera.

Resolved—That the Valuation Committee do meet on Wednesday next, the 4th of November, for the purpose of examining the valuation of the electoral divisions which are perfected. One *ex-officio* and one elected Guardian were added to the Valuation Committee.

November 25th, 1840.

Meeting of the Board—Present, 2 *ex-officio* and 8 elected Guardians.Meetings of Valuation
Committee.

The Valuation Committee which met pursuant to the resolution of the Board on the 4th instant, for the purpose of examining the valuation of the electoral divisions of Greencastle, Mourne Park, Mullartown, Bryansford, Maghera, and Fofany, presented the following report, viz. :—

Report of Valuation
Committee.

"That they are of opinion that there exist many inaccuracies in the valuation of the divisions laid before them, and that in consequence the clerk be directed to write to Mr. Gulson, to request his attendance in order to consider the best mode of proceeding in the matter."

Resolved—That the valuation, as now delivered, is not satisfactory; and that the valuator be instructed forthwith to review, and carefully to inspect those parts of the Union which his assistants have valued; and that the valuator be instructed, before delivering in his valuation, personally; to check the valuation of each townland, so that he can, from his own knowledge, sustain the valuation so made; and that the valuator be further instructed to furnish a fair copy of the valuation.

January 20th, 1841.

Meeting of the Board—Present, 1 *ex-officio* and 5 elected Guardians.

Mr. Wilson attended, and delivered in the valuation of the Union, in the form prescribed by the Act of Parliament.

Resolved—That the clerk be directed to write to Mr. Gulson to ascertain whether the Guardians of each division may be allowed to take the valuation of their several divisions to their own residences, in order that they may carefully inspect the same, and give their opinion of them at the next meeting of the Board.

Resolved—That if Mr. Gulson acquiesce, the clerk be requested to send the valuation of the several divisions to the Guardians representing each.

February 10th, 1841.

Meeting of the Board—Present, 1 *ex-officio* and 9 elected Guardians.

The Valuation Field Books having been handed by the Clerk to the Guardians of the several divisions, and many errors of quantity having been discovered, and errors as to the names of landlords being apparent,

Resolved—That each Guardian be requested to point out or make a list of such as appear to him to require revision, and forward them to the clerk with the Valuation Book, in order that the clerk may at once refer such list to the valuator, and that the valuator be desired forthwith to revise such cases and alter them as to him appears necessary, before delivering the valuation for their inspection by the rate-payers, and that the valuator deliver them to the Board Meeting in a revised state.

March 10th, 1841.

Meeting of the Board—Present, 2 *ex-officio* and 10 elected Guardians.

The valuation having been delivered in a revised state,

Resolved—That the clerk be instructed to issue the notice that it will be open for inspection.

Extract from Letter Book.

Circular to the Land Proprietors and Agents in the Union:

Kilkeel, 19th December, 1839.

Sir,—The Board of Guardians of the Kilkeel Union having considered it necessary to have a valuation of the property within the Union, for the purpose of raising a rate for the relief of the poor; but, in order to make it perfect, the valuator requires to be supplied with the names of the occupiers on the several estates in the Union, with the quantity of land contained in each holding; and I have to request you will be so kind as to furnish a list of tenants on such parts of your estate as is comprised within the Union, and, as far as is practicable, the quantity of land of which the several holdings consist in each townland, or to allow the valuator or clerk to have access to your Books for the purpose.

JOHN BOYD,

Clerk of the Kilkeel Union.

Application to landlords for lists of their tenants, with the number of acres held by each.

Evidence.

Mr. JOHN WILSON, Valuator, *examined.*

He was appointed valuator on the 6th October, 1839; was to receive £2 per thousand acres for arable land, £1 per thousand acres for mountain.

Farms about 50 or 60 acres of his own in the County of Down.

Has been engaged from time to time for 30 years and upwards in valuing land for private gentlemen. The last gentleman whose estate he valued was Mr. Synnot, in the County of Armagh: that was about 12 months ago.

Has valued the Unions of Banbridge, Newry, Kilkeel, and has been appointed valuator of the Newtownards and Downpatrick Unions. These comprise nearly the whole of the County of Down; was well known by the Guardians of this Union; was recommended by the Assistant Commissioner, Mr. Gulson; has been written to by several Guardians of other Unions, offering to get him appointed valuator; but has enough to do, and declined to undertake any other Union.

Was supplied with Griffith's Valuation Field Books; Ordnance maps; Copies of Tithe books in two parishes; County Cess Applotments.

Got also from most of the landlords or their agents, lists of the tenants, with the number of acres held by each, but not the rents.

These documents were only to assist him in making out the areas.

Had three assistants besides his son. Two of them, William M'Gill and John M'Crink, were professional valuers whom he had instructed himself, and whom he had been in the habit of employing.

Kilkeel.

Evidence.

Instructions given to assistant valuers.

Method adopted.

Alterations.

Checks.

Test of value, average of rents paid upon late lettings.

Competition for land.

High rents.

Small proprietors.

Comparison between rent and valuation.

£20 an acre would be given for the good-will of land let at his valuation.

Comparison between valuation and rack-rents.

Valuator's calculation in estimating the value of a tillage farm.

Fair rent:—one fourth of produce.

The third, John Edgar, was a bailiff and valuator on Lord Kilmorey's estate for many years. He was well acquainted with the whole of the Barony of Mourne, and in general knew the rents paid by the tenants. Edgar was recommended to him by the Guardians; he, Wilson, did not wish to employ him.

William M-Gill and John M-Crink valued the electoral divisions in the Barony of Upper Iveagh; he instructed them to describe in their field-books the nature of the land and state of improvements, houses, fences, convenience to water, to fuel, to manure, to market, and also to put down what they considered the value.

Instructed them to mark each tenement with particular marks, one for valuation and one for rent, when it could be ascertained. Had four or five different marks for the quality of soil—one for oat soil, which was subdivided into three or four others, according to the quantity of oats the land could produce; another for wheat soil, which was subdivided into two qualities; had no particular mark for pasture land, they wrote down whether it was fattening pasture or mountain pasture, or liable to be flooded, or so on; had four different marks for the aspect; they marked the distance from the nearest market-town by numbers representing the miles; they put down whether it was convenient to manure, to sea-weed or lime; there is no other manure in this country; they then stated what they thought the value. He could in that way set the proper value upon a farm in the County of Cork without going there.

Altered their valuation in 60 cases out of 100. If, from their description of the land, he considered that they had not set the proper value upon a field, he rode there and judged for himself. They did not visit every tenement together; made them check each other, and would occasionally check them both himself; had too much to do to visit every place himself.

Edgar valued that part of the Union which is in the Barony of Mourne; gave few instructions to Edgar; he was old and could not be taught; let him value the land in his own way, from his own knowledge of the letting value; told him to keep a mean between the high and the low rents.

Took the letting value of land in each Union, as the proper test of value for that Union.

By the letting value of land does not mean the highest price the land would fetch, nor the highest price a person could pay and continue to pay, but means the average of the rents actually paid upon late lettings.

In this Union, there is more competition for land than in any other part of the County of Down; the population is very great, and any price would be given for land; that competition has raised the letting value.

On some parts of Lord Kilmorey's estate, which extends over the greater portion of the Barony of Mourne, the rents are fair enough, and not too high, except where there are middlemen, to whom exorbitant rents are paid; all the other landlords in the Union let their lands high, much higher than in other parts of the County of Down.

There are a great many small proprietors in the Union who let their lands high, some of the tenants striving to pay, others cannot. Was obliged to take all these circumstances into account; would not have done his duty if he had not done so.

His test was not a reasonable rent, for there are scarcely any reasonable rents in the Union.

Was not guided by the highest rents actually paid in the Union, but endeavoured to keep a mean between such rents and the fair rents on Lord Kilmorey's estate.

His valuation is, perhaps, 5 per cent. higher than the latter, and from 10 to 15, and in some instances 20 per cent. below the rents on other estates in the Union; his valuation is a shade higher than what he considers a fair rent between landlord and tenant.

When a person wants land he must buy it, or he will get no land in the County of Down. In this part of the County he should pay 20*l.* an acre, lease or no lease; is sure that 20*l.* per acre would be given for the goodwill of land let at his valuation.

Thinks that tenants could pay more than his valuation; knows that many of them pay 10*s.* and 15*s.* more, but cannot say how they manage to pay it; knows land near Kilkeel let at 50*s.* an acre, which he has valued at 35*s.*; considers that 50*s.* for that land is a rack-rent; knows land let at 30*s.* which he has valued at from 20*s.* to 25*s.*; even his valuation is a little more than what he considers a reasonable rent.

Has made calculations for every quality of land, by which he judges that a fourth of the value of what the land can produce, is, in most cases, about the fair rent which ought to be paid to the landlord; considers that if a landlord takes more, he robs his tenant; has made that calculation by taking a farm of a certain number of acres, say 20; a man who cultivates that right would have a rotation of five years, 4 acres of oats, 4 of potatoes, 4 of wheat, barley flax, or oats (according to the nature of the soil), and 8 acres of clover, 2 acres of cutting clover the first year, and 2 the second year for feeding.

From the average price of produce at the nearest market town for the last five years, and from the description and situation of the land, he can calculate pretty nearly what the farm can produce every year, if properly cultivated, and gives a fourth of the value to the landlord, no matter what description of soil; the better the land, the better the cultivator is paid.

For a Farm of 20 acres of Oat Soil of a fair average quality in the County of Down, would make the calculation as follows:—

APPENDIX.

Kilkeel.

Evidence.

Profits of a farm of 20 acres.

Years.	Expenses—Seed and Labour.	£. s. d.	Average Value of Produce.	£. s. d.
1	Lime for Oats, for 4 acres . . .	3 0 0	Oats—25 cwt. per acre, at 6s. per cwt., for 4 acres, is . . .	30 0 0
	Ploughing and Harrowing . . .	4 10 0		
	Seed—12 cwt. at 8s., for 4 acres . . .	4 16 0

	Tithe or Rent-charge, do. 1s. 6d. . .	7 10 0		36 0 0
	Carting Oats to market . . .	5 0 0		£ 108 0 0
	Ditto Potatoes . . .	3 0 0	Deduct Expenses . . .	101 0 0
		£ 101 4 0	Clear Profits . . .	£ 7 0 0

The occupier will be remunerated for his labour, and will have besides a clear profit of £7 20 acre farm. per annum on a farm of 20 acres.

The refuse of the kitchen will feed a couple, and sometimes three pigs, which will enable him to have bacon; the management of the cows will be amply rewarded by the use of milk; and the rearing of poultry, &c. will be an additional profit to provide or assist in providing clothes and other necessities; this is intended for a country farm; in the neighbourhood of towns, the value will improve according to the distance, &c.

Gives the landlord credit for any advantage which diminishes the labour or expense of the tenant, and does not increase the value of the produce.

That will leave enough to the tenant to live and support his family, according to the size and quality of his farm, having regard to his industry and knowledge of farming. No matter what the rent is, a man cannot live comfortably upon a small farm; a man who has only five acres cannot live well, even at a reasonable rent; the landlord ought not for that to be deprived of his profits.

A tenant having ten acres could live and support his family upon potatoes and milk; and, provided his family be not too large, give them meat once or twice a-week: for three months in the year he will be without milk altogether. 10 acre farm.

Upon a farm of five acres, no matter what the rent is, the tenant and his family could not eat meat, except once or twice a-year; if oftener, it should be at another man's expense. 5 acre farm.

Considers that upon a farm of twenty acres the tenant ought to give meat to his family two or three times a-week.

There are no pasture farms in this Union. If there were, he would value them as follows:—

Considers how much weight the land would put upon a beast per acre; fattening land would, in the summer, put on a hundred or a hundred and a half, that would be about £3; he gives two-thirds of that to the landlord. The tenant on these farms has no labour. The £1 he leaves to the tenant is quite sufficient to remunerate him for his trouble, for interest on his capital, chances of death, &c.

Value of grazing farms how calculated.

Has been for thirty years and upwards valuing on that principle, and has found it in every case to be the fair rent; has constantly valued farms for neighbours or acquaintances when they have been purchasing farms, and found them always satisfied; has often settled disputes between man and man about the value of farms, and found both parties pleased. It is about the rent which fair landlords charge, such landlords as the Marquis of Downshire, Lord Londonderry, General Meade, William Sharman Crawford, Lord Charlemont, Lord Gosford, and others. His principle is almost always applicable to their rents upon recent lettings.

This mode of calculation satisfactory.

Does not make that calculation for every farm he values, but it was in that way that he originally formed his notion of the value of land, and of the rent that ought to be paid to the landlord.

The Banbridge Union is valued at about the rents charged by the landlords mentioned above. It is valued just as he would value for a landlord.

Comparison between the valuation of Kilkeel and that of other unions.

APPENDIX.

Kilkeel.

Evidence.

Valued the Newry Union a shade higher, owing to the great advantage of being near a good market. In the Newry Union he had valued Mr. Synnott's estate, about £4,000 a-year, and adopted the same valuation exactly to a shilling for the poor law. Mr. Synnott has adopted it for his tenantry, and both the landlord and tenants are well pleased with it.

Mr. Blacker, Lord Gosford's agent in the Newry Union, gave a new lease last year, and the rent was exactly the same as the valuation of the Union.

The valuation of the Newry Union is perhaps a shade lower than that of this Union; about 3 or 4 per cent. lower.

Has heard that the valuation of the Lurgan and Lisburn Unions were valued considerably lower than the Unions he has valued.

Of the three Unions he has valued, considers Kilkeel the highest, then Newry, and Banbridge is the lowest; but there is not much difference between them.

Got no instructions from the guardians of this Union, or from the Newry guardians. They behaved well to him, and let him do just as he pleased. Took his own views of what the land was letting for in the Union.

Comparison between the rent and the valuation.

Considers that his valuation is in general below the rents paid in the Union upon late lettings. Could not say by how much. Knows instances where the rent is 25s. and the valuation 18s. or 20s. The difference is greater where the properties are small. Upon parts of the Kilmorey estate the valuation is above the rents; but even upon that estate, where the land has been lately let, the rents are high enough; thinks that in those cases they are near his valuation.

Edgar had valued land for Lord Kilmorey, and the instructions he gave him were to value a shade higher.

The farms are small.

There is no comfort in this Union. The farms are too small, and at his valuation the tenants could not live comfortably.

There are 32,000 acres of mountain in the Union which he left at Griffith's valuation, merely a nominal value, perhaps not more than 2d. or 3d. an acre.

Farms near the sea.

When he was valuing farms near the sea, took into account the convenience to sea-weed for manure, but not the profits which might be made by fishing.

Valuation of small farms higher in proportion.

Valued small farms something higher in proportion than large farms, owing to the greater competition for that class of farms.

Valuation of towns.

Valued the towns himself; in general adopted Griffith's valuation for houses above £5, by adding half, and thus bringing them to Griffith's original valuation; that is generally what they would let for from year to year. In most cases he left it so, provided there had been no alterations since, improvements or dilapidations; considered the condition and size of the house; made great allowance for the situation. In every town there is always some part where the best business is done, allowed sometimes cent. per cent. for that; took also into consideration the stores and rere of the house.

Farm-houses.

Did not adopt Griffith's valuation for farm-houses, but looked at the offices and improvements, whether they were conveniently laid out for farming.

Villas at Rostrevor.

Valued the houses at Rosstrevor higher than elsewhere, because they let very well in the summer; took into consideration the chances of letting, the situation, the taste with which the place was laid out, improvements, planting, &c.; did not consider in any instance the cost of building so as to allow a certain rate of interest; a small place, if nicely laid out, would often have a better chance of being let, and fetch a higher price than a larger one.

Comparison between Poor-law valuation and Griffith's valuation.

Did not adopt Griffith's valuation in the country, considering it too low, particularly in this Union; has found that by adding about 30 per cent. to Griffith's valuation of every townland for houses, improvements, &c. he brings it to what he considers a fair rent between landlord and tenant.

Never inquired whether there was a lease, or whether the tenant was a freeholder.

Paucity of leases.

There are scarcely any freeholders in the Union.

Thinks there are very few leases, and those are old leases; there are some leases on Lord Annesley's estate, but none are granted now, for the heir is a minor; there are some few, but very few, on Lord Downshire's property; does not think that the leases are renewed when they fall in on the Kilmorey estate, nor on Lord Roden's estates; knows scarcely any landlords in the County of Down who are giving leases; did not see a lease given these twelve months; formerly he used to see twenty a week.

Land will let and sell as high without as with a lease; a tenant is never ejected as long as he pays the rent.

People are so anxious to get land that Mr. Henry is taking in part of the mountain, which he lets at 5s. an acre. It is bad mountain pasture; thinks that is very high; he has valued part of that by the bulk, according to Griffith's valuation; could not say exactly how much an acre, but something very low.

Thinks Edgar commenced the valuation of the barony of Mourne about March or April, 1840; he himself used to come once a week or once a fortnight to inspect his work, and where he went wrong, correct it. The valuation of the whole Union was complete in six months; he laid it before the Board in October.

Valuation returned to valuator to be revised.

It was returned to him to be revised because it was incorrect. The part Edgar valued was the most unsatisfactory; he was chosen by the guardians; had to go over the whole of it again, altered the greater part of it; altered the entire of one townland; there were mistakes both in the areas and the value; some places were left out altogether.

Returned the revised valuation about two months after.

No regular revision Committee was appointed, but each Guardian took home the valuation of his own electoral division.

They made no alterations as to value, but made suggestions as to the number of acres, names of landlords, &c.; they suggested in many cases that the value should be altered, but he did not yield to their suggestions in that respect.

Got no instructions either from the Guardians individually or from the whole Board respecting the valuation, but knows that most of the Guardians who were tenants wished for a low valuation; heard them after say so; thinks that they are all satisfied, with the exception of one or two.

MR. JOHN BOYD, Clerk of the Union, *examined*.

Mr. John Wilson was appointed sole valuator on the 16th of October, 1839; he had been employed to value estates for private gentlemen. Mr. Gulson, the assistant commissioner, recommended him; he was then the valuator of the Newry and Banbridge Unions, and has since been appointed the valuator of the Newtownards and Downpatrick Unions.

The Board supplied him with maps and field books of the Ordnance survey, and copies of the tithe books for the different parishes. He, the clerk, was directed by the Board to write to the several landlords, or their agents, for lists of their tenantry, with the number of acres held by each tenant: many sent them; others gave access to their books.

He ascertained the areas from the persons who applot the county cess, which in most parts of the Union is collected according to Griffith's valuation.

The valuation commenced in January, 1840; part of it was laid before the Board on the 20th of September, but it was returned several times to the valuator to be revised, and it was not finally adopted until the month of January, 1841.

He had two or three assistants, who visited the holdings and valued them. They were at work at the same time in different parts of the Union. Does not think Wilson himself went to every tenement. He lives about fifteen miles off, near Banbridge, and was busy valuing other unions at the same time. Whilst his assistant was valuing the electoral division of Kilkeel, Wilson did not come more than once a fortnight: he would on such occasions stop a day or two, and take a look over different townlands, and judge for himself whether he was valuing fairly.

The assistant who valued this part of the Union was a person named Edgar, who had at first been appointed the valuator of the Union, but had afterwards resigned.

He did not value the mountains himself, but he adopted Griffith's valuation.

He also adopted Griffiths valuation in the towns of Kilkeel, Rosstrevor, and Newcastle; for the houses over £5 he added one-half, to bring them to the value originally set upon them by Griffith. Wilson himself valued the houses under £5; he would value these according to the letting value of the town; for instance, the houses in the town of Rosstrevor would let higher than in the town of Kilkeel. He valued them something lower than the rent. Knows some houses paying £4 rent valued at £3. 10s.; and so with others in the same proportion. £4 is a high rent; does not think more could be got. Such a rent for that class of houses would not be charged by good landlords; those who let them at £4 wish to make as much as they can out of them. Sometimes the valuation is the same as the rent.

Knows some fields near the town held by persons living in the town, the rent they pay is £3; those fields are valued about £2. 10s. The same land would not be let by Lord Kilmorey for more than £2 or £2. 5s. an acre. The rents on Lord Kilmorey's estate are low, and in many instances below the valuation.

The average size of farms is from three to ten acres. Farms near the sea are more valuable than inland farms; they have plenty of sea-weed, the land is warmer, and produces better crops. Wilson made allowance for that, and valued them higher.

Edgar, who valued the barony of Mourne, was bailiff for many years, and was well acquainted with the neighbourhood, knew the rents, and could tell whether the rent was fair from the way the tenant lived, having regard to the character of the man and the extent of his farm; he could say from the way he lived whether he was paying too little or too much. He would look at his crop, or at his stacks, and then form his opinion.

Is quite sure that those who have houses at Rosstrevor get by letting them furnished in the summer, more than the valuation. Believes they were satisfied with the valuation.

In consequence of the great competition for land, tenants give more than the valuation, and are able to give more and live, but not comfortably. In general, except upon some parts of the Kilmorey estate, the rents are higher than the valuation. The rents vary so much that he could not say exactly how much higher.

The alterations made by the guardians were generally to reduce. Heard Mr. Henry, an *ex-officio* guardian, Lord Kilmorey's agent, say that the valuation was rather low.

The guardians in general, with the exception of one or two, are now satisfied with the revised valuation. Those who complained were guardians near the town of Kilkeel, who were farmers; they complained principally of their own farms, or of their own neighbourhood, being valued too high.

A good many alterations were suggested by the Guardians for the divisions of Maghera, Kilkeel, and Ballykeel; these were generally, to alter the number of acres; some of them were to vary the value.

APPENDIX.

Kilkeel.

Valuation referred to the Valuation Committee.

Report of the Valuation Committee.

Guardians take home the Valuation Committee.

Division of Kilkeel.

Mourne.

Green Castle.

Ballykeel.

Mullartown.

Fofany.

Not many leases in the Union.

Mr. Atkinson elected Guardian.

The electoral divisions of Mourne Park and Fofany were finished on the 30th September, 1840.

On the 28th October the valuator gave in the divisions of Greencastle, Maghera, Mullartown, and Bryansford. The valuation was referred to the Valuation Committee, who met on the 4th of November, and reported that it was not satisfactory, and recommended that the valuator be instructed to inspect those parts that his assistants had valued.

Captain Hill read a memorial from the inhabitants of one townland, complaining that neither the valuator nor his assistants had visited their townland; the assistant said he had.

Wilson took back the books and revised them.

On the 21st January, 1841, Wilson returned the revised valuation to the Board, and the Guardians took home the books of their respective divisions. They suggested a good many alterations, most of them were for mistakes in the number of acres, and some names were left out altogether; some of them, but not many, were for reducing the valuation: the valuator, in most cases, made the required alterations.

There is a large tract of mountain in the Union, there is also a great extent of arable land along the sea shore, and at the other side of the mountain.

The electoral division of Kilkeel contains about 4,496 acres of mountain land, valued at £90 or £100. There are few people living in the mountainous district, not more than perhaps 20 or 30. He adopted Griffith's valuation—charged it to the landlord, and charged the tenants only for their houses; very few leases in the division; all, except two townlands, is part of Lord Kilmorey's estate; no leases have been given on that estate for the last six or seven years.

No part of the division of Mourne is returned as mountain; some of it borders on the mountain; all, except four townlands, is part of the Kilmorey estate.

There are 9,615 acres in the division of Green Castle, 4,093 acres of which consist mountain, valued at £88; nearly all is part of the Kilmorey estate.

The greater portion of Ballykeel is mountain, it contains altogether 12,833 acres, upwards of 8,030 mountain, valued at £80; Lord Kilmorey is the landlord of two-thirds, the rest is divided amongst small proprietors. The rents charged on those estates is considerably higher than the valuation. The whole of the townland of Ballymartin, under Lord Kilmorey, is leased at 1s. an acre. The occupiers are comfortable farmers from 5 to 14 acres. In consequence of the low rents they pay, a good many of them are freeholders.

About half of Mullartown is mountain. There are five townlands in the lower part, three of which belong to Lord Kilmorey, the remaining two are divided amongst several proprietors.

No part of the division of Fofany is returned as mountain, but some of it borders on the mountain; Lord Roden is the landlord of two townlands; does not know whether there are any leases on his estate, but does not think any are given at present; no freeholders; the Marquis of Downshire is the landlord of two townlands; there are some freeholders on his estate; three townlands are part of the Annesley and Bangor estates; is not acquainted with the other divisions.

Does not think there are many leases in any part of the Union; on the Kilmorey estate, when the leases drop, they are not renewed. The tenant considers himself as secure without as with a lease; he is never turned off as long as he pays the rent.

Mr. ATKINSON, elected Guardian for Mullertown, *examined.*

The valuation of his electoral division is very fair; has heard a great many complaints amongst the rate-payers that is too high, but does not think they will be able to sustain any objections.

One of his neighbours, who has 60 or 70 acres, pays rent to Mr. Thompson of Newry, about £70 a year; that farm is valued at £63. 18s. Is sure that more than £70, perhaps £80 a year could be got, but thinks £70 a year quite enough for it.

The country is very densely inhabited; an acre or two would sell at any price; the holdings are from 3 to 4 acres; very few leases; farms of that size near the sea which give good oats, barley, and potatoes, (no wheat) are valued at from 25s. to 30s. an acre; some of them are let higher; some of them are let as high as £2 an acre; thinks 30s. quite enough.

Never heard any of the Guardians complain of the scale of valuation, except Mr. Henry, Lord Kilmorey's agent, who said he thought that, if any thing, it was too low; and two or three others complained that it was too high. The latter are tenants, and guardians in the neighbourhood of Kilkeel. The letting value there is higher than in his division.

A good deal is given for land near Kilkeel. Mr. Walmsley gets £3. 3s. an Irish acre for land valued at about £2. £3. 3s. is a rack-rent for that land. Considers Wilson's revised valuation perfectly fair between landlord and tenant.

Edgar valued the electoral division of Mullartown; does not think he went through every tenement.

Heard many of the tenants say that he never even looked at their land. Never saw him in his division but once or twice.

Wilson called upon him once; thinks he made a good many alterations in Edgar's valuation.

Thinks Edgar got the value of the whole townland from Griffith's valuation; he added about 25 or 30 per cent. for the houses, improvements, &c., according to their number and

Valuation of the neighbourhood of Kilkeel.

Assistant valuator's mode of valuing.

condition; 30s. for one, 25s. for another, and so on; he then found the relative value of each holding from the County Cess applotments. Has compared Wilson's valuation with Griffith's, and found the former, in most instances, to be about 30 per cent. higher.

There were a great many errors in the number of acres: some places were left out altogether. He pointed out a great many mistakes, which Wilson corrected. Knows every acre in his electoral division, and thinks that at present it is pretty fairly valued; not the most that would be given, but the fair value of the land, and a little below the rents.

Mr. GEORGE MULLIGAN, elected Guardian for Bryansford, *examined*.

He considers the town of Newcastle is altogether too highly valued.

Walked with Wilson when he was valuing the town, and he told him that he adopted Griffith's valuation by adding half to it.

There is neither fair nor market at Newcastle, the people merely depend upon strangers who come in the summer; many houses are often unlet, even in the summer, some of them are let for a month or two.

The greater part of the town is under lease; ground-rent is paid to Lord Annesley, it varies from 6s. to £2. 10s.

Has a house next door to, and of the same description as, the one he resides in, he has it let to a tenant from year to year for £16; Wilson has valued that house and his own together at £30.

The owners are, generally, satisfied if they make £20 in one season,—alludes to the best houses in the town,—that is the most they ever make, furniture included; these are valued at £15 or £20.

Knows a small thatched house, which is valued at £8; it is often let in the summer for a month or six weeks, at 20s. per week. Does not think if a man came from the country to take it by the year, he would give more than £5 for it.

Knows the house where the captain of the coast-guard lives; the rent is £20, including furniture, stabling, &c.; it is valued at £30.

This town is valued higher than Kilkeel or Castletwellan, though they are both market-towns.

Has heard no complaints about the land in his electoral division; very high rents are paid, 40s. or 50s. an acre; thinks it is, in most cases, valued as high as the rent; no leases are given now in his neighbourhood.

W. S. HILL, Esq., ex-officio Guardian, *examined*.

He resides in the electoral division of Bryansford, is not well acquainted with the valuation of the other parts of the Union. In his neighbourhood Wilson depended principally upon his assistants; does not think they visited every tenement. Mr. Wilson's son came to him, and had access to his maps and books.

On one or two townlands there were memorials from the tenants, complaining that their townlands had not been visited, but has heard that Wilson went there since.

When the valuation of the part of the Union in which he resides was given in, there were a great many mistakes both in quantity and value.

The whole valuation was referred back by the Board to Mr. Wilson, who returned it about two or three months after, and he (Mr. H.) then took home the valuation of his district, and he gave Wilson a list of objections which he corrected in his (Mr. H's) office, without visiting the tenements.

Does not mean to object to the valuation as at present altered, and considers it a tolerably fair valuation as between landlord and tenant; these observations apply only to the part of the Union in which he resides; this is merely his present impression; could not say without looking into it more minutely, and comparing the valuation with his books, whether it is above or below the rent.

Mr. WILLIAM HAMILTON, elected Guardian for Kilkeel, *examined*.

He thinks the valuation altogether too high, particularly in the vicinity of the town; it is considerably above the rents on Lord Kilmorey's estate.

Mr. Henry, the agent, thinks the valuation too low, but when he, Mr. Hamilton, pointed out some small farms near the town, he admitted that in those instances it was too high.

Does not know much of other parts of the Union.

There are a great many middlemen about the town, and they let their land high; the price they get is above the valuation, but thinks that the rent paid to the owner in fee is lower than the valuation.

Has a small farm which he has let for the last 20 years to a tenant-at-will, the rent of which is £2 an acre; that is the full rent it is worth. It is valued by Wilson at £1 an English acre.

Mr. ROBERT DAVIDSON, elected Guardian for Greencastle, *examined*.

Considers the valuation a very fair one; the land is fully worth the money at which it is valued. The farms with which he is acquainted, are not valued too high, but just what they ought to be valued at between landlord and tenant.

COOTEHILL UNION.

Extracts from Minute Book of Board of Guardians.

18th September, 1839. First meeting of the Board.

Present 5 ex-officio and 16 elected Guardians.

Committee of one ex officio and four elected Guardians appointed to inquire and report upon the best mode of proceeding to obtain a fair valuation of the property within the Union, according to the Act of Parliament.

Resolved,—That the chairman, vice-chairman, and deputy vice-chairman, be members of all committees.

11th October, 1839. Meeting of the Board.

Present 3 ex-officio, 11 elected Guardians.

The valuation committee presented the following Report:—

Your committee are of opinion that the valuation required for the Union can best be effected by taking Mr. Griffiths' county valuation as a guide, leaving it to a competent valuator to revise, correct, and adapt the same under your auspices, so that the tenement of each occupier should be set down at the reasonable and fair letting value as required by law; and that such properties or elements of value as are not included in such valuation, which are liable to be rated under sections 63 and 64 of this Act, should be added.

Your committee deem it necessary that the valuator should be furnished with,—

1. Copies of Griffiths' valuation, and the townland maps marked with the red lines, denoting the qualities of each portion of land, and copies of the field books corresponding thereto.
2. Lists of occupiers from the tithe valuation.
3. With such other information as can be obtained from landlords, which may tend to assist in determining the equitable valuation designed by the law.

With respect to the information last adverted to, your committee desire to express their decided opinion, that upon the amount of assistance afforded by landlords and other persons interested, and more especially on the energy and zeal afforded by your Board, both individually and collectively, depends the success of the work about to be undertaken. It is a point upon which all are interested, because by the completion of an equitable valuation, the cheerful payment of the amount levied upon each individual will be best recovered, appeals will be avoided, and all additional expense thereby guarded against.

A circular adapted to desire cordial co-operation, and pointing out the information required, has been adopted.

That a permanent valuation committee be now appointed, with full powers to superintend the progress of the valuation, and report to the Board from time to time.

That an advertisement be issued for valuator.

That the valuator be required to proceed in the valuation by electoral divisions, and give in the same to the committee according as they are completed.

That previous to entering upon an electoral division the clerk should issue the circulars recommended; and that when the valuation of an electoral division is complete, the committee, acting as a committee of revision, should take into consideration such complaints as are made, and determine upon those which should be sent to your Board, to be considered finally in the presence of the valuator.

That the Guardian or Guardians for the electoral division in progress of valuation should, pending such valuation, be ex officio members of the valuation committee, and be summoned to attend as such, in order that the committee may obtain the best local information as the valuation of each electoral division is laid before them.

An advertisement for a valuator was read and approved of.

Resolved unanimously,—That the same valuation committee be continued, and act as a permanent valuation committee, as suggested in the Report.

Resolved unanimously,—Report and minutes of the proceedings of the valuation committee to be sent to the Poor Law Commissioners.

8th November, 1839. Meeting of the Board.

Present four ex officio and seven elected Guardians.

The proposals for the valuation of the Union having been opened and read by the chairman,

Resolved unanimously,—That Mr. Wilson's proposal be accepted, in case of Mr. Otway receiving a favourable answer from Mr. Hawley, as to the manner he performed the valuation of the Newcastle Union, now in progress.

6th December, 1839. Meeting of the Board.

Present, four ex officio and nine elected Guardians.

Mr. Otway read a letter from Mr. Wilson, stating the period he could commence the valuation of the Union (on 15th February, 1840).

Mr. Otway also stated the result of his communication with Mr. Hawley respecting Mr. Wilson.

APPENDIX.

Cootehill.

Extracts from Minute-Book.

First meeting of the Board.

Committee appointed to inquire as to valuation.

Report of the Valuation Committee.

Documents to be furnished to valuator.

Advertisement for valuator.

Proposals by valutors.

APPENDIX.

Cootehill.

Mr. Wilson appointed valuator.

Resolved,—That Mr. Wilson's appointment, in accordance with the resolutions of the last meeting, is fully approved of and confirmed.

16th March, 1840. Meeting of the valuation committee.

Present, one ex officio and four elected Guardians.

Mr. Wilson having been called in, stated to the committee, that he would not commence the work of any other Union until he finished Cootehill; that he engaged to visit and inspect each house and tenement within the Union; that he did not consider it necessary to attend upon appeals, unless required by the Board of Guardians; that he would execute the contract for valuation before he entered on his duties; and would, with two sufficient sureties, execute the bond at any time during the progress of the valuation that the Board of Guardians might require, as he would not require any money until all was finished.

Resolved,—That the valuator commence with Cootehill electoral division.

3rd April, 1840. Meeting of the Board.

Present, 3 ex officio and 12 elected Guardians.

The valuator, Mr. Wilson, having been called in, produced his valuation book for the information of the Board as to the progress of the valuation.

8th May, 1840. Meeting of the Board.

Present, five ex officio and seven elected Guardians.

A letter was read from the valuator, stating that the field books of the divisions of Cootehill, Tullyvin, and Ashfield, were complete; also a great portion of Drumgoon and Laragh. He further stated, that his work was impeded by not being provided with the rentals, and requested the Guardians of the several divisions to make arrangements to procure them.

He stated that he had submitted part of his work to some of the Guardians, and that they agreed with him as to the value of land. He requested to be furnished with copies of the tithe books.

Resolved,—That the letter from the valuator be referred to the valuation committee, with the request of the Board that they would meet the valuator on his return to the Union, and report to the Board on the progress of the valuation, and on any circumstances connected with the facility of the valuation.

26th June, 1840. Meeting of the valuation committee.

Present, three ex officio and three elected Guardians.

A letter from the valuator, dated 4th May, was read by the clerk.

Resolved,—That the valuator do finish Cootehill electoral division before he enters on any other, and so on each electoral division, as laid down in the order declaring the Union.

3d July, 1840. Meeting of the Board.

Present, 3 ex officio and 11 elected Guardians.

The valuator reported, for the information of the Board, that the valuation of Cootehill, Ashfield, Tullyvin, Drumgoon, Laragh, and Knockbride electoral divisions were finished; and having produced the rough draft of such valuations, was examined thereon, and gave general satisfaction.

24th July, 1840. Meeting of the Board.

Present, 3 ex officio and 11 elected Guardians.

The valuator having been called in, was examined on the progress of the valuation of the Union.

21st August, 1840. Meeting of the Board.

Present, three ex officio and seven elected Guardians.

The valuator's Report on the progress of the valuation was read by the clerk. It stated, that since their last meeting he had gone through the remainder of the Union, namely, the divisions in the county of Monaghan undone at that time, the Guardians of which divisions individually rendered him most able and important assistance; and he hoped on examination it would be found satisfactory.

He suggested the propriety of each Guardian taking the field book of his division and submitting it to the inspection of the rate-payers, as no work going through a first revision could be expected to be entirely perfect.

The field books were then submitted to the Board for inspection.

Resolved,—That the field books of each electoral division be left with the Guardian or Guardians thereof for the purpose of inspection.

5th February, 1841. Meeting of the Board.

Present, one ex officio and four elected Guardians.

The valuation being now complete, it was resolved, that it should be lodged for 21 days for exhibition at the clerk's office.

Valuator to finish each electoral division before he enters on any other.

Field-book of each electoral division to be left with the Guardians of such division.

Evidence.

Mr. Cornelius, clerk of Union.

Appointment and qualification of valuator.

Documents furnished.

Evidence.

MR. SAMUEL CORNELIUS, Clerk of the Union, *examined.*

'William Wilson was appointed valuator on the 8th November, 1839.

He was a professional valuator, and had been employed by many gentlemen to value their estates; amongst others by Lord Cremorne, an ex officio Guardian of this Union. He had valued the Newcastle Union, and had letters of recommendation from Mr. Hawley, the Assistant Commissioner, and from gentlemen whose estates he had valued.

He had no assistants; he valued the whole Union himself.

He was supplied with copies of the tithe compositions, Griffiths' valuations and field-books

for the four electoral divisions in the county of Monaghan; rentals from the landlords and agents. Griffiths' valuation for the county of Cavan was not complete at the time. Does not think he got the county cess applotments. He got information from the county cess collectors to help him in making out the areas and boundaries of the tenements. He did not follow Griffiths' valuation, which he considered too low.

He got the names and rents of the occupiers from the landlords' rentals; he inserted them in his field-books, and generally adopted the rent, if, upon visiting the tenement, he considered that it was a fair rent; but if he thought that it was too high or too low, he would alter it according to his own views, and then add something for county cess, repairs, &c., to make up the gross value.

Does not think he was guided in every instance by the rent; does not think he valued the land at the highest price that could be got for it. Landlords in this part of the country do not advertise their land or let it to the highest bidder. When they have land to be let, they make private inquiries and receive proposals, but do not accept the highest offer; they are satisfied with a fair rent, and generally take the most solvent tenant.

If let to the highest bidder, that would be a rack rent; the tenant would not probably pay it; at least, there would be great trouble in collecting it; that was not the test adopted by Mr. Wilson.

His test was not the utmost that could be got from a solvent tenant, for a solvent tenant, namely a man of capital, might pay a rack-rent or a very high rent for a few years, but would be wasting his capital.

Does not think he valued it at the utmost that a tenant might pay and continue to pay, for a tenant might do that by stinting himself; for instance, by giving the buttermilk to the pig and not to his family.

Believes the valuator generally inquired from the tenant whether he could afford to pay a higher rent and reserve a reasonable profit to himself. If the man did not answer him fairly, he would find it out from his neighbours.

Thinks Mr. Wilson valued the land at a fair rent, so that the tenant could reserve a reasonable profit to himself, and live comfortably for a man of his class.

Thinks that most tenants would be willing to pay their rents at Wilson's valuation, and that good landlords would be satisfied with such rents.

Most of the landlords in the Union are large proprietors and indulgent to their tenants, the rents are moderate and considerably below what the land could be let for.

On some estates where the landlords are very indulgent to their tenants, the valuator considered that the rent was too low, and raised his valuation above the rent; and where the rent is 7*l.* 10*s.* and 8*l.* the valuation is 9*l.*; and where the rent is 6*l.* the valuation is 7*l.*, and so on in proportion.

In the greater portion of the Union the valuation is the same as or within a few shillings of the rent. In some few instances where the rent is paid to a middleman, and on one or two small estates which have been lately purchased, the owners of which are anxious to get a high rate of interest for their purchase money, and let their lands at the most they can get, the valuation is considerably below the rent; knows instances on such properties where the rent is 9*l.* and the valuation 6*l.*, and where the rent is 6*l.* and the valuation 4*l.*; believes that these high rents are paid, but not so punctually; the tenants live wretchedly.

The greater number of farms are tillage farms, and vary in extent from three to six acres. There are not many over twelve or fifteen acres; thinks that landlords charge a higher acreable rent for small farms than they do for large farms; does not think Mr. Wilson made any difference in his valuation, but thinks he put the same acreable value upon a large as upon a small tenement.

Has compared Mr. Wilson's valuation in several parts of the Union with Griffith's, and has found Mr. Wilson's about 20 per cent. higher.

Mr. Wilson commenced his valuation on the 25th of March, 1840. It was finished in October; he went away two or three times in the interval, and was absent altogether about two months; he was about four months actually engaged in the valuation.

There were no particular instructions given to the valuator except those contained in the Report of the valuation committee, and the circulars from the commissioners.

He was directed to value each electoral division separately.

The valuation committee did not meet to revise each electoral division, but when Mr. Wilson had finished the valuation of a division, he gave the field book to the Guardians, and the Guardian of the division took it home to look over it and show it to his neighbours.

When the Guardian thought a tenement was not valued fairly, he suggested it to the valuator, who made the alteration himself.

There were very few alterations made; they were generally to lower the valuation, and he always agreed to the suggestion.

He valued the Union in the summer, and if the land was liable to be flooded, or not in such good condition, in the winter, this was generally suggested by the Guardian.

The division of Cootehill, which includes the town of Cootehill, was the first division that was valued.

He took into consideration the size and condition of the house and of the offices in the rear, also the situation for business; he did not value residences as high as houses of business; for the majority of the houses in the town the occupiers pay only ground-rent; he has not valued them at the highest price that would be given for them, but at a reasonable rent. Some houses which he has valued at 10*l.* could be let for 12*l.* or 15*l.*; knows a house let at 20*l.* which he has valued at 15*l.*; does not think that more than 20*l.* could be got for it.

dians.

Cootehill.

APPENDIX.

Cootehill.

Town fields.
Ashfield.

Many householders in the town have some land in the neighbourhood; some have four or five acres, others only one or two, he valued those fields at about 2*l.* or 3*l.* an Irish acre, some of them are let at 4*l.*

Does not think he made much difference between large and small farms.

The second division was Ashfield; the upper part of this division is hilly, and the farms are small: the lower part is very good land, and there are not so many small holdings; is very well acquainted with the upper part of this division; it is very poor land; Mr. Wilson has valued it at about 1*l.* an acre.

The valuation is about the same as the rent; thinks he has valued that district just enough to let the tenant live barely comfortably and no more.

The lower part of Ashfield division is valued at about 30*s.*; thinks that is about the rent; it is much better land, and if the tenants paid rents at Mr. Wilson's valuation, the tenants could live more comfortably than in the upper part; very few have complained of the valuation in this division.

Tullyvin.

The next division he valued was Tullyvin; thinks if there were any difference, Mr. Wilson valued that division upon a lower scale than the last.

Drumgoon.

He then valued Drumgoon; he valued it very fairly with the exception of one or two townlands, where there were some complaints, but the valuation of those townlands will be reduced.

The other divisions are all valued fairly but not to say low.

The occupiers would like to be valued lower, but thinks he was generally near the mark.

He generally inquired whether there was a lease, but could not say whether that influenced him in his valuation. He first valued the land and then added something for the house, offices, improvements, &c.

Valuator attended
market to ascertain
value of produce.

When he first commenced his valuation he came two or three times to Cootehill on market days to inspect the market and ascertain the prices to form an opinion as to the value of the produce.

Heard him remark that this was a good market town, from the good roads and its proximity to Dundalk, Drogheda, and Dublin; there is always a sale for corn; thinks he took that into consideration.

Thinks he made some but not much allowance for the great demand there is for land; land is seldom unlet.

Does not think, in estimating the value of tenements of which the owners were freeholders, he made any reference to the value they had themselves set upon them.

The competition for land has not raised the rent above what a tenant can reasonably pay except where the tenants hold under middlemen; the owners in fee do not generally set their land at the utmost a tenant could pay.

The county cess amounts to about 3*s.* per acre a-year.

Leases.

In the Cootehill division more than half the land is under lease.

The leases were made sixteen or seventeen years ago for one life, or twenty-one years.

In the town the leases are for three lives, or thirty-one years.

In Rakenny some leases have been made within the last year or two, for one life or twenty-one years.

In that division there are also many old leases.

In the Ashfield division many leases were given out lately.

The same in Dartrey.

Not many leases have been granted lately in the electoral division of Tullyvin.

Cannot say whether there are many leases in Drumgoon, but knows there are some.

In Drum and Leragh a good many.

In Knockbride there are some very good leases; the tenants are comfortable and independent; the land there was valued by Mr. Wilson at about the rent. In many instances above the rent.

Almost all Dartrey is under lease; new leases are constantly granted.

Altogether in the Union thinks that more than half the land is under lease, and the landlords are generally disposed to give leases.

All the Guardians approve of the valuation, there was no difference of opinion amongst them. They did not interfere much, there were several days fixed for meetings of the valuation committee, but only one or two members attended.

They had great confidence in the valuator, and were perfectly satisfied with him.

Ninety-six objections were sent in, they were all from occupiers for overvalue. Many of them have been withdrawn, and there is an understanding amongst the Guardians that the others will be settled by making a slight reduction.

Mr. M'Intosh,
elected Guardian.

MR. EDWARD M'INTOSH, elected Guardian for the electoral division of Cootehill, *examined.*

Resides in the town of Cootehill, and has several large farms in the neighbourhood.

The valuator was directed to value each electoral division separately, and not to undertake more than one at a time.

No regular revision
committee.

Mr. Wilson generally consulted the Guardians who resided in the division; there was no meeting in each district; he gave the field book of each division to the Guardians of the division. When he had finished the whole he submitted it to the Board, and each member inspected the portions with which he was acquainted.

Thinks that the valuator was guided by what he considered the land would fairly let for, according to the quality of the soil, not the utmost that could be got for it by advertising for a tenant, or by giving it to the highest bidder.

Thinks most of the holdings could be let for more, but the valuator considered what the tenant could fairly pay and live comfortably.

Mr. Wilson's valuation upon estates, the rents of which are moderate, is generally about the same as the rent.

In this Union the rents in general are not high, the landlords are large proprietors and like to see their tenants comfortable.

Thinks he followed the directions of the commissioners, and that he made a fair and reasonable valuation.

He (Mr. M.) valued the parish of Drumgoon about seven years ago for the tithe composition: the principle he went upon in his own valuation was a fair and reasonable rent between man and man, so as to live and let live; compared his own valuation with Mr. Wilson's, and found it in many instances nearly the same.

Generally a little below the rent, but not much; in some instances where very high rents are paid, considerably below the rent; that is not often the case in this Union.

He took local advantages into consideration; for instance, town fields, small spots of two or three acres were valued higher in proportion than the larger holdings, because the actual letting value is higher.

The majority of the farms in the Union are from five to fifteen acres, many under five acres.

The average rent paid in this neighbourhood is from 25*s.* to 30*s.* an acre. Mr. Wilson's valuation of land paying that rent would perhaps be from 22*s.* to 25*s.* or a little more; he is perhaps half a crown in the pound below the rent; is generally pretty near the mark. Comparison of valuation with rent.

The valuator did not visit every tenement, but when he went to a townland he took a general view of the surrounding fields. In some instances he could not get the rentals.

There is great competition for small farms, but the land is seldom let to the highest bidder; thinks that small farms are let higher in proportion than large farms, but thinks that Mr. Wilson valued both large and small farms on the same scale.

About half the holdings are under lease, many of them late leases.

Competition has raised the price of land very high. From 10*l.* to 20*l.* an acre is constantly given (even where there is no lease and the rent is high,) for the goodwill or tenant right; believes that 10*l.* or 20*l.* an acre would be given for the goodwill of land let at Mr. Wilson's valuation.

Has himself paid 50*l.* for four acres near the town, subject to about 4*l.* per acre rent, no lease, that is valued at about fifty shillings.

A tenant can generally underlet his holding at a higher rent than he pays, but the great competition is for tenements held under the owner in fee. The valuator did not take that competition into account.

His valuation was fair and equitable between the several electoral divisions.

The Guardians generally approved of the valuation. The rate-payers are under the impression that the landlords have been endeavouring to raise the valuation that they may have less to pay. Does not think that is the case; the landlords did not interfere.

The Guardians never took part when their own properties were under discussion, except to give information.

The term of leases is generally for one life, or twenty-one years.

No revision by the committee of valuation has as yet taken place.

There were some complaints made by the occupiers; they did not complain that the valuation was higher than the value of their land, but that their tenements were rated too high in comparison with the tenements of others.

In some instances the valuation is a good deal below the rent, but where the rents are moderate the valuation is pretty near the mark; sometimes above it, sometimes below it, perhaps on the whole a shade lower, about one-eighth or a tenth.

CHARLES COOTE, Esq., Chairman of the Board, *examined.*

Considers that the valuation is very fair and equitable; it is generally rather below the rent, and thinks it is what a good landlord would let his land for.

Charles Coote, Esq.,
Chairman of Board.

RENT AND VALUATION OF £10 COUNTY ELECTORS (registered 1832 to 1840), so far as ascertained.

Marked thus (*) registered in 1832, and not since re-registered.

		13318	2 26	7953 14 8	9891 7 0	9,234 16 0*

* This total assumes the rent of the four last townlands to be the same as Wilson's valuation.

† A mill in this townland, rent £16, valued at £100.

APPENDIX.

Roscrea.

ROSCREA UNION.

Extracts from Minute Book of Board of Guardians.

Friday, 28th June, 1839.

Resolved,—That it is the opinion of this Board, that there is no existing valuation which can be made available, sufficient for the purpose of estimating the net annual value of the rateable property in the Union, and that a fresh valuation will be required.

Resolved,—That a competent person be appointed to value the whole of the rateable property throughout the Union, and revise and correct existing surveys when necessary; and that the clerk be directed to insert advertisements in the “Leinster Express,” and “Tipperary Free Press,” calling on competent Valuers for tenders for their service.

Resolved,—That a Special Committee for superintending the valuation of the rateable property be appointed, and that the following Guardians be appointed members of the committee (3 to be a quorum)—(here followed the Names).

Thursday, 8th August, 1839.

To the Roscrea Board of Guardians.

Gentlemen,—I hereby propose to value the Union under your guardianship at the rate of 2*l.* per 1000 acres, and I will also furnish to you a valuation of the several towns in the Union for the sum of 50*l.* sterling.

The above proposal was agreed to unanimously.

Thursday, 11th July, 1839.

Resolved,—That Henry Scroope, Esq., be appointed Valuator of this Union, at 2*l.* 15*s.* per 1000 acres. The Board agreed unanimously to this appointment.

5th November, 1839.

It was ordered unanimously, that Mr. Scroope be requested by our clerk to attend the next Board; and that, in the meantime, if he has an electoral division valued, and ready to be laid before the Committee of Valuation, the name of the said electoral division be communicated to each member of the said committee, and that they be summoned to attend on that day, and each day successively, as each electoral division shall be ready in future.

5th November, 1839.

By resolution of this date, the Guardians of each electoral division were permitted to vote with the committee.

15th February, 1840.

That the members of the electoral division under consideration by the Valuation Committee be added to and vested with all the powers of said committee during the period such electoral division is under consideration, provided two of the seven members originally appointed be of the quorum.

2nd March, 1840.

There being much discussion about the valuation, it was determined that a little further time be given to Mr. Scroope to revise it, after which it is the opinion of the Board that very many objections will be removed, and then the public shall have due notice when their objections will be heard.

*Evidence.*Mr. HENRY SCROOPE, valuator of the Union, *examined.*

The valuation he considers *rather low*; in very few cases, if in any, exceeding the rents paid by the tenants; and in most cases considerably under.

He valued the Union on the principle, which he considers an equitable one, that every tenant should have an interest in his holding.

And, at his valuation, he thinks that interest (supposing the tenant to have a lease of 21 to 31 years) would vary from 2*l.* to 10*l.* per acre on large farms, and from 10*l.* to 15*l.* per acre on smaller ones.

The disparity in the value of the interest between the large and small farms, he thinks, arises from the circumstance of the smaller farms being within the reach of the greater number of parishioners, and from those who possess large sums being able to make a better investment than in the purchase of farms.

He thinks that his valuation is at least 25 per cent. under the rack-rent; and he knows instances in which a rack-rent of 50 per cent. over his valuation is charged.

In the towns, he valued the houses something below the letting value—say, 15 per cent.

In the country, he put a very low value on common farm houses.

He valued gentlemen's seats from 10 to 35 per cent. in addition to the value of the land.

He is a professional valuator: is a native of England; and was brought up in a valuator's office there; has been some years in this country.

His valuation for the poor-rate is something—say 10 to 15 per cent.—lower than he would have valued the Union, if employed to do so, for letting or sale.

Extracts from Minute Book.

New valuation required.

Advertisement for valuers.

Valuation Committee.

Proposal for valuation.

Valuator appointed at 2*l.* 15*s.* per 1000 acres.

Summons to Valuation Committee.

Valuation Committee open to Guardians.

Mr. Scroope, Valuator.

Valuation rather low.

Principle of valuation.

Value of tenant's interest.

Cause of disproportion of value of small holdings.

Valuation 25 per cent. under rack-rent.

Townholdings.

Farm Houses. Gentlemen's seats.

Is a valuator by profession.

Poor Law valuation 10 to 15 per cent. below valuation for letting or sale.

Roscrea.

Evidence.

In the latter case allows for competition.

Accordance of valuation with directions issued by Poor Law Commissioners.

Beneficial interest of tenements valued at 5*l.* equal to 12*l.* or 15*l.*

If no manual labour paid for, beneficial interest 25*l.* per annum.
Instances of valuation.

Principle of valuation.

Very few leases in the Union.

Objections to valuation.
On what grounds.

Hon. F. A. Prittie,
Chairman of the Board of Guardians.

Tenders for valuation.

Committee of revision.

Valuation satisfactory.

Mr. Smallman,
elected Guardian.

Captain Smith,
elected Guardian.

Definition of letting value.

Where tenant holds immediately, beneficial interest exists.

The reason of which is, that, in that case, he would take the competition for land into account, which he has not done in the present valuation.

Having drawn Mr. Scroope's attention to the principle on which the Poor-Law Act and the Commissioners' Circular on valuation and rating prescribed that the net annual value of the different hereditaments should be ascertained—namely, "the rent at which, one year with another, the same might, in their actual state, be reasonably expected to let from year to year; the probable annual average cost of the repairs, insurance, and other expenses (if any necessary), to maintain the hereditaments in their actual state; and all rates, taxes, and public charges (if any), except tithes, being paid by the tenant:"—and asked whether he thought the principle on which he proceeded, of going 10 to 15 per cent. below what he would have done if valuing for letting or sale, was reconcilable with this requirement of the Act and of the Circular of the Commissioners—he stated, in reply, "That he felt that, owing to the short time allowed for so extended a valuation as 150,000 acres, and the small remuneration sanctioned by the Commissioners, that it was totally out of his power to do the justice he should have wished to the valuation he undertook: he consequently considered that, by valuing at what he thought a low rate, he was quite sure he would give the tenant the advantage, rather than the landlord."

Having inquired from Mr. Scroope what beneficial interest the occupiers of tenements rated at or about 5*l.* usually derived from their farms, according to the mode of cultivation generally practised by small farmers, he replied—

That, casting his eye over half-a-dozen farms in the townland of Clougheen, division of Ettagh, varying in extent from 7½ acres to 15 acres, and valued by him at from 5*l.* 15*s.* to 12*l.*, if everything that grew on the farm was sent to market, and was put to the credit of the farm, and supposing that it was charged, with the rent at which he has valued it, with all taxes, with seed, labour, tear and wear—all the cost of production—there would be a clear profit of 15*l.* on the farms of 7½ acres, valued at 5*l.* 15*s.* in the rate-book; and at the same rate on the larger farms.

And if the tenant had not to pay for manual labour, there would be an additional profit of 10*l.*, making 25*l.* in all: and he considers the farms he has alluded to, to be of rather an inferior quality of land.

Taking the same farms in another point of view, an additional rent of 4*l.* might be got on the farms valued at 5*l.* 15*s.* One of the farms valued by him at that sum, he knows is let at 7*l.* 10*s.*

His principle of valuation, generally speaking, is the one-third of the *disposable* produce to cover the expense of production (including taxes), one-third to the landlord, and one-third to the tenant: but this principle, in valuing lands for letting or sale, must be controlled by the practice of each district, and the demand then existing for farms.

There are very few leases in the Union, owing principally, as he believes, to an indisposition on the part of the landlords to make voters; and he also thinks it may arise from a feeling in the mind of the landlords that they have a greater control over their tenants when there are no leases.

There have been a good many objections to the valuation, on the ground of inaccuracies as to the extent of the different holdings (arising from the insufficiency of the surveys); but there have been very few objections as to the scale of valuation adopted. Some landlords have expressed an opinion that the valuation is rather low; but no formal objections have been made by any landlord on this ground.

The Hon. FRANCIS A. PRITTIE, chairman of the Board of Guardians, *examined.*]

States that there were advertisements inserted, requiring tenders for the valuation; there were tenders by several other valuers, and Mr. Scroope was unanimously appointed by the guardians.

A Committee of Revision of Valuations, consisting of seven members of the Board (four ex-officio), was appointed.

The committee met once to examine some of the books which were first completed; and, being satisfied with the manner in which the valuation was done, no further revision took place; and the Board unanimously expressed their approbation of the manner in which the valuation was conducted.

There are very few leases within this Union: he conceives the reason to be, that landlords do not like their tenants to go against them at elections.

Mr. SMALLMAN, elected guardian, *examined.*

Stated that he was not acquainted with any part of the Union but that in which his own land was situated. He holds some land himself, and does not think it over-valued.

Captain SMITH, of Mount Butler, elected guardian, *examined.*

Is a magistrate, and deputy chairman:

Generally speaking, Mr. Scroope's valuation is from 15 to 20 per cent. below the fair letting value.

His idea of the fair letting value is this,—that if a man had a lease of a farm at what he conceives to be the fair letting value, he would get from 8*l.* to 10*l.* per acre for his interest, for his bargain.

And wherever the tenants hold *immediately* from the proprietors, the tenants generally have this interest in their holdings.

J. P. LIDWELL, Esq., a magistrate, and elected guardian, *examined.*

Concurred in what Captain Smith had stated.

He also said it was a fallacy to suppose that the qualification in Lord Morpeth's Bill would enfranchise the old 40s. freeholders: it would disfranchise five out of every seven of them.

There exists a good deal of indifference on the part of the farmers to get registered, arising from having seen a good deal of misfortune brought on many who have opposed their landlords.

Thinks Mr. Scroope's valuation is a low one.

Mr. O'BRIEN, clerk of the Union, *examined.*

Stated as an instance of the lowness of Mr. Scroope's valuation,

That he had been in treaty for purchasing the interest in the lease of a farm in Clogheen, No. 7, in the division of Ellagh, for which the Rev. Mr. Kelly is rated at 48*l.*: it contains 54 Irish acres. Witness offered 100*l.* for the interest, and 30*s.* per acre, which was refused.

BALLINASLOE UNION.

Extracts from the Minute Book of the Board of Guardians.

APPENDIX.

Ballinasloe.

No previous valuation available.

July 16, 1839.

Present, 36 guardians.

Resolved,—That it be communicated to the Poor Law Commissioners that there is no survey or valuation in existence by which it would be desirable to go in making a valuation of the Ballinasloe Union; but that the Ordnance survey of Galway county is in such a state of forwardness as in all probability to be available for the purpose; it is already published for Roscommon, and is available for that part of the Union.

Resolved,—That advertisements be put in the "Dublin General Advertiser" for sealed tenders from persons duly qualified to make a valuation of the Union.

Resolved,—That a Committee of Valuation be appointed to the number of seven, and that they report to the Board of Guardians from time to time.

Three *ex-officio* guardians and four elected guardians were appointed as such Committee.

Board advertise for tenders.

Valuation Committee appointed.

August 17, 1839.

Resolved,—That two elected Guardians be added to the Valuation Committee.

September 28, 1839.

Present, 37 guardians.

Ordered,—That the tenders from valuers be opened and read; which being done, the several persons proposing for the valuation of the Union were called in and examined.

Tenders opened and candidates examined.

(Here follow the names of 10 candidates.)

Resolved,—That 300*l.* be given for the valuation; 10*s.* per day for attendance before magistrates in support of the valuation, and nothing if it cannot be sustained; and for re-valuation one farthing per acre.

Amount of remuneration.

Mr. Charles Cooper was elected valuator, and accepted the terms as agreed to by the Board, finding security, himself in 500*l.*, and two approved securities in 250*l.* each.

C. Cooper elected valuator.

January 6, 1840.

Present, 11 guardians.

Resolved,—That Mr. Cooper be cautioned against taking account of the landlords' rents, either before making his valuation of any electoral division, and the same having been approved of by this Board, or in any way referring thereto in making such valuation.

Valuator not to take actual rents into account.

The Board having been of opinion that a trace from the Ordnance Survey of the Union, lying in the county of Galway, would greatly contribute to obtain a correct valuation thereof,

Valuator enabled to procure tracings of Ordnance survey.

Resolved,—That the sum of 17*l.* be given to the valuator to procure same.

Resolved,—That instructions be given to the several wardens to attend the valuator when called upon, and to afford him all the facility in their power in making his valuation, and to obtain for him all the information he may require in their respective electoral divisions.

Wardens to attend valuator.

April 25, 1840.

Present, 15 guardians.

The names of one *ex-officio* and two elected guardians were added to the Valuation Committee.

June 27, 1840.

Present, eight guardians.

The valuation of the electoral divisions of Moore and Taughmaconnell, as approved by the Valuation Committee, was confirmed.

Valuation of two electoral divisions confirmed.

February 6, 1841.

Present, 16 guardians.

The Valuation Committee report that they have gone through the valuation of the entire Union, and now submit it to the Board.

Valuation Committee report.

March 6, 1841.

Mr. Cooper, the valuator attended with the amended valuation which the Board went through.

Board went through valuation.

Resolved,—That the valuator be instructed to put a proper valuation upon the tolls of the Grand Canal, according to the electoral divisions it passes through.

Grand canal tolls to be valued.

March 20, 1841.

Present, 10 guardians.

The valuator having reported that 150*l.* per Irish mile would be a fair and just valuation, on the Grand Canal,

Valuation of Grand Canal.

Resolved,—That Mr. Cooper be instructed to place that valuation on the Canal accordingly, which completes the valuation.

valuation completed.

*Evidence.*Mr. CHARLES COOPER, Valuator of the Union, *examined.*

Mr. Cooper, Valuator.

Is a professional surveyor and valuator. Was engaged during six years on the Ordnance survey, and during five years practised on his own account. Was appointed

valuator of the Union 28th September, 1839. The valuation is completed, and open for the inspection of the rate-payers. In the Roscommon portion of the Union adopted the Ordnance survey, deducting therefrom all bogs and other waste land. In the Galway portion was obliged to depend upon general information, obtained from the occupiers and landlords, and also, in some parishes, from the tithe applotments, as the Ordnance survey of Galway was not so far completed as to enable him to obtain tracings of it, although the Board of Guardians offered to pay the expence of obtaining such tracings. In order to ascertain the names of occupiers, he, in the first instance, appointed an assistant to visit each tenement, and also to call upon the landlords for returns relating to the extent of their property, and the quantity of land held by the several tenants on it. Afterwards he personally visited about one-half the townlands within the Union, and compared the information so procured with his own actual observation. Mr. Philips was in partnership with witness in the valuation of this Union. Mr. Philips is a professional valuator and surveyor. Considers that the guardians approved of Mr. Philips being joined in the valuation, as he attended meetings of the valuation committee, and gave explanations to the guardians, with which they appeared satisfied. Mr. Philips has been employed by the Shannon Improvement Commissioners, and also extensively in England. Believes him to be a fit and competent person to be joined in the valuation of the Union.

Witness visited each townland in that part of the Union which he himself valued. Believes that Mr. Philips did the same with that portion which he valued. Cannot say that each holding in a townland was visited. Is acquainted with the quality of land in each electoral division in the Union. Believes that the valuation made by witness and Mr. Philips is uniform throughout the Union. In ascertaining the value of land, witness, when in doubt, did inquire into the actual rent, but not otherwise. Is now acquainted with the rent generally paid for tenements in the Union. In his opinion, and in that expressed by several guardians on the valuation committee, the valuation is in general from 10 to 12½ per cent. below the average actual rent. Means the rent paid under leases recently made, or by tenants from year to year. In valuing tenements considered each by itself with its own peculiar advantages or disadvantages. Divided land into four classes, according to its quality, and valued all land of the same class at the same rate, making, however, additions or deductions in consideration of local advantages or disadvantages, such as roads, shelter, supply of water, exposure, being subject to inundation, or the like. In valuing land, adopted as a test the fair and reasonable letting value as between landlord and tenant, founded on a knowledge of the general letting value of land in the Union. Some landlords in the Union let their land at a reasonable rent, but did not take any of those estates as a criterion for the valuation of others. Nor did the size of the tenement make any difference in the scale of valuation, except that a farm-house on a small farm would increase the value, while on a large farm, say of 50 acres, it would not be taken into consideration.

Considers the valuation of the Union, as now completed, to be equal to the reasonable letting value of the land, without any deduction, except that the occupier's liability to pay 1s. in the pound as poor-rates was always kept in mind, and an abatement allowed to that amount. The net annual value was first estimated, then taxes, repairs, and insurance were added to bring out the gross annual value. In calculating the net annual value did not adopt as a test any calculation founded on a division of the produce; cannot possibly say what proportion of the produce would be a fair remuneration either to the landlord or to the tenant. Adopted as a test of value the rent at which a landlord should set his land; that is, the rent which a solvent tenant would give for it. Does not mean the utmost which could be obtained from a solvent tenant if the tenement were to be let from year to year; but what a solvent tenant, making a prudent arrangement, would give. A solvent tenant is a person who knows how to cultivate his land, and would be able to pay his rent, and have a reasonable prospect of being able to continue to pay it out of the produce of the land. Makes no reference to the tenant having other means besides the land. However, in the case of the Callows along the rivers Suck and Shannon, the valuation is from 25 to 50 per cent. under the rent, as they are liable to great loss from inundations. The Earl of Clancarty's land is let at a reasonable rent; the valuation and the rents paid by his tenants are nearly equal. Believes that most of his lordship's tenants are registered electors. Knows land under one landlord let for 17. per acre, and land of the same value at the other side of the fence let at from 30s. to 40s. Did not adopt as a test of value the rent which land would bring if set up to public competition, because, there is such an anxiety to obtain possession of land, that witness has known from 87. to 107. per acre paid for land subject to, at least, 17. per acre rent, and not held on lease, although the same land is valued at not more than 17. in the valuation made by witness. Did not consider that the tenant was bound to deliver up possession at the end of a year. Did not at all consider the amount of profit or the nature of the subsistence to be derived by the tenant. Did not at all take into consideration the fact of the tenant being a registered elector, except in one instance, (as he can now best call to mind,) when, having some doubt as to the valuation, the knowledge that the tenant had registered satisfied witness that the valuation was not too high. The demand for land over the whole Union is great and nearly equal; but this did not affect the valuation. The principal landowners are Lords Clancarty, Clonbrock, and Ffrench; Sir M. D. Bellew and Sir Ross Mahon. The landowners do not in general let their land to the highest bidder, but let it at a reasonable and just rent. Most large holdings in this Union are on lease; almost all large farms on lease. There are many old leases. There are very many large farms, but the majority, both in number and in acreable extent, are small farms. There are more farms under 20 acres than over. Ascertained the quality of land; if in tillage, by examining the nature of the soil; if in grass, by the nature of the herbage. Valued houses and land sepa-

APPENDIX.

Ballinasloe.

rately, but did not value farm-houses on large farms. The principal towns in the Union are Ballinasloe, Ahascragh, Eyrecourt, Ballygar, and Anghrim. In towns adopted as a standard of value the letting value of houses. Judged from the average of the usual rents paid for houses of the same description in the same place, taking into consideration the character of the landlord and condition of the house. By character of the landlord means whether he lets his property at a reasonable rent or otherwise. In valuing houses did take into consideration the good-will in trade, but did not estimate the value by the cost of building. Allowances for repairs, insurance, &c. were 2s. 6d. in the pound. Made no allowance for taxes on houses. First calculated the net annual value, and then added repairs and insurance to make up the gross value.

The Board appointed a valuation committee. When one electoral division was valued, the guardians of that division were summoned to attend on a particular day; they met, and proposed alterations, either to increase or lower the valuation of particular tenements, leaving it to the valuator to adopt or reject the proposed alterations. Valuator complied with very many, but not all those suggestions. The valuation is generally satisfactory to the guardians. Both landlords and occupiers have generally expressed their opinion that the valuation is fair. Ascertained the average amount of county cess in each parish, and calculated the per centage to which it amounted on the entire valuation of such parish, and then added a proportionate part to the net value of each tenement. Wishes to say, that were he employed professionally to value lands for a proprietor, with reference to the letting thereof, he would go into more details for that purpose than he did for the purpose of this valuation, conceiving that the remuneration for its execution was quite inadequate.

WALTER M'DONOUGH, Esq., ex-officio Guardian, *examined.*

Is well acquainted with the Union, and with the value of land in it.

Considers the valuation a fair one; rather under the actual lettings; about 2s. 6d. per acre under.

Thinks that it is in general satisfactory and uniform.

During the course of the valuation the valuator was in the habit of submitting portions of it to the Board of Guardians, and those who were acquainted with the different localities assisted him in correcting it.

There is great competition for small holdings.

THOMAS GRAYDON, Esq., elected Guardian for Ballinasloe Electoral Division, *examined.*

Is agent for several estates in the Union; considers the valuation to be fair and uniform.

The average rent in the Galway part of the Union is about 25s. per acre and the valuation about 3s. per acre less.

The revision was effected by those members of the Board who had local knowledge. The valuation committee revised the valuation as it was proceeded with. The lands were valued with reference to other lands, the letting of which was considered fair.

In the Roscommon portion of the Union the average rent is not more than 16s. per acre, the land being of an inferior description, with the exception of that part which adjoins the town of Ballinasloe, which would set at 20s. per acre.

Thinks there was a leaning in favour of a low valuation.

The average size of the small holdings in the Union is five or six acres.

The general tenure is from year to year.

JAMES PATRICK COMYN, Esquire, elected Guardian for Ballymacward Electoral Division, *examined.*

Has a general knowledge of the acreable rents of lands in a great portion of the Union. Was a member of the Valuation Committee. Was present during the revision of the greater part of the valuation. It is generally uniform. In most cases considers the valuation to be under the rents paid. There is not much subletting. Land is generally set fairly by the large proprietors. Higher rents could be obtained if the land was set up to competition, but they would not be so well paid. Thinks that the valuation is half a crown in the pound under the average rent, generally speaking. Does not think that houses in towns are valued up to the actual rent. There is an indisposition to give leases to the humbler class of farmers except where voters are made. Does not think that five per cent. of persons valued at and under five pounds have any leases.

The rent paid by large holders on the Ballydonnellan estate, which is some of the best, grazing land in the country, averages 30s. per Irish acre. In small holdings of two or three acres the valuator has valued the house so as to make the valuation equal to or above the rent. Is of opinion that the valuation was made impartially, without any reference to local or political interests. Rent of land in the Galway portion of the Union averages about 24s. per acre; in Roscommon about 15s. or 16s. The actual rent at which land is let by the great proprietors is more reasonable in this part of the County Galway than in almost any other part of the province. It is generally the fair value; such as a tenant can well pay out of the land. Thinks the valuation, although not perfect, yet as good as could be expected under the circumstances.

THOMAS BERMINGHAM, Esq. of Caramana, elected Guardian for the Kilconnell Electoral Division, *examined.*

Is of opinion, that the valuation in this Union is fully up to what he considers ought to be the rent at which a considerate landlord would let his land, and in some cases it is higher.

Value of houses.
Test of value.

Repairs and insurance 2s. 6d. in the pound.

Revision by Guardians.

Valuation satisfactory.

W. M'Donough, Esq.,
Ex-officio Guardian.

Valuation a fair one.
Satisfactory and uniform.

T. Graydon, Esq.,
Elected Guardian.

Valuation fair and uniform.
3s. per acre less than the rent.
Revision by Members of Board.

Extent and tenure of small holdings.

J. P. Comyn, Esq.,
Elected Guardian.

A member of Valuation Committee.
Valuation uniform.
Rents reasonable.
Valuation 12½ per cent. below rents.

High valuation of very small holdings.
Valuation impartial.
Actual rents reasonable.

T. Bermingham, Esq.,
Elected Guardian.

Valuation as high as fair letting value.

APPENDIX.

Ballinasloe.

Desire for fair and uniform valuation.

Uniformity of principle not observed in revision.

Incompetence of assistants.

Mr. Philips (colleague of Mr. Cooper the valuator) told witness that he had valued land, which witness had set at what he considered a fair rent, at 10 per cent higher.

The general desire seemed to be, that the valuation should be fair and uniform; heard some complaints, but not many. Does not think that it is uniform. Some of the guardians who were on the Valuation Committee attended to the particular districts with which they were acquainted, but did not attend throughout. Considers that the want of uniformity has arisen from the fact, that the revision in different districts was effected on different plans.

Is of opinion that the valuator should have seen every separate holding, and attended each meeting of the Valuation Committee; thus he would have insured uniformity.

On the days that witness attended as one of the Valuation Committee, he found gentlemen present who were well acquainted with the particular locality under discussion, and able to give the best information, but he had not the opportunity in any one instance of having the opinion of Mr. Cooper the principal valuator; and he believes that he (Mr. B.) has more property in the Union, under his management, than any other person.

In his opinion, in order to make the valuation correct, uniform, and satisfactory, the valuator, Mr. Cooper, should separately revise each holding in the Union which he has not already seen; has formed this opinion from the knowledge he has subsequently obtained of the capacity of the persons who were subordinately employed in the valuation.

VALUATION of £10 COUNTY ELECTORS, (registered 1832 to 1840,) so far as ascertained.

ATHLONE UNION.

Extracts from Minute Book of Board of Guardians.

May 18, 1839.

Resolved,—That there are no valuations of hereditaments within the Union which appear to the guardians to be available, and sufficient for the purpose of estimating the net annual value of such hereditaments as are liable to be rated under the Poor Law Act. That the ordnance survey might be available and sufficient as a survey.

Resolved,—That a committee of seven be appointed as a Valuation Committee, viz., two *ex officio* and five elected guardians.

At a meeting of the Valuation Committee, June 6, 1839,

Resolved,—That a professional valuator be advertised for in the Dublin and local newspapers.

At a meeting of the Board, June 28, 1839,

Resolved,—That the proposal of Mr. Hughes, as valuator, be accepted, and no other persons be called in.

July 28, 1840.

Resolved,—That the report of the Valuation Committee be received and confirmed.

REPORT.

Your Committee met on several occasions and carefully examined the valuation books of the different electoral divisions of the Union as submitted by Mr. Hughes, the valuator, which they have found in some instances, as far as they have been able to ascertain, correct; but in many of the divisions discrepancies appear, which the valuator states were occasioned by persons giving incorrect returns of their different holdings. Your Committee under these circumstances recommend that an extension of time be allowed Mr. Hughes, for the purpose of enabling him to correct the inaccuracies alluded to; and that he be directed to account for the Ordnance survey, the contents of which your Committee suggest, may be taken as accurate.

Resolved,—That Mr. Hughes be required to add up his books, and account for every acre in the Ordnance survey; and that he correct such inaccuracies as are alluded to in the report of the Valuation Committee, with the least possible delay.

Evidence.

MR. HUGHES, Valuator of the Union, *examined*,—

States that he also valued the Sligo Union. He is a civil engineer and professional valuator, and has been so for many years. The Ordnance survey was furnished to him for ascertaining the contents of townlands.

Did not ascertain the rents. Asked the landlords for information on that point, but in only one instance was his request complied with.

Took the rents on Lord Castlemaine's property as a standard of a fair, reasonable rent between landlord and solvent tenants, and valued other lands according to their quality by that standard.

With the exception of the town parts of the electoral divisions of St. Mary's and Athlone, and the town of Moate, he adopted the same plan in valuing houses in towns as in the rural districts.

In Athlone and Moate he valued each house separately, according to the average rents of similar tenements, having regard to the state of repair and to local advantages and disadvantages.

He visited each tenement several times, and, in estimating its value, took into consideration the advantages or disadvantages of its situation, the facilities of communication, or the contrary, &c.

He ascertained the contents of each holding and the names of the occupiers, from persons on each townland.

He valued the land at the reasonable rent which solvent tenants could continue to pay one year with another for it. He considers that one-third of the produce is a reasonable rent for the landlord to receive.

He made no difference where there was a lease.

He valued farms under five acres at a higher rent in proportion than larger tenements. He valued them at a rent which in a large farm would be considered a rack-rent. Farms from five to ten acres extent he valued on a somewhat lower scale than those under five acres; and those from ten acres, upwards, he valued on the regular scale before mentioned.

In the rural districts, whenever there was a good house on the tenement, he valued it separately, and added the value to that placed on the land. Estimated the value of the houses according to the state of repair they were in, and their accommodation, particularly with respect to farm offices, &c.

APPENDIX.

Athlone.

Extracts from Minute Book,;

No previous valuations available.

Ordnance survey available.

A Valuation Committee of seven.

Advertisement for valuator.

Mr. Hughes appointed valuator.

Report of Valuation Committee.

Committee examined valuation.

Discrepancies.

Recommend an extension of time.

Acreable contents in Ordnance survey to be accounted for.

Evidence.

Mr. Hughes, valuator.

Professional valuator.

Ordnance survey. Did not ascertain rents.

Adopted Lord Castlemaine's rents as a standard.

Valuation of houses in towns.

Visited each tenement.

How area ascertained.

Valued at reasonable rent, one-third of the produce.

Small tenements valued higher than large.

Valued houses of a superior kind separately.

APPENDIX.

Athlone.

Allowance for repairs and insurance.
Allowed a clear third to the tenant.

Tenures of immediate tenants principally leasehold.

Valuation revised by himself aided by rate-payers.

Valuation is uniform, and about 10 per cent. under actual rent.

Allowed eight per cent. for repairs, and for insurance the same as in the Sligo Union, viz., 5s. in every case.; 7s. 6d. from 10l. to 100l.; above that according to the regular percentage charged by insurance companies.

In valuing the land did not suppose the tenant bound to manage it so, as if he were bound to deliver it up at the end of the year. Calculated that the tenant should have a clear third of the produce to himself. Was not in any manner influenced by the value which tenants set on their holdings in the Registry Court.

The tenure of the immediate tenants within the Union is principally leasehold.

There is much subletting and great competition for land, particularly for small holdings. Made allowance for the effect of such competition, which has been to raise the price of land above what a solvent tenant could pay, reserving a reasonable remuneration. Small holdings are now up to the war prices.

The revision of the valuation was made by himself, aided by the suggestions and additional information received from the rate-payers, who met for that purpose; some of the guardians also being occasionally present giving their assistance.

Except in one or two instances did not revisit the tenements for the purpose of revision.

The total amount of the original and revised valuations is about the same. Considers it to be uniform all over the Union, and about 10 per cent. under the actual rent.

Both landlords and tenants seemed to be desirous of a low valuation.

The principal proprietors in the Union are,—

	Viscountess Castlemaine	Tenure of Occupiers.
	Mr. Temple	Leasehold.
	Mr. Ennis	Ditto.
	Mr. Smith	From year to year.
	Mr. Naghten	Leasehold.
	Mr. Longworth	From year to year.
		Ditto.

Mr. Hughes is of opinion that the valuations of Sligo and Athlone Unions are on the same scale, the apparent difference being caused by the fact that the average rent is higher in Sligo than in Athlone, the competition for land in the former Union being greater.

John Gaynor, Esq.,
Vice-chairman of
Board of Guardians.

JOHN GAYNOR, ESQ., Vice-Chairman of the Board of Guardians, and Chairman of the Town Commissioners, *examined*,—

Is elected guardian for Athlone electoral division. Is well acquainted with the borough of Athlone and with the parish of Drum. Knows the rent usually paid for houses in Athlone.

Was a member of the Valuation Committee of the Athlone Board of Guardians. Was a constant attendant on that committee. The committee attended from day to day to check the valuation. They suggested alterations in the valuation.

Has examined the valuation books. The valuator has made some of the alterations suggested by the committee.

Valuation in borough 25 per cent. under rent.

The valuation of houses in the borough is in general from 20 to 25 per cent. under the rents actually paid.

Exceptions.

Thinks the valuation is in general uniform, but with some exceptions.

Perceives that a higher value has been set upon some tenements than the rent which could be obtained for them. These are cases in which the houses are of the better sort.

There is not much competition for the better class of houses in the borough. The rent is in general lower than in Moate, in this Union.

The value of houses here is not much affected by a calculation of the value of the goodwill of the holding.

There is at present no taxation in the borough on houses. No rate has been imposed by the town commissioners.

Better class of houses leased.

Most of the houses except the humbler class are let on lease.

The tenants keep the houses in repair; the landlords seldom repair the houses of the tenants from year to year, the tenants repair them. It is not usual for any but the wealthier classes to insure.

No previous valuation.

Is not aware of any valuation of houses in the borough previous to this valuation.

Thinks that the names of occupiers are in general set down correctly, but cannot speak of the very small holdings.

The Valuation Committee pointed out to the valuator the over valuations, in order that he might correct those errors.

The Valuation Committee in some instances raised, in others lowered Mr. Hughes' valuation; this was to make the valuation uniform.

Valuation satisfactory to occupiers.

Believes it to be now generally satisfactory to the occupiers, but cannot say how the landlords feel on the subject.

Houses and land valued uniformly.

Is of opinion that the valuation of houses in the borough of Athlone, except those of the better class, bears the same proportion to the actual rents as the valuation of land does to the actual rent of land in such of the rural electoral divisions as he is acquainted with.

In Taghmaconnell valuation 25 to 30 per cent. below rent.

Knows Taghmaconnell electoral division; in it the valuation is to the rent as about 70 or 75 to 100.

By rent means the rent for which the land lets from year to year. Cannot speak of the value of land to a solvent tenant.

George Fleming, Esq., Deputy Vice-chairman.

GEORGE FLEMING, ESQ., Deputy Vice-chairman of the Athlone Union, *examined*,

Is well acquainted with the borough of Athlone, and with the value of houses in it.

Considers it to be a sinking town, and the value of the better class of houses to have become considerably deteriorated.

Thinks the valuation of that class of houses to be in many instances too high, and that the sum set down as net value should have been the gross value.

Cannot give an opinion as to the valuation of the inferior class of houses.

Better class of houses overvalued.

ST. GEORGE GREY, Esq., *ex officio* guardian, *examined*,

St. Geo. Grey, Esq.,
Ex-officio Guardian.

He is acquainted in particular with Drumreany electoral division. Considers the valuation of that division to be in general uniform.

But in the valuation now lying for inspection he observes some instances in which land is valued in one townland at 20s. per acre, and in another townland at 11s., although both are really of equal value.

From an inspection of the valuation books, is of opinion that the net annual value of holdings therein is fully 25 per cent. under the actual rent, but sees some holdings valued nearly 35 per cent. under the actual rent; the lettings to which he refers are from year to year.

Valuation 25 per cent. under rent.

Thinks that lettings are generally at a fair and reasonable rent.

Lettings generally at a reasonable rent.

Land is generally let at a lower rent than if set up to general competition; alludes to lettings by owners to occupiers where there are no middlemen.

The competition for land is very great; has known 20% given for the tenant's interest in a very small holding of about one acre and half, let at the full value, and not on lease.

Extraordinary competition for land.

Thinks that an occupier ought to have one-fourth of the produce over and above his outlay, as well in seed and labour as otherwise.

Occupier's profit.

Small farms are generally held from year to year; some large farms are not held by lease, but it is more usual to give leases of large farms.

Tenure of farms.

GEORGE KING, Esq., elected guardian for Kiltoombe electoral division, *examined*,

George King, Esq.,
elected Guardian.

He is acquainted with that portion of the Athlone Union which lies in the county of Roscommon. Is of opinion that the valuation is below the letting value; it is 10 per cent. under the rent paid. Generally speaking, land is let "high enough," but there is not much sub-letting. The average size of holdings is from five to ten acres. The peasantry are "wretched enough." Competition has raised the price of land; there is much competition for land.

Valuation 10 per cent. under rent.
Not much sub-letting.

— HUDSON, Esq., *examined*.

— Hudson, Esq.,

Is acquainted with several of the electoral divisions in this Union. Considers himself a good judge of the value of land.

Thinks that the valuation is under the fair and reasonable letting value of land; in some cases it is 30 per cent. under the fair letting value.

Knows a solvent tenant who has been paying 35s. per Irish acre for land which is only valued at about 13s. per statute acre, being equal to about 21s. per Irish acre.

Valuation is much under the value.

When occupiers hold immediately from the owner of the land the rents are reasonable; but when they hold from a middleman the rents are too high.

Rents by middlemen excessive.

Sub-letting prevails to a considerable degree.

There is much competition for land.

Rent averages from 25s. to 30s. per Irish acre.

Average rent of farms.

The average size of farms is from 10 to 12 acres.

Is of opinion that one-fourth part of the produce of land should be a fair remuneration to a tenant. Thinks that if he received a clear fourth he would be well off.

Tenant's fair profits.

JAMES EGAN, Esq., elected guardian for Moate, *examined*,

James Egan, Esq.,
elected Guardian.

That he is a landlord within the Moate electoral division.

Thinks that in the town of Moate some of the superior class of houses are over valued, but the lower class of houses, those worth 10% a-year and under that rent, are under valued.

Sees the valuation in the rate-books of his own property, and of property in his own neighbourhood.

The valuation is below the rent which a solvent tenant would give for it. It is 10 per cent. under it.

Valuation 10 per cent. under value.

Sees the valuation of land at 40s. per Irish acre, for which witness would give to make profit of it 50s. per Irish acre. T. Conollys' holding, 112 Irish acres, is valued at 140%.; he pays two guineas per acre.

E. Gaynor's holding, 46 Irish acres, is valued at 75%.; it would set to a solvent tenant for 2% per Irish acre. C. Adamson has 34 Irish acres with house and offices, valued at 55%.; this holding is well worth 50s. per Irish acre.

M. Stones has 34 acres, valued at 45%.; he pays 50s. per acre, but this is a rack-rent. Observes some lands valued 25 per cent. under the reasonable rent which a solvent tenant making a provident arrangement would undertake to pay.

Undervaluation of land.

Adopts the test of value in the instructions to valuers, viz. the rent which would be given by a solvent tenant making a fair and provident arrangement.

Test of value.

Observes farms worth 40s. per Irish acre valued at 30s.; these are all large farms; they are worth the above-mentioned rents to a solvent tenant.

A solvent tenant is a person well able to pay his rent out of the produce of his land.

Solvent tenant.

A reasonable rent is one-third of the produce to the landlord, one-third remaining to the tenant, and one-third being for seed and labour.

Reasonable rent.

Sees valuation of lands at 28s. which are subject to a rent of 37s. 6d.

Land let at 2% is valued at 28s., and land let at 45s. is valued at 27s.; but the two latter lettings are at rack-rents.

APPENDIX.

Athlone.

Land greatly under valued.

Valuation 10 per cent. under reasonable rent.

Farms average 5 to 20 acres.

Great competition for land.

Landlords not willing to grant leases.

Witness, as a landlord, would give the land so let at 2*l.* for 35*s.*

Small holdings are even more undervalued than large holdings.

A house and land let the other day at 90*l.* is valued at 60*l.*

On the whole the scale of valuation, both of houses and of lands, may be said to be uniform, but with many exceptions. It is at the least 10 per cent. under the rent which a solvent tenant from year to year, making a provident arrangement, could undertake to pay with a reasonable prospect of being able to continue to pay it.

Farms average from five to twenty acres in Moate and Ballyloghloe electoral divisions.

There is great competition for land; this raises the rent offered by persons seeking to become tenants. Landlords are not generally disposed to grant leases, more particularly within these few years.

There is not much sub-letting in these divisions. At present landlords generally let directly to the occupiers, and chiefly from year to year.

Knows instances of leases being granted for a term of thirteen years.

Was not on the Valuation Committee, but some corrections were made in the valuation in consequence of information given by witness.

Mr. H. Gilligan.

MR. HENRY GILLIGAN, of Capnakelly, *examined*,—

Is well acquainted with the value of lands within the Union. Has large farms both in Roscommon and in Westmeath.

His own land is valued at 18*s.* per acre; pays 1*l.* per acre rent, and can afford to pay it. He considers himself a solvent tenant, and his rent reasonable.

Land in Clonbrusk is valued at 23*s.* per acre, it is well worth 25*s.* to a solvent tenant to hold in a large farm; if let in small farms, tenants could afford to pay from 35*s.* to 40*s.* for it. The actual rent is from 40*s.* to 50*s.* Observes land near Auburn worth 2*l.* per acre valued, at 30*s.*

VALUATION OF £10 BOROUGH ELECTORS (registered 1832 to 1840), so far as ascertained.

BOROUGH OF ATHLONE.

LOUGHREA UNION.

Extracts from the Minute Book of the Board of Guardians.

APPENDIX.

*Loughrea.*Extracts from
Minute-book.

11th October, 1839, present, 19 Guardians.

Resolved—That it is the opinion of this Board, that there is no existing valuation which can be made available and sufficient for the purpose of estimating the net annual value of the rateable property within the Union, and that a fresh valuation will be required; but, that existing surveys may, with due revision and correction, to a certain extent be sufficient for ascertaining the acreable quantity of the Union.

Resolved—That a competent person or persons be appointed to value the whole of the rateable property throughout the Union, and revise and correct existing surveys when necessary; and that the clerk be directed to insert an advertisement in the Dublin Evening Post, calling on competent valuers for tenders.

Resolved—That the following members of the Board be appointed a standing Committee, for assisting in the valuation of the rateable property of the Union, three to form a quorum, viz., one ex-officio, and five elected Guardians. That the Committee be open to all members of the Board who may think proper to attend, to assist the Committee, but not to vote; and that one Guardian of every Electoral Division under the process of valuation, to be chosen by and from amongst the Guardians residing within such Electoral Division, be added to such Committee during the valuation of such Electoral Division, to give information, and assist in the valuation.

Resolved—That the Committee shall meet so soon as a valuator is appointed, in Loughrea, on the first and third Thursdays, at one o'clock, in every month, at which meeting the valuator shall attend and produce his book; and that at the conclusion of the valuation of each Electoral Division, a special report be made thereon to the General Board for their sanction and approval, according to the 13th clause of the 2nd section of the order of the Commissioners for regulating the proceedings of the Board of Guardians.

31st October, 1839, present 21 Guardians.

Resolved—That a sum not exceeding £200, be allowed for the valuation of all rateable property in the Union of Loughrea, including all charges. The valuator to have all necessary surveys made, and to attend all appeals which may be made hereafter, and to defend the same, without cost to the Union; and to have the valuation completed on or before the 1st August, 1840; to bind himself, and two sureties in the sum of £200 for the due fulfilment, within the time specified, of the valuation.

Proposals from five valuers having been read, the candidates were called in, and the above resolution read to them; whereupon John Blake, Esq., was appointed valuator of the Union.

26th December, 1839, present, 13 Guardians.

A letter from Mr. Blake, dated 17th December, 1839, having been read, whereby he resigned the office of valuator, in consequence of the remuneration being insufficient.

Resolved—That an advertisement should be inserted in the Dublin Evening Post, for tenders from valuers.

Notice was given of a motion to rescind the resolution fixing the remuneration to the valuator at £200.

30th January, 1840, present 17 Guardians.

Resolved—That the resolution of 31st October, 1839, be rescinded, so far as the sum of £200 is mentioned, so that the sum to be paid for the valuation may be left open to be fixed by the Board this day.

Tenders were read from—

Messrs. C. Cooper, and R. B. Philips. £250.

Mr. Connor Pelly. £200.

Mr Philips's name having been withdrawn,

Resolved—That Charles S. Cooper, Esq., be appointed valuator; to be allowed the sum of £250 for the valuation of all rateable property within the Union; to have all necessary surveys made; to attend all appeals which may be lodged against the rate, and to sustain his valuation at his own expense; to attend the fortnightly meetings of the Valuation Committee; to have the valuation completed on or before 31st December, 1840; and finally, to bind himself, and two sureties, in the sum of £200, for the fulfilment of the foregoing conditions.

16th April, 1840, present, 11 Guardians.

Resolved—That Mr. Cooper having submitted to us a portion of his valuation of the Electoral Division of Loughrea, we are of opinion that, generally speaking, he is proceeding with the valuation on a fair and equitable scale.

30th September, 1840, present, 6 Guardians.

Resolved—That we bear most willing testimony to the efficient and correct manner in which our valuator, C. S. Cooper, Esq., has proceeded with the valuation of the Loughrea Union, and the general satisfaction which he has given to all parties interested in the same.

No previous valuation available.

Surveys partially available.

A Valuation Committee of six appointed.

An open Committee.

One Guardian of each division under revision, to belong to the Committee, during such revision.

Meetings of Committee.

Committee to Report on each Electoral Division.

Remuneration to Valuator.

Terms of Contract.

Mr. Blake appointed Valuator.

Mr. Blake resigns.

Advertisement for tenders.

Amount of remuneration to Valuator to be reconsidered.

Tenders read.

Mr. Cooper elected Valuator.

Conditions of Contract.

Valuation generally on a fair scale.

Approval of Valuator's proceedings.

APPENDIX.

Loughrea,*Evidence.*Mr. CHARLES COOPER, Valuator of the Union, *examined.*Evidence.
Mr. Cooper, Valuator.

Has completed the valuation of the Loughrea Union, with the exception of the Electoral Divisions of Dooniry, Tyna, Portumna, Ballynakill, and Killeenadema, which will not be finished for some weeks.

Refers to his evidence
in Ballinasloe Union.

Was also valuator of Ballinasloe Union, and for the principles upon which his valuation here was conducted, refers to his evidence given with respect to that Union.

He adopted the same method of ascertaining the names of occupiers, and acreable extent of tenements, with, however, the assistance of unfinished proofs of the Ordnance Survey, from which he took the contents of town-lands.

Had no partner.

The valuation was made on a calculation of the acreable value.

Had no partner in this valuation; visited each tenement himself.

Sought access to surveys and other documents, in the possession of landowners, and checked them by the Ordnance Survey. Believes that the acreable contents set down in the rate-books are accurate.

Extent of tenements.
Nature of tenures.

With respect to the extent of tenements, and nature of tenures, he refers to his evidence on the Ballinasloe Union (*see* Ballinasloe Union, Appendix.)

Did not refer to registry.

Did not in any case take into consideration the fact of the occupier being a registered elector.

Principal towns in
Union.

The principal towns in the Union are Loughrea, Portumna, and Athenry.

The Guardians have generally expressed themselves satisfied with the valuation.

Mr. Walsh, Assistant
Valuator.Mr. MICHAEL WALSH, Assistant Valuator, *examined.*

Was assistant to Mr. Cooper, in the valuation of five Electoral Divisions in the Loughrea Union.

Had no experience in
valuing land.

Never had any previous experience in valuing land; but from his knowledge of this part of the country, and of agricultural affairs in general, thinks he could form a pretty accurate estimate of its value; was furnished with maps, defining the boundaries of the different town-lands.

Furnished with bound-
aries of town-lands.Valued each holding
separately.

Valued all the tenements previously to Mr. Cooper going on the ground.

Visited and valued each holding separately; returned his field-books to Mr. Cooper, who then accompanied witness to every tenement he had valued, with the exception of those in the Electoral Division of Killeenadema, the valuation of which is not completed.

His valuation in the majority of cases was adopted by Mr. Cooper as correct.

Divided lands into
several qualities.

Divided the land into several qualities, and valued the different qualities, according to the fair letting value; what he considered the fair letting value of similar lands in the neighbourhood.

Ascertained rent.
Valuation lower than
rent.

In most instances ascertained the rent from the tenants themselves.

In the greater number of instances, thinks the valuation is lower than the actual rent; cannot say how much lower.

Test of value.

With respect to a few recent lettings, the valuation is rather higher.

Adopted, as the test of value, the fair reasonable rent which a solvent tenant could pay out of the land.

Solvent tenant.

By a solvent tenant, means one who could pay his rent punctually, and support his family comfortably off the land, according to his condition in life.

Valued small farms on a higher scale, by the acre, than large ones.

Houses.

Did not value the houses separately, except when he found them of a description superior to the common run of farm-houses.

Demesnes.

Valued demesnes according to the quality of the soil.

Woodlands.

Valued wood-lands merely as so much land, without reference to the timber on them.

Local advantages con-
sidered.

Always took into account any local advantages, such as good roads, proximity to market, facility of obtaining manure, &c.

Houses in towns.

Valued houses in towns according to the state of repair they were in, the part of the town in which they were situated, and convenience, &c.

Basis of valuation.

Adopted, as a basis of valuation, the average rate at which houses were let, and valued all houses of a similar description at the same rate; considers his valuation to be uniform.

Thomas Birmingham,
Esq.THOMAS BIRMINGHAM, Esq., of Carramana, *examined.*

Is well acquainted with the value of land in the Union of Loughrea.

Valuation is as high
and in some instances
higher than actual value

Considers that the valuation is as high, and in some instances higher than the rent at which a landlord, looking to his own interest, the comfort of his tenantry, and the permanent improvement and security of his property, would let his land.

Cannot say it is uniform.

From the cursory examination which he this day gave the books, and from his knowledge of the land in general, he is not prepared to state that the valuation is uniform.

Great number of small
farms.

Small farms prevail throughout the Union; a great number are under 5 acres; the small farms were leased principally by the operation of the forty-shilling franchise.

Landlords are pursuing
the system of enlarging
the farms.

It is his own aim, and he is sure that of all other gentlemen acting for the landlords, with a view to make a comfortable yeomanry, to consolidate the small farms, so as to leave no intermediate class between occupiers paying £10 rent, and labourers. This system is being extensively pursued; however, witness has always taken care, in those estates of which he has the management, that due regard should be had to the interests of those who are dispossessed, either by the landlord, or by the incoming tenant giving compensation.

CHARLES FARRELL, Esq., of Dalyston ex-officio Guardian of Loughrea Union, was present during the examination of Mr. Birmingham, and stated that he fully concurs in the opinion which that gentleman expressed.

APPENDIX.

Loughrea.

Charles Farrell, Esq.,
ex-officio Guardian.

J. Smith, Esq.,
elected Guardian.

Land agent.

Mode of revision.

JAMES SMITH, Esq., Elected Guardian for Loughrea Electoral Division, *examined*.

Was a member of the Valuation Committee, which he attended constantly, and took an active part in revising the valuation; has a general knowledge of the lands within this Union; was for many years an extensive land agent.

The valuation of each Electoral Division was read out by the Chairman, and any objection that was made, was taken into consideration, and the Guardian for that division was consulted on the subject.

The Committee in almost every instance coincided with the valuator.

The Committee were of opinion that the valuation, as far as it is completed, is reasonable in amount, and uniform. Was in many instances referred to the valuation of lands of equal quality, in different parts of the Union, and has found the valuation uniform.

Valuation, fair and
uniform.

Is an extensive landholder.

Is generally acquainted with the actual rents paid by occupiers; the valuation is generally 1*s.* or 2*s.* per acre under the rents, that is, rents of holdings from year to year; means reasonable rents, not rack-rents; cannot say how much it is under the average actual rents.

Proportion of valuation
to rent.

Divides holdings into three classes,—

Three classes of hold-
ings.

1. Grazing Farms.

2. Tillage ditto.

3. Very small or cottier holdings.

First Class. Are numerous throughout the Union, average about 100 acres; not generally held on lease; there is much competition, which raises the rent beyond the reasonable value.

Grazing farms.

Some few landlords do not exact as high rents as they might obtain; the valuation is about 23*s.* per acre on a farm the fair letting value of which would be 25*s.*

Is of opinion that the summer grazing should pay the *rent*, and the winter grazing pay interest on capital, taxes, &c., and remuneration of the tenant. The summer is to the winter grazing as about two to one; unless the summer grazing pays the rent, the farm is considered dear.

Second Class or Tillage Farms. Extent from 12 to 15 acres. This class is farmed in a very indifferent manner, generally let on lease, with a view to the Parliamentary franchise; the £10 electors are generally from this class; the rents in this case are not so much influenced by competition as in class No. 1, as the landlords, in most cases, wish the tenants to be electors. In this class the valuation is also below the letting value, in the same proportion as stated in class No. 1.

Tillage farms.
Extent, &c.

Third Class or Cottiers. The rent of this class is high, and generally paid in labour; it is a rack-rent; calls those holdings “cottier holdings,” which are valued by Mr. Cooper from 30*s.* to £3 or £4 a year. Mr. Cooper values the houses; they are valued under the actual rents, but at or nearly at the reasonable value.

Cottier tenements.

Believes the valuator ascertained the actual rents, as he always referred to them when before the Valuation Committee, but he did not profess to be solely guided by them.

In the Valuation Committee there was a tendency to a moderate valuation, certainly not to a high one; to something under the actual value.

Tendency to a moderate
valuation.

Considers one-third of the produce of a tillage farm a fair rent for the landlord, one-third for the tenant's remuneration, and one-third for the outlay. But much depends on the management of a farm.

The principal landed proprietors in the Union, are,—

Marquis of Clanricarde,

James Daly, Esq.

Sir John Burke, Bart.

Dudley Persse, Esq.

} Tenant's tenure generally leasehold.

} Some leasehold.

Thinks that there is less indisposition to grant leases of large farms now than formerly, but many persons have an objection to make leases of small holdings.

Objection to granting
leases of small holdings.

There is, and has been for some years, a desire to consolidate small holdings, and to create a class of tenements ranging from 10 to 15 acres, except when the cottiers are required as labourers.

Enlarging farms.

The constituency since the year 1832 has considerably diminished, and is likely still farther to diminish.

Constituency dimi-
nished.

RENT and VALUATION of £10 COUNTY ELECTORS (registered 1832 to 1840), so far as ascertained.

COUNTY GALWAY.

GORT UNION.

APPENDIX.

Gort.*Extracts from Minute Book of Board of Guardians.*

October 10, 1839.

Extracts from Minute Book.
No previous valuation available.

Existing surveys partially available.

A Valuation Committee of six appointed.

An open Committee.

Valuator to attend meetings of the Committee.
Committee to report to the Board.

At a meeting of the Board of Guardians, present 17 guardians.

Resolved,—That it is the opinion of this Board that there is no existing valuation which can be made available and sufficient for the purpose of estimating the net annual value of the rateable property within the Union, and that a fresh valuation will be required; but, that existing surveys may, with due revision and correction, to a certain extent, be sufficient for ascertaining the acreable quantity of the Union.

Resolved,—That a competent person or persons be appointed to value the whole of the rateable property throughout the Union, and revise and correct existing surveys, when necessary; and that the clerk be directed to insert an advertisement in the *Connaught Journal*, calling on competent valuers for tenders for their services.

Resolved,—That the following members of the Board be appointed a standing committee, for assisting in the valuation of the rateable property of the Union, three to form a quorum,—two ex-officio and four elected guardians.

That the committee be open to all members of the Board who may think proper to attend, to assist the committee, but not to vote.

That one guardian of every electoral division under the process of valuation (to be chosen by, and from amongst the guardians residing within such electoral division) be added to such committee, during the valuation of such electoral division, to give information and assist in the valuation.

That the committee shall meet so soon as a valuator is appointed, in Gort, on the first Saturday in every month; at which meetings the valuator shall attend and produce his book; and that, at the conclusion of the valuation of each electoral division, a special report be made thereon by the committee to the General Board for their sanction and approval, according to the 13th clause of the 2d section of the order of the commissioners for regulating the proceedings of the Board of Guardians.

November 7, 1839.

Present 18 guardians.

Resolved,—That the chairman, vice-chairman, and deputy vice-chairman shall be members of all committees.

£120 to be allowed for the valuation.

Resolved,—That a sum, not exceeding 120*l.*, be allowed for the valuation of the Union of Gort, including all rateable property; the valuator to make, or cause to have made, all necessary surveys; to attend all appeals which may be made at the quarter sessions against the rate, at his own expense, and to have the whole completed on or before the 1st of July, 1840.

Tenders from four valuers having been opened, the candidates were called in, when two of them refused to accede to the above terms.

Mr. Robert Bell elected valuator.

Mr. Robert Bell was duly elected valuator, giving security, himself in a sum of 100*l.*, and two sureties in 50*l.* each, to complete the valuation, on the terms stated, for 120*l.*, on or before the 1st September, 1840.

February 8, 1840.

Present 7 guardians.

Resolved,—That the following report from the Valuation Committee be received, approved of, and entered on the minutes.

Valuation of Kilmacduagh satisfactory.

“The committee have agreed that the valuation of the electoral division of Kilmacduagh has been completed to their satisfaction, and beg leave to report the same to the Board of Guardians.”

Two guardians were added to the valuation committee.

March 7, 1840.

Present 14 guardians.

The following report was presented from the valuation committee, and ordered to be inserted on the minutes.

Report upon the valuation of Beagh and Kiltarton E. D.

“The valuation committee have to report, that, having examined the valuation of the electoral divisions of Beagh and Kiltarton, as submitted to them by Mr. Robert Bell, the valuator, they are of opinion that the same has been made on a fair and just principle.”

August 22, 1840.

Time for completing valuation extended.

Resolved,—That the time limited for the valuator to complete his valuation be extended to 1st December next.

Saturday, September 19, 1840.

The following report was presented from the Valuation Committee, and ordered to be inserted on the minutes.

August 22, 1840.

APPENDIX.

Gort.

Report from Valuation Committee.

"The Valuation Committee have to report that having examined the valuation of the electoral divisions of Killeenavarra, Killeeneen, and Ardahan, as submitted to them by Mr. Bell, the valuator, they are of opinion the same is on a fair and just principle."

December 5, 1840.

The following report was read from the Valuation Committee.

"The Valuation Committee have to report, that having examined the valuation of the electoral divisions of Kilthomas, Kilbeacanty, and Killeedy, as submitted to them by Mr. Bell, they are of opinion the same is made on a fair and just principle."

Resolved,—“That the valuation of the Union having been from time laid before us, as approved of by the Valuation Committee, we are of opinion that the same should now, in compliance with the 69th section of the Act for The more effectual Relief of the Destitute Poor, be exhibited for 21 days to the public generally.”

Resolution that valuation should be exhibited.

At a meeting of the Board, held on the 9th day of January, 1841, pursuant to adjournment, for the purpose of endeavouring to reconcile any differences that may exist between the valuator and rate-payers, on the valuation of the Union.

Resolved,—“That having endeavoured as much as possible to reconcile the differences between the valuator and rate-payers, as submitted to us, and which we find are not maintainable, we consider the valuation correct, and leave those persons who think themselves aggrieved to the remedy which the law gives them, namely, an appeal against the rate.”

Objections of rate-payers not maintainable.

January 30, 1841.

Mr. Bell, the valuator, having attended the Board, and stated a few alterations which he wishes to make in the valuation of the Union, as already submitted by him,

Mr. Bell desires to make some alterations.

Resolved,—“That Mr. Bell has stated to us sufficient reasons for the few alterations which he has submitted to us, and which he requires to make in the valuation.”

Extract from Minute-Book of the Valuation Committee.

At a meeting of the Valuation Committee of the Gort Union, held on 4th April, 1840, Mr. Bell having attended and submitted to the committee his valuation of the electoral division of Kinvarra,

Resolved,—That Mr. Bell be requested to reconsider his valuation of such portions of land in the electoral division as may have attached to them the right of collecting sea-weed, and fishing, the committee being of opinion that such portions have been rather undervalued.

Rights of sea weed and fishing.

Evidence.

Mr. ROBERT BELL, Valuator of the Union, *examined.*

Evidence.

Was appointed valuator upon 7th November, 1839.

Has had considerable experience as a farmer in Roxburghshire, and also in England.

Has resided for some years in this country. From the experience he has had, considers himself a good judge of the value of land.

Mr. Bell, Valuator.

Was furnished with the tithe applotments; and those gentlemen whose estates had been surveyed supplied him with the contents of their tenants' holdings.

Had also the applotment of the county cess: this, however, was almost useless as to the number of acres, for it was founded on Strafford's survey, which is incorrect. Generally speaking, in each townland there are considerable portions which pay no county cess.

Used Tithe Applotment and Surveys to ascertain contents of holdings.

Visited each tenement and valued each person's holding separately, except in cases of joint tenancy, which are frequent in the mountain districts.

Applotment of county cess incorrect.

Ascertained the names of occupants by actual inquiry.

Visited tenements.

In estimating the value of land carefully examined its quality, calculated the amount of produce it was likely to yield, and the value thereof according to the medium price of agricultural produce.

Calculated amount of produce.

Generally made himself acquainted with the rent that was paid, but was not guided by it in making his valuation. Valued the land at the rent which he thought a solvent tenant could afford to give. A solvent tenant, according to his view, is a person who has sufficient capital to stock and cultivate his farm to the best advantage.

Test of value.

Valued the land at what he considered a fair reasonable rent.

Solvent tenant, what.

Thinks that the tenant would not be safe unless the produce of his farm bore to his rent the proportions of 5 to 2; in other words the rent should, at the utmost, not exceed two-fifths of the produce.

Proportion of rent to produce.

Thinks that a farmer should have as clear profit 15 per cent. on the capital he has expended.

Farmer's profit.

Made no difference in the case of tenements let upon lease.

Where there was a comfortable house on small farms valued them proportionably higher than large holdings.

The average of the valuation is considerably lower than the actual rent.

Valuation lower than rent.

The majority of holdings in the Union are small, ranging from 7 to 20 acres Irish.

Only in a few instances was the valuation higher than the rent: they were cases of old leases.

Valued houses and lands together in the rural districts.

In valuing houses in the towns, took into consideration the actual state of repair they were in, the accommodation they contained, and the business carried on in them.

Houses in towns.

Valued private houses by the average rate of letting of houses of a similar description.

APPENDIX.

Gort.

Demesnes.

Fact of registry not taken into account.

Tenure.

Great competition.

Sub-letting.

Wretched state of undertenants.

County Cess.

Tithe.

Mode of revision.

J. Lahiff, Esq.,
elected Guardian.

Small tenements
valued on a higher
scale than large.

Valuation is 20 per
cent. under actual
rent.

Size of farms.

Rent of land.

Valuation compared
with rent.

Great competition for
land.

Few leases of small
tenements.

James Daly, Esq.,
ex-officio Guardian.

Valuation uniform.

Much below actual
rents.

Under reasonable rent.

Sub-letting.

Competition for land.

Indisposition to grant
leases.

J. Rosengrave, Esq.,
elected Guardian.

Valuation satisfactory.

Valuation is uniform
and reasonable.

In valuing gentlemen's demesnes and plantings, valued as for so much land according to the quality, added the value of the house, and from the gross value ascertained the acreable value of the whole.

Was not in any manner influenced by the fact of the holder of a tenement being a registered elector.

The prevailing tenure in the Union is from year to year.

There is very great competition for land, which has raised the market price considerably higher than a solvent tenant could pay.

There is a good deal of sub-letting.

Under tenants pay the very utmost the land is worth, and live in a most wretched state. Their principal, witness may say their only, food is potatoes, often without milk.

There are great numbers of this class who do not pay over 5*l.* a year rent.

The average rate of county cess in the Galway portion of the Union is about 2*s.* 9*d.* per acre. The average of tithe is about 1*s.* per acre. In the Clare portion the county cess is very high, averaging about 4*s.* per acre.

Knows some instances in which the county taxes are higher than the rent: they occur in the electoral division of Kilkenny.

Believes the valuation to be uniform.

Was in the habit of submitting the valuation of each electoral division as it was finished, to the Committee for their inspection and consideration, and there are very few instances in the entire valuation in which the slightest alteration has been made.

Many large tracts of land are held in common, and are valued in bulk, as it was impossible to ascertain how much belonged to each occupier.

J. LAHIFF, Esq., elected Guardian for Ardahan electoral division, *examined.*

Is possessed of considerable landed property within the Union, and is an extensive landholder, but formerly was occupier of more land than at present.

Was a member of the Valuation Committee. Was a constant attendant upon that Committee.

Is of opinion that the valuation is, in general, just and uniform, except that the small tenements are valued somewhat higher than large holdings. The small tenements let at a higher rent in proportion than large.

The valuation is considerably below the average of the actual rents. It bears the same proportion to the average of the actual rents as 1*l.* bears to 25*s.*, or nearly so. Lands in this Union are, in most cases, set fully up to their value.

There are not many large farms in the Union. The generality of tenements are small.

Land lets from 1*l.* 1*s.* to 26*s.* or 27*s.* per Irish acre. The town-parks let higher; they let at about 3*l.* per acre. The valuation of town-parks is about 50*s.* per acre.

Knows land of which the rent is 12*s.* per acre; it is valued at 10*s.* It is light, rocky, pasture land.

There is great competition for land. Knows cases where his own tenants not having leases have sold their tenements of five or six acres for 20*l.*

Very few occupiers who pay under 10*l.* rent have leases, except in the case of town-parks. The tenures within the Union are not generally on lease. There is less desire at present amongst landlords to create a political interest than formerly. There is, in his opinion, an indisposition to grant leases.

JAMES DALY, Esq., ex-officio Guardian, *examined.*

Considers the valuation made by Mr. Bell to be in general reasonable and uniform. It is much below the actual rents, but he cannot state how much.

Is of opinion that the valuation is somewhat under what would be a fair and reasonable rent: means such a rent as a solvent tenant making a provident arrangement could pay for the land.

There is much subletting of land in the Union.

There is so much competition for farms that the rents of lands are raised above the real value.

Thinks there is a greater indisposition to grant leases than formerly.

There are very few registered 10*l.* electors within the Union.

JEREMIAH ROSENGRAVE, Esq., elected Guardian for Kilmaedagh electoral division, *examined.*

Has not heard any complaints of the valuation from the occupiers. Thinks that they are satisfied with it. The landlords are mostly guardians, and they have confirmed the valuation. The occupiers generally express a wish that the valuation should be adopted by landlords as the rent to be charged for tenements. The valuator was well acquainted with the rents and value of lands in the Union.

Witness is also well acquainted with the usual rents and value of lands, more especially in his own electoral division. He holds between 400 and 500 acres in his own demesne.

Is of opinion that the valuation is generally uniform throughout the Union, and is fair and reasonable. Knows land which witness was about to purchase: witness, for the purpose of his purchase, valued it at 16*s.* per acre; Mr. Bell's valuation is 17*s.* per acre. Knows land which a friend was about to purchase. Witness was asked to value it, and valued it at 25*s.* per acre: it is valued by Mr. Bell, partly at 24*s.*, partly at 27*s.*, but the average is 25*s.* Witness has made many similar comparisons between the valuation and the reasonable value. From

those comparisons, and from his knowledge of the value of land, is of opinion that the valuation is a very fair valuation, and about the reasonable rent which a solvent tenant could afford to pay.

Thinks that the valuation is much below the actual rents, in many cases 25 per cent. below the rents. There is a great deal of subletting and great competition for land, by which means rents are raised much above the fair value of the tenements. Knows that land worth 20s. per acre very often pays 30s. rent, and land worth 15s. pays 20s.; refers to small farms. Farmers holding about 100 acres have leases, and frequently sublet at a profit rent, which is generally much higher than a solvent tenant could afford to pay.

In Kilmaeduaigh electoral division tenements are mostly small, varying from two to ten acres. There are scarcely any large farms in that electoral division, not more than three or four. In general there are no leases of the small tenements.

DANIEL M'NEVIN, Esq., elected Guardian for Beagh Electoral Division, *examined*.

That he has been a guardian of the Gort Union from the first election of guardians. Mr. Bell was appointed to be valuator because he was considered most competent to fulfil the duties. Is not aware of what instructions were given to the valuator, but knows that the guardians were anxious that the valuation should come near to the actual rents, yet should be somewhat under the rents.

There were but few complaints made of the valuation; they were about five or six in all, as he best recollects. They were made in writing. The method of revision adopted by the valuation committee was, to call in the valuator and require him to explain the grounds of his valuation in each case in which objections were made. In one or two instances only the valuator was directed to alter his valuation. The objections were all for overvalue; there were no objections on account of undervalue. The committee did not visit the tenements in question. The guardians were almost all well acquainted with the tenements within the Union, and competent to give an opinion upon the fairness of the valuation. Has no doubt of the valuator having personally visited every tenement within the Union.

Is of opinion that the valuation is generally uniform throughout all the electoral divisions of the Union, but thinks that large pasture farms were valued on a somewhat lower scale than tillage farms, and that very small or cottier holdings under 10 acres were valued on a higher scale than either of the preceding. Gentlemen's houses were valued in addition to the acreable value of the land, as were the better class of houses. Townparks were valued much higher than other lands, but they pay a proportionately higher rent.

In his opinion the valuation is within 2s. in the pound of the average rent.

There is very great competition for land, whether in large or small farms. Knows that for the possession of small farms of about five acres, held at a fair rent, but not on lease, as much as 10% is often given.

In general sub-tenants pay rack-rents; immediate tenants, in most cases of recent lettings, pay the full value, but not rack-rents. Cottier holdings, which are not worth more than one pound or one guinea per acre to a solvent tenant, are subject to about 25s. per acre rent. Considers that a solvent tenant is a person who has the means of cultivating his land, and has industry to do so. Mr. Bell's valuation of the several tenements within the Union is about the rent which a solvent tenant would give for them respectively. Does not think that a solvent tenant would give more than the valuation. A solvent tenant would not give for a large farm within 5s. per acre of the rent which would be given for a small farm, on account of the different proportions of capital required and of profit expected from each. Land is not now let in joint tenancy; there are no joint tenants, excepting under old leases.

There exists an indisposition to grant leases of tenements under 10 acres. Large farms are generally held upon lease. The great majority of tenements within the Union are under 20 acres in extent.

APPENDIX.

Gort.

Valuation is under the actual rent.

Effect of competition for land.

Size of tenements.

D. M'Nevin, Esq.
Elected Guardian.

Guardians wished the valuation to be near, but under the rents.

Very few objections to the valuation.

How disposed of.

Valuation is generally uniform.

Relation between valuation and rent.

Great competition for land.

Rents.

Small holdings pay high rents.

Solvent tenant test.

Valuation equal to real value.

CASHEL UNION.

Extracts from Minute-Book of Board of Guardians.

APPENDIX]

Cashel

March, 15, 1839.

Present, 8 ex-officio, and 22 elected guardians.

Resolved,—That it is the opinion of this Board that the tithe valuation may, to a certain extent, as regards the acreable quantity, be made available for the purpose of a survey of the rateable hereditaments in the Union, but that the services of a valuator or valutors will be required for ascertaining the net annual value of the same; that such valutors should be perfectly unconnected with the Union, and that the salaries for the performance of their duties be paid by the guardians, and that the Poor Law Commissioners be requested to instruct the guardians as to the readiest mode of proceeding to such valuation.

Tithe valuation available so far as regards acreage.

May 4, 1839.

Proposed by Chas. Clarke, Esq., and seconded by Wm. Pennefather, Esq.,—That the valuator should be advertised for in the *Tipperary Constitution*, *Tipperary Free Press*, and the *Dublin General Advertiser*, twice in each paper; carried.

Advertisement for valuator.

A standing Committee to assist the valuator when appointed was formed, viz.—James Heany, Nicholas Greene, Edmund Scully, Richard Long, and Leonard Keating, Esqrs. to attend once each fortnight, and to continue in office one month.

Valuation Committee.

June 1, 1839.

That this Board do examine the proposals tendered, and the person who offers to value all the valuable property of the Union cheapest per plantation-acre, be accepted, provided he prove himself to the satisfaction of the Board to be efficient and capable; carried.

Tenders for valuation.

Proposed,—That Mr. Thomas O'Brien be appointed valuator of all the rateable property of the Union, being the lowest tender; carried.

Valuator appointed.

March 18, 1840.

Errors and omissions having been found in the valuation, the Board resolved,—That the clerk should write to the valuator, Mr. O'Brien, to attend the next meeting-day, in order that they may point out to him such omissions, errors, &c.

Valuator summoned to attend revision.

April 22, 1840.

A letter from Mr. Mr. Hawley was read,—That Mr. O'Brien made application to the Poor Law Commissioners, stating, that the books of the valuation were completed, and had received the sanction of the Guardians, and directing that the matter be brought before the Board.

Appeal to Poor Law Commissioners.

April 30, 1840.

That the valuation-books of the Union be left at the Court-house, Cashel, in the custody of the clerk, for the public inspection, to commence on Thursday the 8th of October next; public notice of same to be given.

Valuation-books open for public inspection.

November 25, 1840.

The objections to the valuation to be heard in the order of the electoral divisions.

November 27, 1840.

The Board this day having disposed of all the objections, proceeded to declare a rate, and declared same at 5*d.* in the pound on the net value of the property of the Union.

Rate declared; 5*d.* in the pound.*Evidence.*LEONARD KEATING, Esq., ex-officio Guardian, *examined.*

Tenders were received for the valuation of the Union, and Mr. O'Brien being the lowest, he was appointed valuator.

The valuation of this Union is altogether the act of the valuator, and has given satisfaction generally.

It is as high as the rent ought to be.

He is a rent-payer, and the landlords think differently.

But it is not anything like as high as the rent charged to the tenants.

Evidence.

Leonard Keating, Esq., ex-officio Guardian.

Valuation has given general satisfaction.

Valuation as high as rent ought to be.

Landlords think differently.

But far below actual rent.

Richard Long, Esq. ex-officio Guardian.

Valuation moderate. Valuation of small holdings 25 per cent. below the letting value.

Great portion of Union let on lease.

Was chairman of the Board; thinks the valuation is moderate.

Believes that Mr. O'Brien, the valuator, (whom he considers a most excellent judge of land,) set out with the intention of giving the tenants an interest in their holdings; he is about 25 per cent. below the letting value in the case of small holdings in the county, which he considers high.

The great portion of the Union is let on lease, but there are a great number of the large proprietors who object to let on lease, and would not renew it if the old leases expired.

The motives which induce himself, and he believes, the landlords of the Union generally, to refuse leases, are, that he would not give his tenants the power of going against him at elections or elsewhere.

Many large proprietors object to giving leases.

APPENDIX.

Cashel.

Thinks that a tenant who conducted himself properly would feel secure without a lease.

Beneficial interest of a tenement valued at 5*l.* averages 12*l.*

S. J. Cooper, Esq.
ex-officio Guardian.

A second reason is, that there should be that feeling between landlord and tenant, that a holding from year to year would be as good as a lease, where a tenant conducted himself properly.

He would not give leases for a further reason; because, where there are no leases, the landlord has a better means of preventing the tenant from assigning to an improper person.

The profit on the general class of tenements rated at 5*l.* charging the farm with the expense of management and repairs, rent, and all the cost of production, and selling all the produce, would be about 12*l.* per annum average.

SAMUEL COOPER, Esq., ex-officio Guardian, *examined.*

Concurred in what Mr. Long had stated, and thinks, if a tenant had a farm at Mr. O'Brien's valuation, he could easily get 10*l.* an acre for his bargain.

Mr. Matthias Laffan,
elected Guardian.

The valuation a fair one.

Valuation 15 to 25 per cent. below rent of indulgent landlords.

8*s.* or 10*s.* an acre below the smart rent.

Beneficial interest of a tenement valued at 5*l.* equal to 12*l.* to 15*l.*

Might be 20*l.* with improved cultivation.]

MR. MATTHIAS LAFFAN, Elected Guardian, *examined.*

Is a practical farmer, holding 70 acres of land within the Union of Cashel.

Mr. O'Brien's valuation is, in his opinion, a fair value for the land, but it is 3*s.* to 5*s.* in the pound below the rent of lands let within the last seven or ten years, even by the most indulgent landlords, and where smart rents are charged, it is 8*s.* to 10*s.* per acre below the rents.

At the Poor Law valuation of Mr. O'Brien, he would swear that from 10*l.* to 15*l.* per acre (afterwards, on reading over his evidence to Mr. Laffan, he said, that *to make sure*, he would confine the sum to 10*l.* per acre,) would be got for the interest from a solvent tenant.

Taking the average of the tenements rated at 5*l.*, he thinks a clear profit of 12*l.* to 15*l.* is made by the ordinary cultivation of the district, and if the same tenements were properly cultivated in a superior manner, he has no doubt the profit would be 20*l.*

Mr. James Heany,
Vice-Chairman of the
Board of Guardians.

MR. JAMES HEANY, Vice-Chairman of the Board, *examined.*

He is a large landholder, tilling 70 acres, and pasturing about 500 or 600 acres; he is a tenant of Lord Stanley's, and he challenges England, Ireland, or Scotland to produce a better landlord; he has a good interest in his farm; the rent he pays is 10 per cent. over the Poor Law valuation.

RENT and VALUATION of £10 BOROUGH ELECTORS (registered 1833 to 1840) so far as ascertained.

NOTE.—This list of townlands and denominations in the Cashel rate-book, which do not appear by the Clerk of the Peace's list, to contain £10 Electors, has been carefully revised, and is as accurate as the documents from which it has been compiled will admit of. It has been referred to the Local Report on the Cashel Union, page 217.

CASTLEREA UNION.

APPENDIX.

Castlereau.

*Extracts from Minute Book of Board of Guardians.*Extracts from
minute-book.

At a meeting of the Guardians of the Castlereau Union, held on the 13th day of December, 1839, it was resolved that Mr. Gaffney be appointed valuator of the Union.

Valuator appointed.

At a meeting of the Valuation Committee, held on the 30th April, 1840—

The valuation of the electoral division of Artagh was taken into consideration.

Valuation of Ar-
tagh, E. D.

In cases where farms are held by owner or occupier, with a herd's house or garden thereon, the valuator has set down the herd as a separate occupier, and his master as the owner. The Committee are of opinion that the herd has no interest in the land; he is removable at a moment's notice; and his house and garden should be included in the whole quantity of the occupier, under the description of houses, offices, and land.

In like manner, where a porter's lodge is attached to a mansion-house, the lodge is put as a distinct tenement. It should be considered as part of the house and offices, as a stable or a garden-house is done, and included in the extent and net value of the mansion.

The Committee have given much consideration to the value of timber, and have been unable to find a fixed rate in the Act of Parliament, or in any published communication of the Commissioners.

Valuation of tim-
ber.

A recommendation is made by the Commissioners, in a letter of Mr. Stanley to the Guardians of Cork, dated 27th November, 1839: but this is given with much doubt; and the Guardians left at liberty to decide the matter.

The Commissioners are of opinion, that the most equitable mode of rating woods and plantations grown for profit is to estimate the actual value of the trees as they now stand, and consider one-twentieth as the net annual value.

Principle on which
woods should be
valued.

With the above observations the Committee approve of, and submit to the Board of Guardians, the valuation of the electoral division of Artagh.

Valuation of Artagh
approved of.

At a meeting of the Valuation Committee, 6th May, 1840—

The letter of Mr. Stanley, dated 28th April, enclosing copies of a circular on valuation and rating, has been received.

Commissioners' cir-
cular on valuation.

The instructions contained in this circular, on the subject of the valuation of timber, are clear, and differing from the resolutions entered into at the last meeting, the Committee have pointed out those clauses to the particular attention of the valuator, and have given a copy of the circular to him for his guidance.

Evidence.

Evidence.

Mr. EDWARD GAFFNEY, valuator of the Union, *examined.*

Mr. Gaffney, valu-
ator.

Was appointed valuator of this Union in January, 1840.

Is not a professional valuator, but has been an under-agent on extensive estates for the last 12 years, and as such has had great experience in valuing land.

Qualification.

The valuation is not yet completed.

Valuation not completed.

Was furnished with the Ordnance maps. In general obtained from the incumbents the tithe-appotments of their respective parishes, and this for the purpose of ascertaining the contents of holdings.

Ordnance maps and tithe
apptment.

Always ascertained the names of occupiers, and the contents of holdings; sometimes the latter by actual admeasurement.

Visited every individual holding, and valued it separately, with the exception of those tenements which were held in partnership. Valued every tenement as carefully, and on the same principle, as if he had been valuing for a landlord. The principle which he adopted was this:—On a farm of average quality he calculated the amount of produce which the land was likely to yield, estimated the value of that by a fixed scale of prices, and, deducting so much for seed, labour, and taxes, and a small allowance for repairs, arrived at the net produce, one-half of which he allowed to the tenant as fair remuneration, and the other half to the landlord as a reasonable rent: this rent he adopted as a standard of value, and valued all lands through the Union by it, according to their quality.

Valued tenements
separately.Principle on which
valuation was made.

Made allowance for advantages or disadvantages of situation, such as proximity to markets, facility of obtaining manure, &c. Where tenements were at a distance from good roads he made an abatement of three or four shillings an acre. The half of the net produce he considers a fair reasonable rent, such as a solvent tenant could pay.

Advantages of si-
tuation.Half of net produce
a fair rent.

A solvent tenant is one who has capital sufficient to cultivate his farm advantageously, and out of the produce "meet all demands on him," and support his family comfortably.

Solvent tenant.

Made a rule not to ask the tenants what rent they paid, except in a few instances of partnership.

Did not inquire the
rent.

Valued small and large farms on the same scale.

Small and large
farms valued on the
same scale.

Never inquired whether there was a lease.

APPENDIX.

Castlerea.

Grazing farms valued on a higher scale than tillage ones.
 Demesnes.
 Size of farms in Roscommon.
 Mayo.
 Houses in towns.
 Relation of valuation to rents.

Prevailing tenure.
 Fewer leases granted than formerly :
 The reason.

Great competition for land.
 Valuation uniform.

B. Irwin, Esq.
 elected Guardian.

Valuation fair and uniform.

Valuation 13 per cent. below actual rent.

No wish shown either for a high or low valuation.

Valuation satisfactory.

Principle of valuation fair.

Amount of remuneration to tenant.

Small farms prevail.

In Mayo and Galway average below 10 acres.
 In Roscommon about 10 acres.

Fewer leases granted than formerly.

Value of land considerably increased; nearly up to the war prices.

Few of the small holders have leases.

Constituency has diminished.

Great competition for lands.

Owen Young, Esq.
 ex-officio Guardian.

Valuation incorrect and not uniform.

Revision necessary.

Tenure.

Farms that were used exclusively for grazing he valued on a higher scale. Did not value houses separately from the farm.

Valued demesnes according to the quantity and quality of the land, woodland and all. Valued the house, garden, offices, &c. separately.

In the Roscommon portion of the Union the average size of farms is from 8 to 10 acres; in the Mayo portion 6 acres is the average.

Was guided in the valuation of houses in towns by the actual letting value.

Generally speaking, on the large estates, the valuation is fully up to the actual rents; the holdings of small proprietors and middlemen are valued considerably lower than the rent—30 per cent. lower.

The prevailing tenure throughout the Union is from year to year.

There is decidedly less disposition now than formerly among landed proprietors to grant leases.

Is of opinion that landlords object to give leases from a wish to prevent their estates being cut up into small subdivisions.

There is such extraordinary competition for land, that it has been raised considerably above its value. Very few small holders have leases.

Is positive that the valuation, as far as it has gone, is uniform.

Thinks it is satisfactory; with one exception, has heard no objections. No alterations were made in his valuation by the Committee, with the exception of some cases where he valued porters' lodges and herds' houses as separate tenements, they directed him not to value them separately; they also directed that growing timber should not be valued.

BALLANTINE IRWIN, Esq., elected Guardian for Castle Plunket Electoral Division, *examined*.

Is a member of the Valuation Committee. The valuation of eight electoral divisions has been completed, but has not yet been adopted and confirmed by the Board.

Considers it a very fair valuation and uniform.

It is about 13 per cent. below what land would bring if it were set up to competition.

Thinks that when an article is brought to market and set up to public competition, the price which it will bring is its actual value: the valuation is about 13 per cent. below the actual rent paid.

Thinks that there was no desire expressed either for a high or low valuation, and no attempt made to influence the valuation either way.

Considers the valuation to be generally satisfactory.

Thinks that the principle which the valuator adopted was a fair and correct one.

Where all the land is properly cultivated, thinks that one-third of the produce would be a fair remuneration; but in this part of the country, where from deficiency of proper treatment the land is not so productive as it should be, is disposed to think that one-half would not be too much.

Small farms prevail throughout the Union.

In the Mayo and the greater part of the Galway portion of the Union the farms are below ten acres, nearer to five than ten. In the Roscommon portion of the Union thinks that ten acres would be close on the average. In that part a principal proprietor, Lord Mount Sandford, has been for some years in the habit of consolidating the small holdings, and bringing them up to ten acres.

There is decidedly a greater indisposition now than formerly among landed proprietors to grant leases.

Thinks that the motive which induces landlords not to grant leases varies in different parts; in some places the motive is political; in others, the landlords, either from an objection to having their estates cut up into small holdings, or from an impression that the value of land is likely to rise, have a disinclination to grant leases.

During the last ten or twenty years the value of land has considerably increased, and there is a general impression that it will rise still higher. It is now nearly up to the war prices.

Will venture to state that there is scarcely a holder under ten acres in the Union who has a lease dated within the last twenty years.

The amount of the constituency has diminished within the last few years. Some landlords have not registered their tenants, knowing that they would not vote with them.

On those estates where the political feelings of the landlords and tenants are the same, the tenants are anxious to register; while on those estates differently situated, they register with reluctance.

There is great competition for land. Knows an instance of a tenant under notice to quit at May getting in March 1871 for his good-will, though the holding was only six acres.

OWEN YOUNG, Esq., ex officio Guardian, *examined*.

Is a member of the Valuation Committee. The valuation of eight electoral divisions has been submitted to them. As far as he has examined it, he cannot say that it satisfies him.

"Generally speaking" it may be fair, but in those parts which he has examined, he thinks it is incorrect and by no means uniform.

A revision is necessary.

Tenancy-at-will is the most prevailing tenure in the Union.

Castlereagh.

There is very great competition for land.

Knows a case where a small holder-at-will, whose rent amounted only to about 3*l.*, received 16*l.* for his good-will.

Great competition.

There is a great number of small holdings. The Union comprises portions of the poorest and most populous parts of Mayo, Roscommon, and Galway.

Great number of small holdings.

A very large proportion of the holdings are under 5*l.* a-year rent. Very few of them are on lease.

There is great indisposition on the part of landed proprietors to grant leases, except when they wish to create a political interest.

Disinclination to grant leases.

DOMINICK CORR, Esq., ex officio Guardian, *examined.*

Domk. Corr, Esq.,
ex-officio Guardian.

From the examination he has given the books, is of opinion that the valuation is so incorrect that a thorough revision is absolutely necessary.

Valuation incorrect.

VALUATION of £10 COUNTY ELECTORS (Registered 1832 to 1840),
so far as ascertained.

COUNTY ROSCOMMON.

* Marked thus registered in 1832, and not since re-registered.

BELFAST UNION.

Supplemental Extracts from Minute Book of Board of Guardians.

February 23, 1841.

Present, Mr. Gulson and 14 guardians, including four members of the Valuation Committee.

Resolved,—That ten per cent. throughout the Union be allowed as a rebate to all landlords who undertake the payment of rate for properties of the annual value of less than 5*l*.

That in all cases where the net value is just 5*l*. the clerk be authorized, with the consent of the parties, to reduce the value to 4*l*. 19*s*. 6*d*. to bring such properties under the operation of the seventy-second section of the Poor Relief Act.

That the clerk be directed to cause an advertisement to be inserted in the papers with reference to the seventy-second section of the Act, and that such applications be received up to Thursday the 4th March.

On the 16th March, 1841, the rate books were signed by the guardians.

APPENDIX.

Belfast.

10 per cent. rebate allowed to landlords.

Valuations amounting to exactly 5*l*. reduced to 4*l*. 19*s*. 6*d*.

Rate books signed by Guardians.

Evidence.

Supplemental Evidence.

Mr. FRANCIS RICHEY, Valuator, *re-examined*.

Mr. Richey, valuator. Assistants.

He had as assistants in his valuation his two sons and his nephew. They are all concerned in engineering and in assisting him in contracts for buildings.

He valued all the principal parts of the town himself. He first went with each of his sons and his nephew through particular parts of the town, and pointed out to them what he considered the value of the houses. His instructions to his assistants were, that when they should come to value houses they were to put a value on them at the same rates as he had valued those he had shown them. He directed them when they came to a house of the value of 5*l*. letting value, to put down the rated value under it. He wished on a 5*l*. house to keep the rated value from 15*s*. to 1*l*. under the letting value. He instructed his assistants to act in the same way on the 4*l*. houses, and on 3*l*. houses to deduct even something more.

Mode of valuation.

Instructions to his assistants.

His reason for these directions was, that that class of houses are not kept in as good repair by the landlord as the more valuable houses, and because the tenants pay the rent by the week. He thought the tenants of such houses were paying more than the fair value of the houses, and that as the landlord was getting more than the fair rent he ought to be liable to a greater portion of the rate. Those instructions were acted on by himself and his assistants.

Reasons of his giving such instruction.

In houses of 6*l*. value and upwards he kept nearly to the value of them as far as he could judge, but still putting on them in the rate-book a value a little under what he considered the letting value.

Valuation of 6*l*. houses.

If he thought a tenement would let for 10*l*. he put it down in his valuation from 9*l*. to 9*l*. 10*s*. He took as a general rule that the landlord paid for all repairs, painting, papering, keeping the house waterproof, and for insurance, and that the tenant paid the rent and taxes. That is the general mode of letting house property in the town. He wished to be a little under the real letting value rather than over it, and therefore he did generally put down the value 1*l*. less than the real letting value of 10*l*. houses; but where he thought the house good value he put down that without deducting anything.

Wished to be under letting value.

On all houses over 10*l*. he kept near the actual letting rent, but still a little under it.

In putting down the net annual value he deducted from the value at which the house would reasonably let according to the mode of letting in Belfast, the tenants' poor rates calculated at 5*d*. in the pound, and 2*s*. 6*d*. in the pound for tenants' taxes. The sum added for landlord's insurance and repairs was 1*s*. 4*d*. in the pound on the net value of houses under 20*l*.

Net value.

Taxes and rates.

In valuing villa property he considered what it would actually let for, keeping always a little under the letting value.

Valuation of Villa property.

Was not furnished with rentals, but ascertained from the occupiers in a great many cases the rents they were holding at. He took down in many of the cases the amount of the rents in his rough books.

Ascertained rents.

Had frequent communications with Mr. Gulson, the Board of Guardians, and Valuation Committee. The directions he received from them were to put a fair letting value on. Was furnished by the Board with a copy of the police valuation for the town of Belfast. Made use of that valuation and also of Griffith's valuation to assist him in coming to a conclusion on the net value of the tenements, but exercised his own judgment on the value.

Directions of Guardians as to valuation.

The valutors under the Police Act are nominated by the Police Committee, and approved of by the Commissioners. They must be householders of the town; four are appointed and act together. The actual letting value is what the police valutors ought to be guided by. Their valuation is not an equal one, because when the letting value is a little above 20*l*., the valutors generally fix their valuation for the Police Act a little below 20*l*., for if a house be rated at 20*l*. it pays 2*s*. in the pound police rate, and if under 20*l*. but 1*s*. in the pound.

Valuation under Police Act.

Not an equal one.

Mr. JOHN GILMER, *examined*.

Mr. John Gilmer.

The valutors under the Police Act of the town of Belfast are sworn to return an impartial valuation.

The Act empowers a rate to be levied of 6*d*. in the pound on tenements of 5*l*. annual value

Rating under Police Act.

APPENDIX.

Belfast.

Evidence.

No houses under 5*l.* value rated under Police Act.

Proportion of rating under Police Act to rents.

and not exceeding 20*l.*; of 1*s.* in the pound on tenements of the annual value of 20*l.* and not exceeding 80*l.*; and 1*s.* 6*d.* in the pound on all above 80*l.* The commissioners have a power of increasing the rate in the same ratio.

No houses under 5*l.* annual value are rated under that Act.

The directions given by the commissioners are to put on the fair annual value, that is, what the landlord would let the house for to a yearly tenant.

In general, the valuations are under the rents actually obtained for the tenements.

In 1839, the valutors in many instances inquired the rents payable and rated the parties at the amount of rent ascertained.

Where houses are rated under the Police Act at from 5*l.* to 7*l.*, the rent paid is in general from 1*l.* to 1*l.* 10*s.* more than the rate; 7*l.* and 8*l.* rated houses bring a rent of about 10*l.*

In all old streets the valuation on the low value houses is lower in proportion to the rent paid than on the new houses by at least 10 per cent.

Where houses are rated from 10*l.* to 15*l.* the rates are 2*l.* to 3*l.* under the rents paid.

Where houses are rated from 20*l.* to 30*l.* the rating and rents paid are about equal, but it is not possible to give any definite estimate of the rents paid where the houses are rated above 30*l.*

Mr. Webb, guardian.

Mr. WEBB, a member of the Board of Guardians, *examined.*

Opinion of Board as to valuation.

The Board considers that the valuation as regards the better houses is a high valuation, that is, on houses of the rated value of 20*l.* and upwards. There is no appeal for a high valuation from the owners or occupiers of houses under 20*l.* Mr. Chermside proposed as landlord of 16 rated tenements to undertake the payment of the rate. Of those 16 tenements three were rated by the valuator at 5*l.*

Reduction in rated value of tenements.

In order to enable Mr. Chermside to become the undertaking rate-payer of the entire of his rated tenements, the Board reduced the valuation of those three tenements situate in Charlemont-street from 5*l.* to 4*l.* 19*s.* 6*d.* each. The alteration was made in the rate collector's books. The alteration was not made in the valuation book as signed by the guardians, but it is intended to make it.

From documents furnished by the clerk of the Union, it appears that in one case relating to the property of Mr. William M'Gee in Crown Entry, and in seven cases of houses belonging to Messrs. Thompson, situate in Gardiner-street, the same arrangement has been made.

Mr. ARCHIBALD M'BRIAR *furnished the following Statement:—*

"Population of the borough of Belfast, within the Parliamentary boundary, at least	70,000
Number of electors who voted at last general election	1,840
Add number of persons qualified, who for various reasons did not vote	71
"Total amount of the qualified constituency at the general election of 1837	1,911
Number of voters disqualified by death, removal, or the expiry of their registry who were qualified to vote at last election, or who have been registered at any time between April, 1837, and July, 1840, both inclusive	1,723
N.B. Voters losing one qualification, and at the time retaining a second, are not reckoned.	
Number registered since April, 1837, up to July, 1840, both inclusive, omitting all double registries either from the same or separate premises	1,645
"Decrease in the constituency since last election	78
Number of voters registered up to 1st March, 1841, who retain their occupation as per list furnished	2,083
Deduct 263 registered in October, 1840, and January, 1841, not yet ripe, less 13 of these since removed, and consequently not entered in the list furnished	250
"Total amount of constituency entitled to vote at 1st March, 1841	1,833
Number of voters on clerk of peace's list up to July, 1840, inclusive	5,750
Deduct number registered in 1832, and January, 1833, now out of date	1,663
"Total number of names on clerk of peace's list ripe to vote on March, 1841, being the apparent amount of constituency at that date, while the actual amount as above is only 1,833	4,087
Number of voters as per list who are rated in the Poor Law valuation at 9 <i>l.</i> nett and upwards	1,820
Number as per list rated at 8 <i>l.</i> and under 9 <i>l.</i>	131
Number as per list rated at 7 <i>l.</i> and under 8 <i>l.</i>	64
Number as per list rated at 6 <i>l.</i> and under 7 <i>l.</i>	30
Number as per list rated at 5 <i>l.</i> and under 6 <i>l.</i>	21
Number as per list rated under 5 <i>l.</i>	17
Total as per list	2,083

Number of tenements rated in the Poor Law valuation at 9*l.* nett and upwards *within the Parliamentary boundary* 4,187

Number registered as per list who are rated at 9*l.* nett and upwards,

which rating under the present law would qualify all so far as value is concerned	1,820	
Deduct of these registered in October, 1840, and January, 1841, not yet ripe	205	
“Total number that would be entitled to vote rated at 9 <i>l</i> . and upwards under the present system of qualifying, viz., by six months occupation of the same premises previous to registry, and six months after previous to voting	1,615	
“Being 38½ per cent. on the tenements rated at 9 <i>l</i> . and upwards.		
Number of tenements rated at 8 <i>l</i> . and under 9 <i>l</i> . within the Parliamentary boundary	441	
36 per cent. of these would probably be qualified, viz.	158	
“Total number that would be entitled to vote as above rated at 8 <i>l</i> . and upwards.	1,773	
Number of tenements rated at 7 <i>l</i> . and under 8 <i>l</i> . within the Parliamentary boundary	447	
33 per cent. of these would probably be qualified, viz.	147	
“Total number that would be entitled to vote as above rated at 7 <i>l</i> . and upwards.	1,920	
Number of tenements rated at 6 <i>l</i> . and under 7 <i>l</i> . within the Parliamentary boundary	680	
28 per cent. of these would probably be qualified, viz.	190	
“Total number that would be entitled to vote as above rated at 6 <i>l</i> . and upwards.	2,110	
Number of tenements rated at 5 <i>l</i> . and under 6 <i>l</i> . within the Parliamentary boundary	1,069	
20 per cent. of these only would be qualified, a large proportion, as appears by the rate-book, being occupied by two or more families	213	
“Total number that would be entitled to vote rated at 5 <i>l</i> . and upwards	2,323	

“According to clause 16 in Lord Morpeth’s Bill parties who have been registered from one house and removed to another of sufficient value would be again entitled to register at first sessions subsequent to removal, which would add at least 10 per cent. to each and all of the above estimates.

“According to clause 17 in same bill joint occupants would be entitled to register, which would add 130 to each and all of the above estimates.

“N. B. Partners who have private dwelling-houses independent of their partnership premises are not reckoned.

ARCHIBALD M’BRIAR.”

Belfast, April 11, 1841.

No. I.—ABSTRACTS of preceding STATEMENT, and of the Returns which accompanied it.

Estimated Population within the Parliamentary Boundary.	Estimated Net Value of Property within the Parliamentary Boundary. * The returns, which are very voluminous, of the names of the Electors and their respective valuations in Belfast, have not been printed. The original papers are deposited in the Irish Office. The above table contains the result of the list of the £10 Electors, as furnished and classified by Mr. M’Briar.

APPENDIX.

Dunmanway.

DUNMANWAY UNION.

Extracts from Minute Book of Board of Guardians.

At the first meeting of the Board of Guardians, held at Dunmanway on the 1st of February, 1840,

Present, W. J. Voules, Esq., Assistant Poor Law Commissioner, Daniel Connor, Esq., Chairman, and 17 Guardians,

Resolved,—That an advertisement be published in the Cork papers for a clerk, valuator, and treasurer.

13th February, 1840. At a meeting of the Board held this day,

Proposed by Mr. Bryan, and seconded by Mr. Donovan,

New valuation considered necessary.

That it being in the opinion of this Board requisite that there should be a new valuation of all the rateable property within the Union, and an advertisement having been published inviting competent persons to effect such valuation, and tenders having been given in, which were this day opened by the Chairman in the presence of the Guardians,

Appointment of three valutors: 240*l.* for valuation.

Resolved,—That the tender of Messrs. William Gillman, John Whelply, and William Pattison, to effect the valuation at 240*l.* for the three, be accepted; it being understood that in all cases the three valutors will inspect and value all the property conjointly, so as to insure relative value throughout the whole Union, and will complete their valuation by the 1st of January, 1841.

2d March, 1840. At a meeting held this day,

Resolved,—That the valutors be directed to proceed forthwith with the valuation of the Fanlobus [otherwise Dunmanway] electoral division, and that they be directed to give notice to the clerk some short time before it is completed, with a view to the Guardians being summoned to inspect the same.

Documents ordered.

Resolved,—That the clerk be directed to procure field-books, valuation sheets, three copies of the Act, three copies of each of the instructional letters on valuation, and 500 copies of a printed circular sent down by the Commissioners for the purpose of noticing landholders to attend and point out their boundaries, and give such other information to the valutors.

2d May, 1840. At a meeting held this day,

Valuation Committee.

Resolved,—That a Valuation Committee, consisting of three Guardians, be appointed, for the purpose of inspecting the books and proceedings of the valutors, and reporting the same to the Guardians; and that Mr. James Gillman, Mr. Thomas Bryan, and Mr. Thomas Gillman, be requested to act as such Committee.

10th October, 1840. At a meeting held this day,

Valuation submitted for inspection.

Resolved,—That the valuation be open for inspection at the court room of Dunmanway, from the 21st of October instant to the 13th of November next inclusive; and that the clerk be directed to advertise the same.

14th November, 1840. At a meeting held this day,

Resolved,—That the Guardians will attend on Wednesday, the 25th of November instant, to hear the objections of the Kilmany and Kilmichael electoral divisions to the valuation; and on Saturday, the 28th, to hear the objections of the remainder of the Union; and that the clerk give notice of the same.

25th November, 1840. At a meeting of the Board of Guardians of the Dunmanway Union, held this day,

Minutes of the 14th read.

Resolved,—That this meeting do adjourn to Saturday, the 28th November instant, to hear the objections of those persons noticed for that day.

28th November, 1840. At a meeting of the Board of Guardians of the Dunmanway Union, held this day,

Minutes of the 25th November read.

Additional Remuneration to Valutors.

Resolved,—That the valutors are to be paid 10*s.* per day each for every day they are ordered out by the Guardians to re-inspect any part of the Union.

Resolved,—That this meeting do adjourn to Wednesday, the 9th day of December, to hear any farther objections to the valuation, as it is to be open again for inspection from the 1st to the 8th day of December; and that the clerk is to give notice to that effect.

9th December, 1840. At a meeting held this day,

Rate struck.

Resolved,—That Mr. Deane, clerk to the Cork Board of Guardians, be requested to strike the rate of the Dunmanway Union, and that he receive 5*l.* for his services, and to pay his coach-hire to and from Dunmanway.

Resolved,—That the Guardians having taken into consideration Mr. Voules's suggestion, that the valutors ought not to receive any payment beyond that originally stipulated, are of opinion that as the valutors in their valuation have taken much pains, the Guardians consider that they ought not to direct the valutors to re-value without ordering them payment of 10*s.* per day each; and that the Guardians are of opinion that it would prevent appeals by sending out the valutors in some few instances.

10th December, 1840. At a meeting of the Guardians held this day,

Revision of objected parts of valuation ordered.

Resolved,—That the valutors be directed to commence the re-valuation of the farms, to which the attention of the Guardians has been drawn, on Saturday next, and to have them

finished with as little delay as possible, to enable the clerk to complete a copy of the valuation.

Resolved,—That the clerk be directed to prepare a correct copy of the valuation, preparatory to striking a rate; and that he be directed to apply to Mr. Thom for a rate-book, and to have it forwarded as soon as possible.

27th January, 1841. At a meeting of the Board of Guardians, Dunmanway, held this day.

Resolved,—That it is the opinion of this Board that at the next day of meeting, on the 27th of February, a rate should be struck for the Dunmanway Union, the valuation being completed; and that the Commissioners be requested to issue an order for the appointment of a rate collector.

APPENDIX.
Dunmanway.

Rate ordered to be struck.

Evidence.

MR. WILLIAM PATTISON, valuator; *examined.*

Was appointed on the 1st of February, 1840, with Messrs. John Whelply and Mr. William Gilman (who are at present absent from Dunmanway), to value the Union conjointly.

None of the three were professional valutors, but farmers residing within the Union. Mr. Whelply had previously been employed in making a valuation of the West Division of East Carbery, for the purpose of equalizing the county cess, about 16 years ago.

The valutors were furnished with a copy of the Poor Law Act, the Commissioners' circular on valuation and rating, the tithe composition books, and the county cess' applotments for the parishes of Fanlobus, Drinagh, Inchigeela, and Kilmichael.

They did not apply for or obtain any rentals from landlords, but got maps of their estates from some of them.

The three valutors always valued together. They used the tithe composition and county cess applotment books, for the purpose of ascertaining the areas of the different farms, which in general they found to be correct, but did not use either of them for the purpose of ascertaining the value, because the county cess valuation was much below the real value, having been calculated according to a low scale of the prices of farming produce, and the tithe composition was often too high, although the value of land in the Union has greatly improved since that valuation was made; but always used both to assist them in forming their opinion as to the true value.

Did not estimate the gross produce and reduce it by the outgoings of the tenant, in order to ascertain the value.

Adopted the same system of valuation in the towns and villages as in the rural districts, except that they took into consideration the higher letting value in towns.

In estimating local advantages or disadvantages took into consideration the proximity to market towns, to public roads, to limestone quarries, and to public strands for procuring sand for manure.

Visited every tenement in the Union.

The inquiries made by them on visiting each tenement were, as to its extent, the names of the landlord and occupant, and the amount of rent. The replies to all these inquiries, except the last, were in general satisfactory, but in some cases the tenants refused to state the amount of their rent; and when they did so, it was generally under what they paid, so that the valutors could not depend on it, and never took it down in their field-books.

The test of value which they adopted was, not the utmost that could be got from a solvent tenant, but such a rent as they considered the tenant could afford to pay, and fairly live by.

In calculating the value, did not take the present prices of produce, but the average for the last four years, which brought it below the present prices.

Made no difference in the valuation where there was a lease.

Made no distinction between farms of different sizes.

In the mountain districts, which comprise upwards of one-third of the Union, the farms are generally from 50 to 300, and in the lowland districts from 10 to 50 acres.

Instituted a comparison between the value set upon each tenement, and the rent actually paid where the valutors were, from their own local knowledge, aware of the amount, the result of which was that in a very few instances, and those principally where tenants held under old leases, the valuation was as high as the rent, but by far the greatest portion were below the rent, in some cases nearly one-third when the lands were held under middle men.

Houses and lands were separately valued, even when occupied together, but the amounts were added and one sum for both inserted in the valuation book.

The value of the house was estimated according to its appearance and state of repair. A slated house was valued considerably higher than a thatched house of the same description.

No allowances were made by the valutors for either repairs or insurance in calculating the gross value; nor is there any sum charged for either in the Rate Book, the valutors' attention never having been called to them either by the Assistant Commissioners or the Board of Guardians.

In estimating the value of land supposed the tenant bound to manage the farm so as to deliver it up at the end of the year in good condition.

The value was estimated by what would be given for it by a person who would be bound by covenant to keep it in such condition and who would be able to perform the covenant, or compensate the landlord for his damages.

In estimating what the tenement would let for to such a person, did not make any allowance for any profit to be derived by him from the occupation, but merely for his living.

Evidence.

Mr. Pattison, valuator.

Qualifications.

Documents furnished.

No rentals applied for or obtained.

Valutors acted together.
Use of documents furnished.

Did not estimate gross produce.

System of valuation same in towns and rural districts.
Local circumstances considered.

Inquiries made on visiting each tenement.

Test of value.
Fair rent.

No distinction where of different sizes.
General size of farms.

Value compared with rent.

Houses and lands separately valued

Mode of valuing houses.

Repairs not allowed for.

Profit not allowed for.

Dunmanway.

Value set by owners in Registry Courts not considered.
Usual manner of letting land in this Union.

Effect of competition not allowed for.

Fair support for tenant allowed for.

Average amount of county cess and tithe.

Sixty objections lodged.
Considered by Board of Guardians.

Rate-payers generally content.
No objection from any landlord.

Prevalent disposition to lower the valuation.

In estimating the value of the tenements out of which the owners had registered freeholds did not make any reference to the value which the owners had set upon them in the Registry Court.

The usual manner in which lands are let in this part of the country by the owners in fee, is for three lives or 31 years, but leases for 21 years under middlemen are more numerous.

There is much competition for land in this Union.

Made no allowance for the effects of such competition in raising the market price of land.

Such competition has raised the market price above what a solvent tenant could afford to pay, reserving a reasonable remuneration for his time, labour, and capital.

Never calculated exactly what would be such reasonable remuneration, but always allowed what would fairly support the tenant and such members of his family as lived with him, and assisted in cultivating the farm.

The average acreable amount of county cess over the entire Union is about 9*d.* per annum, of tithe about 7*d.*

About 60 objections were lodged against the valuation, and the Board of Guardians met pursuant to notice, on the 25th and 28th of November, 1840, for the purpose of hearing such objections, when they dismissed about 20 of them as frivolous, about twenty were allowed, and there being a doubt as to the remaining 20, the valuers were directed to re-value them, which they accordingly did, and made some alterations which were satisfactory to the tenants, who withdrew their objections.

The rate-payers are generally content with the valuation.

There has been no objection from any landlord.

No notices of appeal have been lodged.

The prevalent grounds of objections were excess of value, compared with other holdings, very few on the ground of actual value, and not many on the ground of excess of areas.

There were no objections on the ground of too low a value except by persons who complained of their own holdings being too highly valued as compared with such holdings.

The disposition to lower the valuation is most prevalent among tenants. The supposed reasons for their wishing to lower it are, lest a high valuation should militate against them when re-taking their farms from their landlords, and increasing their rents.

The valuation is below the rent.

The number of tenements of which valuation altered by revision, was about 40.

VALUATION OF £10 COUNTY ELECTORS (registered 1832 to 1840), so far as ascertained.

COUNTY CORK.

Marked thus * re-registered in 1832, and not since registered.

LISTOWEL UNION.

Extracts from Minute Book of Board of Guardians.

APPENDIX.

*Listowel.*Extracts from
Minute-book.

At the first meeting of the Board of Guardians of the Listowel Union, held in the sessions-house, in Listowel, on Wednesday, the 6th day of May, 1840,

Present,—W. H. T. Hawley, Esq., Assistant Poor Law Commissioner, 4 ex-officio, and 24 elected guardians,

The following resolution was agreed to—

New valuation neces-
sary.

Resolved,—That it is the opinion of this Board, that there is no existing valuation which can be made available and sufficient for the purpose of estimating the net annual value of the rateable property in the Union, and that a fresh valuation will be required; but that the Tithe Composition Survey may, to a certain extent, with due revision and correction, be sufficient for ascertaining the acreable quantity of the Union.

Ordered,—That a Report to this effect be made by the clerk to the Poor Law Commissioners, in accordance with the third section of the order for regulating the proceedings of the Board.

Valuator to be ap-
pointed.

Resolved,—That a competent person or persons be appointed to value the whole of the rateable property throughout the Union, and to revise and correct existing surveys, where necessary, and that the clerk be directed to insert advertisements for two posts, at the rate of sixpence per line, in the Limerick Chronicle, Cork Southern Reporter, Kerry Evening Post, and General Advertiser, newspapers.

Copy of Advertisement.

“ TO VALUATORS.

Advertisement for
valuator.

“ The Board of Guardians for Listowel Union are desirous of obtaining the services of a competent person or persons to undertake the valuation of the rateable property in the Union, and to revise and correct existing surveys where necessary. The Union comprises about 209,261 statute acres, and the valuator will be held responsible for the equal valuation of the whole Union, employing assistant valutors at his own expense, if necessary, subject to the approval of the Board of Guardians. Competent persons willing to undertake the duty, and to enter into the required securities for the due performance of the same, should send in written tenders addressed to the clerk of the Board at Listowel, on or before the first day of June next, to be considered at a meeting of the Board to be held on the third day of June next. The terms must state a sum per day, a sum per thousand acres, and a gross sum, together with the time within which the whole work will be completed. Further particulars may be obtained by application to the clerk of the Board.

By order of the Board,

“ EDWARD STOKES,
“ Clerk to the Board of Guardians.”

Valuation Committee.

Resolved,—That the following members of the Board, viz., Stephen Edward Collis, Jeremiah O'Connor, Kerry Supple, Robert Stack, John Langford, Nicholas Cooke, Darby Moloney, Thomas O'Connor, and John Duggin, be appointed a committee for assisting in the valuation of the rateable property of the Union, three to be a quorum, and that the guardian or guardians of each electoral division under the process of valuation, be added to the committee as a consulting member, but not to vote; and that the valuator do give at least one week's notice to the clerk of his having completed the valuation of an electoral division, when the committee shall meet, examine, and correct the valuation when necessary, and report thereon to the Board of Guardians, for the purpose of their confirming the valuation as approved by the committee.

At the second ordinary meeting of the Board of Guardians, held on Wednesday, the 3rd day of June, 1840,

Present,—W. H. T. Hawley, Esq., Assistant Poor Law Commissioner, 5 ex-officio, and 17 elected guardians. Stephen Edward Collis, Esq. in the chair.

Appointment of
valuator.

Proposed by William T. Crosbie, Esq. and seconded by John F. Hewson, Esq.,—That Mr. Thomas O'Brien be appointed the valuator of this Union. Mr. O'Brien was duly appointed.

280*l.* for valuation.

Proposed by W. T. Crosbie, Esq.,—That Mr. O'Brien do take the gross sum of 280*l.*—Passed unanimously.

On the appointment of Mr. Thomas O'Brien as valuator of said Union,—It was ordered by the Board, that the clerk should direct Mr. Thom, bookseller, of Abbey-street, Dublin, to furnish such books, papers, and sheets, as may be necessary for the valuation and rating of said Union.

At the third ordinary meeting of the Board of Guardians, held on 3d July, 1840,

Present,—W. H. T. Hawley, Esq., Assistant Poor Law Commissioner, Stephen Edward Collis in the chair, 2 ex-officio, and 13 elected guardians,

Map of Union to be
furnished to valuator.

On the proposition of W. H. T. Hawley, Esq., Resolved,—That a copy of the map containing the parishes of the Listowel Union should be made, and given to Mr. O'Brien the

valuator, for his guidance and information; and that Mr. Julian, the surveyor, should be employed to make a fair copy of said map, for which he is to receive the sum of 1*l.* 10*s.*

Aug. 3, 1840.

At a meeting held this day, it was resolved,—The map being done in a correct and finished manner, that the surveyor be paid an additional sum of 2*l.* 10*s.*

December 3, 1840.

At the eighth ordinary meeting of the Board of Guardians, Resolved,—That this meeting do adjourn till Wednesday, the 23d day of December, instant, for the purpose of receiving and signing the valuation books.

December 23, 1840.

At an adjourned meeting held this day. Present,—Stephen E. Collis, Esq. chairman, 4 ex-officio, and 16 elected guardians.

Ordered,—That the valuation books be deposited with our clerk, and that they shall not be given out of his custody to any person, and that the Poor Law Commissioners be apprised thereof.

Moved by William Sandes, Esq., seconded by Maurice M. O'Connor. and unanimously agreed to,—That our valuator, Mr. O'Brien, is eminently entitled to the thanks of the Board, for the efficient and satisfactory manner in which he has to this period performed his duty.

Valuation approved of by Board of Guardians.

February 17, 1841.

At an extraordinary meeting of the Board of Guardians, Ordered,—That the valuation books be deposited with our clerk for inspection, during the period of 30 days from the 1st of March next.

Valuation books deposited with clerk for inspection.

Saturday, March 13, 1841.

At an extraordinary meeting of the Board of Guardians, Ordered,—That Mr. O'Brien, the valuator, be written to, to attend on the 3rd day of April next, to hear objections.

Valuator to attend to hear objections.

Evidence.

Mr. THOMAS O'BRIEN, Valuator of the Union; *examined.*

Evidence.

Mr. O'Brien,
Valuator.

Was appointed valuator of this Union, on 3rd of June, 1840, in consequence of a letter of recommendation from the Board of Guardians of the Cashel Union, which he valued, and another from Mr. Hawley, the Assistant Poor Law Commissioner. Is not a professional valuator, but is an extensive farmer, and resides at Newcastle, in the county of Tipperary.

Appointment of valuator.
Qualification.

Was furnished with the Poor Law Commissioners' circular on valuation and rating; with a map of the Union, which he believes to have been made from the Ordnance Sketch Map; with the Tithe Composition Books; and with the County Cess valuation.

Documents furnished.

The valuation in the Tithe Composition Books was very incorrect, and he only used it to ascertain the areas of the different farms, which he compared with the information received from the tenants, and with the map, which stated the exact area of each townland.

Use made of them.

The County Cess valuation (which had been made out by a number of sworn valuers in each parish,) he found in general very correct as to relative value, but not as to the actual value, it being much above his valuation, in some instances 25 per cent., and occasionally even above the rent.

County Cess Valuation, correct as to relative value, but much above his valuation.

When he went into a townland, he required the tenants to furnish him with the quantity and rent of their respective farms, which they always willingly gave, and showed him their leases, receipts, or pass books for rent, from which he was able to ascertain correctly the amount, which he always entered in his field-books. He did not, in consequence, apply to the landlords for such information, as he understood from the guardians that they wished it to be obtained from the tenants if possible.

Occasionally above rent.
Mode of ascertaining areas and rent.

Did not estimate the gross produce and reduce it to the outgoings of the tenant, in order to ascertain the value, as he considered he could not by that means ascertain the net value in conformity with the directions of the Poor Law Act, the landlords' and tenants' rates, which are included in the gross rent, being a poundage on the net value.

Net value how ascertained.

Adopted the same system in towns and villages as in rural districts, except that in doing so, he estimated local advantages and disadvantages and the higher letting value in towns than in rural districts.

In rural districts.
Same way in towns.

Visited each tenement separately. The test of value he adopted was not the rack rent, nor the utmost that could be got from a solvent tenant, but a fair and reasonable rent, which he calculated on the average rents for the last 10 or 20 years, paid by tenants able to meet their demands.

Test of value.

Made no difference where there were leases.

Made no difference where there were leases.

Found that large farms were lower set than small ones: a farm of 100 acres being generally set 40 per cent. less than one of 10; and, in valuing them, kept up the same proportions as they were let at.

Large farms lower let than small.

Farms of from 20 to 30 acres are most prevalent in the Union.

General size 20 to 30 acres.

Instituted a comparison between the value set by him upon the several holdings, and the rent actually paid, in almost every instance, the result of which was that he found his valuation differed very little from the rent obtained, even on recent lettings, from the occupying tenant by the owners in fee, but that it was occasionally one-third under, one-half, and in many instances even less than one-half of the rent obtained by middle-men from their under-tenants.

Comparison of his valuation with rent actually paid.

Houses and lands, when occupied together and held under the same landlord, were not separately valued; but when he did value them separately, he merely estimated the value of the house according to the accommodation it afforded to the occupier.

Houses not separately valued.
Estimate of value of a house.

APPENDIX.

Listowel.

Allowance for repairs.
Insurance.
Value of land.

How estimated.

Allowance of usual
profit, one-third of
the produce.

No reference to value
set by owner in Re-
gistry Court.

Tenures.

Great competition for
land.
No allowance made
for it.

Average amount of,
county cess and tithe.

Valuation presented
as completed.

Valuation uniform.
Gave general satis-
faction.

Grounds of objections.

14 objections because
valuation too low.
Disposition to lower
valuation prevalent.

Valuation much below
rent paid.

Mr. Supple,
Guardian.
Valuation satisfac-
tory.

Causes of complaint
against valuation.

Valuation low, except
in comparison with
other electoral divi-
sions.

P. Mahony, Esq.
Guardian.
Considers valuation
partial.

The allowances made for repairs were for thatching or slating, and keeping the walls in the same repair as he found them in.

Calculated the insurance at about 4s. 8d. per cent. (including duty), except in cases of risk, where a greater premium would be required, which he allowed.

In estimating the value of land, supposed the tenant bound to manage the farm so as to deliver it up in good condition at the end of the year.

The value was estimated by what would be given for it by a person who would be bound by covenant to keep it in such condition, and who would be able to compensate the landlord for breach of the covenant.

In estimating what the tenement would let for to such a person, made an allowance for the profit usually derived from occupation in this part of the country, which he estimated at one-third of the produce.

In estimating the value of tenements, out of which the owners had registered freeholds, made no reference whatever to the value which the owner had set upon them in the Registry Court, as he never inquired who was or who was not registered.

In the barony of Iraghticonnor, a number of tenants on the Trinity College estate hold under-leases for 19 years; the remainder are tenants from year to year. On the other estates in the barony, the tenants generally hold under-leases from 14 to 21 years.

In the barony of Clanmaurice, the majority hold from year to year; but a number hold under leases for two lives and 21 years.

There is great competition for land in the Union; made no allowance for the effect of such competition.

Such competition has raised the market-price above what a solvent tenant could afford to pay, especially in the neighbourhood of the towns.

The average amount of county cess per acre was about 3s. 9d. per annum.

Of tithe about 3s. 6d.

As soon as he valued each electoral division, the book containing the valuation was handed by him to the Board of Guardians, who gave it to the guardian or guardians for that division, in whose possession it remained for one month, for the inspection of the landholders, who had free access to it. At the expiration of the month it was returned to the valuator, with any remarks the guardians deemed necessary, who then re-examined the books, and returned them corrected to the board. They have since remained with the clerk of the Union, and have been open for inspection by the rate-payers since the 1st of March last, and are to continue so open till the 30th instant. After which a revision is to take place on the 3rd of April.

There is no difference in the value of the first valued and the last valued.

The tenants and landlords are in general perfectly satisfied with the valuation. Seventy-six objections have been lodged altogether in the entire Union. Only one landlord has lodged any objections.

No notices of appeal have been lodged, as the revision has not yet taken place.

The prevalent grounds of the objections lodged are, that the valuation is too high, but principally in comparison to other tenements. A few are as to the area.

There are 14 objections on the ground of too low a value.

The disposition among the tenants to lower the valuation is most prevalent, as they consider that not only the amount of their poor-rate, but of other public charges may be regulated according to it. They also expect that it will have an effect on future lettings made by landlords.

The valuation is supposed to be much below the present rent paid by the occupying tenants.

MR. KERRY SUPPLE, Guardian of the Rattoo Electoral Division, *examined.*

The valuation of the Union has in general given satisfaction. Has heard of no well-founded complaints, except as to some electoral divisions being over valued in comparison with others.

Considers Rattoo over valued in comparison with the division of Listowel, in which, from its vicinity to a market, land is of greater value than at a distance.

The great cause of complaint, however, is that gentlemen's houses and demesnes in the electoral division are undervalued. As example:—Gurtenard, the seat of Lord Listowel, in which his agent, Mr. Colles, resides, the demesne of which contains 39A. 1R. 18P. of the best land in the Union, and immediately adjoins the town of Listowel, is only valued at 50L. net. And Mr. Elliott's house and demesne, only one mile from the town of Listowel, containing 88A. 1R. 20P., are valued at only 100L.; whereas Mr. Dominick Rice's house and demesne, containing 16A. 0R. 32P. in Knockraveen, in the Rattoo division, and distant nine miles from Listowel, is valued at 30L., although the house is much smaller and of less value, and the land also much inferior. Considers that Mrs. Barry Gun's holding, in the same townland, which contains 28A. 1R. 16P., on which there is no house, is also overvalued at 24L.

There are a great many others in this division who complain, but all agree that the valuation is low, except comparatively with the other divisions, particularly Listowel.

PEIRCE MAHONY, Esq., Guardian of Gunsborough Electoral Division, *examined.*

Is an extensive landed proprietor in this Union; considers the valuation which has been made in some cases capricious and partial, but particularly the allowances made for repairs.

The demesne of Tarbert, containing 323 A. 3 R. 35 P., with an excellent house upon it, the property of Mrs. Leslie, is only valued at 170*l.* net, whilst his own demesne of Kilmeany, containing 348 A. 1 R. 2 P., situate in a wild and remote district, with a very bad house on it, not worth repairing, is valued at 350*l.* net. Has a farm within a mile of Tarbert, called Kil-murry, containing 199 A. 0 R. 38 P.; there is no farm-house upon it, nor any road convenient to it, and yet it is valued at 120*l.*; whilst Mr. Colles's demesne, adjoining the town of Listowel, the house and offices on which cost 4,000*l.*, and for which he would himself give 200*l.* per annum, is only valued at 50*l.*

Has made anxious inquiries in this neighbourhood, where he has been for some time past, as to the probable effects of Lord Morpeth's bill; is of opinion that, if carried, it will reduce the present constituencies in boroughs and cities, and increase them in counties, if the landlords grant 14 years' leases. In this Union, which extends over two baronies, Clanmaurice and Iraghticonnor, the numbers registered in 1832 were as follow:—

	£50 and £20.	£10.
Clanmaurice	74	132
Iraghticonnor	27	54

Comparison of registries in Union.

101 186 Total . . . 287

The following is the present state of the registry in the two baronies:—

	Clanmaurice.		Iraghticonnor.	
	£50 and £20.	£10.	£50 and £20.	£10.
1833	2	..	..	..
1834	..	..	..	..
1835	19	17	..	..
1836	3	12	..	1
1837	8	37	6	4
1838	4	38	5	2
1839	35	78	22	24
1840 and 1841 .	18	42	5	11
	89	224	38	42
	Total 393.			

Thus showing an increase of 106 from 1832 to 1841; but, of the additional electors, 26 are 50*l.* and 20*l.* voters, and in Clanmaurice the 10*l.* voters have increased by 92, whilst in Iraghticonnor they have decreased from 54 to 42; but in the same barony the 50*l.* and 20*l.* voters have increased from 27 to 38.

The state of the franchise in Iraghticonnor arises from two causes: first, the extent of the estate of Trinity College, being 28,000 plantation acres, from which no registry of 10*l.* voters can be made, as the term granted is only 21 years to the immediate tenant, Mr. Maxwell Blacker, and 19 years by him to his under-tenants; another cause for the few voters in both baronies is the neglect of registries upon the Earl of Listowel's very large estates.

Deductions from it.

No £10 voters on estate of T. C. D., containing 28,000 acres.

THOMAS O'CONNOR, Esq., Guardian of Ballylongford Electoral Division, *examined.*

T. O'Connor, Esq.
Guardian.

The only complaints he has heard against the valuation which has been made of the Union, are as to the comparative value of different tenements. Some of these he thinks well founded, particularly as to the low valuation of Gurteward house and demesne; but is convinced that the valuation already made, with some slight alterations, which he has no doubt the valuator will see the propriety of making, will give very general satisfaction.

Complaint against valuation.
Only against comparative value.

RENT and VALUATION of £10 COUNTY ELECTORS, (registered 1832 to 1840,) so far as ascertained.

Marked thus * registered in 1832, and not since re-registered.

RATHDOWN UNION.

Extracts from Minute Book of Board of Guardians.

September 16, 1839.

Committee of 12 guardians appointed to ascertain whether any valuation of any part of the Union are extant, and if so, whether and how far they can be made available in preparing the rateable hereditaments of the Union on the principle of the Irish Poor Law. Committee to report, and report to be forwarded to Poor Law Commissioners' Committee.

December 30, 1839.—Report of Committee presented. Present 6 ex-officio and 22 elected guardians, as also Mr. Mugeridge, Assistant Commissioner.

Committee reports—No valuation in Union which could be made available by the Poor Law Commissioners, but that in the district of Kingstown there is a local valuation which might be of much service in giving them the required information for that district.

Resolved,—That the valuation be intrusted to a competent person, and that advertisements for valuers be published.

October 23, 1839.—Present 5 ex-officio and 17 elected guardians.

Resolved,—That Mr. George Taylor be appointed valuator, and that his offer of valuing the Union at a bulk sum of 220*l.* be accepted.

November 20, 1839.—Appointment of valuator approved of by the Commissioners.

Resolved,—That valuator proceed with valuation, and furnish his valuation of each electoral division as completed.

March 25, 1840.—Present 1 ex-officio and 15 elected guardians.

Resolved,—That the guardians are dissatisfied at the non-attendance of valuator to report progress as arranged at last meeting, and that they are surprised that Mr. Taylor has not sent in the names of the assistants employed by him for their approval, pursuant to resolution of the 30th September last.

April 22, 1840.—Present 1 ex-officio and 17 elected guardians.

Mr. Taylor having attended to report progress, notified that he purposed to employ Mr. A. Brownloe and Mr. R. Wallnutt as assistants in the valuation, on approval by guardians.

May 20, 1840.—Present 2 ex-officio and 16 elected guardians.

Mr. Taylor attended and reported progress, and that he had completed the valuation of the electoral divisions of Dundrum, Stillorgon, and Blackrock; whereupon

Resolved,—That the guardians for the above divisions, together with the ex-officio guardians resident in these divisions, be appointed a Committee of Valuation to confer with the valuator on his valuation, and report the result of their conference to the next meeting of the Board.

May 26, 1840.—Meeting of Valuation Committee at residence of valuator, 28, Holles-street, Dublin. Present—Mr. Sherrard, Mr. Scully, Mr. Gilman, Mr. Warren, and Mr. Verschoyle.

Committee entered into examination of the valuation of the electoral division of Blackrock, and the Committee having suggested certain amendments therein, the valuator appeared disposed to accede to these suggestions.

Summonses ordered of other guardians, members of Committee, in order that Committee may avail itself of their local knowledge of each in perfecting the valuation of the electoral division in which he resides.

June 2, 1840.—Meeting of Committee at office of Mr. George Taylor, 10 members present, engaged in examination of division of Dundrum, and a part of Blackrock.

June 9, 1840.—Meeting of Valuation Committee at same place, 6 present. Blackrock and Stillorgon completed.

June 16, 1840.—Meeting of Valuation Committee at same place.

5 present, viz.:—Mr. Henry Smith, chairman; Mr. George Hatchell, Thomas M. Scully, John Gilman, and Henry C. Field.

Valuation Committee.

Meetings of Valuation
Committee.

APPENDIX. Rathdown.	Report.—That they held four meetings, at each of which they entered fully into the examination of the valuation of each of the electoral divisions of Dundrum, Blackrock, and Stillorgan.												
Report of Committee. Valuation approved of.	The Committee are of opinion, after a close and strict examination, that the valuation of the aforesaid electoral divisions is a fair and equitable one, and is, as far as they can judge, according to the provisions of the 1st and 2nd Vict., c. 56, and the circular on valuation and rating, dated 25th March, 1840, issued from the office of the Poor Law Commissioners.												
Vote of thanks to valuator.	The Committee have great pleasure in expressing their full satisfaction as to the mode in which Mr Taylor, the valuator, has proceeded in the valuation, and they beg to offer him their best thanks for the attention he has shown to their suggestions, and for the correctness of his valuation.												
Meeting of Board.	June 17, 1840. Present 4 ex-officio and 16 elected guardians. Mr. Taylor reported that the valuation of the divisions of Kingstown and Killiney would be completed in a few days. Resolved,—That the guardians of those electoral divisions and the ex-officio guardians resident therein, and A. B. Crofton, Esq., be appointed a Committee of Valuation to confer with the valuator on his valuation, and to report result of conference to the next meeting of Board. Mr. Taylor appointed another assistant.												
Meetings of Committee.	June 23, 1840. Meeting of Valuation Committee for divisions of Kingstown and Killiney, held at the office of Mr. Taylor. Present 2 ex-officio and 7 elected guardians, engaged in the examination of the valuation of the division of Kingstown.												
	June 30, 1840. Meeting of Valuation Committee at same place. Present 5 elected guardians, engaged in examination of the division of Kingstown.												
	July 7, 1840. Meeting of Valuation Committee at same place. Present 1 ex-officio and 6 elected guardians, engaged in valuation of the division of Kingstown.												
Valuation of Kingstown reported fair.	July 14, 1840. Meeting of Valuation Committee at same place. Present 3 elected guardians. The Committee having completed the examination of the Kingstown electoral division, are of opinion that the valuation is a just and equitable one, and according to the provisions of the 1st and 2nd Vict., c. 56, and the circular on valuation and rating issued by the Commissioners.												
Meeting of Board.	July 15, 1840. Meeting of Board. Present 2 ex-officio and 9 elected guardians. Ordnance Survey sheets of portion of Union in County Wicklow ordered. Mr. Taylor reported that the valuation of the electoral divisions of Glencullen and Rathmichael would be completed in a few days, whereupon it was resolved,—That the guardians of these electoral divisions and the ex-officio guardians resident therein, be appointed a Committee of Valuation to confer with the valuator on his valuation, and that they report the result of their conference to the next meeting of the Board. Mr. Taylor made an application for permission to employ another assistant, which was granted, but afterwards withdrawn.												
Valuation of Killiney reported fair.	July 21, 1840. Meeting of Valuation Committee for divisions of Kingstown and Killiney, held at office of Mr. Taylor; present 1 ex-officio and 3 elected guardians. “The Committee having inspected the valuation of the Killiney electoral division, are of opinion that Mr. Taylor has gone over it with attention, and feel satisfied it will give general satisfaction.”												
Evidence.	Evidence.												
Mr. Mackay, clerk of Union.	Mr. GEORGE MACKAY, Clerk of Union, examined. Produces order of Poor Law Commissioners declaring Union, dated 8th August, 1839.. Union divided into 10 electoral divisions.

4. Stillorgan.	8. Bray.												
Names of Electoral Divisions. 24 Elected Guardians. 7 Ex-officio. Valuator a professional person.	Number of elected guardians 24, viz.:—4 for Blackrock, 4 for Kingstown, 3 for Bray, 1 for Rathmichael, 2 for each of the other divisions. The number of ex-officio guardians is 7.												
Documents applied for by valuator.	Mr. Taylor, the valuator, had been employed by the Marquis of Sligo as a surveyor, and he mentioned several others for whom he made private surveys and valuation of estates.												
Tithe Compositions.	Mr. Taylor applied to the Board for documents to aid him in the valuation; he applied for the tithe composition of all the parishes, and for the county cess applotments; also applied for the local valuation of Kingstown; got the tithe composition for the whole Union himself; witness supplied him with the tithe composition of Bray and Old Connaught: thinks he got the county cess applotments; knows Lord Powerscourt furnished his rental; Mr. Sandys is his agent; thinks the rentals and the tithe applotments and the county cess applotments are not used to ascertain value, but extent of holdings and names of occupiers; thinks that in every instance that has been examined into, the names of the occupiers are correct: thinks that in most cases												
Rentals.													
Names of occupiers generally correct.													

the principle of the valuation was to have it lower than its real value; it is considerably below the rack-rent. There is glebe land set for 5*l.* 10*s.* which is paid, that is valued at 4*l.*; that is about a mile from Bray. The highest rate for farming land that he knows of in this division (in Bray) is 6*l.*; is well acquainted with this division of the Union; thinks the valuation generally is much below what he (witness) would give for land.

The guardians directed the valuator to ascertain the net annual value.

The greatest dispute was as to the Dundrum division. The valuator had not allowed 25 per cent. for uncertainty of letting; he afterwards did so at Blackrock and Kingstown. The guardians of Dundrum objected, and the dispute was adjusted by the valuator striking off 25 per cent. off the holdings of Dundrum electoral division.

After the valuation of Dundrum had been made, in the first instance the guardians met and approved of it.

The field books of the division of Dundrum were laid before the Valuation Committee in Mr. Taylor's office. Witness was present at all those meetings of the Valuation Committee, with the exception of two or three. The matter was discussed whether too high or too low; thinks that part of Blackrock was the first gone into, then Dundrum was proceeded with and completed, that was 2nd June, 1840. The guardians then approved of the valuation as it was then entered in the field books. The difference of opinion between the guardians and the valuator was then only in some cases as to particular holdings; they agreed as to the principle. The guardians were generally disposed to lower the valuation rather than raise it. The valuator had placed rather a high value upon the tenements; the guardians were disposed to lower it. The valuator frequently acceded to the suggestions of the guardians; sometimes the valuator declined to lower the value which he had originally put on the tenements.

Finally the valuation of the Dundrum division was gone through to the satisfaction of the guardians. There was no difference of opinion amongst the guardians themselves as to the valuation; they were mostly unanimous. Afterwards the valuation of Blackrock was proceeded with.

In proceeding with Blackrock the valuator allowed 25 per cent. for uncertainty of letting, and that division was finished upon that principle, to the satisfaction of the guardians. The guardians of that division were also generally unanimous on the subject of the valuation. Stillorgan was then proceeded with.

The valuator also made the allowance of 25 per cent. in Stillorgan. It was gone through to the satisfaction of the guardians; the most of the guardians are wealthy men.

There was a new committee then appointed for Kingstown and Killiney; they took four days at Kingstown and one at Killiney revising the valuator's field books. It was gone through to the satisfaction of the guardians; they never left it till they were perfectly satisfied. They suggested alterations sometimes to raise the valuation of particular tenements, sometimes to lower them; their suggestions were mostly to lower. Mr. Taylor in general acceded to their suggestions. When an alteration was under discussion, it was generally discussed with reference to some similar tenement which had been already valued and agreed on; it was altered so as to bring it to its real value in the judgment of the guardians. The allowance of 25 per cent. for uncertainty of letting was allowed in Kingstown and Killiney, and in all the subsequent divisions.

Rathmichael was next proceeded with, and then Glencullen. The same process was gone on with. The guardians appeared anxious to adjust the valuation according to the way they understood the Act of Parliament, and also to have it as perfectly fair and equitable between man and man as possible. The guardians generally withdrew while their own particular holdings were under discussion, that is the holdings in their own occupation. In one instance a guardian declined to have a reduction made upon his own holding, thinking it fair, although it was proposed to do so by the committee of which he was a member. They proposed to make the reduction, not to gratify him, but to bring it to a fair value; thinks Mr. Taylor was present at this discussion. The valuation was not reduced in that case.

During the discussion of the valuation the actual rent was often taken into consideration, and also whether there was any money expended in improvements. The rent was one of the data.

The reduction of 25 per cent. was applied to the sea-bathing places at Kingstown, Killiney, Blackrock, and summer residences in-land.

The reduction of 25 per cent. was not made in the electoral division of Dundrum until nearly the close of the valuation proceedings. Does not recollect any correspondence taking place on the subject. Mr. Scully put in a written protest, objecting generally to the valuation of Dundrum division, on the ground of the 25 per cent. not having been allowed in Dundrum. That protest was not entered on the minutes, it was read to the Board. Mr. Fitzsimon was chairman; he decided that the objection in the protest could be of no weight, and that the objection should come in in the shape of complaints by all individuals seeking the reduction of 25 per cent. This was the first day for the extraordinary valuation meetings. The valuation had then been declared. Mr. Scully had verbally made objections before, but no alteration had been made. Extraordinary meetings (similar to those held in Bray) were held in the court-house at Dundrum. These were public meetings; witness was in attendance; they were attended by rate-payers in great numbers.

The printed notice, dated 22nd December, 1840, was issued, appointing persons to attend at grand jury room, Bray, and at Armstrong's hotel, Kingstown. The numbers who attended at grand jury room, Bray, were so great that an adjournment to the court-house was necessary, and the meeting was continued in the court-house. There were between 200 and 300 persons attended daily at the court-house, Bray. At Kingstown the numbers who attended were small, few objections having been put in from the electoral divisions to be examined into at Kingstown, viz., Blackrock, Kingstown, Stillorgan, and Killiney, (as witness recollects.) Frequently many

objections were on the same paper. Cannot state total number of objections. They were finally delivered to Mr. Taylor, and taken into consideration by the Valuation Committees.

Those who found that their own tenements were rated on a higher scale than others, sent in objections to their own valuation. Does not recollect any instance of a person objecting on the ground of his neighbours being rated too low. Thinks that they have as much ground to object for that reason. In some instances persons objected to their valuation although they paid a much higher rent. They were generally asked what rent they were paying.

Does not recollect any objection by landlords on the ground of the valuation being too low, and throwing the rate on the landlord. The tenants are very glad not to have to pay all, and the landlords are satisfied to be made liable for their legal proportion.

Shortly after the formation of the Union there was much doubt how the rate was to be distributed between landlord and tenant. Mr. Fitzgibbon's opinion was discussed, and there were discussions in the public papers.

The total valuation is upwards of 164,000*l*. It is supposed the rate will be about nine-pence in the pound. The landlords think that a large sum will fall upon them. The landlords are aware that the lower the valuation is the larger will be the proportion of rate which will fall upon them. They have not expressed any hostility to a low valuation on that ground, that he has heard of. Thinks it is the general opinion that the valuation is a low one. This is not looked on as a final valuation, but as progressive to a perfect one. They are disposed to acquiesce in it till they see the effect. Thinks there will be no opposition until the rate is to be paid.

The houses in Bray are rated considerably under the rent. Knew of one valued at 11*l*. which is let for 34*l*. That rent is well paid and is considered a fair rent. Knows another where the valuation is 26*l*. for two holdings, the total rent paid for one is upwards of 30*l*. and the other is worth about 15*l*. Thinks that the valuation generally is on a higher scale than those two cases, but cannot state precisely the scale. Houses in Bray let higher from year to year than upon lease. Thinks the valuator made himself acquainted with the rent paid.

It was under discussion at the Board that it was immaterial whether a high or low scale was adopted, so that a fair and even scale relatively were maintained. Thought that erroneous. It was frequently renewed. Thinks it was the general opinion that the valuation should be made so as to leave a profit to the tenant, and a fair amount to the landlord. It was the general opinion that it should not be valued according to the rack-rent. Thinks the lands in this division are let at the highest they will bring. It is common here to let by advertisement. That is the mode of letting which brings the highest rent. Does not say that it brings the best tenants. Knows of about 150 acres let in that way to three or four tenants for a term of five years. Thinks the rate is about 6*l*. an acre. Considers that that will not be paid long: that is about a mile and a-half from Bray.

The usual length of lease for agricultural purposes are from 21 to 31 years, or three lives concurrent. There are a great number of persons up at Powerscourt who have no leases. Thinks that when leases expire here they are generally renewed, but a higher rent is charged.

About Powerscourt the average extent of farms is about 40 acres. Thinks they are larger there than in the Bray division.

In the mountainous districts the holdings are about six acres; those persons have the run of the common. There is an understanding that if they take so many acres, they have the run of the common. They pay something better than 1*l*. an acre for their six acres.

Mr. Taylor,
Valuator.

MR. GEORGE TAYLOR, Valuator of the Union, *examined*.

The Board advertised for valuers, and stated that the difficulty of the valuation would be diminished by the documents to be furnished, viz. the tithe composition, the county cess applotments, and the local valuation of Kingstown; on the faith of that advertisement, proposed to value the Union. Witness was unanimously appointed. Was brought up to the profession of a civil engineer. Had valued about 200,000 acres in Ireland for private and public purposes. Valued nine parishes for the tithe composition. Has valued for private individuals in the counties of Sligo, Mayo, Galway, Roscommon, Meath, Westmeath, Kildare, Donegal, also in the county Dublin. Did not get those documents from the Board; got some at his own expense. Got the tithe composition, the county cess applotments, that was all. Could not get the valuation of Kingstown. The Board stated that they had applied, but found it would be too expensive. Never had an opportunity of seeing the valuation of Kingstown.

The valuation of the division of Kingstown, amounting to 34,932*l*., notwithstanding all the inducements held out by the guardians to object, was not altered in any item. It was altered after it had been adopted by the Union.

Griffith's valuation is not made in this Union.

Obtained the Ordnance maps from the Commissioners, without any assistance from the guardians; that applies to the County Dublin; County Wicklow was not then done. Before the valuation was completed, obtained the maps of the County Wicklow. Got many maps from private individuals. Got no rentals, did not apply for them; did not wish to apply for them; did not wish the feeling to go abroad that he would rely on the rent. Has valued above Lord Powerscourt's rents.

Was sole valuator; employed assistants with the concurrence of the Board. The assistants were chiefly made use of in ascertaining the areas; this was the most laborious and tedious operation. There was an indisposition to give the areas accurately. The occupiers were disposed to underrate the number of acres held by them. There was a general feeling among every man when he went on his land to depress the value of his tenement, and every one gave reasons why it should be low; many of them afterwards explained why they wished to have it low. The motives were these: they said it would be the basis on which all future tax-

ation would be levied; and, secondly, it would affect the minds of the landlords when reletting. Leases were of course expiring, some lands are let from year to year, and they thought the valuation would help them to make a good bargain.

Lord P.'s estate comprises the largest area of any estate in this Union. He has given directions to make out a book, setting forth the areas held by each of his tenants, his valuation to poor-rate, and his rent. Lord Powerscourt's rents are very equitable; if the lands were let to-morrow, they would produce half as much more.

164,500*l.* is the total valuation of the Union; there are about 70,000 statute acres; there are about 15,000 statute acres of mountains. There is a great part of the mountains valued at 3*d.* an acre. There is one lot of 700 and odd acres valued at 15*l.*; that is in Glencullen; that is outside all boundaries. No land is known here by quantity in letting, except arable; a man who has six acres of arable on the skirt of the mountain round his cabin, will have 20 to 30 acres of the mountain inclosed to his own use; he employs those 20 or 30 acres in grazing cattle; they are a very comfortable, snug class of farmers; they have a very beneficial interest in their farms; there is not one of them who could not get considerable sums for their good-will. Has seen 200*l.* given for the good-will of a stripe of a mountain farm; there was not more than about 20 acres arable or green land, and about 60 acres of mountain. Thinks the rent was about 30*l.* Would value that at about 45*l.* a-year. Thinks that the effect of locality as regards contiguity to Dublin extends all over the Union, and affects the value of those mountain farms. A great number of cattle are fed upon those mountains. Another reason is, that gentlemen's residences extend into those districts. Thinks that country is growing into wealth. Such a farm as that in Mayo, Galway, and parts of Sligo, would not produce one-fourth of that valuation.

Valuation of mountain farms.

Tenants of those very comfortable.

Thinks that, including 15,000 acres of mountain, the valuation of the Union comes to about 3*l.* 15*s.* a statute acre, that is, taking an average of all tenements, including villa property, house property, and all except mountain.

Average value per acre.

As to the villa property, they have them from 10*l.* annual value up to 400*l.* a tenement. Lord Powerscourt is valued at 400*l.*

In speaking of the average of 3*l.* 15*s.* an acre, a large portion of very poor land in Glencullen, Delgany, Dundrum, and Bray is included; thinks the average of the rest, excluding that portion, would be 5*l.* an acre.

Thinks that the rents which people will give for villa property is no test of value; never valued them at that at all; valued villa property according to the sum expended, allowing the proprietor an interest of 10 per cent. for his capital laid out on the house, and valued the land about it according to the acreable scale of value which he had adopted in that locality. Kept in view particular portions of each locality, and valued them relatively with that, fixing first a maximum and a minimum.

Villa property.
How valued.

Began in Dundrum with Roebuck; fixed a scale for Roebuck. The first place he went to was about the head of Foster's avenue.

The field-books were furnished by the guardians. There is only one line for each tenement; if there were 50 descriptions of land in the one tenement (and there are frequently 10 or 12) there is no mode of taking an account of their different qualities.

Field-books defective.

As he best recollects, it was about 6*l.* an Irish acre that he began with, at the head of Foster's avenue; added for the house, on a calculation of the amount expended, then reduced the scale of value according to its fitness for the locality in which it was placed.

In going through the division of Dundrum, kept the value which he had fixed at the head of Foster's avenue in view; 6*l.* was the maximum for anything like a demesne; there are pet spots, gardens, which he has valued at 8*l.* 8*s.* the Irish acre, that is the maximum.

Thinks the 6*l.* was very near the value which you would set on it as between landlord and tenant, supposing it to be set by a good landlord.

Scale of valuation.

It is not a full valuation, nor anything like a full valuation, according to the rents to be obtained from tenants, who will pay and continue to pay. More can be got out of it.—Thinks that it is 20 per cent. under what is so got; is safe at that. Is satisfied that there is a vast difference between the 164,500*l.*, at which the Union is valued, and that which is actually got out of it. Is sure that 200,000*l.* at least is got out of it. Knows that there are exorbitant rents paid, far beyond what could be put on it, attending to a fair valuation between man and man.

Lower than the rents paid.

Thinks that the valuation of Rathdown is 30 per cent. higher than any other Union he is acquainted with. Thinks that his valuation is 30 per cent. nearer the real value than that of any other Union he is acquainted with; thinks he is 30 per cent. nearer the truth.

Higher than in other Unions.

In speaking of real value, means the value at which it ought to be let by a fair man for grazing cattle, or any other agricultural purpose. Thinks he is a shade under the fair rent at which it ought to be let to a tenant, for agricultural purposes, by a good landlord; but it is very little under that amount in his judgment.

Meaning of "real value."

Never heard of any Union valued up to the letting value.

Thinks that if the Legislature insisted on the guardians and valuers valuing the land according to the utmost rent that people could be got to pay, it would create great dissatisfaction. There would be a constant tendency to evade setting down the maximum. Thinks that there would be that tendency on the part of the valuers, the guardians, and the people.

Difficulty of valuing up to the letting value.

Comparing Balrothery with Rathdown, they are not in proportion as regards the value, nor as regards the rents obtained. The total valuation of Balrothery is only about 91,000*l.* or 92,000*l.*, and it contains nearly 20,000 acres more than this Union, and not one-fourth of the

Comparison with Balrothery.

APPENDIX.

Rathdown.

mountain; there is not 2,000 acres of mountain in the whole of that Union. The valuation here comes nearer to the real value than in Balrothery. The valuation of Balrothery is also lower in proportion to the rents actually paid than in this Union.

In that Union Mr. Hamilton receives more than double the valuation in many instances.

As the valuation proceeded, the field-books were laid before the Valuation Committee. In some instances there were differences of opinion, but not of any moment, as they were all adjusted.

Balrothery was the first Union in which he commenced to value under the Poor Law. Had commenced the valuation in Rathdown before the Valuation Committee of Balrothery had commenced the proceedings by which they reduced the valuation.

Tendency to a low valuation.

There is a feeling amongst the valuers employed under the Poor Law, that it is more convenient to make a low valuation, and that everything goes smoother. They have an idea that the landlords will never appeal. Has heard so from a dozen valuers; those dozen have valued at least 20 Unions. They all feel that a low valuation is by far the most desirable, the easiest made, the quickest made, with least trouble to themselves, and that by making a low valuation they get their money at once.

A low valuation is easier made, because even if not relatively fair, there are fewer objections. Some of the valuations in Ireland are made on the principle of little more than half the rent; such a valuation is rarely objected to; thinks that such a valuation has a tendency to be less relative than any other, because men will not dispute about the difference when both are under the mark. All these low valuations are compilations from documents and local information obtained from parties who have not the same inducements to give fair accounts as a person who depends on his own judgment.

Thinks that a man may adopt the principle of a valuation on a low scale, and by depending on his own judgment may make it relatively accurate.

But thinks that wherever a valuation is made in that way it is generally founded on such information as he has described.

Valuation for landlords.

In making a valuation for private individuals valued according to the fair rent at which it ought to be let to a solvent tenant by a liberal landlord.

Never took into calculation whether tenants are to register.

Frequently found that on the estates valued by him, when let at his valuation, the tenants registered their votes, unless prevented by some circumstances, that is, where the extent of the holding was about 20 acres.

Always made a difference of 10 per cent. between the valuation at which a good landlord would let, and the rent which might be obtained by setting it up to be let by competition; did the same in this Union; if anything was a shade under that in making the valuation for the Union.

Small and large holdings valued on same scale.

In consequence of the great competition for land, the smaller the holdings, the higher the rack-rent; in valuing the Union adopted the same acreable value for all holdings whether large or small.

Comparing the valuation with the rack-rent of small holdings, there is a much greater difference between them than between the valuation and rent of large holdings.

In speaking of small holdings refers to anything under five acres.

The rack-rent of a small holding would be about half as much more than the valuation.

If you go down to smaller holdings, the rent may be double.

— Quin, Esq.,
Elected Guardian.

Mr. QUIN, Guardian for Electoral Division of Bray, *examined.*

It is not considered necessary to ascertain the amount of the rent actually paid.

Test of value.

The test adopted was what a solvent tenant would pay for it, but certainly not the utmost that a solvent tenant could be got to pay for it.

Not the rack-rent.

The test adopted was the fair rent, everything connected, situation very particularly.

The fair rent.

If land be let at the utmost that a solvent tenant can be got to pay, the rent will be much beyond what he considers a fair rent.

Three Classes of Tenements.

There are three classes of tenements, the value of which is ascertained by different tests, viz. :—

1st. Tenements the rent of which does not depend on the produce of the land, such as houses and residences which are let at rents, not depending on what the land will produce.

2nd. Arable land.

3rd. Mountain pastures.

The first class is a very large portion of this Union; the number of residences is very great, and the property divided amongst those residences very extensive. The land in the neighbourhood of them has acquired a letting value to a great extent independent of the produce of the land.

He (Mr. Q.) has let 40 acres for ever, at 10*l.* an acre, to solvent tenants—Mrs. Putland and Mr. Quin, of Claremount; 10 acres of that is nearly two miles from Bray. Mr. Tilly has let a very considerable extent in the same way, at the same rate. The land on which the poor-house is built is let at a very high rent; thinks it is 8*l.* an acre.

Ten acres of the land which he (Mr. Quin) has let at 10*l.* an acre is rated at 4*l.* an acre: 30 acres of it is valued at 6*l.* an acre in consequence of being nearer to Bray; took the portion of it which is let to Mr. Quin of Claremount, at 4*l.* an acre, about 10 years ago; was bound by his lease to lay out money on it. Mr. Taylor rated it at 4*l.* an acre; that valuation was not altered; Mr. Taylor was aware that it was let at 10*l.* an acre; 4*l.* an acre was fixed as agricultural value; he speaks of the Irish acre.

Valuation fixed as agricultural value.

The greater proportion of the valuation in point of amount relates to that class of tenements,

the value of which does not depend altogether on the produce of the land but upon the circumstance of being occupied by residences, or in the neighbourhood of them.

Of the 170,000*l.* at which the Union is valued, thinks 120,000*l.* relates to tenements of that class.

The whole Union is valued very low; was much surprised at the result; expected that the total valuation would have been much greater. Mr. Tilly's land, which is let to Mr. Randal Plunket at 10*l.* an acre, is valued at 4*l.*; thinks that is enough for it as agricultural land.

Knows a person who has three acres at Shanganagh, the rent of which is 10*l.* an acre, and he pays it; he is a carpenter. That is rated at 4*l.* or guineas: that is a mile and a half from Bray.

Answers of the Board of Guardians to Queries respecting the Valuation and the test of Value.

Sir George Hodson in the Chair.

The valuation has been completed to the satisfaction of the Board; full information respecting the proceedings in framing the valuation will be found in the Minute-book; and respecting details, the Board are desirous to refer to the valuator.

The Board consider that the valuation is entirely satisfactory to all classes, landlords, tenants, and the public. Public meetings have been held at which all objections to the valuation were gone through, item by item, and all were satisfied that the valuation was a fair and equitable one.

The test of value which has been adopted, is the reasonable rent and not the rack-rent.

APPENDIX.

Rathdown.

Whole valuation is very low.
Instances of rent and valuation.

Sir George Hodson,
Bart.,
Chairman of Board.

Valuation entirely satisfactory to all classes.

VALUATION OF £10 COUNTY ELECTORS (registered 1833 to 1840), so far as ascertained.

Supplemental Evidence.

Mr. GEORGE TAYLOR, Valuator, re-examined.

APPENDIX.

Rathdown.

What are the usual charges by professional surveyors for valuing an estate for a landlord for the purpose of letting?—The usual charges by a professional surveyor for making such a valuation are, for small estates, say 1,000 Irish acres, at the rate of 2½ per cent. on the amount of the valuation, giving each field, with a report on the present and prospective condition of the property; and for large estates done in the same way 2d. per Irish acre.

Mr. George Taylor.
Usual charges for valuing estates.

What are the usual charges for valuing an estate for the purpose of purchase or sale?—That service is generally performed at the rate of 1l. 1s. per day, with travelling and hotel expenses for the time engaged in the work.

Usual charges for purchase or sale.

Practically, what is paid by landlords to country surveyors for making valuations for the purpose of letting?—Owing to every hedge schoolmaster styling himself a surveyor, the gentry get such services for about 5s. per day, and they would value about 100 Irish acres (per day) on an average between landlord and tenant.

Country practice.

Taking the case of a Union containing 141,653 statute acres and 7,277 tenements,* what time would that occupy a valuator visiting every tenement and exercising his judgment upon it?—I conceive 400 statute acres on an average for every day would be good work if properly done, this gives 354 working days to do the Union stated to contain 141,653 statute acres and 7,277 tenements. This would be rather a favourable Union for a valuator, and I believe more so than an average one in 25 counties in Ireland.*

Time required for an average Union, supposing every tenement visited.

Supposing the valuator adopts the course of obtaining lists of tenants and their rents from under agents and others through the country, then visiting the tenements and inspecting the condition of the tenants who hold at those rents, can he make a tolerably accurate estimate of the value of the tenements?—I conceive a tolerable and satisfactory valuation as regards the Poor Laws, could be made by a competent professional person under the circumstances stated, and I am aware that these principles have been adopted, in an imperfect way, in forming many of the valuations throughout the country.

Accuracy thus attainable.

* Of 31 Unions not containing boroughs returning members to Parliament, and of which the returns of the number of tenements valued had been received when these questions were put, the average number of statute acres appeared to be 141,653 statute acres, and the average number of tenements valued appeared to be 7,277.

APPENDIX.

Dundalk.

DUNDALK UNION.

Extracts from
Minute Book.*Extracts from Minute Book of Board of Guardians.*

[In this Minute Book the ex-officio are not distinguished from the elective Guardians.]

Valuation Com-
mittee.

July 22, 1839, Present, Thomas Fortescue, Esq., Chairman, and 13 Guardians.

Resolved,—That the following gentlemen be a Valuation Committee, to report to the Poor Law Commissioners upon the point set forth in the Commissioners' order, section 3rd, clauses 1, 2, and 3, and to consider and report to the Board of Guardians at the next meeting, or as soon after as possible, upon the best mode of proceeding in order to obtain a correct valuation of the several hereditaments in the Union, upon which to form a rate for the relief of the poor, in accordance with the Act of Parliament in that respect.

COMMITTEE—

John Stratton, Esq.	Neil Kelly, Esq.
Travers Wright, Esq.	Patrick Darcy, Esq.
George M'Gusty, Esq.	James M'Alister, Esq.
James O'Callaghan, Esq.	Donald M'Neill, Esq.
Thomas Byrne, Esq.	M. W. Kenny, Esq.

August 12, 1839. Present, Thomas Fortescue, Esq., and 34 Guardians.

The Valuation Committee delivered the following Report:—

Resolved that a
valuator be ap-
pointed.

The Committee met 29th July—Present 6 members—and, after discussing the matter referred to them, were of opinion, that in order that an uniform and equitable rate should be established throughout the Union, it will be necessary, in the first place, that a valuator be appointed for the entire Union, to assist the Guardians in the several electoral districts in making out the valuation of all property subject to rate therein. They are also of opinion, that, with the assistance which it is expected the landed proprietors of the Union will afford, the Government survey will be a check sufficient for the purpose contemplated by the Act.

The Committee, however, consider it premature to adopt any formal resolution on the subject either of the valuation or the site for the intended workhouse, and adjourned to Monday, the 5th of August.

REPORT.

Adopt the Ordnance
survey.

No. 1.—That the Government survey, as a general survey, is sufficient for our purpose.

Advertise for valu-
ators.

No. 2.—That there is not any sufficient valuation in the Union on which to form a rate. That, in the first instance, it is necessary that one or more fit and competent persons be appointed as valuers, and that advertisements for tenders on certain fixed terms be inserted in the public papers for such valuers.

Resolved,—That the following advertisement be inserted in the *Drogheda Journal*, the *Newry Examiner*, the *Newry Telegraph*, and the *Dublin Advertiser*, to be inserted once in each paper:—

*Dundalk Union.—To Valuers.*Documents for va-
luator.

The Board of Guardians of the Dundalk Union having resolved to adopt the Government valuations as the basis upon which to found the rate for the relief of the poor, are desirous of obtaining the services of a competent person or persons to undertake the revision, correction, and completion of the same. The Union comprises about 104,372 statute acres, and the Board of Guardians will furnish to those employed copies of the Government valuation, and of the townland maps, marked with Mr. Griffith's red lines, denoting the quality of each portion of land, and copies of the field-books corresponding thereunto. The Board will also furnish lists of occupiers from the tithe valuations, and such other information or documents as can be obtained from the landlords, and which may be considered useful or desirable.

August 26, 1839. Present, T. Fortescue, Esq., in the Chair, and 28 Guardians.

The following offers having been received from persons who are willing to undertake the valuation, viz:—

Candidates for the
valuation.

B. Roddy	2 <i>l.</i> per 1000 acres, and 1 <i>s.</i> per	on houses.
J. P. Gaynor	9 <i>d.</i> per house, and expenses.	
T. M'Ardle	1 <i>l.</i> 17 <i>s.</i> 6 <i>d.</i> per 1000 acres.	
M. Casey	1 <i>s.</i> per house.	
J. Stoakes	1 <i>l.</i> 16 <i>s.</i> per 1000 acres.	
W. Price	2 <i>l.</i> ditto	and 40 <i>l.</i> for town valuation.
E. Murphy	2 <i>l.</i> ditto	
Quinn and Martin	1 <i>l.</i> 15 <i>s.</i> ditto	

Resolved,—That the consideration of this question be postponed till this day fortnight, and that in the mean time the clerk be directed to insert the advertisement in the *Dublin Evening Mail* and *Dublin Evening Post*.

September 23, 1839. Present, T. Fortescue, Esq., in the Chair, and 32 Guardians.

P. M'Cann resigns the office of Guardian to offer himself as a candidate for the valuatorship. Eighteen applications received from different persons offering their services as valuers.

The appointment of valuator of the Union having been considered, and many applications for the situation having been read,

Mr. M'Cann ap-
pointed the rural
valuator.

Resolved,—That Mr. P. M'Cann be appointed valuator of the Union on the terms pro-

posed, viz. at 2*l*. per 1000 acres, including all property upon the area, except the town of Dundalk, subject to the approval of the Poor Law Commissioners. The contract to be filled up and the work to commence as soon as possible.

The valuation to be completed in 12 months from this date, and 10*s*. per day to be the sum to be paid in case of appeals in which the valuation is supported, and 5*s*. per day in cases in which the appeal succeeds.

The appointment of a valuator for the town of Dundalk then took place, and two candidates were put in nomination, and Mr. Casey was duly elected. Mr. Casey appointed town valuator.

November 18, 1839. T. Fortescue, Esq., in the Chair, and 19 Guardians, present.

Ordered,—That the clerk do write to the incumbents of the several parishes in the Union, or the churchwardens, or the persons in possession of the tithe valuations of the property within the Union, requesting the use of the tithe applotment for the valuator of the Dundalk Union, and engage to take care of and return same. Tithe applotments.

December 2, 1839. T. Fortescue, Esq., in the Chair, and 13 Guardians, present.

Ordered,—That the clerk do write to Mr. Gulson to request that he would procure for the Board copies of the general valuation of Ireland as far as it is concluded in this Union, inasmuch as the valuations cannot proceed without them in their duties. Griffith's valuation.

January 13, 1840. B. Thomson, Esq., in the Chair. Present, 9 Guardians.

Resolved,—That the clerk be directed to proceed to Armagh, and take copies of the tithe valuation, for the information of our valuator, of the following parishes:—Enniskeen, Louth, Killarny, Creggan, Darvin, Kane, Roach, Drumiskin, Castletown, Dunbin, Ballyboice, Faughart, Ballargan, and Baling.

March 23, 1840. J. M'Alester, Esq., in the Chair. Present, 11 Guardians.

Resolved,—That the valuator, Mr. P. M'Cann, having brought this day a considerable portion of the valuation of the Dundalk Union, and having made progress in this respect, that a cheque be drawn in his favour for the sum of 50*l*. on account.

May 18, 1840. T. Fortescue, Esq., in the Chair, and 3 Guardians present.

Ordered,—That the clerk give up the maps and field-books to C. H. Ligar, Esq., to be completed and furnished by next Board.

Ordered,—That the clerk write to the Valuation Committee, requesting them to meet at the Court House, Dundalk, on Monday, the 1st of June, 1840, at eleven o'clock forenoon, to examine the valuation of the electoral division of Drumiskin, and also to write to the Guardian of Drumiskin, particularly requesting his attendance, and to Mr. M'Cann, who will bring in the valuation. Ordered,—That a cheque be drawn in favour of P. M'Cann for 100*l*., on account of the valuation. Ordered,—That a cheque for 20*l*. be drawn in favour of M. Casey on account of the valuation of the town of Dundalk.

June 15, 1840.

Ordered,—That the clerk write to the Valuation Committee to attend at the Court House, Dundalk, on Monday, the 22nd of June, 1840, at eleven o'clock forenoon, and to the Guardians of the electoral divisions of Enniskeen, Drumiskin, Barronstown, and Lower Creggan, requesting their attendance. Ordered,—That the Clerk write to Mr. Flood to furnish the remainder of the field-books and maps for the Union, as the valuation cannot proceed without them. Summons of Committee.

July 20, 1840. T. Byrne, Esq., in the Chair, and 12 Members present.

Ordered,—That Mr. M'Cann before the next Board meeting prepare a statement, added up so as to show the comparative valuation of each townland, and of each electoral division, and of the whole Union as compared with the Government calculation thereof. Mr. Griffith's valuation compared with the Poor Law valuation.

Ordered,—That a cheque be drawn for 50*l*. to Mr. M'Cann, on account of his valuation.

August 31, 1840. J. M'Alester, Esq. in the Chair, and 12 Members present.

The following letter was received from Mr. Gulson:—"he was not aware of any business which would be before the Board, except as regards the valuation—in this matter it would be best to appoint a Committee, one of the town Guardians, to inspect the valuation of the town and [some words appear to be omitted in copy] the country; and as the divisions are [a word here illegible] over, the Guardians of the several divisions should be asked to attend the Committee to inspect it.

"The Committee will of course see by the Act of Parliament, section 64, that the valuation ought, as a whole, to be not less than the rent at which the property in the Union let. Assistant Commissioner's directions as to the valuations.

"One property may be valued at more than the rent, and another may be valued at less than the rent, but as a whole the valuation ought to be fully equal to the rent. This is shown by section 64.

"He did not anticipate that much alteration will be made in the valuation by the Committee, except the corrections of some errors such as omissions or mistakes; but it will be desirable that every Guardian should look over the valuation as far as he is enabled, before it is laid open to the public, and as soon as this is quite completed he would attend the Board of Guardians, and would arrange for the valuation being laid open for public inspection prior to the making a rate."

August 31, 1840. James M'Alester, Esq., in the Chair, and 12 Members present.

Resolved,—That three gentlemen for the town of Dundalk form a Board of Valuation, and five form a Board for the rural districts, both Committees to meet at the Court House, Dundalk, on Monday, September 7, 1840, at eleven o'clock in the forenoon, and examine and correct the town valuation, and the electoral division of Barronstown, and that the clerk send notice for such attendance. Committee of Valuation.

September 28, 1840. B. Thompson, Esq., in the Chair, and 15 Members present.

The Valuation Committee reported that since the last meeting they had met on the 7th, Meetings of Committee.

APPENDIX.

Dundalk.

Election divisions
examined.

Meetings of Com-
mittee.

11th, 12th, 13th, 14th, 15th, 18th, 21st, and 28th September, and examined the electoral divisions of Barronstown, Haggardstown, Faughart, Darver, and the town of Dundalk.

October 26, 1840. J. O'Hanlon, Esq., in the Chair, and 8 Members present.

The Valuation Committee for the rural districts having reported that since their last meeting they had met on the 5th, 12th, 19th, and 26th October, and examined the electoral divisions of Ballymascanlan, Ravensdale, and Dromiskien.

November 23, 1840. B. Thomson, Esq., in the Chair. Present, 9 Guardians.

The Valuation Committee having reported that since their last meeting they examined on the 9th, 16th, and 23rd instants the electoral divisions of Jenkinstown and Louth, it was resolved,—That the clerk should write to Mr. M'Cann to send in the book of the statement drawn up of each electoral division for the use of the Committee of Valuation, before the 30th instant.

December 21, 1840. J. Stratton, Esq., in the Chair, and 7 Members present.

The Valuation Committee reported, that since the last meeting they examined on the 30th of November the electoral divisions of Lower Creggan, and on the 14th of December the electoral division of Killarny.

January 18, 1841. J. M'Alister, Esq., in the Chair, and 11 Members present.

The Valuation Committee reported, that since their last meeting they examined the valuation of the electoral divisions of Enniskeen on the 28th of December, 1840, and Rathcor on the 11th of January, 1841.

The valuation of the town of Dundalk having been completed by the valuator, M. Casey, a balance of 10% was paid him.

February 15, 1841. R. Haig, Esq., in the Chair, 12 Members present.

The Valuation Committee reported, that they have now examined all the books of the valuation of the several electoral divisions of the Dundalk Union, and will meet on Monday, 22nd instant, at the Court House, to report on the same.

Examination con-
cluded.

Extracts from

Valuation Com-
mittee.

Extracts from Minute-book of Valuation Committee.

August 31, 1840.

A Valuation Committee was appointed at a meeting of the Board of Guardians, held at the Court House, Dundalk, on Monday, August 31, 1840.

Committee for the Borough of Dundalk consisted of 5 Members; the Committee for the Rural Districts consisted of 15 Members.

Resolved,—That three gentlemen form a Board of Valuation for the town of Dundalk, and that five form a Board for the rural districts.

The Extracts from the Minute-book of the Valuation Committee supply no information, further than mere notices of progress and adjournment, with the exception of the following REPORT.

Dundalk, March 8, 1841.

At a Meeting of the Valuation Committee of the Dundalk Union, held at the Court House, on Monday, 8th March, 1840, pursuant to adjournment,—

Present, J. M'Alister, Esq., and 6 Guardians.

The following Report was unanimously adopted:—

Your Committee having carefully examined and compared the valuation of the several electoral divisions in this Union, as made by Mr. M'Cann, compared with that of Mr. Griffith, and found so great a discrepancy, not only between them, but also between several places in several of the electoral districts, as compared with one another, are of opinion that the only satisfactory way to arrive at a just and fair valuation, and such as will be calculated to give general satisfaction, will be to take Mr. Griffith's valuation as a basis, and add thereto from 15 to 25 per cent., generally, with such further addition, so much per centage, as may be agreed on in such localities, as are valued by Mr. Griffith greatly under the fair letting value of the day.

(Signed) J. M'ALESTER, Chairman, and 8 Guardians.

Mr. CASEY, Town Valuator, *examined*,—

Was appointed by the Board to value all the property contained within the limits of the borough of Dundalk. It consists almost exclusively of house property. He is a builder, and is well acquainted with everything relating to houses. He lived always in Dundalk, and is intimately acquainted with the rents of houses in the town. House property is depreciating in value every day. Few houses are built now. There is hardly any trade here, the exports are confined to corn and cattle for the English markets. He was furnished by the Board with Mr. Griffith's valuation of the borough, but he made little use of it, as he was well acquainted with the value of the property in the town. He formed his opinion of the value from the nature of the buildings and their situation in the town. He has compared his valuation with Mr. Griffith's valuation. The Poor Law valuation is something higher. In Mr. Griffith's valuation no value is placed on cabins. He has placed some value on every sort of tenement. This would make the total of his valuation much higher than Mr. Griffith's, but when they refer to the same property they nearly agree. If he made his valuation when Mr. Griffith's was made it would be much higher. When Mr. Griffith's valuation took place there were upwards of 120 public houses in full business; this business is now nearly extinct. He made a valuation for the purposes of lighting and paving the town. This was made immediately before the valuation for the Poor Law, but it did not include houses under 5*l.* yearly value. The

APPENDIX.

Dundalk.

valuation made under the Poor Law of the same property is something lower. In estimating the value for the purposes of the Poor Law he took the reasonable value.

Every person seemed anxious that his property should be valued low. No one applied to have his rate increased, that he might be entitled to vote.

He was acquainted with the rent paid for almost every house in the town. Houses in the town are generally let at a rack-rent.

He knows a house lately let for 90%, which he has valued at 70%, and this he thinks full the value.

He ascertained the value by inspecting the premises, and thinks that the houses would not let at present for more than he valued them.

The instruction he received was to value the property at what a solvent tenant would pay.

The difference between the gross and net value is 20 per cent. He allowed about 10 per cent. for repairs and insurance. He made the same allowance for all sorts of houses, new and old, slated and thatched.

He considers that houses of every description would require the same rate of annual outlay to keep them in the state they were when valued; houses of an inferior description are not kept up in the same manner that good ones are. In valuing a house he never considers whether the occupant registers from it or not.

There is not much competition for houses; many are untenanted; most of the persons inhabiting the cabins in the suburbs make out their rent by day-labour; some of those cabins are occupied by poor tradesmen; many of those inhabiting such cabins make their rent by begging—the cabins inhabited by this class are valued generally from one pound to two—but in many cases several families live in the same house.

The only manufactory in the town is a pin-manufactory; the tradesmen are principally Englishmen; girls are also employed.

When he had completed his valuation of the town, it was submitted to the Committee of Valuation: the Chairman read it to the Committee from the field-books. This valuation was considered too high; he reduced it, and made out new books: he thinks he reduced it about 10 per cent.

The valuation so reduced was satisfactory, and the only objection made was that he valued Mr. Watton's Quay too low.—However, he did not alter the valuation.—The Chairman read out for the Committee his several valuations; the Committee made a favourable report to the Board. The valuation was then discussed by the Board, and, after many remarks, was finally adopted.

JAMES M'ALESTER, Esq., Guardian; *examined.*

Is possessed of considerable property in the town of Dundalk; is acquainted with the mode the valuation of the town is made; considers that it is about 10 per cent. under the letting value. Property in the town has greatly depreciated: this is partly caused by the temperance movement, and partly by the succession of bad harvests for the last three years. This is an agricultural county, and, with the exception of a pin-manufactory, there is no manufactory in this town.

Does not consider that the property of the 10% householders is much undervalued.

He was one of the Commissioners under the 9th Geo. IV. c. 82; never knew of an instance where a person applied to have the value of his tenement increased, although a slight increase would procure for the applicant the right of voting.

Knows many instances where applications were made by occupiers to lower the valuation. Does not recollect of an application being made, the effect of which would be the disfranchisement of the applicant.

The people were very anxious in the selection of Commissioners, and the town was much divided.

The parks about the town let at high rents; the ground is good; moreover it is the property of a single individual, who can on this account name the price.

In this town there are not many houses of a very inferior description, and the number is diminishing daily. The rents of the town-parks are paid generally only three out of four years; when the rent is in arrear the landlord is satisfied to relinquish the rent due, on condition that he gets back the peaceable possession.

The town-parks are used for the purpose of grazing a milch cow; some till a small portion. He considers that 20 per cent. is too great a difference between the gross and net value.

A man taking a house would pay more as a yearly tenant than if he took a lease; he has himself made abatements for the purposes of inducing solvent tenants to take leases.

MR. M'CANN, Rural Valuator of the Union, *examined.*

Was appointed on September 23, 1839. He contracted to value the Union within a year. It contains 104,375 acres. This was the first Union he was employed to value. Since then his services have been engaged in valuing Carrickmaross, Ardee, and Larne. He has completed the three first. They have not, however, passed the Board. He never was employed as a valuator before he commenced valuing the Dundalk Union. He is a farmer, and has considerable experience in the value of land. His capabilities were well known to the Board; he was a member of the Board, and resigned, as he found the Board disposed to appoint him as valuator. There were many applicants, and he was chosen unanimously. Immediately after his appointment he commenced valuing the Union. When he completed the first four electoral divisions he submitted the valuation of them to the Board, and it was looked over, and no objections were made to it.

General anxiety that valuation should be low.

Mode of ascertaining value.

Difference between net and gross value.

No reference to Registry.

Competition for houses.

Valuation submitted to the Committee.

Considered too high. Reduced it 10 per cent.

This valuation satisfactory.

J. M'Alister, Esq., Guardian.

Town of Dundalk valued 10 per cent. under the letting value.

No application was ever made by an occupier to increase his rate.

Many applications to lower.

Rathcor.

Mode of husbandry.

Jenkinstown.

When he valued any division, he fixed on a place where he read his valuation to the farmers occupying the ground valued. Those meetings were numerous attended. The Guardians approved of this mode of giving his valuation publicity. He listened to any objections any person wished to make, and where he thought he could have been mistaken in the value he placed upon the tenement, he reviewed it, and altered the value, if he thought it necessary. During all those proceedings the valuation seemed satisfactory. When he gave notice to the Board that the valuation was complete, they formed a committee for the purpose of revising it. The committee held several meetings. Very few objections were made by them to the valuation until he came to the electoral division of Dundalk. There an objection was made to the value he placed on town-parks. He valued them on an average at 3*l.* 10*s.* per annum. Lord Roden's agent objected to this valuation, as being too low, stating that a low valuation would throw all the burden of the poor-rates on the landlord. Town-parks generally fetch 7*l.* per Irish acre.

He considered that the town-parks were not intrinsically worth more than the value he placed on them; and that the high rents which were paid was owing to persons being satisfied to make any sacrifice for their convenience.

He applied to Mr. Gulson, then Assistant-Commissioner, for information.

He directed him to take into consideration how much the property was increased in value by its neighbourhood to the town. Mr. Stratton, Lord Roden's agent, stated that the town-parks would sell to a purchaser at the rate of 6*l.* or 7*l.* per acre. Mr. M'Cann altered his valuation of the town-parks; increased it about 80 per cent.

There were no other objections of any moment made to his valuation. Any objection that can be made he is ready to listen to; and if he finds it well founded, he will alter his valuation accordingly. But he thinks, from the pains he took in making the valuation, few alterations are necessary. The objections were generally, if not all, made by landlords, who complained that he valued the Union too low.

In valuing the Union, he judged from the appearance of the soil and situation of the property, what a solvent tenant could pay, reserving to himself a fair remuneration. The occupiers of land in this Union are willing to pay rents which will not allow them reasonable remuneration.

He considered that a man could not live respectably, holding less than from 10 to 15 acres Irish. This he would be able, with the assistance of his family, to cultivate advantageously. He placed such a value on a farm of that extent as would allow the occupant to live as a person in his situation should live.

Farmers in this part of the country holding from 10 to 15 acres of ground cannot afford themselves better food than potatoes and salt for half the year. Some have a little milk and meal during the summer. It would be impossible that any valuator would adopt a scale of valuation which would oblige the occupiers to live in this manner.

He thinks that occupiers of from 10 to 15 acres should be able to kill a pig or two for their own use in the year, and also be supplied with milk and other necessities.

On those considerations his valuation of the Union is founded.

Having in this way tested the valuation of one portion of ground, his experience and judgment enabled him to rate all the others proportionably.

The electoral division of Castletown principally belongs to eight different persons.

The land there is let in farms of 15 to 30 acres; the land is good and is let high—much too high. The rent varies between 2*l.* 2*s.* to 2*l.* 10*s.* per acre. There is very little grazing land, and no bullock land, principally sheep-walks. This land would not fatten 2½ sheep to the acre. Wheat is now rarely sown in this part of the country.

The ground in this division is valued at from 1*l.* 8*s.* to 1*l.* 10*s.* The large farms are generally held under old leases. In those cases this valuation is above the rent.

Higher rents would be given for small farms than large ones.

The rents increase proportionably as the tenements decrease.

The value he placed upon land was not at all influenced by the manner it was held. He rates a larger farm as high as ground of equal quality in the same locality though much subdivided. When he undertook the duties of valuing the Union the Guardians directed him to use Mr. Griffith's valuation as a basis for his. He then stated that his opinion of ground differed in many instances from Mr. Griffith's, and that he would only use it as a guide to help him in forming an opinion, if they wished to have the benefit of his evidence on appeals. The Guardians seemed satisfied with this explanation.

Mr. Griffith's valuation upon the whole is uniform, but there are, however, some inaccuracies. He is aware of two townlands, where land worth, in the estimation of people in the neighbourhood, 1*l.* more per acre than the other, is valued 10*s.* less.

In the valuation of bogs Mr. Griffith's valuation is very erroneous. Rathcor principally belongs to six persons. There are very few large farms in this division. The land is let in general high; the arable part is generally let at 2*l.* 5*s.* per Irish acre. The cultivated portion of the mountain is let at 1*l.* 5*s.* The heathy tracts at 8*s.* to 10*s.* per acre. The people who occupy this sort of ground are principally jobbers, and make their rent and livelihood in this way. They could not pay their rent out of the produce of the ground. Few in this division hold under leases. Does not consider that any solvent man would take a lease of ground at the rents paid in this Union.

With very few exceptions, the highest bidder in this Union will be the accepted tenant. The tenant endeavours to take as much as he can out of the ground; when it is exhausted he gives it back to the landlord.

Jenkinstown is principally mountain. The cultivated parts are let for about 1*l.* 7*s.*, this

is valued by him at 7s. 6d. The heathy parts are let in tracts of about 60 acres at a rent of about 25l. This tract would be rated by him at 7l. 10s. Considers that a man holding 20 acres of the arable and 20 acres of the pasturage, at the rent at which he values the land, would be able to live as he considers the lower order should live, and as he before described.

Many of the persons occupying these mountain districts leave their homes when they sow the crop. Those able to work go to England, the mother and children beg about the country. When the crop is fit to be cut they return, and live on the produce until the following spring. The money they earn in England pays the rent. No valuation could be based upon rents paid in this manner.

Upper Creggan is divided among many landlords. Few of the tenants have leases. There is no mountain in this division, but the soil is poor. The farms are small, generally 10 or 12 acres; many so low as 2. It is generally rented at 35s. per acre. The people are very poor, they make their rent and livelihood by jobbing; they consider the land merely as a home and not as the means of earning a livelihood. The houses are of the very worst description, and no value would be placed upon them.

There are many proprietors in Darver. The land is the best in the Union. The farms are generally large, and held under old leases. The valuation is higher than the rents paid. The better class of lands is valued at 2l. 2s. The inferior land is occupied by small farmers at rents from 2l. 10s. to 3l. The land is valued about 1l. 12s.

Barronstown.—There are many landlords in this division; the farms are generally small, from two to ten acres; the rent is very high, about 2l. 2s.; this land is valued about 30s. A great part of the division is held by persons holding under old leases, who relet at very high rents. Some leases have lately expired, and the property came into the hands of the Earl of Ludlow, who let to the occupants at 30s., before they had paid from 45s. to 50s. This land is valued about 30s.

In Inniskeen there are many landlords; the lands are very poor, and let in small farms; the rents are high, from 35s. to 40s.; it is valued about 25s. The occupiers are principally jobbers in cattle, and live on the gains of this occupation.

The fee of Louth Electoral Division is much divided; it is also let in small farms, at rents from 3l. to 2l. 15s. The land is good, but the rents are very high; it is valued at 2l. 2s. The rent is partly paid in work.

Dromollagh is a mountain district; it is let at from 2l. to 2l. 10s. per acre. The inhabitants make their rent by fishing; the ground is cultivated with the greatest difficulty, and the return is very poor. He considers the people would be much better off if they held no ground, and purchased from their earnings as fishermen all their requisites.

In Haggardstown, Drommiskin, and Castlering there are some large proprietors and many small ones; the ground is generally good, the rents high, generally 45s. He has valued the ground at 38s. The farms here are large, and therefore let proportionally lower than in other places. Few register, except those holding under old leases.

Few persons in this Union take a lease for any other purpose than to be out of the power of the landlord, in case the year turns out favourably. If there is a bad year, the landlord must either give an abatement or receive no rent.

In Ravensdale the ground is mountainous, and is let to dealers in cattle at very high rents, good and bad, about 25s. The average value he placed upon it is 17s. per acre.

There is some good land in Carlingford; the best lets at 50s., generally the good ground lets for 45s.; it is valued about 37s. to 38s. It is principally held by small farmers, under middle-men, and owners in fee.

They all require as high rents as can be got. Some persons who have become owners in fee of commons, register as 10l. freeholders.

The land in Lower Creggan, Ballymascanlan, Killanan, is poor, and belongs to several persons; it is let to small farmers, at from 30s. to 35s.; it is valued from 20s. to 25s.

Although his valuation is low compared with the rents, Mr. Griffith's is still lower, about one-third.

He attended several meetings of the Committee; it was an open Committee; any member of the Board might take part in the proceedings. When the valuation was read at one meeting, one part of the valuation was considered too high, another too low. At the next meeting other Guardians might attend, and the Committee would then decide that the valuation was fair.

No objection was ever made to the valuation of ten divisions. In eight others objections were made to the value of twenty townlands. Some were thought to be valued too high, some too low. Even some of these objections were deemed by other Committees to be groundless.

Lord Roden's agent now complains that the valuation is too high, and that Lord Roden's share of the rate, now that the ground is valued near the rent, will be as great as when the value was low.

The objections to a low valuation were chiefly made by landlords, who consider that such a valuation would place the burden of the rate upon them.

He went upon every tenement and brought Mr. Griffith's valuation with him; he used it to assist his judgment, but in many instances differed from it. He placed, in every instance, that value which he thought a solvent tenant would pay, and continue to pay, for the ground. He considers that the generality of occupiers in this Union are in a state of bankruptcy. He considers, that he could value ground at a rack-rent, but he considers the occupiers would never be satisfied with such a valuation, even though it were equitable.

In valuing land with a house he considered how much the value of the land was increased by having a house on it. He valued gentlemen's seats and demesnes at what a farmer

Board mean to adopt Griffith's valuation with increase.

would give for them, and this he did by Mr. Gulson's directions, who told him never to take into consideration what the house cost. Gentlemen's houses he valued from 20% to 30%, that is, the house increased the value of the adjoining land so much. Plantations he valued according to the soil they stood on.

Carlingford is the only town he had to value; the houses there are small; he valued them from 15% to 18%. The lands about the town are valued higher than the lands of the same quality at a greater distance. There are few bathing lodges; they are very insignificant.

Mr. CONNICH, Clerk of the Union, *examined.*

Was appointed in August, 1839. Shortly after the Committee were selected from the Board. It consisted of 15 members, but the guardians generally attended and took part in the discussion. The valuator submitted his valuation to the Committee, when he had the valuation of the Union complete.

The Committee suggested many alterations in the valuation. He is not aware when the valuator adopted those suggestions. The objections were generally made to the unequal valuation of the lands.

The Chairman of the Committee read from the field-books the valuation made by the valuator. Another member of the Committee compared the valuation with Mr. Griffith's valuation, and, if the valuations differed, the valuator was requested to reconsider his valuation. He does not recollect the nature of the discussion on those occasions.

Mr. Griffith's valuation was considered uniform, that is, ascertained with accuracy the relative qualities of land. Does not recollect whether Mr. Griffith's valuation was considered a low valuation or not.

Does not recollect that it was ever considered by the Board whether a high scale of valuation would affect the proportion of rate between landlord and tenant.

When the value of any tenement was under discussion, no difference of opinion seemed to exist between the members of the Committee. It was never considered by the Board that the value placed on lands for the purpose of the Poor Law would in any manner affect the franchise.

Different valutors were appointed for the town and rural districts. There had been a valuation of the town for corporate purposes, and this valuation is much higher than the Poor Law valuation.

Mr. BARRETT, elected Guardian for the North Ward of Dundalk, *examined.*

Was one of the persons appointed on the Committee of Valuation of the rural districts of the Union. The Committee was not formed until the valuation was completed by the valuator.

Immediately after the formation of the Committee weekly meetings were held for the purpose of investigating the valuation.

The valuation of one electoral division was considered at each meeting.

The Committee, at their first meeting, disapproved of the valuation of the division which was under their consideration.

The Committee considered it an unequal valuation, as some houses were valued too high and others too low.

Mr. Barrett was present at a meeting of the Board, when the valuator received instructions to take Mr. Griffith's valuation as the basis on which he should proceed in making his valuation for the purposes of the Poor Law. The valuator agreed to follow those instructions. However, when his valuation was compared by the Committee with that of Mr. Griffith's, it was found that some farms were valued by their valuator 60 per cent. higher than under Mr. Griffith's valuation. And other farms were valued 25 per cent. lower than in Mr. Griffith's valuation. The Committee never observed that the discrepancy between the valuations was confined to the valuation of certain description of ground. In some cases the valuation of prime land made by the Poor Law valuator was 60 per cent. over Mr. Griffith's valuation. In other cases similar descriptions of ground were valued by their valuator 25 per cent. lower than in Mr. Griffith's valuation. Similar discrepancies existed between the valuations when they related to bad land—in fact, land of every quality.

The Committee frequently called on the valuator to assign reasons for his great deviation from Mr. Griffith's valuation. He was unable to satisfy the Committee of the correctness of his valuation; and expressed himself willing to make any alterations that the Committee would suggest. The Committee accordingly made many alterations in the valuation of some divisions, but at length came to the conclusion that, as the valuation was so incorrect, it would be easier and better to throw it aside, and adopt some other measures for valuing the Union, than attempt to correct the valuation made by their valuator. On the 29th of March, 1841, the Committee made their report to the Board, disapproving of the valuation.

The valuation was then discussed, and the Board have unanimously resolved to throw it aside. Mr. Griffith's valuation has been critically examined, and it is found to be uniform.

Very valuable turf-bogs, however, he values much too low; they bring in this country higher rents than any other sort of land. 8% per acre is frequently paid for the ground covered with the turf cut from neighbouring turf-banks; with this exception Mr. Griffith's valuation is approved of, and the Board purpose to increase it by 15 or 25 per cent., and this valuation so increased, will be the valuation of the Union for the purposes of the Poor Law. This valuation will be what a good and solvent tenant would pay for land. It is much below rack-rents.

It is also lower than the rents usually obtained for town parks. It would pretty well agree with the rents obtained from tenants in the country.

APPENDIX.
Dundalk.

At the next meeting of the Board, which will be held on Monday, the 12th of April next, the exact per centage will be fixed on; and when the books are made out according to this scale they will remain open for inspection.

In valuing the Union the rents paid are not at all considered. So that, although small farms let higher than large ones, this will not affect the contemplated valuation. Each farm will be valued according to the nature of the soil, and its locality, without reference to the manner it is let.

He considers that a man, with occasional assistance in harvest, could, with the aid of his "Rack-Rent," family and a servant-man, cultivate about 20 acres. If the produce of a farm were divided meaning of.

The valuation the Board intend to make will be about eight or ten per cent. less than a third of the produce.

The occupiers of small farms make out their rent by working for hire, and by jobbing in cattle.

The produce of the land would hardly support their family. A great portion of the Union is held by persons holding from one acre to ten.

In the neighbourhood of the town of Dundalk, town-parks let at 5*l.* per acre; there is no Town-parks. other town in the Union.

There are a few villages along the sea-coast, where persons resort in summer for the purpose of bathing. The lodges are of various descriptions. The best description of house contains two parlours and three or four bedrooms, with a kitchen, stable, &c. A house of this description would let for from 3*l.* to 4*l.* per month; and this rent is only obtained for about three or four months in summer. No houses are built lately for the purpose of accommodating bathers.

The valuation of the town of Dundalk has been approved of by the Board, and he considers it to be up to the letting value: it has not as yet, however, been open to inspection. Town valuation approved of.

The land in the immediate vicinity of the town is very much subdivided. This was formerly done for the purpose of making 40*s.* voters.

Thinks that no valuation would be a fair or satisfactory one, unless it allows an industrious man who holds from 10 to 20 acres to retain from the produce of his farm as much above his rent as would enable him to live comfortably, eat meat three times a-week, and lay by something as a provision for his younger children. This is the sort of valuation the Board wish to make of the lands of this Union. When one farm is considered in this way, it will be easy to set a proportionable value on all the rest of the land in the Union. His idea of a fair standard of value.

The standard which should be adopted in valuing the lands in the Union was never considered with reference to the effect it might have at the registry.

A valuation of the town of Dundalk has been made for corporate purposes. According to this valuation the right of voting for Commissioners is ascertained.

The Board never considered that their valuation would in any manner affect any class of voters.

NAAS UNION.

APPENDIX.

Naas.*Extracts from Minute-book of Board of Guardians.*Extracts from
Minute Book.

April 5, 1839, First Meeting of the Board.

Present 4 ex-officio and 25 elected guardians.

The subject of preparing a rate-book and valuing the rateable property within the Union having been much discussed, it was resolved, That the further consideration of it be postponed till the next meeting of the Board.

April 26, 1839.

Present 6 ex-officio and 25 elected guardians.

Resolved unanimously,—That it be recommended to the commissioners to retain in their own hands the power of appointing valuers to complete the valuation of the rateable property within the Union; and that it is the opinion of this Board that the guardians should have no share in the valuation of the property.

Application to
Commissioners to
appoint Valuers.

May 9, 1839.

Present 1 ex-officio and 19 elected guardians.

Mr. Dunne was requested by Mr. Earle, the assistant-commissioner, to consider the best method of ascertaining the quantity of land held by each rate-payer in the Union. It was then suggested that a meeting be called by the guardian or guardians in each electoral division, in order the better to ascertain the quantity of land held by each occupier in that division.

Public meetings
proposed, to ascer-
tain quantity of
land.

June 3, 1839.

Present 1 ex-officio and 15 elected guardians.

Mr. Dunne, elected guardian, read suggestions to facilitate the valuation of the rateable property in the Union. Mr. Phelan also read suggestions relative to the valuation of the property. Mr. Phelan recommended that the Board should procure from the returning officer a return of the quantity of land held by each occupier in the Union, as the same had been furnished to him by the baronial collectors of county cess; a long discussion was then entered into between the guardians as to the best method of ascertaining the quantity of land and rateable property subject to the poor-rate in each holding in the Union.

Resolved,—That the elected guardian or guardians in each electoral division, along with the neighbouring ex-officio guardians, form a committee for the purpose of ascertaining, by calling to their assistance the aid of the landlords and cess-payers as they may deem it necessary to obtain information from them, the number of acres and all other rateable property held by each individual in each electoral division, and that they report to the next Board such progress as they shall have made therein.

Local Committees
appointed.

Ordered,—That the clerk do send a list of the townlands in each electoral division to the guardians of such division, with the quantity of land in each townland, as returned by the Ordnance survey.

Lists of townlands
sent to Guardians.

July 2, 1839.

Present 2 ex-officio and 22 elected guardians.

Several of the guardians reported progress in the ascertaining the rateable property in their respective electoral divisions, and handed in such returns as they were able to procure of the quantity of land held by each occupier, these returns to be subject to future revision if necessary.

The guardians engaged in ascertaining the acreage of their respective electoral divisions having reported progress, and stated that they found several discrepancies existing between the acreage stated in the Ordnance survey and that returned to them by the landlords.

Resolved,—That in all such cases landlords be apprized that unless the discrepancy be accounted for to the guardians, the estimate of the Ordnance survey will probably be adopted in the valuation and rating of the property.

Ordnance survey.

Resolved,—That the guardians do continue their inquiries respecting the acreage of their several electoral divisions, and that they produce in writing the result of their investigations at the next meeting of the Board.

Notice of motion was given to rescind the resolution of the Board of Guardians of the 26th April, to the effect that the commissioners and not the guardians do appoint the valuers of the rateable property in the Union.

July 23, 1839.

Present 4 ex-officio and 19 elected guardians.

Resolved,—That the resolution of the guardians of the 26th April last, which gave to the commissioners and not to the guardians the power of appointing the valuers of the Union, be rescinded, and that the power of appointing valuers be retained by the guardians, subject to the approval of the Poor Law Commissioners.

Resolution referring
appointment of
Valuers to the
Commissioners
rescinded.

Resolved,—That our clerk be instructed to advertise for proposals from persons proposing as candidates for the valuation of rateable property within the Union, such proposals to state the rate by the acre or by the bulk.

Advertisement for
Valuers.

APPENDIX.

Naas.

Proposals by Valuators.

August 20, 1839.

Present 3 ex-officio and 14 elected guardians.

Several proposals were read from candidates offering as valuers; one at 5s. per 100 plantation acres, and 1s. for every house. Another 3s. per 100 plantation acres, and 8d. per house in towns. A third 1l. per 100 plantation acres, and 3s. for every house. Another for houses and tenements at 6d. within the precincts of the town, farms at 10 guineas per thousand acres, town parks and demesnes at 1½ per cent. on the gross, with a mearnsman to show the boundaries, or one guinea per day during the whole of the valuation. Another at 3s. per cent. on the gross valuation, and the town at the rate of 6d. per house and concerns. The last was from Mr. Edward Vaughan, at 40s. per thousand acres, and 4d. per house.

Resolved,—That the clerk do write to Mr. E. Vaughan, requesting that he will attend the Board of Guardians at their next meeting, to confer with him on his proposal as valuator.

September 3, 1839.

Present 5 ex-officio and 21 elected guardians.

Two other proposals were read; one of them to value the Union, or any part of it, at the rate of 4s. for every 100 acres, and 1s. per house.

The second proposal was to value the whole Union for 500l.

Valuator appointed.

Mr. E. Vaughan was called in, and conferred with on the terms of his proposal. After a lengthened conference, Mr. Vaughan was requested to withdraw, and it was resolved unanimously that the guardians of this Union do accept Mr. Vaughan's proposal to value the rateable property of the Union at the rate of 2l. 2s. 6d. for every 1000 statute acres, including every description of rateable property within the Union; Mr. Vaughan to be supplied with two copies of the maps of the Ordnance survey of the land comprised within the Union, and the valuation to be completed in nine months from this date.

Nine months allowed for valuation.

September 23, 1839.

Present 4 ex-officio and 12 elected guardians.

Farm-houses not to be valued separately.

Resolved,—That the valuator be directed in the valuation of acreable property to include farm-houses in the valuation of the land, and not to make a separate valuation of such houses distinct from the farms to which they belong.

April 1, 1840.

Present 7 ex-officio and 27 elected guardians.

Ordered,—That the clerk of this Union do write to the Poor Law Commissioners, requesting that they will permit the guardians to appoint such persons as they think fit to collect the poor-rates. The valuator, Mr. Vaughan, was conferred with on the progress of the valuation.

April 29, 1840.

Present 3 ex-officio and 11 elected guardians.

Mr. Vaughan was called in, and conferred with on the nature and progress of the valuation.

He promised to lay before the guardians on or about the 24th June, such progress as he may then have made in the valuation of the rateable property of the Union.

24th June, 1840.

Present 3 ex-officio and 22 elected guardians.

Valuator receives instructions from Poor Law Commissioner.

Mr. Vaughan, the valuator, attended the meeting of the Board, and Mr. Muggeridge explained the duties of the valuator, and the process to be gone through in preparing and revising the valuation of the rateable property of the Union.

The Board conferred generally with the valuator on the progress and order of the method of making the valuation as regards the electoral divisions of the Union.

Revision of the valuation.

Resolved,—That for the purpose of conferring with the valuator on the valuation of the Union, and for revising and examining the same, the Union be divided into the four following districts, namely,

No. 1 to consist of the following Electoral Divisions,

Kill,	} Place of meeting, Naas.
Bodenstown,	
Naas,	
Killashee,	
Clane, Carragh.	

No. 2.

Carnalway,	} Place of meeting, Kilcullen.
Gilltown.	
Uske,	
Ballysax,	
Kilcullen.	

No. 3.

Timahoe,	} Place of meeting, Newbridge
Downings,	
Kilmeague,	
Rathernon,	
Old Connell,	
Moorfield,	
Kildare, Newbridge.	

No. 4.

Rathmore, Ballymore Eustace, Boystown, Blessington.	}	Place of meeting, Blessington.
--	---	-----------------------------------

And that the elected and ex-officio guardians resident in each division be a committee for the district in which such electoral divisions are placed. Valuation Committees.

Also, that the chairman, vice-chairman, and deputy vice-chairman, be ex-officio members of each committee, such committee to report the result of their meetings to the next subsequent meeting of the guardians.

Mr. Vaughan, the valuator, having stated that he had completed the valuation of No. 1 and No. 4 districts, it was resolved, That he be required to furnish the same to the guardians at their next meeting.

July 22, 1840.

Present 2 ex-officio and 13 elected guardians.

Mr. Vaughan, the valuator, attended and reported, that owing to the delay of the book-binder he was not prepared to present the valuation of No. 1 and No. 4 districts, but that he would be able to do so within a few days; whereupon it was resolved, That an extraordinary meeting of the guardians should be held on Thursday, the 30th July, inst., at 10 o'clock, at the usual place of meeting, to receive from the valuator his valuation of Nos. 1 and 4 districts.

That at the said meeting the days be fixed on which the Valuation Committees of said districts shall meet for the revision of the valuation, and that the valuator be instructed to attend the meetings of such committees of revision.

Resolved,—That the valuator be required to deliver in his valuation of Nos. 2 and 3 districts at the next ordinary meeting of the Board.

Extraordinary Meeting, July 30, 1840.

Present 3 ex-officio and 8 elected guardians.

The valuator handed in the valuation of the electoral divisions comprised in the districts Nos. 1 and 4, except the electoral division of Carragh, which he promises to leave with the clerk this afternoon.

Resolved,—That Monday the 10th August, be appointed for the meeting of the Valuation Committee of the district No. 1, at the Court-House, Naas.

Resolved,—That the Valuation Committee of district No. 4 do meet at Blessington on Monday, the 17th of August, and continue from day to day until the revision be complete.

Monday, August 10, 1840, Meeting of the Valuation Committee of the Guardians for the Naas district, held at Naas. Meetings of the Valuation Committees.

Present 1 ex-officio and 6 elected guardians.

The Bodenstown electoral division was investigated on Monday and Tuesday, the 10th and 11th of August.

On Wednesday the 12th of August, the electoral division of Killashee was taken into consideration, and proceeded with for some time, when it was postponed, and the committee began the revision of the valuation of Clane.

13th August. The committee resumed the revision of Killashee; and for the more satisfactory information of the committee, they consulted the following landholders more especially as to the value of the denominations of Swordelstown, Flemingtown, Mullycash, &c., Charles Bertie, John Murphy, and Thomas Gallagher.

The further consideration of this electoral division was again postponed until they should have the assistance and opinion of James M. Lynch, one of the elected guardians of Ballymore Eustace, who was well acquainted with the townland of Swordelstown.

The revision of Clane electoral division was resumed and proceeded with.

On Friday, August 14th, the revision of Clane electoral division was finished, with the exception of the denomination of Ballinagappa, which was left unfinished until several holdings were more distinctly written in the valuation, they being at present too crowded.

The committee then began the revision of Kill electoral division, commencing with the townland of Boston, and adjourned *sine die*.

Monday, August 17, 1840, Meeting of the Valuation Committee of the Blessington district held at Blessington. Valuation Committee of Blessington district.

Present 2 ex-officio and 4 elected guardians.

The committee were assisted in their revision by the Marquis of Downshire, the Rev. Mr. Moore, and others.

The committee having proceeded through several townlands, and postponed the valuation of several denominations, adjourned until the next day.

August 18, Adjourned Meeting.

The electoral division of Blessington was finished, and the committee proceeded with the revision of Boystown; the revision of the townland of Ballinahoun was postponed for future consideration, and the committee having finished the townland of Tullfaris adjourned until Thursday.

August 19, 1840, Meeting of the Board.

Present 6 ex-officio and 19 elected guardians.

The clerk read the Minutes of the Valuation Committees of Naas and Blessington, so far as they had proceeded, which were confirmed, and it was resolved that the Blessington com-

APPENDIX.

Naas.

mittee should meet again on to-morrow, Thursday, the 20th instant, at the usual time and place.

Resolved,—That the Blessington committee do continue, if necessary, until Wednesday, the 26th instant, inclusive; that the Naas committee do resume their revision on Thursday, the 27th instant; that the Newbridge committee do meet on Thursday, the 10th September next; and the Kilcullen committee on Monday, the 28th September.

Resolved,—That the Board at its next ordinary meeting will proceed to the consideration of the number of collectors of poor-rates whom in their judgment it may be desirable to appoint.

Valuation Committee of Blessington district.

August 20, Meeting of the Valuation Committee at Blessington.

Present 2 ex-officio and 1 elected guardians.

The committee finished the electoral division of Boystown, with the exception of Russborough, and having fixed the acreage rate upon some denominations wherein the contents were not finally ascertained, the committee began the revision of the electoral division of Rathmore.

August 21, Adjourned Meeting of Valuation Committee at same place.

Present 2 ex-officio and 2 elected guardians.

The electoral division of Boystown was finished; the electoral division of Rathmore was revised, and the committee commenced the revision of Ballymore Eustace.

August 22, Meeting of same Committee at same place.

Present 2 ex-officio and 3 elected guardians.

The committee proceeded with the electoral division of Ballymore Eustace; the holdings of several persons were postponed, as their contents were inaccurate in the valuation book.

The committee finished the revision of the electoral division of Ballymore Eustace, and it was resolved, That the committee should meet again on the following Monday to reconsider the portions that had been postponed.

Valuation Committee of Naas district.

August 27, 1840, Meeting of Naas Valuation Committee at Naas.

Present 1 ex-officio and 5 elected guardians.

The committee revised the electoral division of Carragh.

August 28, 1840, Adjourned Meeting at same place.

Present 5 elected guardians.

The committee proceeded to revise the electoral division of Naas.

The townland of Broadfield was postponed, owing to the contents being inaccurate.

August 29, 1840, Adjourned Meeting at same place.

Present 1 ex-officio and 4 elected guardians.

The committee resumed their revision, beginning with the denomination of Kingsfurze; and having revised the town of Naas as far as Thomas Atkinson's house, adjourned until Monday, August 31st.

August 31, 1840, Adjourned Meeting at same place.

Present 3 elected guardians.

The committee resumed the revision of the electoral division of Killashee, beginning with the denomination of Swordelstown North.

The committee were assisted in their revision by James M. Lynch, Esq., elected guardian of Ballymore Eustace, who is well acquainted with the lands in this part of the electoral division of Killashee.

The committee adjourned until the 2nd September.

Adjourned Meeting, September 2, 1840.

Present 4 elected guardians.

The committee took up the revision of the denomination of Coghlanstown, postponed on last Monday; and the denomination in the electoral division of Killashee lying near the residence of Mr. James Lawler, elected guardian of Carnalway, the committee were assisted in their revision by that gentleman, who attended for that purpose.

The revision of part of the electoral division of Killashee was again postponed, and the revision of the town of Naas returned to; the committee adjourned at 4 o'clock until Thursday, September 3.

September 3, 1840, Adjourned Meeting at same place.

Present, 3 elected guardians.

The committee resumed the revision of the town of Naas, which they continued until the arrival of Mr. Beaumont, when they took up the revision of the remaining portion of the electoral division of Kill.

The committee adjourned at 4 o'clock until the next day.

September 4, 1840, Adjourned Meeting at same place.

Present 2 elected guardians.

The committee continued the revision of the electoral division of Kill which was finished at 2 o'clock, when the revision of the town of Naas was again resumed, and continued.

The committee adjourned till the next day.

September 5, 1840, Adjourned Meeting at same place.

Present 2 elected guardians.

The chairman, availing himself of the assistance of Mr. Fitzpatrick, proceeded to revise the valuation of Flemingtown South, postponed on last Wednesday.

John Brien, one of the occupiers in this denomination, was called in and examined on the subject of the valuation, and when his opinion was taken he was ordered to withdraw.

This denomination was finished about 2 o'clock, and Mr. Mansfield having gone through the electoral division of Naas, the duties of this committee were for the present discharged, with the exception of a portion of the electoral division of Clane; and Mr. Mansfield having declared his opinion that this committee should sit again (on a day to be named by the Board of Guardians at a general meeting) in order to consider any matter they may think necessary; the committee adjourned until such day be named by the Board.

Meeting of the Valuation Committee of the Newbridge district, held in Newbridge, on the 10th September, 1840.

Valuation Committee of Newbridge district.

Present 8 elected guardians.

The guardians inspected the valuation books, each the book of his electoral division, and took a general view of the acreage, contents, and valuation.

Resolved,—That as a full meeting of the members of this committee on any day, cannot with probability be expected at this peculiarly busy season, this Committee do adjourn until a day be named at the next ordinary meeting of the guardians on Wednesday next.

September 16, 1840, Meeting of the Board.

Present 1 ex-officio and 14 elected guardians.

Meeting of the Board.

The Proceedings of the Newbridge Committee read and approved of.

The clerk read the circular of the Poor Law Commissioners inquiring into the progress of the valuation, and his answers to these queries.

Resolved,—That the next meeting of the Newbridge Committee be held in Robertstown on Monday next the 21st instant, and that the committee do meet again in New Bridge on Thursday next, the 14th October, at 12 o'clock.

Meeting of the Newbridge Valuation Committee, held in Robertstown on Monday, September 21, 1840.

Valuation Committee of Newbridge district.

Present 6 elected guardians.

The committee commenced with the electoral division of Timahoe, which was finished, and the committee adjourned until the next day.

September 22, 1840, Adjourned Meeting at same place.

Present 7 elected guardians.

The electoral division of Rathernon was commenced and continued for some time, when it was laid aside, and the electoral division of Kilmeague taken up and finished, and the division of Rathernon then resumed.

September 23, 1840, Adjourned Meeting at same place.

Present 5 elected guardians.

The committee began the electoral division of Downings, which occupied their attention the entire day.

Meeting of the same Committee held at Newbridge, September 24, 1840.

Present 4 elected guardians.

The committee began with the revision of Old Connell electoral division, denominated Latin's Bog. The electoral division of Old Connell was finished, and the electoral division of Moorfield commenced.

The committee proceeded with the revision of Moorfield until 5 o'clock, when they adjourned until the next day.

September 25, 1840, Adjourned Meeting of same committee at Newbridge.

Present 5 elected guardians.

The revision of the valuation of the electoral division of Moorfield was resumed and finished, and the committee began the revision of the electoral division of Kildare, which after some time was laid aside, in consequence of the entries in the valuation book being inaccurate, and the committee took up the revision of the electoral division of Newbridge.

September 26, 1840, Adjourned Meeting at same place.

Present 5 elected guardians.

The committee proceeded with the electoral division of Newbridge, which was finished, and the electoral division of Kildare resumed, which was proceeded with, when the committee adjourned until Saturday the 3d of October next.

Monday September 28, 1840, Meeting of the Valuation Committee of the Kilcullen district held at Kilcullen.

Valuation Committee of Kilcullen district.

Present 2 ex-officio and 5 elected guardians.

The committee commenced the revision of the valuation of the houses in the town of Kilcullen electoral division.

September 29, 1840, Adjourned Meeting at same place.

Present 2 ex-officio and 3 elected guardians.

The committee commenced the revision of the denomination of Carter's Bog, electoral division of Kilcullen.

The electoral division of Kilcullen was finished, and the electoral division of Carnalway commenced and finished, and the electoral division of Usk commenced.

September 30, 1840, Adjourned Meeting at same place.

Present 2 ex-officio and 4 elected guardians.

The committee proceeded with the electoral division of Usk, which was finished, and the electoral division of Ballysax commenced.

The revision of Ballysax was finished, and the electoral division of Gilttown commenced.

APPENDIX.

Naas.

Valuation Committee of Newbridge district.

October 1, 1840, Adjourned Meeting at same place.

Present 2 ex-officio guardians.

The revision of the electoral division of Gilltown was proceeded with, and being finished, the committee, having discharged the duty assigned to them, dissolved.

October 3, 1840, Adjourned Meeting of the Valuation Committee of the Newbridge district.

Present 4 elected guardians.

The committee proceeded with the electoral division of Kildare left unfinished on last day of meeting.

October 6, 1840, Adjourned Meeting at same place.

Present 3 elected guardians.

The committee resumed the revisal of the electoral division of Kildare, and not having the attendance of the valuator nor any of his assistants, the maps, nor field-books, the committee were under the necessity of passing over several holdings, with the locality of which, according to the names of the occupiers as given in the Valuation Book, they were unacquainted, and having marked such holdings with the word "unknown," they finished the revision of this division, which concluded the duties of this committee, when they dissolved.

Meeting of the Board.

October 14, 1840, Meeting of the Board.

Present 2 ex-officio and 21 elected guardians.

The Assistant-Commissioner and the guardians had a long conference on the subject of the valuation, and the revision thereof by the several local committees.

The several revising committees of the valuation having gone through the same, and recorded in pencil the alterations they recommended to be made, and in most cases such alterations having been assented to by the valuator, a committee was appointed, consisting of 4 ex-officio and 7 elected guardians, to meet the valuator for the purpose of inserting the amendments agreed upon in the rate-books.

Meeting of Committee.

October 28, 1840, Meeting of the committee appointed at the last meeting of the Board.

Present 3 ex-officio and 7 elected guardians.

Mr. Vaughan, the valuator, and his assistant Mr. Fitzpatrick, were in attendance, and the electoral division of Kill—being the first in the division of the Union—was first commenced with.

Resolved unanimously,—That the original valuation, where altered, the alterations of the committees of revision, and the valuation ultimately proposed by the valuator be copied by the valuator, and compared by the clerk of the Union, as a document for the information of the General Board of guardians, and that the pencil marks remain in the books for the inspection of the next ordinary meeting of the guardians.

Resolved unanimously,—That in all cases where the alterations recommended by the several committees have been assented to by the valuator, the same shall be inserted in the proper columns of the rate-books, and that the other cases of alteration be referred to the next general meeting of the board.

Meeting of the Board.

November 11, 1840, Meeting of the Board.

Present 7 ex-officio and 18 elected guardians.

The clerk read the minutes of the general revision committee of the 28th instant, which were confirmed by the present meeting.

The valuator, Mr. Vaughan, attended.

The Assistant-Commissioner, Mr. Muggeridge, the guardians and the valuator took a general inspection of the valuation in the rate books, the original valuation, the valuation as revised by the several local committees, and the valuation ultimately proposed by the valuator, and on this subject they held a long conference.

Resolved,—That the valuation of this Union as corrected by the several committees of the guardians appointed for that purpose, be now adopted as the valuation of the Union.

An amendment was proposed, that the valuation ultimately proposed by the valuator be adopted. The amendment was not seconded.

Valuation, as altered by Committee, adopted.

The original motion was put from the chair and passed by a large majority, two only voted for the amendment.

Resolved,—That the clerk do procure a new set of rate-books, with the necessary number of pages in each, and re-copy the valuation of the Union, placing in the column of net value the revised valuation of the guardians, as the same has passed in committee.

November 11, 1840, Meeting of the Board.

Present 7 ex-officio and 18 elected guardians.

A draft order for the appointment of collectors of poor rates having been read by Mr. Muggeridge, the Assistant Poor Law Commissioner, it was proposed that public notice be given of the intention of the Board to appoint nine collectors of poor rates, at a remuneration of 4½d. in the pound on the amount of collection during the year, at the next meeting of the guardians.

December 9, 1840, Meeting of the Board.

Present 7 ex-officio and 25 elected guardians.

Valuation laid before the public.

Resolved,—That the valuation, as adopted by the Board of Guardians at the last meeting, do lie open for public inspection for 21 days.

January 6, 1841, Meeting of the Board.

Present 5 ex-officio and 23 elected guardians.

Objections to valuation.

Resolved unanimously,—That the clerk be instructed to classify into electoral divisions the

several objections lodged to the valuation, and to number the same in corresponding numbers to those in the rate-books;—further, that the Board of Guardians do meet from day to day in the board-room, to consider and decide upon the validity of the objections, and that the valuator and his assistants be requested to attend such meetings for final revision, the order of the inquiry to be numerical according to the valuation books, and that the divisions be revised in the following order:—

No. 1.—On Monday, January 18, 1841.

Kill.	Killashee.
Bodenstown.	Clane.
Naas.	Carragh.

No. 2.—On Tuesday, January 19.

Carnalway.	Ballysax.
Gilltown.	Kilcullen.
Usk.	

No. 3.—On Wednesday, January 20.

Timahoe.	Old Connell.
Downings.	Moorfield.
Kilmeague.	Kildare.
Rathernon.	Newbridge.

No. 4.—On Thursday, January 21.

Rathmore.	Boystown.
Ballymore Eustace.	Blessington.

And that the clerk be ordered to give public notice by advertisement throughout the Union of the days of attendance for each district.

January 18, 1841, Meeting of the Board.

Present 10 elected guardians.

The guardians took into consideration the objections to the valuation, commencing with the electoral division of Kill. Hearing of objections.

The chairman endorsed on each written objection the manner in which it was disposed of by the Board, and handed it to Mr. Vaughan, the valuator, who attended the meeting of the guardians. The objections in the electoral divisions of Kill and Bodenstown were disposed of, with the exception of a few objections in Bodenstown, which were postponed until Friday next.

January 19, 1841, Meeting of the Board.

Present 1 ex-officio and 8 elected guardians.

Electoral divisions for this day—Carnalway, Usk, Gilltown, Ballysax, and Kilcullen.

The Board commenced with the objections in the electoral division of Carnalway; several persons were called, but were not in attendance; their cases were postponed, and such as were in attendance in the evening were heard and their cases disposed of: the further hearing of the cases in this district was postponed.

January 20, 1841, Meeting of the Board.

Present 1 ex-officio and 15 elected guardians.

The Board took into consideration the objections in the electoral divisions appointed for this day, and with the assistance of the valuator, Mr. Vaughan, who attended, disposed of them in numerical order.

The division of Rathernon was finished at 5 o'clock, and the divisions which were assigned for this day and not disposed of were adjourned till the 25th.

January 21, 1841, Meeting of the Board.

Present 2 ex-officio and 6 elected guardians.

The Board took into consideration the objections in the electoral divisions assigned for this day, commencing with the electoral division of Rathmore, and having proceeded with the examination of the objections until 5 o'clock, the remaining electoral divisions which were assigned for this day were postponed until the 26th.

January 22, 1841, Meeting of the Board.

Present 9 elected guardians.

The valuator, Mr. Vaughan, attended.

The Board resumed the consideration of the objections to the valuation which remained over since the 18th, commencing with the electoral division of Naas.

January 23, 1841, Meeting of the Board.

Present 6 elected guardians.

The Board commenced with the examination of the persons objecting to the rate in the electoral division of Killashee.

After finishing Killashee, the objections remaining of the electoral divisions of Carnalway, being those of persons who were called and did not appear on the 19th, were gone into.

The electoral division of Ballysax was proceeded with and finished.

The electoral division of Kilcullen was proceeded with and finished.

January 25, 1841, Meeting of the Board.

Present 1 ex-officio and 9 elected guardians.

The Board commenced with the consideration of the objections postponed since the 20th, beginning with the electoral division of Old Connell.

APPENDIX.

Naas.

Meetings of Board
to hear objections.

Resolved,—That the 28th be appointed for such persons as have been or may be called and shall not have answered to their names.

Resolved,—That the objections to Newbridge be postponed until the 27th instant.

January 26, 1841, Meeting of the Board.

Present 1 ex-officio and 5 elected guardians.

The Board commenced with the examination of persons objecting in the electoral divisions of Boystown and Blessinton, and having finished Boystown and part of Blessinton, the remaining objections in Blessinton were adjourned until February 1st.

January 27, 1841, Meeting of the Board.

Present 4 elected guardians.

The Board commenced with the electoral division of Clane, which entire electoral division and that of Carragh remained over since the 22nd, and having finished Clane, it was resolved that Carragh and Newbridge be postponed until the 30th.

January 28, 1840, Meeting of the Board.

Present 6 elected guardians.

The Board took into consideration the objections of the persons who had been called but did not appear.

January 30, 1841, Meeting of the Board.

Present 5 elected guardians.

The Board began by calling the objectors who had been called on the previous days and had not appeared; they were chiefly in the electoral division of Killashee.

On the arrival of Mr. Mansfield, the electoral division of Carragh was called and proceeded with; the Board adjourned until the 1st of February.

February 1, 1841, Meeting of the Board.

Present 1 ex-officio and 3 elected guardians.

The Board took into consideration the objections from such rate-payers in the electoral division of Blessington as remained over since the 25th of January.

February 3, 1841, Meeting of the Board.

Present 1 ex-officio and 12 elected guardians.

Objections of
Guardians reserved
for general meeting.

The Board took into consideration the objections to the rate of Mr. Owen Conlan, one of the guardians present, in pursuance to an understanding of the guardians at their daily sittings, that the objections of the guardians should be tried at a general meeting of the Board.

February 3, 1841, Meeting of the Board.

Present 1 ex-officio and 12 elected guardians.

Resolved,—That the Board do meet on the 8th, to consider the objections not yet gone into.

Monday, February 8, 1841, Meeting of the Board.

The Board went into consideration of the objections.

Resolved,—That the rate-books and objections be now delivered to Mr. Vaughan, the valuator, and that he be requested to have the valuation complete and fairly re-written, to lay before the guardians at the next ordinary meeting, on the 3d of March.

Resolved,—That the clerk do write to John Hornidge, Esq., an ex-officio guardian, stating that the Board called over all the objections lodged, and that they made no alteration in the objections of those objectors who did not attend.

March 3, 1841, Meeting of the Board.

Present 3 ex-officio and 19 elected guardians.

Poor Law Commis-
sioners apply for
copy of valuation.

Sixth minute:—The clerk read the letter from the Poor Law Commissioners, of the 27th February, 1841, stating their anxiety to receive a copy of the valuation of this Union, and desiring to be informed when they may expect to receive it.

It was ordered that the clerk be instructed to inform the Commissioners that, in the absence of the valuator, Mr. Vaughan, whose attendance was expected, the guardians regret they cannot give a decisive answer.

It having been represented to the Board that a number of persons, who had lodged objections to the valuation, were unable to attend the meeting of this Board, on the 8th of February, in consequence of the roads being rendered impassable by the depth of snow,

It was resolved, that Monday next, the 8th instant, be appointed to take such objections as were lodged within the 21 days appointed for the public inspection of the rate-books into consideration.

After writing the sixth minute, Mr. Vaughan, the valuator, arrived. The letter of the Commissioners was submitted to him. He said he would have the valuation complete by the day of next ordinary meeting, on the 31st of this month.

The Board took into consideration the objections of John Hornidge, ex-officio guardian, to the valuation of his property in the electoral division of Boystown. Whilst this matter was under discussion, Mr. Hornidge withdrew.

March 8, 1841, Meeting of the Board.

Present 5 elected guardians.

Several persons attended on their objections.

The objection of Mr. Eager was taken into consideration, as being specifically stated with respect to quantity and value.

The objection of John Mealy, guardian, was also disposed of.

John Woodbourne appears for Mrs. Edge. The objection was disposed of.

The objection of Abraham Tyrrell was disposed of.

Benjamin White's objection was considered. No alteration.

Mr. Hudson's objection referred to the General Board. Ordered, that the clerk do send to the valuator the objections which were written on by the chairman as disposed of at this meeting.

March 31, 1841, Meeting of the Board.

Mr. Vaughan, the valuator, attended and delivered in the valuation of the Union, complete; Valuation adopted. whereupon it was resolved that such valuation be received and adopted.

Resolved,—That a rate of 10*d.* in the pound be declared, and that the collectors be directed to attend and prepare their collecting books forthwith, and to perfect their several sureties.

It was moved as an amendment, that the rate be declared at 8*d.* in the pound.

The amendment was withdrawn, and the original motion of 10*d.* in the pound carried. Rate declared.

Extracts from Letter-Book.

SIR,

Poor Law Commissioners' Office,
Dublin, May 11, 1839.

Letter from Poor
Law Commis-
sioners.

THE Poor Law Commissioners acknowledge the receipt of a copy of a resolution adopted at a meeting of the Board of Guardians of the Naas Union, on the 26th ultimo, relative to the valuation of property rateable for the relief of the poor.

The Poor Law Commissioners have given the fullest consideration to the recommendation of the guardians, and are quite sensible of the motives which have induced them to express a wish to be relieved from the responsibility of appointing the valuers; still they conceive it would be more in accordance with the spirit of the Act that the guardians should select and appoint competent and disinterested persons to value the rateable property within the Union, than that the Commissioners should take the matter entirely upon themselves. They will not, however, at present come to any final determination on the subject, because they think it probable that the guardians will readily undertake the arrangements which will precede the valuation; and that, when these are complete, they will not be indisposed to reconsider their views with reference to the appointment of the valuers.

Commissioners
decline to appoint
Valuator.

The preliminary measures to which the Commissioners refer, are the preparation of a list of the occupiers in each electoral division, and the ascertainment of the quantity of land and other description of property held by the occupiers. These will necessarily occupy some time; but it is suggested that the guardians of each division might be authorized by the Board to associate themselves with a few of the principal rate-payers in each division, and that their combined informations might enable them, without much labour, to prepare sufficiently accurate lists of occupiers and their holdings. To check the accuracy of such lists, however, it would be expedient to appoint a Committee of the guardians, to whom the task of testing the correctness of the information acquired might be entrusted; and the Ordnance survey would afford them infallible means for preventing any injustice which might otherwise be occasioned, either by accident or design.

The Commissioners take this opportunity of enclosing copies of a second letter, on the subject of valuation and rating, which they trust will, with that which preceded it, materially assist the guardians.

By order of the Board.

To Mr. B. Power,
Clerk of the Guardians, Naas Union.

(Signed)

W. STANLEY, Assistant Secretary.

GENTLEMEN,

Naas, April 24, 1840.

Reply of clerk of
Union to Circular
of Poor Law Com-
missioners.

I HAVE been this day honoured by the receipt of your circular of the 20th instant, ordering a copy of all instructions which may have been issued by the guardians of this Union, relative to the valuation of the rateable property in the Union, distinguishing the instructions which may have proceeded from the guardians from those proceeding from a Valuation Committee.

In reply, I beg to state that the only instructions which have issued from the guardians, relative to the valuation, are contained in the following minute of the proceeding of the guardians, 23rd September last; viz.—

Instructions given
by the Guardians to
the Valuator.

Resolved,—That the valuator be directed, in the valuation of acreable property, to include the farm-houses in the valuation of the land, and not to make a separate valuation of such houses, distinct from the farms to which they belong.

Previous to the appointment of the valuator, the guardians, at considerable trouble, endeavoured to ascertain the acreage rateable property in their respective electoral divisions. Since the appointment of the valuator, that duty has devolved upon him. He has not yet given in any report to the guardians, but has engaged to have the valuation complete within six months from 10th January last. There has not been, as yet, any Valuation Committee formed by the Board of Guardians of this Union.

I am, &c.

(Signed) BENJAMIN POWER, Clerk to the Guardians.

APPENDIX.

Naas.*Evidence.*MR. EDWARD VAUGHAN, Valuator of the Union, *examined.*

Evidence.
Mr. Vaughan,
Valuator.
Definition of rack-
rent.

Was appointed September 3, 1839. His valuation is not a rack rent valuation; a rack rent is the highest penny that will be given by a solvent tenant; it is a rent which can be paid, but it is the highest that will be offered by any one intending to pay; it is the rent which the landlord might get by an advertisement.

Endeavoured to make his valuation as nearly as possible what a landlord ought to take from his tenant; valued as if he had been employed by a landlord; thinks that the rent which a landlord ought to take is about one-fifth less than the rack rent. Thus, a farm which a landlord ought to let at 1*l.* an acre would bring 25*s.* if put up to public competition.

Makes no calculation founded on the gross produce.

Inquiries made.

Made many inquiries to ascertain the actual rent paid; found that he could not always get any statement on that point that he could depend on.

Rarely inquired the number of acres, but took the acres from the ordnance.

Found no difficulty in general in ascertaining who was the holder of the tenement, but near Ballymore Eustace, where the ground had never before been rated or assessed to any tax, found great difficulty. The people there refused to tell who was the holder.

The valuation occupied about five months.

Did not dig the soil in order to ascertain the value; thinks it unnecessary in a country that is so divided with fences such as ditches; thinks it necessary to ascertain the quality both of the soil and the sub-soil; thinks that can be done by walking along the ditch and the drains. Fitzpatrick (assistant valuator) can now distinguish between soils so as to make an accurate valuation.

Houses valued
separately.

The house was always valued separately, however small the value, and the value added to that of the land.

Valued the ordinary class of houses, that had no stables or offices attached, at 30*s.* to 10*s.*; some mud cabins as low as 2*s.* 6*d.*

Effect of vicinity to
a town.

In estimating the effect of being near a town, thinks that at the distance of a mile the effect ceases. When he came within a mile, raised the acreable value by 5*s.* and then by 5*s.* more, and so on, until he reached to about double. When he came near a town, asked what the town parks let for, and set down that as the value generally. There are some instances near Naas where parts are let at 8*l.*, but in general they are let at from 3*l.* 10*s.* to 4*l.*; that is about his valuation. Made general inquiries as to what was paid; asked the hotel people, but could form an opinion without making any inquiries by looking to the respectability of the town and the appearance of it; thinks he could go within 10 per cent.

Forms his opinion of the value of land by what he knows certain estates to be let, which he considers fairly let.

Cannot state what he made his standard; made the experience of the last 10 years his standard.

Valuations for
landlords; county
Meath.

Has valued Lord Darnley's in the county Meath, 30,000 acres; General Bligh's, county Meath, about 5,000 acres. The Bishop of Ossory's, about 6,000 acres, all in the county Meath. Has valued those estates within the last four years. The farms on those estates which have fallen out of lease, have been let at his valuation. Those are what are called good landlords, as letting their land so as to allow the tenants to live comfortably and register their freeholds. Has valued Naas Union in the same manner; has valued on the same principle in both cases.

County Tyrone.

Valued the estate of Mr. Cole Hamilton in the county Tyrone, 60,000 acres; he was making improvements; valued the land higher in order to enable him to make those improvements. He made about 50 miles of road; intended to make more, but has ceased. It is valued at a higher rate on that account than the above estates in the county Meath. Mr. Hamilton has appointed a new agent, and the improvements have ceased. Mr. Hamilton complains that his former agent was improving him out of the country; the new agent will never get the rents. The improvements did not cost him a farthing, for he got the labour in the shape of arrears of rent. Only 15 or 20 of the tenants have registered; does not think they can register. Mr. Hamilton did not wish them to register. The rents are too high; perhaps if the improvements went on, they would not.

It is not usual in Naas Union to sell the good-will where there is no lease; the practice does not exist there.

County Galway.

Has valued Lord Clonbrock's estate in the county of Galway; has valued different parts of it at different times within the last eight years; he is considered a good landlord; he lets low to poor tenants, but lets dear to rich tenants; he has about 20,000 acres; his grass farms are let much higher than the tillage. His grass lands are let higher than those of equal quality in the Naas Union, they are occupied by a different class of people. It is not easy to compare the tillage of Naas Union with that on Lord Clonbrock's estate. If two tillage farms of equal intrinsic quality be taken, one in Naas Union and the other on Lord Clonbrock's estate, would value that in Naas Union about one-third higher on account of difference of situation; but would value the grass lands in both places about the same. In fact, they will give higher prices for grass lands there than in Naas Union. The grass farms there are larger. Valued Lord Clonbrock's estate so that the tenants might register.

When called on to value for a landlord, he ascertains whether he is a rack-renter or whether he lets his land for the value like Lord Fitzwilliam, and values accordingly. The object then is to value the whole estate alike.

Valued Naas as he valued for Lord Darnley. Those of Lord Darnley's tenants who had leases have generally registered.

Made few or no inquiries in Naas Union except as to the bog, whether it was let to cut turf.

The interpretation he puts on the clause of the Act is, that the rent which one year with another the tenement, in its actual state, might be reasonably expected to let from year to year, means the rent at which a landlord ought to let to his tenant when he lets from year to year. When a tenant gets a lease, he could afford to give a much higher rent if the farm is improvable.

Thinks that the tenants, and those who represent the tenants, would rather that the valuation had been made on a lower scale. Found that the ex-officio guardians generally approved of it. The fact was, that the ex-officio guardians were for having it high, the others were for having it low, and they outvoted the ex-officio guardians.

Valued a house near Naas at 80*l.* a-year; the guardians lowered it to 60*l.*; found that a gentleman who was leaving it paid 120*l.* a-year, and told valuator that he would be very glad to give 150*l.*, but Dean Burgh, the landlord, would not take it.

There was a revision of the valuation. The guardians lowered a great many holdings; the books were taken into the several divisions by the respective guardians and altered.

In the interval between the valuation and the revision the temperance movement took place, and the little whiskey shops in the towns were rendered much less valuable, and this increased the number of alterations that were made very considerably.

Was appointed on 3d September, 1839. The day he was appointed he was called into the Board-room, and requested to state the mode which he intended to adopt in making the valuation. He then produced one of the Ordnance sheets, being part of the South Dublin Union, on which were marked the boundaries of the tenements.

On these maps each tenement was divided into lots according to the quality of each lot. If one tenement contained three qualities of land, it was divided accordingly by differently coloured lines, and each lot valued separately. The sum of the value of these lots together with the value of the house, made up the value of the whole tenement. He always did this himself; this plan was much approved of by the guardians.

Returns had been made by the landlords and occupiers in pursuance of a resolution to that effect, and it was stated to him (Mr. Vaughan) by the guardians that there was a difference in the number of acres between such returns and the Ordnance survey, and he was asked how he meant to reconcile the difference; stated to them that he made all his calculations with reference to the contents of the Ordnance maps, &c. This course was approved of. They agreed to furnish him with the county cess applotments, the Ordnance maps and the lists of tenants, with the number of acres in each tenement. The county cess applotments contained the names of the cess payers and the amount of cess paid by each. It was a document that had been furnished to the returning officer to regulate the election of guardians, and was given him to enable him to fill up the column intended for the taxes, and other public charges. He could make no other use of this document. It did not contain the number of acres or the relative value of the farms. He made very little use of the lists of tenements, for the boundaries of the townlands in the Ordnance survey differ in many instances from the old boundaries, and thus a holding that would be stated in those lists to be on one townland would be found on a different townland on the Ordnance map.

About one month after his appointment, he sent his assistants to mark the boundaries of the holdings as already described.

He had six assistants who had been assisting him in the same way at the North and South Dublin Unions. They were inexperienced in valuing land. They marked about 100,000 acres in one month, and then he withdrew them, and set them again to complete the Dublin Unions. There was great unwillingness on the part of the occupiers to show the true boundaries. They imagined there would be no revision, and that it was their interest to deceive. This applies principally to the lower class. It was in that way that his assistants often went wrong; many of their mistakes were also owing to carelessness on their part. Did not think this could vitally affect the valuation, as he knew that those mistakes would be rectified upon the objections. Knew that the total area of each townland must be right. This was eventually the case, for the majority of the objections arose from this circumstance.

On the 24th of September received a copy of a resolution of the Board directing him in his valuation to include farm-houses in the value of the land; thinks that resolution was passed to lower the valuation; they imagined that, if the houses were valued separately and then added to the value of the land, that plan would put too high a value on the whole tenement; he, (Mr. V.), stated in reply that, he considered that resolution was at variance with the Act and refused to be bound by it.

In March, 1840, he (Mr. V.) and a person named Fitzpatrick, who had been managing a farm which he had in the county of Meath, and who was acquainted with the value of land, went down to that part of the Union which is in the county of Wicklow, and which had not been marked by the other assistants; he intended that Fitzpatrick should both mark the boundaries and set a value on the tenements; remained with him explaining to him the mode in which he was to make the valuation, until he was satisfied that Fitzpatrick perfectly understood the scale which he intended to adopt in his valuation; he (Mr. V.) then went to those parts of the Union the boundaries of which had been marked, and set about valuing them himself. During his valuation, he had frequent opportunities of checking Fitzpatrick's valuation, and found it generally to agree with his own; took one Ordnance sheet and Fitzpatrick another, and when they compared the adjoining fields along the margin they found them to agree; he also checked him by revaluing some portions of the district valued by Fitzpatrick.

He first valued that portion of the Union which is in the county of Wicklow and the adjoining portions of Kildare. There is a great variety of land in that district; it contains the

Evidence.

towns of Blessington and Ballymore Eustace, and a large tract of mountain which is only fit for rearing young stock; it also contains prime feeding and arable land. The farms in that district are small farms, except upon the mountains where, though large in extent, they are of little value.

That district is more densely inhabited than other parts of the Union, the farms are chiefly tillage farms, varying in extent from 10 to 50 acres; the greater part from 10 to 15; means that part which is not mountain. In the mountain, the farms are from 600 to 700 acres; the tenants of such farms are poor.

Mountain farms.

The mountain farms were valued from 1*s.* to 4*s.* an acre; that is about the rent paid to the Marquis of Downshire and Lord Miltown, who have properties in that district. Those landlords let their lands at a reasonable rate; they do not take the highest prices that can be got, they fix the rent, and select the tenant.

On Lord Miltown's estate the land is held under old leases, and the rents are no criterion of value. Colonel Smith also has considerable property, and resides in that district. The assistant generally inquired the rents upon those estates, but was not guided by them; they began the valuation before they had made any inquiries about the rents; knew the rents paid in that district from its neighbourhood to the South Dublin Union, which he had previously valued. In fact, one townland, Brittas, was originally in the Dublin Union, and was afterwards transferred to the Naas Union. Had already valued that townland for the Dublin Union, and kept the same scale in the Naas Union. When he discovered the rents paid as he went further from Dublin, he found that the scale he had adopted was too high, and he reduced it by about 2*s.* an acre. Found that in the Blessington electoral division the rents varied very much, according as the tenement was held directly under the owner in fee, or under a middleman.

Instructions given to assistant valuator.

The instructions he gave Fitzpatrick were not written instructions; told him to examine the soil, and compare it with land with which he was acquainted, and then to form an opinion as to the value himself, and to check his own opinion by ascertaining the rents.

Small farms valued upon the same scale as large farms.

Made no distinction for the size of the farm; took the same acreable value for large and small tenements. Small farms invariably fetch a higher rent than large farms. If the rents upon small farms were taken as a standard for larger farms, the valuation would be far above the rent; perhaps a third more.

In the Blessington district the farms are chiefly tillage farms; there are some few grazing farms, varying in extent from 200 to 400 acres; they are very valuable; they are more in heart, and have been better treated, although the nature of the soil is the same.

Knows a farm upon the townland of Ballynulta where the valuation amounts to 30*3*l., and the rent to 24*3*l. Thinks that was a fair rent when the land was taken, but the tenants have improved it since; they are tenants at will.

Middlemen.

In fact the rents vary so much that the rent is sometimes above and sometimes below the valuation; but where tenants hold under middlemen, the rents are much higher. Where those middlemen reside in the neighbourhood, the tenants pay partly in cash and work out the rest; when they are not resident, they have great trouble in collecting the rents, and in many instances are never paid.

Houses in towns.

The town of Blessington is on Lord Downshire's estate. It has been lately a good deal improved. There are a good many new slated houses. Thinks the Marquis gives long leases, and they build the houses themselves; those houses are valued at about a fifth or a sixth below what they would let for; made that allowance for repairs; thinks that houses being perishable property, he was bound to make that allowance; thinks the valuation would be more than the rent now, since the temperance movement has spread; it has reduced the value of houses in country towns.

Mode of valuation.

When he is engaged to value land, he values it according to his own views of what the land should be worth, circumstanced as the property is with regard to roads, fences, altitude, and general aspect; then inquires from the people in the neighbourhood, how many barrels of wheat or oats, or hundreds of potatoes the land generally produces. He also inquires what land in the neighbourhood lets for, the rates charged for sums or collops; this he finds to vary very much in different parts of Ireland, from 10*s.* to 4*l.* In the mountainous district the price of a collop is only 15*s.* or 1*l.*; in other parts of the Union it is about 3*l.* He also inquires how much land it takes to feed a sum or a collop.

Comparison of Naas and South Dublin Unions.

Valued the different classes of property in the Naas Union upon the same principle as he did in the Dublin Unions; but in general the rents paid in the Naas Union are 10 per cent. below the rents in other parts of Ireland. There may be a few exceptions, especially in the late lettings on estates of small proprietors.

Valued that part of the Union which is nearest to Dublin, higher than other parts of the Union. The adjoining portions of both Unions are valued exactly alike, and he intended that his valuation should bear the same relation to the letting value in both Unions; but from the circumstance that lands in the Naas Union let, as he thinks, 10 per cent. below the letting value of land in other parts of Ireland, his valuation is 10 per cent. nearer to the letting value than he intended it to be.

The Duke of Leinster, the Marquis of Downshire, and other indulgent landlords, never put up their lands to competition; considers that this affects the letting value all through the county, and if they see land let on such estates at a certain price, farmers form from this their estimate of the value of similar land on other properties.

Has heard that Celbridge is valued upon a higher scale than either Dublin or Naas.

Considers that, constituted as Boards of Guardians generally are, the majority being tenants, they have a direct interest in keeping down the valuation, and no valuation which comes up to the mark will be allowed to remain so.

The Union was divided into four divisions for the purpose of revision and for the convenience of the guardians. The meetings of the Blessington division were attended by the Marquis of Downshire, Colonel Smith, Lord Miltown, Mr. Hornidge, and Mr. Murray; the three latter are ex-officio guardians.

The assistant valuator who had valued that part of the Union was in attendance; the valuation of every tenement in that district was examined. There were several discussions. There were some cases upon Colonel Smith's estate, where the valuation was under the rent, some of which, at the instance of Colonel Smith, were raised to the rent; the difference was small, only 3*l.* or 4*l.* in valuations of 50*l.* There were not as many alterations in that district as in the others where there were fewer ex-officio guardians in attendance; does not think his valuation in that district was at the first revision reduced more than 2 per cent.; afterwards when they found that other electoral divisions had made considerable alterations affecting the scale of the valuation, that gave rise to a greater number of objections than would otherwise have been taken.

Valued the Naas district himself; that was the part which his assistants had originally marked; it contains the towns of Naas, Clane, and the village of Kill; there are farms of every description. Bodenstown consists principally of demesnes and large pasture farms; about one-third of Kill consists of demesne land, the remaining portion comprises a respectable class of farms varying from 40 to 100 acres.

The Naas electoral division consists chiefly of the town and land influenced by the neighbourhood of the town.

Houses in the towns were originally valued at what he could ascertain by inquiry they would let for. There were considerable reductions in committee for the town of Naas; inquired the rent of one-half of the houses in the town; ground-rent only is paid for the majority of them; where they are let from year to year, valued them within a sixth of the rent; he made that allowance in consequence of houses being perishable property. They made a good many alterations in the town of Naas; they altered the valuations without consulting him; considers that the revised valuation is in many cases much below the rents; thinks they have valued houses at 6*l.* that would easily be let for 8*l.*; they considered that the temperance movement had reduced, and would be likely to reduce still more the value of houses.

Attended himself the first two or three days, and finding that he was not consulted, he gave up attending, and let them do just as they pleased; he left a clerk for the purpose of explaining the valuation of houses in the rural part of the district.

Four pounds an acre is often paid for town parks near Naas; valued them at 4*l.*; thinks that in general his valuation is up to the rents, and in some instances above the rents; where he had valued above the rents, his valuation was reduced to the rent; thinks the valuation as it now stands is as near to the rents as it can be.

The neighbourhood of Clane is densely inhabited, and the holdings are small, many of them contain only one or two acres, they pay only nominal rents; those small holdings are upon land that was formerly a common; many of them pay no rent, and some of them a trifling rent to the neighbouring landlords who claim a right of ownership. The average of the valuations of that class of farms is from 3*l.* to 6*l.*; the occupiers live on the farms, and also work for the large farmers in the neighbourhood; knows they could not live upon those farms, although they pay little or no rent; does not think there were many objections made respecting that class of farms; thinks that if they were to leave, they could sell their holdings from 10*l.* to 20*l.* an acre, supposing them to pay no rent. If they were to pay rent at his valuation, does not think they could sell them for more than a year's purchase. Tenants are not in any part of the Union in the habit of selling their good-will.

In the small holdings, the difference between the rents and the valuation is greater than in the large farms.

There are not many grass farms in the Union. Considers that the great competition for grass farms has raised the market price of those farms above that of tillage land of the same quality; that class of farms are, in many instances, portions of demesnes, are seldom let upon lease, and are oftener in the market; the valuation of several farms of that class was raised; was aware that high rents were paid, but considered them too high. Considered that they were let at rack rents; tenants are more easily found for that class of farms; persons will bid who do not reside in the neighbourhood; some of them are jobbers in cattle, and if a farm answers their purpose, for instance to finish off cattle for Smithfield, they will pay any rent. Knows one farm containing 300 acres, which has been let at 900 guineas since the valuation was made; when he was valuing that farm, heard that they were in treaty about it, and that 900 guineas was the highest proposal: valued that farm at 55*s.* an acre. It was raised in committee to the rent; thinks his own valuation quite enough for it.

Thinks that where the valuation of grass farms was raised, the present valuation is up to the rack rent; thinks that in the instances where his own valuation was not altered, if they were to be let, they would bring higher rents; the competition is so great, that it is impossible to say how much would be given for them.

There are generally houses upon tillage farms; when a farmer is bidding for land, the house adds little, in his estimation, to the value of the farm; he would give as much, or nearly as much, for a farm upon which there is an inferior house, as for one with a better house upon it.

They all agreed that his valuation of the land was fair. Considers that if the value of the houses were taken off, the valuation would in general be below the rents charged upon late lettings; it would be about the rents charged on the Duke of Leinster's estate. Landlords do not charge for the houses, and owing to this circumstance his valuation was higher than the rent by the value of the houses.

APPENDIX.

Naas.

Evidence.

W. H. Carter, Esq.,
ex-officio guardian.W. H. CARTER, Esq., an ex-officio Guardian, *examined*.

In this county land lets high, at the most that can be got from solvent tenants who will pay the rent.

The farms are large tillage farms, from 20 to 60 acres, and many of them much larger; the farmers are comfortable.

Rents high.

Has a property in the county of Meath, near Ashbourne; he receives there 30s. for the same description of land that would let here for 40s. or 50s.; thinks the tenants pay in this county higher, having regard to the quality of the land, than in other parts of Ireland.

There are good markets and good roads, and the land being of an inferior quality, there is more industry and capital expended to make it productive. They are better agriculturists.

Valuation equal to
rent.

Thinks this Union is valued fully up to the rents. The valuation is up to the rent on his property; that is not the case in the King's County, where he has property in the Parsons-town Union. Has heard from his agent that the valuation there is very low, much below the rents.

The general feeling of the guardians was, that the valuation was too high, and they would rather have had it lower. In his district the guardians were anxious that the land should be valued up to its full value. Does not think it was reduced in his district more than 2 per cent. There was no difference of opinion amongst the guardians; all agreed that the valuation was too high.

The houses in Kilkullen were valued at the utmost that could be got for them if they were to be let; thinks the same was the case in the town of Naas.

He himself never gives leases, but believes that leases are generally given.

A. Mansfield, Esq.,
elected Guardian.
Revision of valuation.ALEXANDER MANSFIELD, Esq., an elected Guardian, *examined*.

When the valuation was completed, the Union was divided into four districts, each containing several electoral divisions. Local committees were appointed, consisting of the elected and ex-officio guardians residing in each district. The committees met from day to day, and carefully examined and discussed the valuation of every tenement. On those occasions the valuator or his assistant was always present. The valuation was found to be much too high, and also very unequal. More than one third of the valuations in some divisions were altered. Nine-tenths of those alterations were to lower the value. In some instances the valuation was lowered 20, and 25 per cent. In other instances, which are few, the valuation was raised.

Valuation unequal.

Grass farms valued
too low, tillage
farms too high.

Mr. Vaughan valued grass farms considerably below their value; his valuation of tillage land was much too high. The majority of the farms in this part of the country vary from 50 to 100 acres; farms of that size always let at their full value. Landlords will sometimes take less to get good and solvent tenants, who will make improvements; but they seldom let their land for less than it is worth. Thinks Mr. Vaughan's original valuation much higher than the letting value; knows many instances in his electoral division where the valuation was above the rents paid. Considers that the revised valuation is very fair, and fully up to the letting value. In the instances where the guardians lowered the valuation, they did not consider that they lowered it below the highest price that could be got from solvent tenants.

Unanimity of guar-
dians.

The majority of the committee with whom he acted were tenants; he was the only landlord amongst them. There was no difference of opinion between him and the others. When the revised valuation was given back to Mr. Vaughan corrected in pencil marks, he went over them all. He agreed to some of them; with respect to others he offered to split the difference. He stated that he still thought that his own valuation was right, but was ready to yield in some degree to the opinions of the guardians. He, Mr. Mansfield, then proposed that the valuation, as revised by the committee, should be adopted, and that course was agreed to by all the members of the Board except two or three. The valuation was again reduced after the objections had been sent in. In a great many instances there were objections to valuations that had been already reduced. No alteration was made in any case in which the person who had sent in the objection did not attend himself. In many instances they produced their leases or receipts for rent. In those instances the valuation was not lowered as low as the rent; something was always charged for the houses.

Personal attend-
ance of objectors
required.

The valuation as settled at present is very fair. A few alterations would bring it to the mark. Those alterations would be to lower and not to increase the valuations. The valuation is fully up to the rents; does not think more could be got from solvent tenants. In some instances more might be got; those instances are few. On his, Mr. Mansfield's property, the valuation is as high as the rent he receives, and in many instances above it. Mr. Vaughan's valuation was 10 per cent. and the revised valuation is 5 per cent. above the rents paid on his estate. In one instance, where the rent is 200*l.*, the original valuation was 250*l.*, and the revised valuation is 225*l.*

Houses in towns.

The valuation of many of the houses in the town of Naas was lowered from 15 to 25 per cent.

The guardians reduced the valuation in the town of Naas to what they considered the full value. Some of the houses are let at higher rents; but thinks the landlords, in those instances, have great trouble in getting the rent.

Nearly all the farms in this county are held by lease. Where the farms are large, landlords must give leases, or they will not get good tenants who will make improvements.

Land mostly let on lease.

* A letter was received from Mr. Vaughan, with reference to the above return, stating that "there are items in that statement which require explanation, for several of the reductions which have been noted are not strictly reductions in the valuation, but upon property (bogs) on which a nominal value was placed in the first instance to oblige landlords to produce their rentals; and a very considerable portion of the reduction was caused by placing on some turnpike roads, and on the canal, a very high valuation for the same purpose."

In a subsequent letter, Mr. Vaughan states, with reference to the same return, as follows:—"I cannot now give any very particular explanation of the apparent alterations in the valuation, but may observe that many of the apparent alterations are not alterations in point of fact; which I shall explain in this way:—When the original valuation was making, we found it necessary to put an excessive valuation on the bogs, canals, and turnpike roads, to oblige the persons deriving profits therefrom to come forward and prove to the exact amount of profit on which they should be rated."

"In this way some bogs, which are rated at 100*l.*, on examination proved not to be rateable, inasmuch as the parties derive *no profit* from them. In much the same way the turnpike roads and canals were reduced to a very considerable amount. These would make, on the whole Union, a reduction of some thousands; which, added to the reductions which really were made by the guardians, would tend to place in a very bad light the interference of the guardians and the *erroneousness* of the valuation."

"Relative to my examination, I would wish to make the following statement:—In my original examination, I stated that I made no calculation as to value, founded on gross value. This answer alludes to the 'gross value' in the second schedule of the Irish Poor Relief Act. The net value was ascertained, not by deducting from a gross value the rates, taxes, repairs, and insurance, but from calculations founded on an innate knowledge of what the land was able to produce, together with a certain scale of prices for agricultural produce. The following scale I had adopted in making a valuation of the Earl of Darnley's estates; and any valuations I have since made are founded upon the same:—

	s.	d.		s.	d.
Wheat	10	6	per cwt. of 112 lbs.	Butter	70 0
Oats	6	3	" "	Beef	35 0
Barley	7	3	" "	Mutton	37 0
Potatoes	1	8	" "	Pork	27 0

"At this scale, about one-fifth of the gross produce would be near the rent. Thus, an acre, producing 20 barrels of oats, at 1*l.* 8*s.* per barrel, would set by the year at from 45*s.* to 50*s.*; and another, producing 10 barrels, about 17*s.* or 20*s.* There will be exceptions, but the cases given are fair specimens. Take, also, an acre of land, able to feed and fatten a beast weighing 6 or 6½ cwt.; the letting value will be about 50*s.* per acre; and land that will take two acres to feed a beast of 4 cwt. will fetch about 20*s.* per acre: this land will not fatten. This is for land 25 to 30 miles from the port. Land becomes more valuable for agricultural purposes as you approach the port, at the rate of about one per cent. for every five miles. (*This proportion Mr. Vaughan in a subsequent letter corrected to 'one per cent. per mile.'*) The acres above alluded to are Irish."

† In the original return, the amount of the final valuation of Boystown electoral division was, by a clerical error, stated to be 2,475*l.* 2*s.* 3½*d.*, instead of 7,475*l.* 2*s.* 3½*d.* In consequence of that mistake, the present valuation of the entire Union was, in the Naas report, stated to amount to 169,364*l.* 12*s.* 8*d.*, being 5,000*l.* less than the true amount.

DUNGARVAN UNION.

APPENDIX.

*Dungarvan.*Extracts from
Minute-book.

DECLARED MARCH 28th, 1839.

10 ex-officio guardians, 30 elected.

Extracts from Minute Book of Board of Guardians.

The first meeting of the Board of Guardians was held on the 16th May, 1839.

Robert Power, Esq., in the chair.

Present 4 ex-officio, 25 elected guardians, (whose names are given,) and the Assistant Poor Law Commissioner.

Resolved,—That the following gentlemen be appointed a committee of valuation for the purpose of inquiring whether any valuation at present existing can be made available to the Union of a poor-rate, and reporting their opinion thereon to the board at the next meeting.

(Here follow the names of the eight gentlemen who were appointed as the Committee.)

Monday, June 24, 1839.

Meeting of the Board. Present 5 ex-officio, 16 elected guardians.

The report of the Valuation Committee, appointed the 17th May last, to report whether any and what surveys and valuation are in existence, by which a rate may be made for the Union, was read, giving it as their opinion that the new county valuation could be made available by a revision of the same by competent persons, and that the local guardians in the Union would assist materially in the necessary revision and correction thereof.

The answers to the queries proposed to the Board of Guardians by the Poor Law Commissioners respecting the valuation of the Union, and whether there were any surveys or valuations which could be made available for the purpose, were then read.

It was then resolved,—That the clerk be directed to state in his next circular concerning a meeting of the Board, that a Committee of Valuation will be appointed.

Tuesday, July 16, 1839.

Meeting of the Board. Present, Robert Power, chairman, 5 ex-officio, 23 elected guardians.

Proposed by Mr. Stafford, seconded by R. Power.

That a committee of 17 guardians be appointed as a Committee of Valuation; viz., one from each of the electoral divisions of the county, and two additional ones from the electoral division of Dungarvan, in consequence of the extent of that division.

Seventeen persons (whose names are given) were then appointed.

Proposed by Mr. Cachem, seconded by Mr. Greaves,—That the Committee be empowered to procure a copy of that portion of the new county valuation, as far as it relates to this Union, made under the 7th Will. IV., c. 4, and that the person from whom same may be procured be directed to furnish the contents of each electoral division separately, and that the clerk be directed to apply for such copy to the persons in whose custody the originals now are; viz., the County Treasurer, the Secretary to the Grand Jury, and the Secretary to the Valuation Committee, requesting to know on what terms same will be furnished; and to lay their answers, when received, before Messrs. Hudson, Carberry, and M'Grath.

Proposed by Mr. Greaves, and seconded by Mr. Stafford,—That advertisements be inserted in the "Waterford Mail" and "Waterford Chronicle" newspapers, for one competent person to value this Union.

Proposed by Mr. Uniacke, seconded by Mr. L. Power,—That advertisements be inserted in the above-mentioned newspapers, for two competent valuers.

On a division, there appeared for one valuator 16 votes; for two, 11 votes.

Proposed by Mr. Smith, seconded by Mr. Hudson,—That an advertisement be inserted in the "Waterford Mail" and "Waterford Chronicle," for one week.

August 2, 1839.

Meeting of the Board of Guardians.

Present Robert Power, chairman. 9 ex-officio, 24 elected guardians.

Mr. O'Donohue, Assistant Commissioner, in attendance.

Letter read from Mr. Rodolphus Mortimer, secretary to the Valuation Committee, in answer to the letter addressed to him on the 18th ultimo, by order of the Board, at the meeting held the 16th ultimo, requesting to be informed on what terms he would furnish a copy of that portion of the new county valuation as far as it relates to this Union, stating that he would furnish such copies at the rate of 3d. per folio.

Letter read from Mr. Michael Mortimer, secretary to the grand jury, on the same subject, stating that Mr. Roberts, the county treasurer, in whose custody the new county valuation is, has instructed Mr. R. Mortimer, secretary to the Valuation Committee, to make out such copies as may be required, at the usual rate of payment.

Mr. O'Donohue having explained the duties of the valuator,

Proposed by Mr. Uniacke and seconded by Mr. Hudson,—That the Board do adjourn until a future day, to take into consideration the question of appointing two valuers for the Union.

17 votes for the adjournment, 16 against it.

Proposed by Mr. Hudson, seconded by Mr. Fitzgerald,—That the gentlemen who had forwarded proposals for valuing the Union be called into the Board-room; that Mr. O'Donohue, the Assistant Commissioner, may explain to them the duties required of them.—Carried unanimously.

Valuation Committee.

Report of committee
presented.New Valuation Com-
mittee.

Meeting of Board.

Letters relating to
county valuation readCandidates for valua-
torship appeared.

Mr. O'Donohue having explained the duties of valuator to the gentlemen proposing to act as such, the chairman having demanded whether any gentleman who had sent in a proposal wished to withdraw same, and they having answered in the negative,—

Proposals were then read from seven different persons: the lowest proposal was from Henry Langley, for 1*l.* 5*s.* the 1,000 statute acres.

Proposed by Mr. Uniacke and seconded by Mr. Carberry,—That the remuneration to be inserted in the second covenant of the valuator's contract be at the rate of 1*l.* per 1,000 acres, and 6*d.* for each house in the towns and villages contained in the Union, for a statement of all the particulars contained in the said valuation, as the same may be varied through any change.—Carried unanimously.

Proposed by Mr. Barron, seconded by Mr. Carew,—That the remuneration to be given to the person who shall be appointed as valuator of the Union, for attending appeals at Quarter Sessions, shall be 7*s.* 6*d.* per day, when the rate shall not be quashed or amended, and 5*s.* per day when the rate shall be quashed or amended.—Carried unanimously.

It being deemed expedient to fix the amount of security to be entered into by the valuator for the due performance of his duties as such before proceeding to the election of such valuator,

It was proposed and carried unanimously,—That 200*l.* be the security required from the valuator and his two sureties.

Mr. Langley, one of the gentlemen who sent in proposals for the office of valuator, had been called in and examined by the Board with respect to his competency to fill that situation,

Proposed by Mr. Usher, seconded by Mr. Carew,—That Mr. Henry Langley be appointed valuator of this Union.

On a division there appeared 22 votes for Mr. Langley, 10 against him.

Mr. Langley was declared valuator on the terms proposed by himself, viz., 1*l.* 5*s.* per 1,000 acres.

Field books and valuation sheets directed to be ordered.

Friday, August 16, 1839.

Meeting of the Board of Guardians. Present Robert Power, chairman. 5 ex-officio, 11 elected guardians.

Mr. Mortimer, secretary to the Valuation Committee, having been called into the Board-room, was directed to provide from the county valuation books that portion of said valuation as far as it comprised the electoral division of Aglish, and to transmit same to Mr. Langley, the valuator for the Union, as soon as possible.

The securities of the valuator were then approved of and the bond and contract duly executed.

Saturday, September 7, 1839.

Meeting of the Board. Present John Hudson, chairman. 2 ex-officio, 15 elected guardians. Form of circular read, calling on landlords, agents, and other persons interested in the valuation, to give assistance and information to the valuator.

Mr. Langley, valuator to the Union, was called into the Board-room and examined respecting the progress he had made in the valuation of the Union.

Saturday, October 5.

Meeting of the Board of Guardians. Present John Hudson, chairman. 4 ex-officio, 15 elected guardians. The Assistant Commissioner in attendance.

Proposed by Mr. Russell, seconded by Mr. Keating,—That the Committee of Valuation appointed 16th day of July last do meet on every second Saturday, and that the first meeting of said committee be held on Saturday, the 19th instant, to examine into the progress of the valuation. Carried unanimously.

Mr. Langley, the valuator, was called into the room and examined by the Board respecting the valuation of the Union.

Proposed by Mr. Russell, seconded by Mr. Keating,—That the Committee of Valuation, at their next meeting, do take into their consideration the propriety of appointing persons for the purpose of giving notice to the landholders of the Union of the valuator, to call on them for the purpose of pointing out the boundaries of the holdings, and rendering him such other services as he may require, such persons to be remunerated for same. Carried unanimously.

Saturday, November 2, 1839.

Meeting of the Board. Present John Hudson, chairman. Two ex-officio, 18 elected guardians.

Mr. O'Donohue, Assistant Commissioner, in attendance.

The report of the Valuation Committee, which sat on Saturday, 19th October last, was read, and ordered to be entered in the minute-book; it is as follows:—

“ Saturday, October 19, 1839.

At a meeting of the Valuation Committee, present John Hudson, Michael O'Neill, John Quinlan, Andrew Carberry, John Dee, Patrick Powel.

Proposed and carried unanimously, that Mr. Hudson be appointed chairman of the Valuation Committee.

Proposed by Mr. Carberry, seconded by Mr. O'Brien, that the question of the mode of valuing ground, underwoods, and forests, be submitted to the next general meeting of the Board of Guardians for their opinion and decision thereon. Carried unanimously.

Mr. Langley, the valuator, reported to the committee the progress he had made in the valuation which he had effected, comprising the electoral division of Aglish, and a portion of the electoral division of Modeligo.

Proposed by Mr. Quinlan, seconded by Mr. Carberry,—That it be submitted to the next

Their duties explained by Assistant Commissioner.

Remuneration for valuation.

Security required from valuator, £200.

Valuator appointed.

APPENDIX.

*Dungarvan.*Extracts from
Minute-book.

meeting of the Board of Guardians, whether the porters' lodges, clerks', gamekeepers', and shepherds' dwelling-houses, the pheasantry and laundry situate within the demesne of Dromana, are subject to be charged and rated in the present valuation, independent of the valuation placed on said demesne.

Proposed by Mr. Carberry, seconded by Mr. Quinlan,—That it be submitted to the next meeting, (that inasmuch as some farm-houses have been valued, and others have not,) that the valuator be directed to revise that portion of said valuation already completed, and add the value of the farm-houses in those instances where same has been omitted.—Carried unanimously."

The Report from the Select Committee on County Cess, (Ireland,) ordered to be printed by the House of Commons, August 4, 1836, having been produced to the Board, and that portion of said Report respecting the valuation of ground, underwoods, and forests, having been read,

Proposed by Mr. Carberry, seconded by Mr. Russell,—That the question of the mode of valuing ground, underwoods, and forests, be adjourned until Mr. O'Donohue, shall have communicated with the Poor Law Commissioners, and ascertained their opinion thereon.—Carried unanimously.

Mr. Langley, the valuator, having been sent for by the Board, was examined respecting the progress of the valuation.

Proposed by Mr. Carberry, seconded by Mr. Greaves,—That the valuator be directed not to value as separate occupancies, the porters' lodges, clerks', gamekeepers', and shepherds' dwelling-houses, dairy, laundry, and pheasantry, situate within the demesne of Dromana, but to value and charge same as appendages to the dwelling-house of Dromana.—Carried unanimously.

Proposed by Mr. Domer, seconded by Mr. Greaves,—That the valuator be directed in the progress of the valuation to value farm-houses separately from the lands.—Carried unanimously.

After disposing of other business,

The next meeting fixed for Saturday, November 30, 1839, and that in future the Board do meet every fourth Saturday.—Carried unanimously.

Saturday, November 30, 1839.

Meeting of the Board of Guardians. Present Robert Power, chairman. 5 ex-officio; 20 elected guardians.

Mr. O'Donohue, Assistant Commissioner, in attendance.

The Report of the Valuation Committee which sat on Saturday the 16th instant, was read as follows:—

"Dungarvan, Nov. 16, 1839.

Meeting of the Committee of Valuation, held at the Court-house on this day. Present John Hudson, Chairman, Andrew Carberry, Edmond Connor.

Mr. Langley, the valuator, laid that portion of the valuation before the meeting which he had effected since the last meeting of the committee, comprising a portion of the electoral division of Dungarvan.

Proposed by Mr. Carberry, seconded by Mr. Connor,—That it be submitted to the Board of Guardians at the next general meeting of the Board, whether the Committee of Valuation have the power of altering or revising the valuation during the progress thereof, at the meetings of the Valuation Committee, the valuator having intimated to the meeting that the committee had no such power.—Carried unanimously."

Proposed by Mr. Stafford, seconded by Mr. Hudson,—That the committee be applied to to advise the Board of Guardians, whether they have it in their power to increase the salary of their valuator for the purpose of enabling him to employ a clerk to assist him in his calculations. Carried unanimously.

Tuesday, December 31, 1839.

Meeting of the Board. Present 3 ex-officio and 8 elected guardians.

Mr. O'Donohue, Assistant Commissioner, in attendance.

The report of the proceedings of the Valuation Committee since the last meeting of the Board were read as follows:—

"Saturday, December 28, 1839.

Meeting of the Valuation Committee held at the Court-house on this day:—

Present Francis Kennedy, Michael O'Brien, Patrick Broderick.

Proposed by Mr. O'Brien, seconded by Mr. Broderick,—That in consequence of the absence of the members of this committee who represent the electoral division of Dungarvan, and inasmuch as the portion of the valuation which Mr. Langley proposes submitting to the meeting comprises that part of the division of Dungarvan which contains the town, this committee do adjourn until Saturday 11th January, 1840.—Carried unanimously."

Letter read from the assistant secretary, dated 16th December, 1839, 5288 D, in answer to the communication addressed to him by order of the Board at the last meeting, respecting the increase of salary to the valuator of the Union, stating, that looking to the low amount to be given to the valuator, the Poor Law Commissioners will not object to his receiving an increased allowance for the purpose of enabling him to employ a clerk to assist him in his operations.

Proposed and carried unanimously,—That the clerk be directed to state in his circular convening the next meeting of this Board, that the question of increasing the valuator's salary, in order to enable him to employ a clerk, will be taken into consideration.

Saturday, January 25, 1840.

Meeting of the Board. Present, John Hudson, chairman, 4 ex-officio, 15 elected guardians. Mr. O'Donohue, Assistant Commissioner, in attendance.

Direction to Valuator,
with respect to porters'
lodges, &c., in de-
mesnes.

Directions as to farm-
houses.

Report of Valuation
Committee.

Report of Valuation
Committee.

Adjournment of the
Valuation Committee
in consequence of the
absence of members.

APPENDIX.

*Dungarvan.*Extracts from
Minute-book.

The proceedings of the meetings of the Committee of Valuation, held since the last general meeting of the Board, were read, stating that three several meetings of the Committee of Valuation had been adjourned in consequence of the non-attendance of the members.

It was proposed and carried,—That the valuator be empowered to employ a clerk to assist him in his operations, at a sum of 20*l*.

Saturday, February 22, 1840.

Meeting of the Board. Robert Lougan, chairman. Present, 2 ex-officio and 9 elected guardians. Mr. O'Donohue, the Assistant Commissioner, in attendance.

The proceedings of the Committee of Valuation, held on this day, were read, viz.,

“Meeting of the Committee of Valuation held on this day. Present, Michael O'Brien and 4 other members (whose names are given).”

Proceedings of Valuation Committee.

Mr. Langley, the valuator, submitted to the meeting and read portions of the valuation which he had affected of the electoral divisions of Dungarvan, Clonea, and Kilgobinet.”

Thursday, May 14, 1840.

Meeting of the Board. Present, Robert Power, chairman, 3 ex-officio and 9 elected guardians (whose names are given). Mr. O'Donohue, Assistant Commissioner, in attendance.

Circular from the assistant secretary, dated the 20th April, 1840, requesting the transmission to the Poor Law Commissioners of return of copies of all instructions issued by the Board of Guardians of this Union relative to the valuation of this Union, for the purpose of being laid before the House of Lords, and the report of the clerk thereon, were read.

Return of instructions to Valuators.

Proposed, and carried unanimously,—That Mr. Mortimer be paid 7*l*. in full for all demands on the Board of Guardians of this Union for furnishing copies of the county valuation for the use of Mr. Langley.

Mr. Mortimer had pledged himself to the Board to give any additional documents which may be required for the purposes of the valuation, free of any additional expense.

Thursday, September 3, 1840.

Ordinary meeting of the Board. Present, Robert Uniacke, chairman; 3 ex-officio, 19 elected guardians (whose names are given).

Mr. O'Donohue, Assistant Commissioner, in attendance.

Moved by Mr. Stuart, seconded by Mr. Lougan,—That the valuator attend on Monday, the 28th instant, and subsequent days, at 10 o'clock in the forenoon, at the Court-house, Dungarvan, to submit for inspection the valuation of the electoral division of Dungarvan to the guardians and such rate-payers as may attend; and that the clerk be directed to forward intimation of this resolution to the clerks of the different chapels in the electoral division of Dungarvan.—Carried unanimously.

Valuator required to attend, and submit for inspection valuation of Dungarvan.

Thursday, October 1, 1840.

Ordinary meeting of the Board. Present, Robert Uniacke, chairman; 6 ex-officio, 11 elected guardians.

Mr. O'Donohue, Assistant Commissioner, in attendance.

A letter from the assistant secretary, dated September 1, 1840, respecting the progress of the valuation, and the answer thereto, were read.

Thursday, January 14, 1840.

Ordinary meeting of the Board. Present, Robert Lougan, chairman; 2 ex-officio, 12 elected guardians.

Mr. O'Donohue, Assistant Commissioner, in attendance.

Proposed, and carried unanimously,—That the clerk be directed to communicate with the Poor Law Commissioners, requesting them to apply to the Ordnance authorities for a return of the acreage of each parish comprised within the Union of Dungarvan.

Proposed by Mr. Stuart, seconded by Mr. Carberry,—That the clerk be directed to procure notices, and to have them circulated through the Union, to the effect that the objections lodged against the valuation will be taken into consideration and disposed of by the Board of Guardians at the next meeting, to be held on Thursday, the 11th day of February, 1841, when the parties objecting will be heard.

Objections to valuations considered.

Thursday, February 11, 1841.

Ordinary meeting of the Board. Present, Robert Lougan, chairman; 3 ex-officio, 17 elected guardians (whose names are given).

Mr. O'Donohue, Assistant Commissioner, in attendance.

The Board of Guardians proceeded to examine the objections lodged against the valuation.

Thursday, March 11, 1841.

Ordinary meeting of the Board. Present, Robert Power, chairman; 2 ex-officio, 10 elected guardians.

Return of the acreage of the Union as furnished by the Ordnance authorities, pursuant to an application from the Board of Guardians, was laid before the Board; and a letter from the assistant secretary, accompanying same, was read.

Ordnance Survey.

Evidence.

MR. HENRY LANGLEY, Valuator of the Union, *examined*.

Evidence.

Mr. Langley, Valuator.

Is a resident of the County of Waterford; has resided at Ballyduff, within five miles of Waterford; has for the last 15 years been a practical farmer; for about eight years previous to his appointment as valuator of the Dungarvan Union, had held a farm of 100 acres in his own hands at Ballyduff. Is well acquainted with the value of lands. Previous to his being appointed valuator, he was employed to value under the Tithe Composition Act. He valued

A practical farmer.

Was a tithe valuator.

APPENDIX.

Dungarvan.

Evidence.

Engaged in valuing
Dungarvan one year
and a half.

No documents but
county valuation.

Thinks his valuation
nearly agreed with
county valuation.

Total valuation of the
Union £93,719. 16s.
11s. 8d. the acre on
an average.
Description of Aglish.

Mode of valuation.

Inquiries made.

Highest value on land
in Aglish 40s. an
acre.

Applied to landlords
for returns of rents.
Got return from Duke
of Devonshire only.
Valuation nearly
agrees with that re-
turn.

Test of value.

Farms generally small.

Valued large and
small holdings alike.

Town fields.

under that Act about 100,000 acres; there was no objection to that valuation on the ground of value, nor was there any appeal. Was appointed valuator of the Dungarvan Union, having been elected in preference to six or seven other candidates. Was engaged for about one year and a half, in completing the valuation. Commenced about the 1st September, 1839, with the division of Aglish. It is one of the most distant divisions, and selected it while the days were long, being one of the most distant parts of the Union, about six miles from Dungarvan, where he resided. He was supplied with no documents to assist him in the valuation, except a copy of that portion of the county valuation which related to the Union, giving the names of the occupiers, of the landlords, and the townlands; also the number of acres, and in some electoral divisions giving the value. At first Mr. Mortimer gave the value, but latterly he did not give the value in his copies. He believes he got the values of about half a dozen electoral divisions; he believes the direction to Mr. Mortimer afterwards was not to give the value. In those cases where he had the value supplied to him he did not use it to guide his judgment. After he had made his valuation he sometimes looked at it for curiosity, to see if his valuation agreed with it. In Aglish, he thinks his valuation nearly agreed with the county valuation. After the whole valuation was completed, he met Mr. Mortimer at the Board-room when making up the books. He recollects to have given him the total of the valuation, which Mr. Mortimer said nearly agreed with the county valuation. Never compared the county valuation with his own. His valuation amounted to 93,719l. 16s., for net annual value, which gives on the average about 11s. 8d. the acre, including the town of Dungarvan and the villages in the Union, Stradbally, part of Kilmacthomas, and part of Bonmahon.

About one-third of Aglish is light hilly land, with about 1,000 acres of unreclaimed mountain. Of the remaining two-thirds, about one-third is prime land, in quality as good as any in the Union, but not as valuable, on account of its distance from markets; and the remaining one-third is of a good quality.

Before he went to value, received the Commissioners' circular on valuation and rating, and the usual field-books. When he came to the lands, he first inquired for the occupier; inquired either at the house on the farm or from the first person he met on it. He was supplied with the names of all the occupiers from the county valuation, and it was the duty of the secretary (if he knew of any change in the occupation) to inform him of it. He relied upon the county valuation for the names of the occupiers, and also for the acreage. His directions were not to make any alteration in the acreage. When he came to the farm, he first walked it over in company with the occupier, whenever he was willing to go with him; always asked him, and he generally complied. Asked the occupier to show him his best land and his worst; after he inspected the whole farm, classified the land, and entered in his field-book the different values of the different qualities. He then inquired who was the immediate landlord, and what rent each occupier paid, and entered them, whenever he got the information, in his field-book. Did not generally make up his valuation till his return home at night. He considered that he was bound by his instructions to value the farm as if on a letting to a yearly tenant. He considers that less would be given for it by a yearly tenant, but did not, in making his estimate of the value, make any deduction on account of that. He put an acreable value on the land, according to its quality, and took nothing else into consideration. He did not inquire whether the occupier held under lease, or whether he was bound by covenant to keep it or give it up in repair. The highest value he set upon any land in the division was, he believes, nearly 40s. the statute acre. All Aglish is let by the statute acre. The land which he valued at 40s. was held by Denis Keehy, and was the best land in the electoral division. Except that farm, the highest value was 32s. or 32s. 6d. the acre. Cannot say with any certainty what the rents were. He applied to all the landlords for returns of the rents, but was not supplied with a return by any landlord, except the Duke of Devonshire. Received that return after the valuation was made. Compared his valuation with that return, and found it nearly to agree. In some cases it was over, and in very few cases under the rent paid to the Duke of Devonshire. It also exceeded in many cases the rents paid to Lord Stuart de Decies, Sir Richard Musgrave, and Mr. Wyse, the principal proprietors in the Aglish division.

In Aglish there are some middlemen, who hold under the great proprietors; the valuation was much under their rents. Thinks that not less than 20 acres of the prime land in Aglish could support a farmer and his family, supposing him to pay 32s. 6d. the acre. He thinks he ought to have an interest of 1l. an acre, at the least, and on his valuation thinks such a farmer would have that interest.

Thinks his test was the fair rent which a solvent tenant could pay, supporting himself and his family comfortably, say giving them meat twice a week; and he made no calculation of the produce of the farm, and how much should be retained by the tenant. Never in his life valued in that way, and never knew any person who did. He classified the land, and depended on his own judgment and experience as a practical farmer to fix the value. Generally speaking, valued throughout the Union in the same manner as he valued in the division of Aglish. The farms are in general small, particularly on the seaside. The average he would say was 20 acres, but the size of the farm made no difference in his valuation. In the neighbourhood of Clashmore made some allowance for the neighbourhood to the town, and fixed a higher value on the land, and also on the land near Stradbally and Bonmahon.

The highest value he set upon any land in the Union was 3l. an acre; that was upon the town fields near Dungarvan. Some of the reclaimed mountain he valued as low as 1s.; he thinks his valuation, deducting the towns, would average over 10s. an acre. Some of these townfields near Dungarvan are let by the Duke of Devonshire at 3l. the acre; for instance, the very field on which the Poor-house is built was let to Mr. Keating at that rent; and some are also let by the Marquis of Waterford at the same rent, 3l. the acre. Some are let as high as 6l. the acre. In valuing those townfields he did not allow the full value for them

as townfields, but he valued them as if they composed a large farm, placing an additional value on them on account of their being near the town.

The townfields are let in small quantities, generally from one acre to five or six. He considers the rent paid for them is more for the convenience than for the value. A person residing in a town wishes to keep a cow for the convenience of his family; he thinks it would require an acre and a half of those fields to keep a cow; and after paying the rent of 6*l.* an acre, there would be very little profit. Found a great variety of rents in the Union; some he considered rack-rents, and very high rack-rents. In many instances cannot conceive how they could be paid; the farmers who paid them lived very little better than their pigs. The system of husbandry is also bad in the Union. They do not sufficiently manure the land, and they exhaust it by repeated crops. Does not know whether leases are generally given throughout the Union. There is great competition for land; particularly for the last four or five years. For the last three or four years the price of produce has also increased. Since 1836 the prices have been rising. In estimating the value never inquired whether any tenant registered. In making his valuation wished to keep clear of politics. When the valuation was completed it was laid before the Board of Guardians, and submitted for public inspection, and objections were lodged; the objections generally were for acreage, and whenever the proper documents, such as leases and surveys, were produced, alterations were made. Objections were also made on the part of Sir Richard Musgrave, Mr. Fitzgerald, and some third gentleman, on the ground that the valuation was too low. He had valued all those properties to the best of his judgment. On the part of Mr. Fitzgerald objections were also lodged that part was valued too high; that part is in his own possession. Witness refused to alter the value, as he had acted on a uniform scale, and such alterations would introduce inequality; the parties objecting threatened to appeal. The tenants say that the valuation was a fair one and are satisfied; the guardians generally say the same, both the ex-officio and elected guardians. He thinks the valuation is 20 per cent. under the rents, and not more on the whole Union.

In valuing the town of Dungarvan, he applied the same scale as in the country portion of the Union. His valuation is, he thinks, generally 20 per cent. under the rents in the town. He asked what the rents were in all cases; he selected the houses in the square as the most valuable, and ascertained the rents which some of those houses paid; he then consulted with some persons who resided in the town, more conversant with the value of houses than himself, as to the value which he should fix upon those houses. After fixing the value of some of the best houses, he then fixed the value of all the other houses; observing a proportion, and taking into consideration the difference of situation.

He kept up the same scale throughout the valuation of the town, except in small tenements which were let at 2*l.* and under, in valuing which he used a lower scale.

[Mr. Robert Power, of Clashmore, the Chairman of the Board of Guardians, having told the clerk of the Union, who was sent to request his attendance, that he was unable, in consequence of some private engagements, to attend to be examined, the following guardians were examined:—]

JOHN HUDSON, Esq., elected Guardian, *examined.*

Is one of the elected guardians for Dungarvan; one of the first set, and has been re-elected. Is the seneschal of Dungarvan. The Duke of Devonshire is lord of the manor. Has resided in Dungarvan over 20 years. Has land in the neighbourhood under the duke. Was chairman of the Committee of Valuation. The valuator presented his field-books to the committee from time to time to show the progress he was making; they were carefully examined by some members of the committee. All the committee did not attend regularly; but among the most regular attendants were Mr. Carberry, the witness, and some few more. In consequence of the irregular attendance of the Committee of Valuation, it was thought advisable by the Board of Guardians that the valuation should be submitted for inspection to the whole Board of Guardians; and accordingly it was submitted to them more than once, and it was carefully examined by them. The valuator was generally in attendance. The valuation was generally under the rents, but cannot say how much. The valuator, Mr. Langley, was a resident of the county, living between Dungarvan and Waterford; was a practical farmer, not a professional valuator, but had been previously employed to value in this county for tithe composition: a high character was given of him by some members of the Board to the Board in general. Generally speaking, in this Union leases are given to the tenants. The Duke of Devonshire's leases are generally 21 years; and in some instances a life concurrent; does not know at what rents the lands in general are let, but knows that the Duke of Devonshire's lettings are all moderate, and has heard the same of Lord Waterford. When the valuation was under examination, there was generally a good attendance of members. They always had some persons present who could, from local knowledge, check the valuation. As far as he has an opportunity of forming a judgment from the lands he knows, thinks the valuation a fair relative valuation. Does not think that the lands have been valued to the amount they would let for if they were to be let to-day; but at the same time is of opinion, from his knowledge of the manner in which lands with which he is acquainted have been valued, that the valuation in general is a fair one as between landlord and tenant; would have no objection to take lands himself at that valuation. The elected guardians were generally, for the town, persons in business in the town; and resident gentlemen for the rural divisions, either practical farmers or large landed proprietors. The members were of all political parties; but there appeared but one feeling among them, to attend to their duties. Anything like a party discussion was never introduced; it would not be listened to; they all co-operated most cordially together. So far as he had an opportunity of hearing and seeing, the general opinion with respect to the way in which the valuator discharged his duty was, that he did it fairly and properly, and never heard an insinuation of partiality. Knows of no substantial objection to the valuation,

APPENDIX.

Dungarvan.

Evidence.

A great variety of rents.
Rack-rents.
System of husbandry bad.
Competition for land.
Increase in the price of produce since 1836.
Objections to valuation.

His scale the same in town as in rural portion.

Small tenements in towns.

John Hudson, Esq.,
Elected Guardian.

Chairman of Valuation Committee.

Valuation under the rents.

Valuator recommended by several guardians.

When valuation was under examination, generally a good attendance of members.

Thinks the valuation was a fair one.

Board of Guardians.

Co-operated cordially

APPENDIX.

Dungarvan.

Evidence.

J. M. Galwey, Esq.,
Ex-officio Guardian.

Examination of the
valuation by the
guardians.

Witness agent of Lord
Cremorne and Lord
Donoughmore.

On those estates, con-
siders valuation fair.

Generally speaking,
under the rent.

Mr. Mortimer,
Secretary to County
Valuation.

Six pair of valuers
appointed.

Valuation completed
in about 12 months.

Has given satisfac-
tion.

Comparison of
Poor Law valuation
with County Valua-
tion.

Plan of County
Valuation.

except on the part of Sir Richard Musgrave. Of course objections have been lodged; as far as he knows none of them are substantial. The objections were for acreage and for value. Some complained that the valuation was too low; those were landlords. The tenants complained it was too high; but the objections not numerous. The landlords generally did not show any anxiety as to what would be best for their own interests in respect to the valuation.

JOHN MATTHEW GALWEY, Esq., ex-officio Guardian, *examined*.

Is an ex-officio guardian of the Union, and a member of the Valuation Committee. But one valuator was appointed, Mr. Henry Langley; he resided in Dungarvan a year before he was appointed, and previously lived with his father, a very respectable gentleman, agent to Colonel Palliser, and whom he had known occasionally to serve on grand juries of the county. The young man's character was very good. Mr. Langley used to attend the Board of Guardians. The sheets he produced used to be examined, and frequent discussions arose upon them. The guardians of particular localities used to examine the parts they knew. The valuation was not completely accurate, particularly as regarded some lands of Sir Richard Musgrave. Some were valued too high and some too low; and Sir Richard's agent said they should appeal. Witness is agent to Lord Cremorne and Lord Donoughmore's estates in the Union. As far as those estates are concerned, found only a very few inaccuracies. Those were in the acreage; but the values he considered fair. Has a general idea of the whole valuation, from having attended the Valuation Committee. The parts he considers incorrect generally relate to Sir Richard Musgrave's property; and what his agent said, who is a good judge of land, struck him at the time as being well founded, but he does not now recollect what those objections were. With respect to Lord Donoughmore and Lord Cremorne's estates, he concludes the valuation was under the rents; and generally speaking, he thinks the valuation under the letting rents, but cannot say how much under the rents. The lettings on those estates he knows are fair and reasonable lettings; the old tenants are left in, and the land is not put up for competition, in consequence of the prices being about the same as when many of the leases were granted in 1801. Had every reason to be satisfied with the care and attention of the valuator; thinks he was a fair man; was not influenced by any improper motives. Thinks the lands in this county are let high. Leases are generally given in the Union. The Duke of Devonshire's leases are generally 21 years for land and 99 years for town lots, and contain strict covenants; Lord Donoughmore's are generally for 31 years or three lives; Lord Cremorne's are also for lives or years. Some part of Lord Cremorne's estate is now out of lease by the dropping of an old life. The old tenants will be left at the same rents, the price of produce being now about the same as it was in 1801, when the leases were made. Lord Waterford, in this Union, has an estate (Shandon) yielding a rental of about 2000*l.* a year, which is capable of great improvement; it is at present occupied by very poor persons living in thatched cabins, who, generally speaking, have no leases. It might be let to respectable persons for 500*l.* a year above the present rental, if cleared of the paupers, and encouraging leases were given. He knows land in this Union, in the parish of Abbey-side, at present not yielding Lord Waterford 2*l.* an acre paid (the tenants are so poor), would, if he gave encouraging leases, be taken by respectable persons, who would willingly give him 6*l.* an acre, and would expend money on it as building-ground.

Mr. RODOLPHUS MORTIMER, Secretary to County Valuation, *examined*.

Is secretary of the Commissioners named in the Local Act of Parliament of the 6th and 7th Will. 4, c. 61.

A committee was named in that Act to superintend the valuation of the county of Waterford. Lord Stuart de Decies was chairman of the committee, and Sir Richard Keane was vice-chairman. The committee consisted of 12 members,—3 to form a quorum.

Six pair of valuers, the most intelligent farmers residing in the county, were selected as valuers. They were appointed to different districts, and completed the valuation of the whole county in little more than 12 months. When the valuation of a barony was completed, the whole was posted at each police barrack, and petty sessions house within the barony, and remained there for 14 days, with a notice that a court would be held after the expiration of the 14 days to hear objections. Objections were heard, and alterations sometimes made. Appeals were brought, and the valuation of the county was finally completed. The whole has given universal satisfaction, and the county cess is now levied with ease, and equally. Has not compared the county valuation under the Act with that under the Poor Law. Has a general idea of their comparative valuation. Furnished to the different Unions the portions of the county within their Unions. In some Unions the acreage and value were both allowed to be furnished to the valuers; he believes this was the case in Lismore and Waterford, but in other Unions the guardians would not permit the value, as in the case of Dungarvan. Has heard from Mr. Langley the valuator the result of the valuation by him. The average value per acre of the Dungarvan Union of lands alone (exclusive of houses) is 11*s.* 8*d.*,* and under the county valuation the average is about 10*s.* 2*d.* The average letting value he would conceive to be about a fourth more than the county valuation; but this he gives merely as his conjecture. The Marquis of Waterford's property is let rather under the value; the Duke of Devonshire's is set moderately; the immediate tenants of Lord Stuart de Decies hold at a fair value; also of Mr. Lane Fox. Mr. Christmas, Sir Richard Musgrave, and Mr. Fitzgerald, also let at the fair value; and from a comparison of the lettings on those estates he forms his estimate.

The plan of the county valuation was taken from the "Bavarian Cadastre." The arable land is divided into six classes, and a price is fixed for each class; for the first class 40*s.*, for the second class, 35*s.*; for the third class, 20*s.*; the fourth class, 15*s.*; the fifth class, 10*s.*; and the sixth class, 5*s.* Besides those six classes there are also separate columns for heath, wood, and turbary.—(*Vide specimen sheet on opposite page.*)

* Mr. Langley included the towns in his average.

(Note by a Correspondent.—This is forwarded to exemplify the mode of valuation adopted on the Duke of Devonshire's estate. Mr. Ferguson is an agriculturist of 25 years' experience; his mode of proceeding is by valuing in fields, and carefully examining the soil, &c., in each field. How Mr. Langley and Mr. Ferguson arrived at the same conclusion I am unable to explain. Any mode of valuing, such as that adopted by the Tithe Commissioners and Poor Law Valuers, whereby they are obliged to guess at the quantities, qualities, &c., must appear to be, at the best, but an imperfect valuation.)

RENT and VALUATION of £10 ELECTORS on the Estates of Lord Stuart de Decies.

COUNTY WATERFORD.

LISMORE UNION.

Extracts from Minute Book of Board of Guardians.

ORDER FORMING UNION, 30TH MARCH, 1839.

Eight ex-officio, 24 elected Guardians.

APPENDIX.

*Lismore.*Extracts from
Minute-book.

June 12, 1839. At a meeting of the Board,—

Present, 7 ex-officio, 23 elected guardians,

Moved,—That a committee be formed to take into consideration the valuation of the Union, and report thereon to the next meeting of the Board of Guardians; and that the committee consist of the whole of the ex-officio guardians and of one elected guardian from each electoral division within the Union.—Proposed by Henry Witham, seconded by Richard Smythe, Esq.

Appointment of
valuation com-
mittee.

Amendment moved upon the above,—That the committee consist of eight members; six to be selected from the elected guardians, and two from the ex-officio guardians.—Proposed by Nicholas Walsh, seconded by Richard Power.

Amendment put from the chair and lost.

Original motion put from the chair and carried.

Resolved,—That the following elected guardians be the members to compose the Valuation Committee, in conjunction with the ex-officio guardians.

(Here follow the names of nine elected guardians.)

Resolved,—That Sir Richard Musgrave, Bart., be the chairman of the Valuation Committee.

July 4, 1839. At a meeting of the Board,—

Present, William Wallstead, deputy vice-chairman, 3 ex-officio, 19 elected guardians.

Resolved,—That the Valuation Committee appointed the last day of meeting, which made a report this day, should be reappointed and continue to exercise their functions until the valuation is complete, reporting from time to time to the Board of Guardians.

Re-appointment of
same committee.

Resolved,—That advertisements for valuers of the Union of Lismore be inserted once in each of the following newspapers, viz., Waterford Chronicle, Waterford Mail, Cork Southern Reporter, and Munster Advertiser.

Resolved,—That Mr. John Bennett, one of the Board of Guardians, be requested to wait upon the grand jury at the ensuing assizes, for the purpose of obtaining copies, tables, and books of valuations relating to the recent valuation of the county of Waterford, as connected with the Lismore Union; and that Sir Richard Musgrave and John Keily, Esq., be requested to advocate this request before the grand jury, and that a copy of this resolution be furnished to Mr. John Bennett.

Grand Jury applied
to for documents.

July 27, 1839. At a meeting of the Board,—

Present, Sir Richard Musgrave, Bart., Chairman, 5 ex-officio, 17 elected guardians,

Proposed and carried unanimously,—That the clerk of the Board do apply to Mr. Mortimer, secretary to the late county valuation, for a copy of the late county valuation, in conformity with Mr. Mortimer's letter to the chairman read this day.

Proposed by John Keily, Esq., seconded by Sir Richard Keane,—That one valuator be appointed for the valuation of the Lismore Union.

Amendment moved on the above, proposed by Mr. Patrick Heffernan, seconded by Mr. H. Witham,—That two valutors be employed. Carried.

Proposed by John Keily, Esq., seconded by F. Drew, Esq.,—That Messrs. Tallon and Waters be appointed the valutors of the Union.

Valutors ap-
pointed.

Carried by a majority of 16 to 6.

Amendments on the above:—Proposed by Mr. P. Heffernan, seconded by Mr. James Power,—That Messrs. Thomas Lowe and Thomas Stafford be appointed the valutors of the Union.

Rejected by the chairman, the numbers being, for 11, against 11.

Second amendment on the above:—Proposed by Mr. John Eustace, seconded by Richard Smith, Esq.,—That Messrs. Edward Lowe and Thomas Lowe be appointed the valutors of the Union.

Rejected by a majority of 19 to 5.

Proposed and carried unanimously,—That Messrs. Tallon and Waters be paid for the valuation 160%.

Mr. Waters, one of the valutors appointed, being called in, the chairman communicated to him the resolution of the Board, and the sum offered. Mr. Waters declined to undertake the valuation on the terms offered.

160% for the valua-
tion. Declined by
Mr. Waters.

It was then proposed and carried,—That the Board should advertise in the same newspapers as before, stating that they offer the sum of 160% for valuing the Union by two competent persons, within the provisions of the 1st and 2nd Vic., c. 56; and that the clerk be instructed by the Valuation Committee to furnish all applicants with the necessary information; and that the Valuation Committee be requested to prepare the advertisement.

Moved as an amendment, and rejected,—That Messrs. Edward and William Low be appointed as valutors for the Union.

APPENDIX.

Lismore.

Re-appointment
of valuator.

August 10, 1839. At a meeting of the Board,—

Present, Sir Richard Musgrave, chairman, 6 ex-officio, 16 elected guardians.

Proposed by Sir Richard Keane, seconded by John Keily, Esq.,—That Messrs. Waters and Tallon be appointed as the valutors of the Union.

Carried by a majority of 16 to 5.

Amendment,—That Messrs. T. Stafford and John Furlong be appointed as valutors for this Union.

Rejected by a majority of 12 to 9.

Security required
from valutors.

Messrs. Tallon and Waters called in, and informed that they were appointed valutors of the Union, and that they should enter into securities according to the instructions of the Poor Law Commissioners.

Proposed and carried unanimously,—That the valutors selected by the guardians be required to agree to attend the sessions on all appeals that may be made against any rate on the ground of imperfection in the valuation, at the rate of 10s. each per diem if no alteration be made in the valuation, and 5s. per diem if an alteration be made at any time within seven years from the completion of the valuation; and that they will without delay, when required, make all such amendments and alterations in the valuation as may be necessary within the same period, at the rate of 5s. each per 1,000 acres in the rural districts, inclusive of all property within them, and at the rate of 1d. per house and appurtenances in towns.

Ordered,—That the valutors be supplied by the clerk, and at the expense of the Union, with valuation, instruction, field-books, and all other papers and books necessary to complete the valuation, together with an Act of Parliament for each.

Reference to Poor
Law Commis-
sioner.

Proposed and carried unanimously,—That the clerk be instructed to apply to the Assistant Commissioner to inform the Board of Guardians, for the instruction of the valutors, whether the valutors are bound to proceed in their valuation of electoral divisions of the Union according to the order in which they are numbered, namely, beginning at No. 1 and so proceeding to No. 9, or whether the Valuation Committee may, if they deem it expedient, direct the valutors to proceed with the electoral divisions in any other order which shall appear to them more desirable or convenient.

August 31, 1839. At a meeting of the Board,—

Present, Mr. Assistant Commissioner O'Donoghue, 3 ex-officio, and 9 elected guardians.

Principle of valua-
tion approved of by
Guardians.

Proposed and carried unanimously,—That the Board of Guardians are satisfied with the gross annual value of the tenements as they appear on the two sheets exhibited to them; and they desire that the valutors will proceed on the same principles throughout the Union.

Proposed and carried unanimously,—That the vice-chairman be requested to forward two sheets to the Poor Law Commissioners, accompanied by an explanatory letter, requesting their advice and directions on various points raised as to filling the columns.

Proposed and carried unanimously,—That the Board of Guardians are of opinion that a clerk is requisite to assist the valutors in performing the calculations necessary for filling the sheets, in order to enable them to complete the valuations within the time required;* and that they are willing to give the sum of 25*l.* to a competent person for this purpose, to be approved of by them.

September 26, 1839. Pursuant to notice, an extraordinary meeting of the Board, to take into consideration a letter addressed by the Poor Law Commissioners to the vice-chairman relative to the valuation of the Union.

Present,—3 ex-officio, 13 elected guardians.

The vice-chairman read the letter addressed to him by the Poor Law Commissioners relative to the valuation of the Union. (*Vide* copies of Col. Curry's letter and Mr. Stanley's answer, *post*, page 311 *b.*)

Proposed and carried unanimously,—That in consequence of the delay that has arisen from the want of sufficient instructions from the Board to guide the valutors in the progress of the valuation, they have been put to expense; and it is proposed to pay them, in addition to the sum before agreed to, 6*l.*, to indemnify them for the expense they have incurred; and that an additional calendar month be allowed them to complete the valuation.

Proposed and carried unanimously,—That the valutors having proposed Mr. John Baldwin, of Lismore, as clerk, to assist in making out the valuations, the Board do approve of same.

F. E. CURRY, *Vice-Chairman*.

October 14, 1839. At an ordinary meeting of the Board,—

Present, the Assistant Commissioner, 2 ex-officio, 5 elected guardians,

Valutors to enter
into security.

Mr. H. Waters, one of the valutors, was called in, and the vice-chairman explained to him the contents of the Poor Law Commissioners' letter of the 9th October, 1839.

Proposed and carried unanimously,—That the valutors do enter into a bond with two sureties in 200*l.* for the proper performance of the contract of the said valutors.

Proposed and carried unanimously,—That the clerk do write to the Poor Law Commissioners, respectfully informing them that the valutors proceeded in the commencement of their valuation in conformity with the instructions which they received from the Valuation Committee, composed of Guardians of the Union; and that as the Commissioners appear in their communication of the 9th October, 1839, to be under the impression that they had proceeded on their own responsibility, perhaps, when this is taken into account, they will reconsider their decision and be induced to allow the sum of 6*l.* to be paid to the valutors, which in their letter alluded to they had declined to sanction.

Valuator limited as
to time.

* It appears from the agreement entered into by the valutors, bearing date the 25th September, 1839, that the valuation was to be completed within seven months from the date of the agreement.

November 4, 1839. At an ordinary meeting of the Board,—

Present, 3 ex-officio, 10 elected guardians,

The Valuation Committee made a report of their proceedings at the two meetings held by them on the 21st of October and 29th October, 1839.

December 2, 1839. At an ordinary meeting of the Board,—

Present, 4 ex-officio, 14 elected guardians,

Proposed and carried unanimously,—That the clerk be desired to write to Mr. Mortimer, stating, that whereas the copy he furnished of the county valuation is not correct, the same will be returned to him for correction; and upon his giving a certificate at the foot of the last page of the schedule that the schedule contained in the sheets is a true and faithful copy of so much of the county valuation as relates to the Lismore Union, an order for payment will be made next Board-day.

December 31, 1839. At an ordinary meeting of the Board,—

Present, 2 ex-officio, 7 elected guardians,

Ordered,—That the clerk do write to Mr. Mortimer to complete with as much despatch as possible the lists of the county valuation as regards this Union: and also that he write to the valuers of the Union to resume their duties as soon as the weather will permit.

January 27, 1840. At an ordinary meeting of the Board,—

Present, 2 ex-officio, 12 elected guardians,

Proposed and carried unanimously,—That Mr. Mortimer having complied with the order of the Board of the 2nd December, by certifying that the copy of the county valuation, so far as relates to this Union, is a true one, an order be now made upon the treasurer for the payment to him of 10*l.*, the sum originally agreed upon.

Proposed and carried unanimously,—That the clerk do apply by letter to the different landlords within this Union for a list of their tenants, with the acreage and the rents they pay, in order that the calculations be justly and fairly made, and that in the event of his not being furnished with such information within a fortnight from the time of such applications, he would be obliged, under the directions of the Commissioners, to place half the rate on the landlords and half on the tenants in the valuation sheets.

Application made to landlords for information relative to the rents.

Proposed and carried unanimously,—That the clerk be desired to write to the valuers, requesting them to send to him any field-books they can spare before the 10th February, in order that the Valuation Committee may examine them on that day.

February 24, 1840. At an ordinary meeting of the Board,—

Present, Sir Richard Musgrave, chairman, 2 ex-officio and 6 elected guardians,

Proposed and carried unanimously,—The Assistant Commissioner having urged the completion of the valuation in due time, according to the contract, and the valuers not having delivered in valuation sheets for some time back, that the clerk be desired to write to the valuers calling their attention to the observations of the Assistant Commissioner, and to require that a continuation of sheets be sent without delay.

Valuers called on for valuation sheets.

Immediately after the passing the resolution Mr. Waters, one of the valuers, appeared, and the substance of it was made known to him.

March 20, 1840. At an ordinary meeting of the Board,—

Present, the Assistant Commissioner, Mr. O'Donoghue, and 6 elected guardians,

The Assistant Commissioner very minutely inquired into the state of the valuation, examined some of the field-books, and requested that the valuation should be proceeded in without any further interruption,

Poor Law Commissioner examined field-books.

April 14, 1840. At the first ordinary meeting of the Board, for the year ending 25th March, 1841,—

Present, the Assistant Commissioner, Mr. O'Donoghue, 5 ex-officio, and 18 elected guardians,

Proposed and carried unanimously,—That the time for the completion of the valuation of this Union be extended to the 25th June, 1840.

Time for completion of valuation extended. Valuation Committee, 1840.

Proposed and carried unanimously,—That the following be appointed as the Valuation Committee for the year ending 25th March, 1841, viz., the ex-officio guardians and the following elected guardians, viz:—(Here follow the names of 10 guardians.)

August 5, 1840. At an ordinary meeting of the Board,—

Present, H. Witham, deputy vice-chairman, 3 ex-officio and 5 elected guardians,

Proposed and carried unanimously,—That the next meeting of the Valuation Committee be held on Saturday, the 22nd August instant, of which meeting all members composing the Committee shall receive due notice, in order to insure their attendance from day to day as may be necessary, and that the valuers be requested to attend and to furnish all documents requisite for explaining the principles which have guided them in their respective values of property.

September 2, 1840. At an ordinary meeting of the Board,—

Present, the Assistant Commissioner, J. O'Donoghue, Esq., Francis E. Curry, Esq., vice-chairman, in the chair, and 4 elected guardians.

The minutes of the proceedings of the Valuation Committee on the 22nd and 25th August instant.

Proposed and carried unanimously,—That in addition to and in pursuance of a resolution passed at a meeting of the Valuation Committee, holden the 25th August, 1840, requesting "the valuers to cast up the columns containing the acreage and net value, so as to exhibit to the Committee at their next meeting the contents and net annual value of each townland within the Union," the valuers be required to deliver up, on or before the 28th instant,

Valuers to add up all the columns.

APPENDIX.

*Lismore.*Extracts from
Minute-book.

the sheets of the valuation of the Union, properly headed, numbered, and totted up, to enable this Board to give such notice thereof to the rate-payers as the Act requires.

Resolved,—That the vice-chairman communicate the resolution to the valuers.

Resolved,—That the clerk procure two quires of objection sheets for the use of the Union. The next meeting fixed for the 30th September, 1840.

October 28, 1840. At an ordinary meeting of the Board,—

Present, Sir Richard Musgrave, Bart., chairman, 4 ex-officio, and 7 elected guardians.

Proposed and carried unanimously,—That a check be drawn upon the treasurer for the sum of 106*l.*, the balance due to the valuers, they having given in the valuation sheets completed. That a check be drawn upon the treasurer for the sum of 12*l.* 10*s.*, due to Mr. John Baldwin for performing the calculations for the valuers.

The checks were drawn accordingly.

November 18, 1840. At an ordinary meeting of the Board,—

Present, the Assistant Commissioner, Sir Richard Musgrave, chairman, 4 ex-officio and 8 elected guardians,

Proposed and carried unanimously,—That the valuation having been delivered in complete, the clerk be directed to advertise as herein undermentioned, that the same will lie in the Board-room, Court-house, Lismore, for inspection, from the hours of 10 in the forenoon and 4 p.m., from the 1st December to the 24th day thereof, both inclusive; and that he be directed to get a sufficient number of handbills printed to post throughout the Union, with form F., and that the same be advertised once in the three Waterford papers, and in the Constitution and Southern Reporter Cork papers.

January 18, 1841. At the ordinary meeting of the Board,—

Present, 1 ex-officio and 8 elected guardians,

Resolved unanimously,—That the clerk do give public notice of the intention of the guardians to hear and obviate the objections to the valuation in the following order:—

1. Lismore on Tuesday, 9th February next.
2. Ballysagartmore, Wednesday, 10th February.
3. Cappoquin, Thursday, 11th February.
4. Mocollop, }
Castle Richard, } Friday, 12th February.
- West Modeligo, }
5. Tallow, Saturday, 13th February.
6. Temple Michael, }
and } Monday, 15th February, 1841.
- Kilcockin, }

Resolved unanimously,—That if the guardians shall not be able to get through the objections for each Electoral Division on the day appointed, that they reserve to themselves the power of adjourning such objections as are not disposed of to the following day.

Resolved unanimously,—That the clerk be authorized to procure 100 printed notices of the intention of the guardians to hear and obviate the objections to the valuation.

Resolved,—That the clerk do write to the valuers, to request their attendance on Tuesday the 9th February next, and from day to day while the guardians are occupied in hearing the objections to the valuation.

February 9, 1841. At an ordinary meeting of the Board,—

Present, Sir Richard Musgrave, chairman, 3 ex-officio and 15 elected guardians.

Resolved and carried unanimously,—That the guardians are of opinion that it would be desirable that the valuation should be revised, on account of the number of objections entered and the prospect of appeal, and that a revision of the valuation would save considerable expense to the Union.

Revision ordered.

Resolved and carried unanimously,—That Mr. Samuel Smith, of Cappoquin, Mr. Hudson, of Tallow, and Mr. John Smith, of Ballysagartmore, be requested to assist the valuers in revising the valuation, the valuers having consented to same.

March 9, 1841. At an ordinary meeting of the Board,—

Present, Mr. Assistant Commissioner O'Donoghue, 3 ex-officio and 15 elected guardians.

Proposed and carried unanimously,—That Sir Richard Keane, Bart., Arthur Keily, F. E. Currey, and H. Witham, Esqrs., be appointed a committee to see the resolutions of last meeting, relative to a revision of the valuation, carried into effect, and that they do meet on Thursday the 18th instant for that purpose, at 11 o'clock, and take steps in the meantime to obtain the attendance on that day of the valuers and gentlemen named to assist them in revising the valuation.

[In this Union a separate Minute-book was regularly kept of the several attendances of the Valuation Committee, in which very short entries were made of their proceedings. These it was not thought necessary to copy. Also in the Minute-book of the Board appear some items of payment to valuers, and notices of adjournment, which are not here extracted.]

COPY of a LETTER from F. E. CURRY, Esq., Vice Chairman of the Board of Guardians of Lismore Union, relative to the Valuation.

(Referred to, *ante*, page 308 b.)

Lismore Castle, Sept. 2, 1839.

Mr. Curry's letter relative to valuation.

SIR,

In conformity with a resolution of the Board of Guardians, entered into at their meeting, held on Saturday the 31st of last month, (for which and other particulars of the business there transacted I beg to refer you to the minutes of proceeding forwarded by the Clerk,) I take the liberty of addressing you, to request the advice and direction of the Poor Law Commissioners on several points of difficulty connected with the valuation, particularly as to filling the columns in the sheets in the manner required by the Act.

I inclose the two sheets alluded to in the resolution, and will proceed briefly to state the manner in which the Valuers have prepared them, proceeding column by column.

Columns 1 and 2 require no comment.

Column 3. Doubts have arisen, where there are landlords intermediate between the occupier and the owner of the fee, which of them is to be here inserted; but it is to be supposed that the name of the landlord next above the occupier is the one that should be given.—(See paper No. II; Valuation, and Rating, page 3.)

Column 4. The Committee of Valuation directed the Valuers to include each house and its appurtenances by itself, including in the latter any walled garden, but excluding any lawn, demesne, or park, which they directed them to place in a separate line, and value as so much land, taking it into account, however, in fixing the letting value of the house as a circumstance calculated to enhance it. This principle was adopted in the valuation of the county just completed, and it is also acted on in the Ordnance Valuation. The Committee were of opinion that an adherence to it would prevent doubts and disputes arising as to what should properly be considered as lawn, demesne, or park, and that it would enable them much more effectually to revise and check the valuation sheets. Also, whenever the same person should be found holding property in different townlands in the same electoral division, the Valuers were to insert his name in each, and value the property separately. The Assistant Commissioner appears to think both these proceedings erroneous, and that the occupier's name should only be entered once in the Rate Book for all the property which he holds in any one electoral division, and their lump value placed opposite to it.

Columns 5 and 6 do not require comment.

Columns 7 and 16. The Valuers have, in the first instance, formed an estimate of what is the fair letting value from year to year of each tenement, on the supposition of all rates and taxes, except rentcharge, being paid by the landlord, and this same they have placed in column 16, calculating upon it the items to be placed in the intermediate columns, and by deducting them from it, they have arrived at the net annual value inscribed in column 7.—(See 1 and 2 Vic. c. 56, s. 64, *note* §.) The Assistant Commissioner thinks that the net annual value should first be shown, and then also the items calculated and added to it, to obtain the gross annual value. This appears to be altogether a question of practice, and immaterial in what manner performed, if the result obtained be correct, which it is presumed will be the case by the mode adopted. The Valuers cannot in the field say exactly what their item will be in amount, but they can say what a solvent tenant should pay for any tenement who has no outgoing but rent to his landlord.

Columns 8 and 9. The Valuers have assumed a rate of 10*d.* in the pound, and divided it equally between the columns. By the report of the proceedings of the Cork Board of Guardians, contained in the Southern Reporter of July 30 last, it appears that this plan was adopted by them, and not objected to by Mr. Voules, who was present. The Assistant Commissioner, Mr. O'Donoghue, thinks it essential that the Valuers should ascertain the rent paid by the occupier of each tenement to his immediate landlord, in order that the proportions in which this assumed rate would be payable by each may be calculated and inserted, and that when so inserted it will be conclusive between the parties unless appealed from. It is to be observed, it is difficult to see what purpose, so far as the levying a rate is concerned, this apportionment will answer. The whole amount is in the first instance payable by the occupier, and the proportion he is entitled to deduct from his landlord is so simply provided for by the 74th section of the Act, that it seems impossible for any difficulty to arise upon it in practice. The labours of the Valuers will be very greatly increased, and they have no power of compelling the production of rent-rolls, or of eliciting the necessary information, if the parties are disposed to withhold it. It is apprehended that the landlords will object to producing their rent-rolls, and it will be impossible to place any dependence on the returns inserted by the occupiers. The Valuers selected for this Union, who are exceedingly competent persons, have announced their intention of immediately resigning if required to do this on the terms of their present engagement, and the Guardians are persuaded that it will be impossible to obtain competent persons to perform the duty for anything like the sum they proposed giving.

Columns 10 and 11. The amount of county rate has been inserted in column 11, being universally paid by the occupier.

Columns 12 and 13. The amount to be allowed for repairs has been calculated on a per centage of the gross annual value of the tenement in all buildings, and the amount to be allowed for insurance by a per centage on the value of the tenement, estimated on a certain number of years' purchase at the gross yearly value. These items have been placed in column 13, as the tenant is usually bound to repair, but there is not commonly any obligation to insure on the part of either landlord or tenant.

APPENDIX.

Lismore.

Mr. Curry's letter.

On columns 14 and 15 I have no observations to make.

Column 16 I have already explained.

The points to which I have particularly to draw the attention of the Poor Law Commissioners, and on which to request their advice and directions, are contained in the following queries:—

Query 1. What name is to be put in column 3?

Query 2. Are the Committee of Valuation justified in the directions they gave the Valuers as to the division of property into lots according to its situation in different townlands; and also as to the valuation of houses with their appurtenances, including amongst the latter any walled garden, but excluding any lawn, demesne, or park, which will appear valued in a separate line?—(See No. 22 and 23, in sheet No. 1, sent herewith.)

Query 3. Have the Valuers proceeded on a proper principle in forming the estimate, in the first instance on the gross annual value, in calculating upon this the items to be placed in the several columns 8 to 15 inclusive, and deducting them from it in order to obtain the net annual value?—(See 1 and 2 Vic. c. 56, s. 64, *note* §.)

Query 4. Is it essential that the Valuers should ascertain the rent paid by the occupier to his immediate landlord in order to apportion the assumed poor rate between them in columns 8 and 9; and also, will the proportions in which it appears in the Rate Book be conclusive as between landlord and occupier, so as to entitle the occupier, in paying his rent, to deduct the exact sum which shall appear in the Rate Book against his landlord, although it may be either incorrectly calculated, or calculated on erroneous information, as to the amount of rent paid?

Query 5. Is the principle adopted for filling in the remaining columns a correct one?

I have the honour to be,

&c.

&c.

F. E. CURRY, *Vice-Chairman.*

To W. Stanley, Esq.,

&c.

&c.

[Compared with the Copy of Mr. Curry's Letter.]

Copy of Mr. STANLEY's Answer to Mr. CURRY's Letter.

*Poor Law Commissioners' Office,
Dublin, Sept. 20, 1839.*

Mr. Stanley's answer to Mr. Curry.

SIR,

The Poor Law Commissioners have had before them your detailed observations on the valuation of rateable property in Lismore Union, and they have to state as follows, in answer to the several questions which you have addressed to them.

1. As to the names of owners.

The Commissioners request that the instruction on this question in their circular No. 2 may be followed, viz.: the column for owners should contain "the name of the proprietor or owner to whom the occupier pays his rent."

2. As to valuing separately each tenement; and also each house and garden, regarding lands at distinct tenements.

It appears to the Commissioners that each tenement in the occupation of the same person should be entered distinctly, except connected buildings, which, although held under separate leases, may be considered one tenement if the rents be payable to the same landlord; but the separation of houses and gardens from the lands belonging to them, which the Guardians of Lismore Union propose, would not be conformable to law, unless when the houses and gardens are held as distinct tenements and at distinct rents. In the 64th section of the Irish Poor Relief Act; it is required that the net rent of tenements shall be estimable with reference to "their actual state;" and in the second schedule appended to the Act, there is an exemplification of the intention of the legislature as to the required mode of valuing tenements consisting of "land and buildings," which shows that they should not be separated in the way you have proposed. A separation appears to be quite incompatible with the principle of valuation established by the Act, as the letting value of a good house and garden, not in a town, would be lessened considerably by detaching the land; and as demesnes would also be diminished in letting value, unless appropriate mansions were attached to them. If, however, there be any cases in which mansions and demesnes, or houses and farms, are let separately, then the separate occupiers must be named, and a separate valuation must be made of each holding.

3. As to forming the estimate of value in the first instance. The Act expressly requires (section 64) that the fundamental valuation shall be an estimate of the net annual value; and the intention of the legislature is exemplified in the second schedule of the Act, by placing the column for this estimate in a position which shows that the gross value is to be ascertained subsequently by adding rates, taxes, and other charges to the estimated average net value. This mode of valuation appears indispensable in Ireland, where lands and houses are almost universally let subject to the payment of taxes and other charges by the occupiers. And the attempt to ascertain a gross value in the first instance by assuming an amount of rent which a "solvent tenant should pay, who has no outgoing but rent 'to his landlord,'" could not lead to an accurate result, without reference to the amount of rents actually payable in each district under the influence of the demand for land or houses which may there exist. Besides, it does not appear that estimating the net annual value in the first instance can tend to retard the progress of the Valuator, when all rents paid are net rents; and the subsequent addition of taxes will be a very simple process, grand jury cess being the only tax in the great majority of cases. The Commissioners observe, that the entries on the streets (*sheets*?) of the valuation which you have transmitted,

are erroneous. The estimated net annual value in every instance contains fractions of pounds and shillings for the rent of town tenements, and whole sums are set down for the gross value, although the taxes and cost of repairs appear to be invariably paid by the occupiers. The Commissioners apprehend that the actual rents of houses are usually in whole sums of pounds or guineas, and that fractions of shillings can only be charged where rents have been fixed in Irish currency, and therefore the estimated net annual value should in all cases exclude fractions of shillings. It is also observed, that the estimate of poor rate has been made with reference to the gross value, while the Act expressly directs that the rate shall be charged on the net value (section 64); and hence it is the more necessary that this value should be made in sums of pounds as far as possible, otherwise the calculations of the rates would be exceedingly troublesome.

4. As to the mode of apportioning the landlord's share of poor rate in column 8 of the valuation. If the actual rent can be ascertained, the landlord's portion of poor rate should be computed conformably to the 74th section of the Act; but when occupiers will not disclose the rent payable, the estimated amount of rate must be divided equally between the occupiers and landlords.

5. As to taxes, and the probable charges for repairs, insurance, &c.

The actual amount of taxes payable should be stated; and the probable annual average charges for repairs, insurance, &c., are to be estimated at amounts which, according to the charges of each district, would be sufficient for maintaining the tenements in their actual state; it is not in the Commissioners' power to form an opinion on the correctness of the Valuator's computations of these charges in the Lismore Union, but it is presumed that the Guardians can have no difficulty in testing their accuracy, for which, as well as all other portions of the valuation, they are made responsible under the Act.

By order of the Board,

W. STANLEY, *Assistant Secretary.*

[Compared with the Copy of Mr. Stanley's Letter.]

Evidence.

MR. JOHN H. WATERS, Valuator of the Union, *examined.*

HAS resided in Dungarvan and its neighbourhood about 30 years. Was elected with Dominick Tallon, of Lackan Lodge, valuator of the Union of Lismore, which is within a few miles of Dungarvan. Had formerly valued for county cess in some parishes of the Union, under the county of Waterford Act of Parliament. Witness and Mr. Tallon were employed in the valuation of this Union over 12 months. Generally went together to value; always, except in one parish, Kilcockin. At the time the valuation of that parish was going on Mr. Tallon was unwell; the parish is a small one, the whole belongs to John Kiely, Esq., to whom the valuation was submitted. He was satisfied with it, and although a few objections were made by the tenants, the Valuation Committee declared them frivolous.

The valuers were furnished with a copy of the county valuation and no other documents for the rural districts. Mr. Griffith has as yet made no valuation in this county.

They did not adopt the value of tenements given in the county valuation, for in the principal barony of the Union (Coshmore and Coshbride), they knew that one-fourth had been taken off the original valuation in that part of the barony called Coshmore, to satisfy persons that had made objections, and that reduction had made the valuation considerably lower in many instances than it ought to be. They generally took the acreage from the county valuation, and told the parties the number of acres they were stated to have in that valuation; and they (the valuers) made corrections in any cases when surveys or landlords' returns were shown to them by the parties.

Ruled field books, with printed headings to the columns (which he understood were sent down by the Poor Law Commissioners,) were given to them, but they were too long and inconvenient to use in the field, and as the witness had some field books, which were given to him for the county valuation, he made use of them.

They had with them on each occasion but one field book, which the witness usually kept and made the entries in. They went through every part of each farm. They classified the land, and after they consulted together and agreed as to the quality; they entered in the field book the quantity of each description of land in each part of the farm, with its value, and after totting those different quantities and their values, summed up the value of the whole tenement and entered it in their field-books, in the column for net value. They then added for the rates and taxes. The county cess is the only charge (except tithe-rent charge) on the rural districts. The average amount varies from 10*d.* to 1*s.* in the pound. There were not any localities where the farms were generally from 10 to 20 acres. There was no regularity in letting in certain quantities in particular localities. The size of farms varied from 10 to 100 acres; generally between 20 and 30.

Before they went out to value, they consulted the guardians, as to the maximum which they should fix for the best class land, as was done in the county valuation, and a maximum was agreed of 45*s.* for the lands near the town of Lismore; 50*s.* for those near Tallow. The valuation of the rest was left to their own discretion. They had a graduated scale downwards, supposing the best land to be worth 50*s.*, and does not think any land (except in the immediate vicinity of a town) is worth more. They generally required to know the rents, as they were directed to get a return of the rents wherever they could for the clerk, that he might fix the landlord's rate; but they generally found an indisposition on the part of the tenants to tell the true rents, for they appeared to think that if they stated they held at low rents, they would be rated low; they therefore did not value according to the rents.

About one-fourth of the Union is composed of mountain farms with strips of low land. In Mountain farms.

APPENDIX.

Lismore.

Mr. Stanley's letter.

Evidence.

MR. WATERS, Valuator.

Previous experience.

Valued jointly with Mr. Tallon.

Did not take value from county valuation.

Took acreage from county valuation.

If surveys, &c., shewn valuation altered.

Used but one field book. Examined each farm. Ascertained net value; added for rates, &c.

County cess only charge. The size of farms generally from 20 to 30 acres.

Maximum of value, 45*s.* an acre for land near Lismore; 50*s.* near Tallow.

APPENDIX.

Lismore.

Evidence.

Valuations of two farms made for the Duke of Devonshire, not differing much from valuations.

Thinks the rents high.

Valued houses separately.

Valued houses in town on same scale as in country. More than 20 per cent. under the rents.

Took no account of tenure, or extent of holding, or registry.

Test of value.

Valuation 20 per cent. under the rents, except on Duke of Devonshire's lettings.

Size of farms varies from 5 to 100 acres.

The tenants wished for low valuation,* landlords for a uniform one. Revising Committee appointed.

The revision not yet completed.

these cases, when the tenants had been a long time in possession (what they call old takes), they valued over the rents, and in many cases of the Duke of Devonshire's tenants, they also valued over the rents. But generally speaking, the valuation was under the rents. In his opinion the Duke of Devonshire lets his lands fairly. Believes that the practice (where any of the Duke's property is about to be let) is to have a valuation of it made, and to let to the tenants at a fair rent according to that valuation.

Mr. Witham, the Duke's agent, produced before the revising committee, for the purpose of checking the Poor Law valuation, valuations of two farms in the Union on the Duke's estates, which were valued for the purpose of letting, and there was but two pounds' difference between the valuation made by witness and Mr. Tallon and that made for the Duke, and those valuations were never seen by witness or Mr. Tallon, before they were produced to the committee.* Mr. Samuel Smith, who was one of the revising committee, had valued a whole townland for the Duke of Devonshire, and on comparison, it was found that the Poor Law valuation nearly agreed with that made by Mr. Smith. Thinks that the rents in this county are high, on account of the competition for land. In every instance, valued the houses separately, and thatched houses very low; on account of the great comparative cost of keeping such in repair, and in cases where cottiers occupied houses without any land attached, their houses were not valued, as they were considered as farmer's labourers. They did not go into every house, but on a view of the exterior judged of the value. In small houses, which would cost from 100*l.* to 150*l.* to build, they allowed five per cent., or rather less on the sum required for building, and then made a further deduction (more or less as the case may be) for the repairs it was likely to require, judging from the state the house appeared to be in. He considers that they valued the houses in the town, in most cases, on the same scale in relation to the rents as they valued the rural districts, that is to say, that they valued the houses in towns more than 20 per cent. under the letting rents. They only charged for insurance on slated houses, or houses of that description, which were likely to be insured; but they never inquired whether they were actually insured. While valuing the town of Tallow, they had a valuation of the town which was given to them by Mr. Witham, the Duke of Devonshire's agent, and which was made for county taxation. Their valuation was lower than that given by Mr. Witham. While valuing Lismore, they had not the valuation of that town, which was previously made for a similar purpose. In valuing lands they did not inquire for what term, or under what covenants the lands were held, but valued the land in the condition they found it, nor did they make any distinction between large and small farms. They merely valued the land according to its quality; they generally saw some part of the land turned up which enabled them to judge, and when it was not turned up they judged by the gries of the ditches. In some places the tenants used to bring out spades and force them to dig the land and examine the soil to induce them to value it low. They never inquired whether the tenant registered or not, except in one case, where witness, thinking the tenant had a bargain, inquired, and found he had registered as a 10*l.* freeholder. In estimating the value of the land, they first considered the locality, and the convenience or inconvenience derived from that. In many instances, asked the general letting price in the particular place. They took those matters into their consideration, and having themselves a knowledge of the value of the lands from having resided in the neighbourhood, they formed their own judgment of the value of each tenement. They did not make an actual calculation, in valuing each tenement, of what the land would produce, and how much of the produce should go to the landlord, and how much to the tenant. It would take years to make such calculations in every case. They relied upon their own knowledge and experience, and believes on calculation the result would be the same. They considered the net annual value to be what a solvent tenant could afford to pay, and support his family; say, give them a bit of meat once or twice a-week, on a farm of from 20 to 30 acres. In dairy farms, where it was a convenience to take a large farm for stock, did not consider the land to be worth what it was usually let for. In such cases the farmer had a large capital embarked, and paid more for the convenience of having the farm for his stock, than it was intrinsically worth for cultivation. The profits of such a farm are produced as much by the stock as by the land. He considered the valuation of this Union, generally speaking, to be 20 per cent. under the rents; except where the Duke of Devonshire lets, thinks it is more than 20 per cent. After the valuation was made got the rents from several tenants who he knew would not deceive him, and from some agents, and also from some returns the landlords sent, and was thus enabled to make the comparison.

The size of the farms in this Union varies from five to one hundred acres, but generally between twenty and thirty acres. The demesnes are considerably larger, some 500 to 600 acres. Thinks the Union of Lismore is valued higher than Dungarvan and other Unions.

The general disposition of the tenants is to have the valuation as low as possible, and the landlords did not seem to care much whether it was high or low, provided the valuation was uniform throughout the Union. After the valuation was completed the books were lodged in the usual manner for public inspection, and objections were lodged. A committee of revision was then appointed consisting of three persons,—Messrs. Samuel Smith, agent to several large proprietors, John Smith, agent to Arthur Keily, and Roger Hudson, one of the guardians. The committee of three attended about ten days from 11 to 4, for five days in each week. They had the witness before them, as he was the person who kept the field-books, and had the principal management of the valuation-books, and they overruled several of the objections.

Mr. Tallon did not attend before the Revising Committee. A new committee has been

* *Vide Table, post, page 319 b.*

recently appointed. Both valuers attended their first meeting, and several of the objections were overruled. The revision is not yet completed.

Sir RICHARD MUSGRAVE, Bart., Chairman of the Board, *examined*.

Is chairman of the Board of Guardians, and also chairman of the Valuation Committee. The valuers made returns to the committee from time to time of the progress they had made, and the committee generally examined as to the mode in which they conducted the valuation, and there was a good deal of discussion as to the reasons why they valued, as it appeared, in some cases high, in others low. The gentlemen on the committee were either farmers or gentlemen having properties in the Union, or their agents; and all took an interest in the proceedings. The elected guardians were generally farmers. The valuers conducted the valuation with great attention and surprising accuracy, considering the time; he was quite surprised how they could do it. They detected many inaccuracies in the county valuation. He considered that his lands have been valued by the Poor Law valuers full 25 per cent. under the rents he generally gets. In the townland of Ballyduff, South, a large farm of his was valued at 24s. or 25s. an acre, which he has let within this year (last January) for 35s., and he was offered for it 40s. an acre, and that too by a man who offered to lodge money as a security. Another farm of his on the same townland he let at 23s. an acre. He was offered for it 30s. an acre, and that farm was valued at 17s. the acre. He thinks that, generally speaking, the same proportion has been observed throughout the valuation, and that it is lower than the rents in all cases, save in old takes, and where the Duke of Devonshire has let.

In Dungarvan the valuation is so much lower that he is inclined to appeal against the whole rate. He understood that in agricultural districts the valuers did not value the farm houses of the cottiers. Some of these are worth from 2*l.* to 3*l.* In his opinion it is impossible that a uniform valuation of land can be had throughout the whole country, as the same description of land will bear a higher price in a county where there are great agricultural improvements, than in a county where agriculture is not so much improved.

He has himself an estate in Kilkenny, and also in this Union, and he finds that lands of the same description bring a higher price in one county than in the other. A large farm of his, of about 600 acres, lately became out of lease in this Union; he advertised part of it, and found that he could get 40s. an acre for it, but afterwards gave it to the old tenant at 35s.

He thinks the price of land is rising in Ireland; all the causes which are generally said to cause an increase in the price of land, are in full operation in Ireland; increase of population, the interest of money lowered, improvement in agriculture, and increase in the price of produce. Thinks the lands in this Union are let at moderate rents. Part of the Holmes estate, lying in this Union, was lately purchased by Mr. Smith of Ballinatrav, part of it was subject to leases, part let to tenants at will, the rental was 1234*l.* a-year, and the purchase money was 31,000*l.* Another part of the same estate near Dungarvan was sold at about the same rate of purchase the year before last, April twelvemonth, and generally speaking, the estate was sold at from 24 to 28 years' purchase. The farms in this Union are not large. Large farms form the exception, seldom exceeding from 40 to 50 acres. There are 30,000 acres of mountain land in the parish of Lismore alone, and at least 10,000 more in the rest of the Union. He would say there are about 50,000 acres of mountain land in the Union. He went through the valuation of a great part of the Union, and examined it, and thinks it was a fair valuation, fairly taken, and that no influence was used on the valuers. He heard there were objections to the valuation, but many of them were, he understood, for the number of acres returned, some for value.

JOHN BOWEN GUMBLETON, Esq., ex-officio Guardian, *examined*.

Is an ex-officio guardian, and was, as such, a member of the Valuation Committee. He agrees with Sir Richard Musgrave, in thinking that the valuation of the Union is about 25 per cent. under the rents.

The rents in this Union are in general moderate. The Duke of Devonshire never lets at the highest rent, and the other proprietors endeavour to follow his example.

He examined that part of the valuation which affected his own property, and was satisfied with it. At first objected, because a neighbour's land was valued lower; but on explanation found it was under wood, and he then withdrew his objection.

As far as he had an opportunity of judging, he thought the valuers acted with great fairness, and endeavoured to give general satisfaction. There was no favouritism. They appeared to be subject to no undue influence; and there was nothing exceptionable in their conduct.

VALUATION of some Houses in the Town of LISMORE, the Property of the Duke of Devonshire.

Name of Occupier.	Net Annual Value, as in Rate Book.	Valuation by Five persons, in June 1837.

APPENDIX.

Lismore.

Evidence.

Sir R. Musgrave, Bart.
Chairman of the
Board of Guardians
and of Valuation
Committee.

Valuation Committee
how formed.

Valuation 25 per cent
under rents.

Instances on his own
estate.

Obstacles to a uniform
valuation of land.

Price of land in Ire
land rising.

Land in Union mo-
derately let.

An estate in the
Union, £1,234 a year,
purchased for £31,000.

50,000 acres of
mountain in the
Union.

J. B. Gumbleton, Esq.
ex-officio Guardian.

Valuation 25 per cent.
under rents.

Rents moderate.

Examined valuation
of his own property,
and satisfied with it.

Valuers' conduct
correct.

RENT AND VALUATION OF £10 COUNTY ELECTORS, (registered 1832 to 1840,) so far as ascertained.

COUNTY OF WATERFORD.

LISMORE UNION.

Valuation Committee

New Valuation Com
mittee comprising the
whole Board.Appointment of
valuators.

Assistant Valuators.

Valuation
Committees.

August 26, 1839.

At a meeting of the Board of Guardians, Sir Patrick Bellew in the chair. Present 7 ex-officio, 22 elected guardians.

Resolved,—That the following gentlemen be appointed a Committee of Valuation:—T. Mathews, P. Langan, T. Bermigan, W. Coyle, T. Markey, T. Donough, H. Chester, R. Maguire, T. Ternan, W. Catines, and St. G. Smith.

December 12, 1839.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair. Present, 4 ex-officio, 12 elected guardians.

Resolved,—That the resolution of the 26th August last, appointing a Committee of Valuation for the Union having been read and considered, it was proposed that the said resolution be amended, and that the entire Board of Guardians do compose the said Committee of Valuation, 5 to be a quorum, with a view to the attainment of more general information for the purposes of their inquiry in a matter of such importance to the interest of the rate-payers, and that St. George Smith, Esq., be appointed chairman of said committee.

January 9, 1840.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair. Present, 3 ex-officio, 6 elected guardians.

The correspondence with Mr. Griffith relative to the state of progress of the valuation of the Union was read.

February 6, 1840.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair. Present, 5 ex-officio, 21 elected guardians.

The subject of the valuation of the Union being considered, it was resolved that the Board should advertise for inviting tenders from valuers for the Union.

March 5, 1840.

At a meeting of the Board of Guardians, Sir P. Bellew in the chair. Present, 7 ex-officio, 20 elected guardians.

Messrs. Shiel and Gargan were appointed valuers to the Union, subject to their naming a fit person to value the house property.

March 23, 1840.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair. Present, 4 ex-officio, 23 elected guardians.

The Poor Law Commissioners' communication, approving of Messrs. Shiel and Gargan as Valuers to the Union, was read, when the latter handed in the names of several whom they considered competent to act as assistants to them, and requested the Board to select any they pleased.

Resolved,—That Messrs. Conolly and Clark be appointed assistant valuers.

April 16, 1840.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair. Present, 5 ex-officio, 14 elected guardians.

Resolved,—That the several sheets of the ordnance survey for this Union be furnished, and that the clerk lend them to the valuers according as they may require them.

May 14, 1840.

At a meeting of the Board of Guardians, St. George Smith, Esq., in the chair. Present, 2 ex-officio, 16 elected guardians.

Resolved,—That 30 copies of the Commissioners' circular of valuation be ordered for the use of this Board.

Resolved,—That the elected guardians of the several divisions of St. Mary, Duleek, and Ardath, and the ex-officio guardians residing therein, be a Valuation Committee for their division, and to report their opinion thereon to such meeting of the Board, and that H. B. Coddington, Esq., be the chairman of said committee.

Resolved,—That the elected guardians for the divisions of Stamullen and Julianstown, and the ex-officio guardians residing therein, be a Valuation Committee for these divisions, and that they report thereon to each meeting of the Board; and that Thomas Brodigan, Esq., be the chairman thereof.

June 11, 1840.

At a meeting of the Board of Guardians, Sir P. Bellew, Bart., chairman.

Resolved,—That the clerk be authorized to order books, paper, &c., for the valuers.

Resolved,—That the elected guardians of the several divisions of Monasterboice, Moyleary, and Mellifont, and the ex-officio guardians residing or having property therein, be a Valuation Committee for these divisions, and to report their opinions thereon to each meeting of the Board, and that B. J. Balfour, Esq., be the chairman thereof.

APPENDIX.

Drogheda.

Extracts from Minute Book.

Resolved,—That the elected guardians of the several divisions of St. Mary, &c. &c., residing or having property therein, and the ex-officio guardians, be a Valuation Committee for the examination of the progress made by the valutors in said electoral divisions, and that they be required to report them to each meeting of this Board, and that Thomas Donogh, Esq., be the chairman thereof.

Resolved,—That the clerk be authorized to furnish Mr. M'Cann with a copy of the resolution passed this day, approving of the conduct of D. Phelan, Esq.

July 9, 1840.

At a meeting of the Board of Guardians, T. Donogh, Esq., chairman. Present, 4 ex-officio, 7 elected guardians.

Revision of valuation.

The valutors being called into the meeting, arrangements were made for them to meet the guardians of the several divisions on the days enumerated below, for the purpose of revising the valuations of these divisions, viz., Termonfechon, Clogher, and Dysart, and Tullyallen, Mullary, and Monasterboice.

August 6, 1840.

Reports of Valuation Committees.

Mr. Brodigan's report of the meeting of the guardians and inhabitants of the divisions of Julianstown and Stamullen, for the purpose of revising the valuations of these divisions, was read, recommending various alterations.

H. B. Coddington's, Esq., report of the meeting of guardians and inhabitants of the divisions of St. Mary, Duleek, and Ardcath, for the purpose of revising the valuations of these divisions was read, recommending various alterations.

T. Donogh, Esq., verbally reported that at a meeting of the guardians and inhabitants of the east and west wards of St. Peter's, Drogheda, for the purpose of revising the valuation of these divisions, very few alterations were made in said valuation, and that they gave general satisfaction.

H. Chester's, Esq., report of the meeting of guardians and inhabitants of the divisions of Termonfechon, Clogher, and Dysart, for the purpose of revising the valuation in these divisions, was read, recommending various alterations.

B. J. Balfour, Esq., verbally reported that at a meeting of the guardians and a few of the inhabitants of the divisions of Tullyallen, Mullary, Mellifont, Monasterboice, &c., for the purpose of revising the valuation of those divisions, a considerable number of alterations were made therein; that such alterations were chiefly additions to the valuations made by Messrs. Shiel and Gargan; that his property was overcharged as to the quantity of ground he occupies, to the amount of about 50 acres, and that several other persons complained of being overcharged in the same way.

September 3, 1840.

At a meeting of the Board of Guardians, H. Chester, Esq., in the chair. Present, 4 ex-officio, 5 elected guardians.

Attendance of Poor Law Commissioner required.

Resolved,—That the Assistant Poor Law Commissioner be requested to attend the next meeting of the Board, for the purpose of explaining some difficulties which have arisen with regard to the valuation of the Union.

October 1, 1840.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair. Present, 4 ex-officio, 12 elected guardians.

Additional payment to Valutors.

Resolved,—That 20*l*. be allowed to the valutors, in addition to their contract, for the purpose of completing the calculations and filling up the columns required in the valuation of the Union, to the satisfaction of the guardians and Poor Law Commissioners.

November 26, 1840.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair. Present, 4 ex-officio, 6 elected guardians.

The valutors having this day signed and executed the contracts for making the valuation, and with their sureties, Messrs. J. O'Brien and Thomas Gargan, entered into the necessary bonds and securities for the execution of the same.

Resolved,—That the said contract and bonds be signed by the chairman on behalf of the Board of Guardians, and that the clerk be directed to affix the seal of the Union thereto.

The contract and bonds to be deposited with the clerk for safe custody.

Resolved,—That the sum of 250*l*. be paid to Messrs. Shiel and Gargan, on account of their contract with the Board of Guardians for the valuation of the Union.

Resolved,—That the clerk be instructed to issue on Saturday next the notice directed by the Poor Law Commissioners (form F.), that a rate is intended to be made on the new valuation of the Union, and that the valuation will be shown by the clerk of the Union from the 30th November to the 24th December, inclusive, at the Tholsel.

December 24, 1840.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair. Present, 4 ex-officio, 18 elected guardians.

The clerk laid before the meeting a large number of written notices of objections to the valuation, when after some discussion as to the best mode of disposing of these objections,

Objections to valuation.

Resolved,—That the objections to the valuation delivered in by the clerk be entertained and examined.

Amendment proposed,—That from the multiplicity of objections to the valuation entered with our secretary by the rate-payers, it appears to us to be expedient to postpone their consideration to the next meeting.

When a division took place and the amendment was lost by a large majority.

The original motion being then put, was carried unanimously.

The objectors to the valuation being in attendance were then called in to the meeting, and the several cases called on.

Resolved,—That the valuation as now revised by the Board of Guardians, this day, be confirmed; that a rate of 4*d.* in the pound, for the relief of the poor, be now declared on the rateable property situate in the Drogheda Union.

Resolved,—That the valuation being now confirmed, and a rate declared, that the clerk be directed to publish, in the two Drogheda papers, that the valuation, as confirmed this day, will be laid open for the inspection of the rate-payers, at the Tholsel, for the next succeeding eight days.

February 18, 1840.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., in the chair.

Present, 4 ex-officio and 6 elected guardians.

Resolved, on the motion of Patrick Matthews, Esq., and seconded by P. Langan, Esq., and carried unanimously,—That a rate of 5*d.* in the pound sterling be now made on all the rateable property in the Union, according to the valuation set forth in the valuation books, and copied into the rate books now produced.

Rate declared; 5*d.*
in the pound.

January 21, 1841.

At a meeting of the Board of Guardians, B. J. Balfour, Esq., chairman.

Present 19 guardians.

It was proposed that the two undecided rate cases, adjourned from our last meeting, be now entertained; which being put from the chair, it was proposed and carried,—That there was no necessity for the motion, inasmuch as the Board of Guardians have already heard and decided all the objections to the valuation.

Evidence.

Mr. N. MARKEY, an elected guardian, *examined*.

Evidence.

Mr. Markey,
Elected Guardian.

Was a member of the Valuation Committee which investigated the valuation of his own district. The valuation of several divisions came before the same committee.

Thinks the valuation a fair one, and something below what a solvent tenant would give—about 4*s.* an acre. But the valuation is made on a scale at which a fair landlord would set his land. In no case is the valuation up to the rack-rent. In some instances the rate is higher than the rent paid. In such cases the land is held under old leases. The term rack-rent, in his opinion, applies to any rent beyond what a solvent tenant could pay.

Valuation is a fair one.
Is lower than the rent
which a solvent tenant
would give

A rent which a tenant living miserably could pay from the produce of his farm is a rack-rent.

Rack-rent.

Thinks a fair rent should enable a tenant to live comfortably. Never considered what portion of the produce of a farm would be a fair rent. He is a farmer, and forms his opinion of the value of land by considering what sort of grazing land it is, or what quality of arable. The land in the southern parts of the Union is principally grazing land, one-half at least. This is the best description of land, and generally sets for 2*l.* 2*s.* per acre. Thinks 50*s.* per Irish acre is the highest rent paid for land in the rural districts of this Union.

Fair rent.

Grazing land.

There is a direct communication between Drogheda and England; this adds to the value of land in the neighbourhood.

In the northern parts of the Union the land is of an inferior description, it is principally under tillage. The farms there are smaller than in other parts of the Union. Small holdings set higher than large farms; when a fruit garden is attached to them, they are rated much higher than large farms—in some instances so high as 5*l.* per acre; this takes place only in instances where all the ground held by an individual is garden ground. Land in the neighbourhood of Drogheda is rated much higher than ground of the same quality at a greater distance. Does not mean by this town-fields, but such as are used by farmers. When any portion of the Union was valued, the valuation was submitted to a committee, consisting of the guardians elected for the districts valued, and ex-officio guardians having property in them.

Small holdings.

Fruit gardens.

Land near Drogheda.

The valuation was read by the valuator from the field books. Members of the committee often suggested alterations; these suggestions were generally made for the purpose of lowering the valuation of particular farms. The committee then considered the propriety of making the alteration suggested; and, if they considered it reasonable, they altered the valuation. The valuator had no power to retain the valuation as made by them.

The valuator gave their reasons to support their valuation: if the majority of the committee thought them satisfactory, the valuation was retained, if not it was put to the vote, and decided by the majority, and the land was valued according to the judgment of the committee.

Valuation Committee
decided by majority of
votes.

The valuator was a person employed to afford them information, but the committee did not consider themselves bound by the value he set on lands. Thinks a committee would be a useless body if controlled by the judgment of the valuator.

Valuation Committee
did not consider itself
bound by opinion of
valuators.

If the valuator valued black acre at 30*s.* per acre and white acre at 35*s.* per acre, one of the committee would say, if he thought the land of equal value, that both should be valued at 30*s.* or 35*s.*; the committee chose which they would select by considering what each was worth; did not take the rent into consideration; they are generally too high. Rent is no criterion even of the relative value of land, as even in recent settings one farm is set at a higher rent than another of equal value. If he got a lease of land he would give more for it than if he took it from year to year.

Rents not regarded,
being generally too
high.

Extent of Union.

Quality of soil.

Qualification of Valuators.

Instruction to Valuators.

If he got a lease he could make any improvements he thought useful. Has no recollection that it was discussed by the committee, whether the value should be considered as if the farm was leased or let from year to year.

The greater portion of the Union consists of farms between 60 and 300 acres; there are, however, many small farms, varying from two to twenty acres. If there was a house upon the farm, the value of the house increased the value of the land proportionably.

A great portion of the lands in this Union are leased at short terms. There is an enormous competition for land; a ruinous rent is often paid.

The consideration of this excessive competition did not weigh with the committee when valuing land. Griffith's valuation is lower than the valuation under the Poor Law. Griffith's valuation of prime land is very low; but his valuation of bad land is up to the fair reasonable rent. In some cases Griffith's valuation has been reduced on appeals. The Poor Law valuation is considered much better. There are only three appeals from the valuation.

Some lands in the Union, valued at 35s. under the Poor Law, would, if in the market, bring 50s. per acre.

The landlords seemed as anxious to lower the valuation as the tenants; they seemed to be of opinion that they would be benefitted by a low valuation.

The county cess is paid according to Mr. Griffith's valuation; it generally amounts to 1s. 3d. half yearly per acre.

Mr. CLARKE, valuator of the town of Drogheda, *examined.*

Contracted to value the houses in the town and suburbs for 45l. Valued houses before for parish purposes. He is well acquainted with the expenses of building; he is employed by Mr. Leland, a merchant, who is in the habit of building houses for the purpose of setting them. He sometimes works, and at other times is employed by Mr. Leland to superintend the building of his houses. From these occupations he has considerable experience in the value of houses in the town of Drogheda.

He visited every house, and procured the applotments made for parish purposes, for the purpose of informing himself of the letting value of houses. In the town, houses of the same description set at very different rents, according to the locality; but he did not adopt the value set upon the houses in the parish valuation; his valuation of houses in good repair was generally about a sixth lower.

In houses that were in a bad state it was generally a fifth lower.

Thatched houses he valued from a third to a fourth lower than the letting value. The parish valuation generally corresponded with the letting value.

The principle he went on was to value a sixth below the letting value. And when he considered the premises would require a large outlay to keep the tenement in the repair it was when valued by him, he reduced the valuation below this sixth, in proportion as he thought the premises would require unusual repair.

When valuing for parish purposes, he valued at a moderate letting value, not at a rack-rent. And the reason he adopted a different scale in valuing for the Poor Law was, that his instructions were different. He knows of no appeal against his valuation; the townspeople, however, are complaining that he adopted a higher scale of valuation than the valuator of the houses in the rural districts.

The expense of outlay would be a bad criterion of value, as the same sum of money expended on a building in one street would produce twice the return that it would in another; for these reasons he was obliged to refer to rents paid.

A valuation of town property on any other principle could not be fair. He either ascertained the actual rent paid for each house, or knows what it would be. He calls that rent a rack-rent which is above the value. The rent next above the value is a rack-rent. Considering the trade of this town, the houses generally are set at a rack-rent; still the occupiers pay their rent. When making his valuation he took the rent paid by a solvent tenant into account, even although he considered it a rack-rent. However, if two houses were of equal value, and set at different rents, he then would place on them—taking the locality into consideration—what he considered would be a fair rent; and by that rent he estimates the value as made in his valuation. He thinks that town property is generally set higher to yearly tenants than on leases; however he made no allowance for the chances of houses being untenanted.

He was not guided by Mr. Griffith's valuation; in fact, that valuation could be no guide, as it only deducted a third from the parish valuation. The tenants generally show their receipts for the rent.

Mr. SHEIL, valuator of the Union, *examined.*

He and Mr. Gargan were appointed valuers of this Union. 300l. was given them for perfecting the valuation.

The Union contains, according to the Ordnance survey, 110,000 acres. There is very little waste.

The greater portion of the Union is prime land.

Mr. Sheil was in the habit of valuing growing crops for tithe; never before was employed to value land. This was the first occasion Mr. Gargan was employed as a valuator. The capabilities of both, as valuers, were well known to the Board.

The Board of Guardians gave them no directions as to the manner they should value land, whether at a rack-rent, a reasonable rent, or low rent.

APPENDIX

Drogheda.

Evidence.

The only instruction they received was a printed document from the Commissioners, which directed them to value land at a fair reasonable value; what a good and solvent tenant would be willing to pay, and at a rate which a good indulgent landlord would set his ground to an improving tenant. This is the scale at which he valued the lands of the Union.

Was furnished with the Ordnance survey. This served as a check to the returns under the tithe applotments.

Mr. Griffith's valuation was not perfected when they made their valuation. The valuers have since seen Mr. Griffith's valuation of the upper barony of Duleek.

His and their valuation of good lands agree pretty nearly; in inferior lands they differ greatly. Where a bad sub-soil lies under a rich surface, Mr. Griffith's valuation is low, compared with theirs; for instance, lands of this description, valued, according to Mr. Griffith's valuation, at 14s., is valued generally by them at 1l. Without knowing what Griffith's valuation was, they find that in many instances, where both valuations related to good lands, they exactly correspond.

The valuers went together, on every tenement in the Union. Generally ascertained the rents paid by the occupying tenants; but, in placing a value on the lands, he was not guided by it. They referred to the rents for the purpose of ascertaining how lands were enhanced by the locality.

In St. Mary's, the principal proprietors are Mr. Taylor—his lands are generally leased. Some of his lands are rated by them at 1l. 18s. Barlow, his tenant, pays for this land 2l. 18s.; out of this the landlord pays about 4s. tithe—Mr. and Mrs. Cottingham's lands, they think, are set about 4s. above what they are rated at. The value of a farm-house makes a difference in the rating, but not at all in letting—Mr. Barlow and Mr. Smith: their ground is set on leases for 21 years. Cannot say what rent it is set at; tenants give evasive answers. In valuing lands, he considered them as if leased for 21 years. Had no communication with the guardians, on the principle they should adopt.

The Assistant Commissioner told them that, in valuing the Union, they should place a fair and reasonable value; what a good and solvent tenant could pay.

The land in this Union is chiefly held by good and solvent tenants. They hold generally from 60 to 200 or 300 acres; the small holdings vary from 2 to 10 acres; they pay a higher rent than large farms. The value placed on those tenements by the valuers was according to the real value, and not according to the mode in which they were let.

Never took into consideration that a man registered a vote out of the premises rated. Is acquainted with many registered 10l. freeholders; knows the rent paid by some of them. A great many 10l. freeholders register out of small portions of land. In Gormanstown, many persons cultivate fruit gardens; and they are valuable. Fruit gardens are generally valued at 5l. per acre. Formed their judgment of the value of land from their experience as farmers; entered into no calculation. Most of the small farmers make money by jobbing, not by the produce of the land. Does not recollect rating any 10l. freeholder at a less rent than that paid by him.

The Board of Guardians divided the Union into five districts, for the purpose of revising the valuation. Notice was given when meetings would be held; and a place was appointed within each district, where the valuation was read in the presence of the landlords and rate-payers. A committee of the Board attended. Any rate-payer might make an objection, and in several instances did so. The justness of the objection was considered by the committee, and altered according to what the committee and the valuers thought fair. No difference ever took place between the valuers and the committee; sometimes one gave in, sometimes the other.

The committee never put a question of value to the vote; the objections were few and trifling. When the valuers had concluded the valuation, about forty objections were made, and only three alterations.

Cannot give any account of the rents paid by the 10l. freeholders. Never looked to the Act of Parliament for information concerning the principle on which he (Mr. Sheil) should value. Derived all his information from the extracts of the Act furnished by the Commissioners, which directed him to investigate the reasonable rents in the neighbourhood of the property valued, and also contained a list of the rateable property.

There was an example given in the instructions; viz., a farm paying 200l. a-year, which was valued at 160l.; in such a case the landlord would pay 5l., the tenant 3l., for the purpose of equalising the rate between landlord and tenant. They took the fair reasonable value, that the landlord could not have cause to complain. Mr. Gargan, however, did not derive his information from any other source than his own knowledge and experience of the letting of lands.

The general valuation of the Union lay open for public inspection for 21 days, and 8 days additional.

The landlords seldom interfered in the valuation. Including waste and all, gentlemen's demesnes were valued at from 2l. 2s. down to 1l. 4s. per acre. Calls "waste" what is occupied by trees, pleasure grounds, and ditches; in fact, what does not make money. They were to look to the value of property, what it would produce. Took Mr. Griffith's valuation as the standard for valuing gentlemen's houses. This is not included in the value placed upon the land in the demesne. They valued the houses occupied by farmers at a certain sum; they then valued the land independently of the houses, added both together, and divided the same by the number of acres; the quotient was the acreable rate.

P. Ternan, Esq., J.P.

Mr. WHITWORTH, clerk of the Union, *examined.*

His appointment took place in March, 1839. He was present at all the meetings of the Committee; at those meetings the value placed on every tenement was read by the chairman from the field-books. Members of the Committee made remarks when they thought it necessary. The valuation made by the valuator was generally satisfactory.

Previous to the meetings of the Committee the valuation was discussed very fully at public meetings, consisting of the rate-payers, the valuator, and the Guardians of the district valued.

The principle the valuator should adopt in ascertaining the value—whether the reasonable letting or otherwise—was hardly, if at all, discussed by the Board. Their whole anxiety seemed to be that a fair relative valuation should be maintained.

He was present when the Assistant Commissioner, from time to time, instructed the valuator on the principle they should adopt in valuing the Union.

On those occasions the Assistant Commissioner referred to the Act of Parliament, and pointed out errors which the valuator had committed. Does not exactly remember the nature of them, but they were errors in principle. To the best of his recollection, the Assistant Commissioner told the valuator he was valuing too low. It is impossible to make valuator come up to the mark at which property would let to a solvent tenant.

Has frequently valued lands for parish purposes; such valuations of the parishes about Drogheda have been frequently made.

The valuations made by the Tithe Commissioners are not considered accurate; but as they effected a great improvement on the old system they were not objected to.

In making the present valuation for the Poor Law, the tithe valuations were never referred to. Mr. Griffith's valuation was frequently noticed; it is considered a fair one, but rather low. It is generally lower than the Poor Law valuation of houses. The value, however, placed on house property in the country is much higher in Mr. Griffith's valuation than under the Poor Law.

As gentlemen's seats are rarely in the market, an opportunity seldom occurs of estimating their value by the rent which would be paid for them.

In the neighbourhood of this town, town-parks let at from 4*l.* to 6*l.* per Irish acre. This ground is rated about 4*l.* per Irish acre.

There are only three appeals from the valuation: in all the appellants complain that others are rated lower than they are.

Has valued the town-parks for parochial purposes. He does not, however, consider that his valuation was perfect. He endeavoured to make a valuation at the rent the property would bring in the market. The occupiers gave him every opposition. If he adopted a low scale of valuation there would not have been any opposition. Thinks that it would be very difficult to value land at the market price—he means at a value that a solvent tenant would pay. This is his opinion, founded on his experience as a valuator.

He is not very well acquainted with the value of land in the rural districts of the Union. But from all he has heard and seen, he thinks he would have a good bargain if he rented the lands of the Union at a rent exceeding the valuation by 20 per cent. He had many opportunities of forming an opinion in this way. He has been engaged for many years in investigating the value of property in the county of the town. It contains between 5000 and 6000 acres.

He is acquainted with the letting value of houses in the town of Drogheda. He thinks the valuation of them is 20 per cent. lower than the letting value. He has compared the valuation with the letting value in fifty instances, and in every instance he found this to be the case. Houses of a middling description are valued higher than houses of the best or worst description. Inferior houses often require repair; the rent is often lost, and there is great trouble in collecting it. Houses of a middling description are more easily let than the best class of houses.

Thinks that, on the whole, the valuation of town property is 20 per cent. under the letting value, making every allowance for repairs, insurance, and uncertainty of letting. There is a strong disposition to have a low valuation.

The valuator has made the valuation without any reference to the registry of parliamentary voters or burgesses. They have often made the valuation of a tenement close to the amount: sometimes within a few pence; and thinks that, if they had had the registry in view, they would have added that sum for the purpose, especially as the occupier, in many such instances, certainly had the value, all the tenements having been undervalued to a much greater amount than that. Only knew of one instance in which a man claimed to have his rate raised in order that he might not lose his franchise. They all come and battle to have the amount lowered; but that is the only instance in which an occupier claimed to have his rate raised. The valuation has been made since the Corporation Bill passed. The people are fully aware that the franchise of burgesses under the Act depends on the valuation under the Poor Law.

P. TERNAN, Esq., J. P., *examined.*

The value set by the Poor Law valuator, on houses in the town of Drogheda, is below the rent. The valuator is conversant with the details of building, and the rents at which houses set. There are few villas about the town; that is, few persons doing business in the town have country residences. The valuation of the town has given general satisfaction.

Town valuation
satisfactory.

APPENDIX.

Notes illustrative of preceding Tables.

COMPILED FROM LOCAL INFORMATION.

Drogheda.
Notes to table of townlands.
Kilsharvan.

No. 1. *Kilsharvan*.—This townland lies south of Drogheda, about two miles east of the Dublin road: it lies between Shallon and Beaumont. The soil is of middle quality: it is partly limestone. The crops are half grazing and half tillage. There is a linen bleach-green kept in it, which gives a good deal of employment. A good deal of it is farmed by the owners; one of them, Mr. Armstrong, farms about 100 acres. He lets another portion of about 100 acres, which is now bought by Farrell. Mr. Mathews occupies a considerable grazing farm, which is his own. The population is very thin, except about the bleach-green.

Smithstown.

No. 4. *Smithstown*.—about $2\frac{1}{2}$ miles from Drogheda, on the south side along the Dublin road. It is generally a bad description of soil on the east side; part of it on the west side is better. It is generally tillage. The crops are wheat, peas, oats, and potatoes. The rents are from 2*l.* to 2*l.* 2*s.* The population is thin. There is little pasture. Mr. O'Callaghan holds about one-half of it; he has not outlet, except cabin and gardens to his workmen. The rents are paid; the farmers make the rent out of the land. Thinks the rents are too high for the tenants to get rich.—MR. W. OWENS.

Shallon.

No. 6. *Shallon*.—is about $3\frac{1}{2}$ miles from Drogheda, 2 miles west of the old Dublin road. It is about the middle quantity of land; it is a clay soil, with limestone bottom. The crops are wheat, oats, and potatoes. It is well enough populated for the extent of it. It is cultivated by about a dozen farmers. They hold under Mr. Chester. There is no cottier population; each farmer with the help of his family tills his own land. The rents are from 2*l.* 10*s.* to 2*l.* The tenants pay their rents very honestly, but are uncommonly hard worked. They have no means whatever but the land, except himself (Wm. Owens). The extent of the farm is from 65 acres down to 5. It is all tillage; thinks he himself could not pay the rent out of the land without other resources, but, comparing the land with his neighbour's, thinks it is worth the rent.—MR. W. OWENS.

Gaffney.

No. 7. *Gaffney*.—In this townland there are only two or three farmers; between tillage and fruit-gardens they get their families reared. The rents are from 3*l.* to 2*l.* 2*s.* It is about a mile and a half east of Duleek. It is about three and a half miles from Drogheda.—MR. THOMAS KELLY.

No. 14. *Bettystown*,—about four miles from Drogheda. Mr. Shepherd is the proprietor of the greater part, or nearly the whole of Bettystown. Part of it is a very good soil. It lies east of Drogheda, along the sea-shore. Part of it gravelly, and part of it a deep clay soil. The crops are general, part of it in grass, other parts in tillage; it grows wheat, oats, and potatoes. The population is not very thick. The farmers are generally small; they mostly till their own land without the assistance of labourers. There is no village, except a few houses together called Square, and towards the sea-shore there are a few more. The rents are from 2*l.* to 3*l.* an Irish acre. The rents are all paid. There is no cottier population except a few which are towards the sea-shore. The farms are from three acres to 20 acres. Bettystown is resorted to in the summer season as a bathing place, although there is no town. But the farmers who live near the sea-shore let their houses in the summer, and live in the back part of the premises with their families during that season. Some people from Drogheda, others from Navan and Athlone, lodge in those houses during the bathing season. That helps the farmers to pay the rent. A good part of those houses are ordinary mud houses thatched, some of them are slated. That and the produce of the land is all they have to pay the rent.—MR. THOMAS KELLY.

No. 15. *Pilltown*—is to the west of Bettystown. It is an agricultural district also. It is mostly in the occupation of Mr. Brodigan, who is the owner. He has let other parts to two or three tenants. The rent is two guineas. Some six or seven acres are let at 2*l.* 5*s.* The land is heavy strong land, and wet. There are a few cottier houses, occupied by labourers who work with Mr. Brodigan. They pay their rents in labour. The nominal amount of the rent of these cottiers' houses is about 2*l.* a-year, which is chiefly paid in labour, and the houses are kept in repair by the landlord. These houses would let for 2*l.* a-year to be paid in money. It is the same thing to the cottiers' to pay in labour or in money. It is a general practice with the farmers in that neighbourhood to charge 2*l.* a-year for a cottier's house, and to take it either in money or in labour.—MR. W. OWENS.

No. 17 and 19. *Coalp*.—Heavy stiff clay, yellow near the surface; bad subsoil on the east-side, but better on the west. Wheat is the general crop. The two Mr. Smiths are landlords of the greater part. It is partly arable and partly pasture. The population is not very great. There are 200 acres of it at present unoccupied. The landlord is a minor, and no lease can be granted. The rent in Coalp is about two guineas. It is about three miles from Drogheda. Coalp is inferior land, much inferior to Stagrennan. There are a few farmers, and a few cottiers under them. The farmers are making no money except what the landlords get. The export trade of corn has gone back within the last three years, in consequence of the failure of the crops.—MR. W. OWENS.

No. 18. *Stameen*.—This townland is two miles and a half from Drogheda. Soil yellow clay; some of it fine gravelly ground, with a good deep sod; subsoil yellow clay, and holds the wet. It is an agricultural district, both arable and pasture. It is not good enough for fattening, or at least they are not in the habit of doing that with it. It pays better in tillage, being near the manure of the town. Stameen gives every sort of crop very fair, except one portion of it near Coalp, which is inferior.—MR. W. OWENS.

No. 20 and 21.—*Little Donecarney* and *Great Donecarney*.—Part of these townlands is very fine land: some of it gravelly, some of it strong yellow clay; deep soil; subsoil bad.

No. 22. *Painstown*.—This is an agricultural district, mostly tillage, very little pasture; good deep soil, the subsoil yellow clay; crops mostly wheat, little or no oats. Landlord, Thomas Brodigan, Esq. Rents are high, but they are paid. It is nearly three miles from Drogheda. Many of the tenants have other ways of living besides the produce of the land. Many of them live partly by keeping a cart and horse, and drawing for road-makers; others by going to Dublin with merchandize, taking linen there, and bringing groceries up. There is very little trade in poultry between this and Dublin; there is a considerable trade in poultry between this and Liverpool, in comparison. Some of them help themselves out, more or less, by jobbing in that trade, the women selling something in the way of butter or eggs about the town of Drogheda. By all these means, added to the produce of the land, the people of Painstown pay the rent.—MR. THOMAS KELLY.

No. 23. *Newtown*.—Is just beside the town of Drogheda; it is the finest land about the town; it is highly manured and naturally good; it is deep clay soil, the subsoil is also good. There is a good deal of building on it—that is, a great many cabins, only one good house that they know. The cabins are not built in regular rows, but scattered; they are chiefly inhabited by labourers and weavers. There is generally an intermediate landlord. There are portions of it planted with fruit-gardens, which is very much subdivided, the tenants of which pay at the rate of about 10*l.* an acre for some of it. They make it out by living low, raising a pig and sending it to market instead of eating it; and also by various little ways of industry, in a similar way to Painstown. The weaving helps some of them a little.—MR. W. OWENS.

No. 24. *Stagrennan*.—Adjoins Newtown, is about a mile from Drogheda. Along the Boyne is fine land: some of it pays 4*l.* an acre, and some of it 6*l.* Part of it is a clay soil, and part of it gravelly; the subsoil is strong heavy clay, and holds the wet; it is all arable. It is thinly populated. Has only three tenants. Knows of no cottier tenants there. The three tenants are persons who pay their rent; one of them is worth a great deal of money. Thinks they are not growing rich at their rents, but they pay them.—MR. W. OWENS.

No. 25. *Kiltrough*.—Is not near such good land as Stagrennan: it lies up the Dublin road, about two miles and a half from Drogheda. It is heavy strong clay, but inferior quality. The crop is wheat whenever the tenant can; when they sow oats, it is mostly bad. It is highly rented: the rent is from two guineas to thirty shillings. The tenants are hard-working people, and pay the rent. There is a little weaving, which helps them. It is chiefly tillage land.—MR. THOMAS KELLY.

No. 26. *Morningtown*.—Is chiefly tillage; is about two miles from Drogheda. There are a few good houses and a few cabins. The rent is from 3*l.* to 1*l.* 10*s.* The people make the rent in various ways besides the produce of the land. It lies along the seashore. Some of the holdings extend to 50 acres, but the greater number are very small.—MR. W. OWENS.

EDENDERRY UNION.

APPENDIX.

*Edenderry.**Extracts from Minute Book of Board of Guardians.*

June 13, 1839.

Extracts from
Minute Book.

At the first meeting of the guardians of the Edenderry Union,—Present, four ex-officio, and all the elected guardians;

Valuation Com-
mittees appointed.

It was carried unanimously,—That the elected guardians of each electoral division, along with such ex-officio guardians as reside therein or in the neighbourhood, be a committee to ascertain the rateable property in that electoral division, and that they report progress to the Board.

July 16, 1839.

Resolution,—To appoint valuers.

August 17, 1839.

J. H. Nangle, Esq., chairman. Present, 4 ex-officio, 18 elected guardians.

Resolved,—That competent persons be appointed to value the Edenderry Union. Extent, about 135,000 acres; and two considerable towns. The tenders to state the conditions, whether by value or by acreage, or by average on the houses, and when the valuation will be completed.

Valuation Commit-
tee.

Resolved,—That a committee of the Board of Guardians be appointed as a Valuation Committee, to communicate with the valuers and transact and report to the guardians upon all business relating thereto.

The Valuation Committee were appointed, consisting of eight guardians.

August 13, 1839.

Sir Francis M'Donnell, chairman. Present, 2 ex-officio, 21 elected guardians.

Seven tenders for valuation were read; the tender of Edward Robbins and Thomas Bracken, proposed to value the Union for 1*l.* 15*s.* the 1,000 acres, the houses at 4*d.* each, and all the other rateable property at 1 per cent., or to value all the rateable property for 260*l.*, and to complete the same within one year from the date of the contract; the guardians to supply all existing maps, surveys, and valuations.

Reference as to
qualification of
Valuator.

Resolved,—That a letter be written to William Daniel, of Halstown, and John Costello, Esq., agent to Luke White, of Lanesborough, Esq., requesting to know if the valuation made by Thomas Bracken of William Costello's estate, under the direction of the Court of Chancery, and of the estate of Luke White, Esq., were satisfactory in every particular, and should their answers prove satisfactory, that Messrs. Bracken and Robbins should be appointed.

September 14, 1839.

Edward Shaw, Esq., J. P., in the chair. Present, 1 ex-officio, 10 elected guardians.

Valuator appointed.

Resolved,—That Mr. Bracken having undertaken the survey and valuation of the Union for the sum of 260*l.*, which was accepted by the Board, he shall be bound to attend in all cases of appeal from his valuation, for which attendance he shall receive 40*l.*

The Board undertakes to afford Mr. Bracken access to all existing surveys attainable by the Board.

September 23, 1839.

Sir Francis M'Donnell in the chair. Present, 1 ex-officio, 16 elected guardians.

The valuator perfected his securities.

October 26, 1839.

R. Shannon, Esq., in the chair. Present, 12 elected guardians.

Resolved,—That the valuator be furnished with the ordnance survey of the Union and the field-books.

Ordnance survey.

Resolved,—That the guardian or guardians for each division be on the committee during the valuation of each electoral division.

Valuation Commit-
tee, how consti-
tuted.

November 23, 1839.

Present, 9 elected guardians. Mr. Shaw appointed chairman of the Valuation Committee.

December 21, 1839.

Sir Francis M'Donnell in the chair. Present, 1 ex-officio, 8 elected guardians.

Resolved,—That the valuator be required to attend the Valuation Committee in Edenderry on the 4th of January.

January 4, 1840.

At a meeting of the valuation Committee, Mr. Shaw in the chair. Present, 6 members of the committee, and 2 guardians of the divisions valued.

The valuator having submitted the documents to the committee, the meeting adjourned to February 1, 1840.

January 18, 1840.

At a meeting of the Board, Michael Williams, Esq., in the chair. Present, 10 elected guardians.

Resolved,—That the clerk be directed to procure copies of the tithe valuation of the electoral divisions of the Union, and furnish the valuator with them.

Resolved,—That, owing to the flooded state of the townlands, the valuator be permitted to select such high lands as he may think proper.

February 1, 1840.

The valuator attended; but as only one member of the Board attended, there was no meeting.

February 15, 1840.

Edward Shaw, Esq., in the chair. Present, 1 ex-officio, 10 elected guardians.

Resolved,—That the clerk be instructed to write to the Rev. Mr. Browne, to request that he would furnish the Board of Guardians with a copy of the tithe valuation of the parish of Cloncurry, for which the guardians will pay. Tithe valuation.

March 14, 1840.

J. Hervey, Esq., in the chair. Present, no ex-officio, 13 elected guardians.

Resolved,—That 10*l.* be paid for copying the tithe valuation.

April 11, 1840.

T. Wolstenholme, Esq., in the chair. Present, 3 ex-officio, 15 elected guardians.

Resolved,—That the returns made by the valutors of the value of the several lands and holdings in the electoral divisions of Castlejordan, Ballyboggan, Clonard, Cadamstown, Mylertown, Ballinadrimna, and Ardkill have been investigated, and appear so far satisfactory. Valuation of seven electoral divisions submitted to the Board and approved of.

June 6, 1840.

J. H. Nangle, Esq., in the chair. Present, 5 ex-officio, 12 elected guardians.

A letter from Mr. Robbins, one of the valutors, having been read, in which he requested an advance of money on account of the valuation,—

Resolved,—That the clerk be instructed to apprise Mr. Robbins that every application on the subject of the valuation should come from Mr. Bracken only.

Resolved,—That the clerk be instructed to write to the valuator, directing him to attend with his valuation on the 20th of this month; and that he shall mention what districts he will then be able to report on, in order that the clerk may summon the Valuation Committee, and the guardians of the divisions to be reported on.

July 4, 1840.

T. Wolstenholme, Esq., in the chair. Present, 2 ex-officio and 9 elected guardians.

Resolved,—That the clerk be directed to communicate with the valuator, and to request of him to inform him what portion of the valuation he will be prepared to submit to the Valuation Committee on the 18th instant, as they consider much time is lost by the valutors in producing their estimate.

July 18, 1840.

J. Harvey, Esq., in the chair. Present, 12 elected guardians,

Resolved,—That the valuator having laid before the Board his return of the several electoral divisions of Carriche, and Carberry, and Clonmore, and having been investigated, appear so far satisfactory. Valuation of three divisions laid before the Board.

August 15, 1840.

F. L. Davies, Esq., in the chair. Present, 1 ex-officio and 9 elected guardians.

The valuation of the electoral division of Ballymacwilliam having been examined by the Board, some alterations were made with the concurrence of the valuator, who was requested to consider a few others; generally the valuation was approved of. Valuation of Ballymacwilliam. Alteration with concurrence of Valuator.

September 12, 1840.

Edward Shaw, Esq., in the chair. Present, 1 ex-officio and 11 elected guardians.

Resolved,—That the Valuation Committee be requested to meet at the Board-room on the 14th of September, in order to meet the valuator and examine his books, and that all the guardians shall get notice of such meeting. Meeting of the Committee of Valuation.

September 14, 1840.

— Williams, Esq., in the chair. Present, 4 members of the committee and 5 guardians.

The valuator having submitted the valuation of the divisions of Ballinakill, Edenderry, Clonsart, Rathangan, Ballyhurly, Cloncurry, and Crogan, Resolved,—That having examined the same, we have found the valuation so far to be generally correct, except those parts marked for re-consideration. Valuation of seven divisions laid before the Board.

October 10, 1840.

J. H. Nangle, Esq., in the chair. Present, 3 ex-officio and 9 elected guardians.

Resolved,—That the meeting of the Board, held on the 12th of September, was summoned for the purpose of taking into consideration the report of the valuator, and that it was, therefore, irregular to transact any other business of serious moment.

October 24, 1840.

(No chairman named in the minute-book.) Present, 4 ex-officio and 11 elected guardians.

Resolved,—That the Valuation Committee of this Board do attend on the 14th of November, to meet the valuator and examine his books, and that the Board of Guardians do meet on the 21st of November, to consider said valuation, and to pay contingent expenses incurred. Meeting of Committee of Valuation.

November 14, 1840.

F. L. Davies, Esq., in the chair. Present, 3 members of the committee, and 4 members of the Board.

The valuator delivered to the clerk of the Union the books of the different electoral

APPENDIX.

Edenderry.

Extracts from
Minute Book.
Amendments of
Draft valuation
approved of.

Additional remuneration to Valuator.

divisions of the Union, perfected, together with the maps and cess returns belonging to the Union. Resolved,—That the points left for re-consideration at the last meeting of the Valuation Committee, having been submitted to the valuator, the amendments were considered and approved of.

November 21, 1840.

Doctor Grattan in the chair. Present, 2 ex-officio and 16 elected guardians.

Resolved,—That the secretary be directed to inform the Commissioners that the books of the valuation of this Union have been this day laid before us, and to request their directions as to the place and period at and during which the valuation may be open to the public inspection, in accordance with the 69th section of the Act.

Resolved,—That the letter of our valuator, Mr. Bracken, relative to additional remuneration, in consequence of a larger quantity of land being found to be contained within the Union than was contemplated, when advertisements for the valuation were published, be recommended to the favourable consideration of the Board of Guardians, at their next meeting.

Resolved,—That the sum of 100*l.* be paid to Mr. Bracken, our valuator, on account of his charge for the valuation of this Union.

January 16, 1841.

Doctor Grattan in the chair. Present, 7 elected guardians.

Resolved,—That the books be handed back to the valuator, for the purpose of having proper numbers prefixed to the names of occupiers in each electoral division, according to the instructions of the Poor Law Commissioners.

Resolved,—That the clerk be instructed to furnish Mr. Robbins with the documents he required; this Board, at the same time, not recognizing Mr. Robbins as their valuator.

February 13, 1841.

Thomas Murray, Esq., in the chair. Present, no ex-officio—13 elected guardians.

Valuation complete.

Resolved,—That Mr. Bracken having completed the valuation, according to the directions of the Poor Law Commissioners, that the clerk be directed to give notice, according to the instructions of the Commissioners; the clerk be directed to insert advertisements in four newspapers; and also that 1,500 notices, of like import, be printed and distributed amongst the guardians, for the information of the rate-payers in their respective divisions.

Valuation to lie for inspection.

Public notice.

Resolved,—That the inspection of the valuation shall commence on 17th February, 1841, at the residence of the clerk, as it is the most convenient place for the public.

Objection papers.

Resolved,—That the clerk be directed to furnish 2,000 copies of objection slips.

March 13, 1841.

J. Murray, Esq., in the chair. Present, 2 ex-officio and 18 elected guardians.

Valuation not yet completed.

Time for inspection extended.

Resolved,—That as a townland and several farms are omitted in the valuation books, the valuator be directed to go over his books, and attend here on Saturday next, to account for those omissions; and as the valuation cannot be considered complete with these inaccuracies, the time for objection against the valuation be extended, and the books be kept open until the 20th of March.

Evidence.

Evidence.

Board of Guardians.

Replies of BOARD OF GUARDIANS to queries as to the test of value which had been adopted.

Taking it generally, the land is rated at a fair valuation, so that a tenant could live by it.

Question.—Is the valuation higher or lower than what the land would let for?

Answer.—It is valued at what it ought to be let for as between landlord and tenant.

Question.—Is it higher or lower than the rent at which it might be let to a tenant who could pay the rent, and continue to pay it?

The Board gave no answer to this question, and were of opinion that that was not the criterion.

Mr. Bracken,
Valuator.

Mr. BRACKEN, Valuator, examined.

His previous experience.

Was appointed valuator to the Edenderry Union on the 6th of September, 1839; was allowed a year to perfect the valuation. Previous to his undertaking the valuation he had been employed in valuing land for private gentlemen, for property about to be sold, and for the purpose of giving evidence before the House of Commons. The Union contains 167,000 statute acres, and is divided into 17 electoral divisions. He was supplied by the Board with the ordnance survey of the Union, which he used as the basis for ascertaining quantity. Never found it erroneous, save only one list of Griffith's valuation, but was never guided by it. His valuation differed from it, in some places higher, in some lower generally.

The difference chiefly took place where Griffith's valuation looked to the intrinsic quality of the land, rather than to its present state. He (Mr. B.) chiefly looked to the present state of the land.

Mode of proceeding with the valuation.
Valuation Committee.

According as the valuation for each electoral division was made, it was submitted to a committee of the Board, consisting of about 8 present members and the guardians elected for the division, the valuation of which was submitted to the committee. The committee were generally satisfied with his valuation; any objections made to it at that time were on the ground that it was low. These objections were not made because they supposed some persons would be charged with less than their proportion of the rate; but the guardians feared that the landlords would not be satisfied with such a valuation, as in that case they would bear more than their proportion of the rate. The greater proportion of the Board consisted of farmers paying rent. The landlords did not attend often, or in numbers. When suggestions were made by the committee, he generally reviewed the tenements objected to, in a few instances he complied

with their suggestions—they were generally made to induce him to raise the valuation. He (Mr. B.) was at first assisted by a Mr. Robins. Some parts valued by Mr. Robins were not seen by him, Mr. Bracken. The objections made to the valuation of individual tenements chiefly came from those places. This may have been partly owing to Mr. Robins not being present to answer them.

There has been no applotment of any part of the Union under the Grand Jury Act. He (Mr. B.) had access to the tithe applotments, but used them only as guides to ascertain the quantity of land held by individuals. In respect of the valuation of the land, they varied much from his, being sometimes higher, sometimes lower.

Those valuations were made by people living in the neighbourhood. He is not acquainted with them, and knows nothing about their capabilities for valuing land.

He (Mr. B.) took that section of the Act which relates to the valuation, as his guide for value, which he understood meant a fair and reasonable value. He was strengthened in his opinion by a note to the Act of Parliament, which, as he best recollected, stated that it should be a low and reasonable letting. Understood this to mean such as would make a tenant very comfortable. Never had a doubt that this was the proper interpretation.

(Being referred to the copy of the Act published by the Commissioners, edit. 1839, London, Mr. B. observed, he thought that the copy used was not the same).

When he first commenced the valuation, he went upon a farm and calculated the probable produce. This he divided into three parts, one for the tenant, one for wear and tear; from the remaining third he deducted 12 per cent., and this third, so reduced, he allowed for rent, and this he called the net value or fair rent which a landlord should receive, according to his valuation. He made his valuation on the supposition that the land would only be let from year to year. This, in his opinion, was in accordance with the Act. Considers that the value should be higher, if he supposed a lease were granted of the premises.

The most prevalent farms in this Union vary from 50 to 100 acres. He set a higher value on small farms than large ones—they would bring more in the market. When a house was on the premises he increased the rent proportionably, making due allowance for repairs, &c.

Never considered the value placed by the tenant upon his tenement when he sought to register.

The value he set upon lands, when valuing for other purposes, was quite different from that which he adopted for the Poor Law. When he valued properties for sale, he valued them at a rent, not a rack-rent. The valuation he made of this Union was at least 20 per cent. lower than a valuation for the purpose of sale. Valued much higher when giving evidence before the House of Commons.

At present the land in this Union is, to a great extent, let from year to year; knows land which he valued to have been since let from year to year, at a rent exceeding his valuation.

If let from year to year, it would let at from 1s. 4d. to 2s. more than he valued it.

The county cess is very unequal on town-lands or plough-lands; some pay for much more than they contain, while others do not pay for the sixth of their contents.

The nominal cess varies from 1s. to 1s. 6d. per acre, half-yearly.

The Marquis of ——— seldom gives leases; Lord ——— gives his tenants leases, and at a low letting value, he gives a man his due; Hon. ——— does the same; Lord ——— is an encouraging landlord; he gives leases, and he has heard that he allows the tenant in his rent for certain improvements that he specifies; Lord ———'s land is very good; he sets his lands at a low rent, compared with others, but does not give leases.

He was furnished with the accounts of the net and gross profits of the canal, and as the traffic on it in this Union is an average one, he divided the total net amount of profits by the extent 201 miles; the rate charged is 126l. per mile.

He (Mr. B.) would not undertake to value land under the Poor Act at a rack-rent; he thinks it could not be accomplished. The competition being so great, no one could judge what another might be forced to pay.

Indulgent landlords will be offered by persons not possessed of capital, more than can be made out of the land; they hope that the landlords will not see them losers in the end.

Has been an agent; has experience in the letting of lands, and he always found that the chief object of many persons was to obtain possession of farms; the rent seemed to be a secondary consideration.

Reasons peculiar to individuals may enable them to offer and even to pay a greater rent than any other person would give; it would be impossible for any man to be acquainted with all the circumstances which would induce persons to outbid all reasonable calculation.

He knows of several instances where one man was able to make a livelihood paying 54s. per acre, while another is not able to pay for similar land 1l., and this not the result of negligence.

For these and many other reasons he is of opinion, that no man could undertake to make a valuation at a rack-rent; he is positive that no degree of nicety in the relative value could render such a valuation satisfactory. The bulk of persons holding land are in favour of a low valuation.

He has seen the objections made to his valuation; they are, mostly for reputed errors in quantity. A great part of the remainder are made by persons who complain that their neighbours are rated lower than they are.

At one of the meetings of the committee, a guardian objected to the valuation as too low; the other guardians immediately referred to the Act and canvassed the meaning of the clause, and overruled the objection. He has since heard of no objection to the principle on which he acted in making the valuation.

The quality of land varies much throughout the Union; rated some so high as 54s. per Irish acre, and in other cases arable so low as 10s. per Irish acre.

APPENDIX.

Edenderry.

Evidence.

Land near towns
valued higher.Visited every tene-
ment.

There are two towns in the Union, both small; the land about them however is much increased in value by their vicinity to these towns; he has rated them accordingly.

First-class lands would fatten a 10 cwt. bullock to the acre; sheep could not be fed on such lands.

Prime sheep-walks would fatten five to the acre, or three cows to five acres in rural districts; he valued such lands about 34s. per Irish acre.

Near towns the value is much higher. Small shopkeepers wish to have as much land as will supply them with milk and their house with necessaries. He went upon every tenement (except a few that Mr. Robins valued) and examined the nature, extent, and locality of each holding. He employed persons who were acquainted with the localities of each tenement; by this means, with the assistance of the Ordnance Survey, he was not liable to mistake the contents.

He farms considerably, and would be most happy to get ground at the rent he valued it; would pay a large fine to get it upon those terms.

But notwithstanding thinks it impossible to make a general satisfactory valuation on any other principle than the one he adopted.

T. Wolstenholme,
Esq., Guardian.T. WOLSTENHOLME, Esq., Guardian, *examined.*Valuation satisfac-
tory.Definition of Rack-
rent.

Fair Rent.

On most occasions attended the meetings of the Board. Was not on the committee for valuation, but attended the meetings when they brought up their Report. The valuation so made was most satisfactory. No objections to the principle on which the valuation went; very few objections, but these were only as to the relative value. It was always understood by the Board, that the value should be decidedly a moderate one for the tenant. He knows fine grazing lands near Enfield, for which 3*l.* per acre was refused. He may not be exactly accurate as to the amount of the fine, but it was some thousands. The extent of this farm was between 200*a.* and 300*a.*; this farm is valued at about 3*l.* per acre. The lands throughout the Union are valued on the same principle. Thinks that a good and solvent tenant would, on an average, be willing to give 10*s.* an acre more than they are valued at. The tithe valuation is considered irregular; sometimes high and sometimes low. The rents were decidedly not taken into consideration. A rack-rent means that rent which a tenant pays, who is satisfied to live most miserably; this is not the rent understood when he says the land could be set for 10*s.* an acre above the valuation. Means by a fair rent what a tenant could pay, reserving to himself reasonable remuneration for his capital and labour; giving him support and enabling him also to lay something as a provision. Considers that a difference should be made in valuing land when a house was granted, and when set from year to year. The principal part of Carberry is held under leases for lives and years; Edenderry, principally at will; the lands in Cloncurry and Rathangan are leased. — is the only landlord who grants leases in Clonard, Ballyboggan, and Castlejordan.

Dr. Gilligan, Clerk
of the Union.DR. GILLIGAN, Clerk of the Union, *examined.*General opinion in
favour of a uniform
Valuation.

It is the opinion of the most intelligent persons, that the valuation ought to be relatively fair in all parts of the Union; and that it is of less importance what height the valuation is framed upon, if the valuation be relatively fair. For example, if a Union be valued at 150,000*l.*, and supposing that be over the value, it will not impose a higher rate of cess upon an individual than he ought to bear, provided the same scale is preserved throughout.

The Commissioners gave directions to make a fair valuation.

Generally speaking the valuator has made a fair valuation relatively; gives that as the opinion expressed by guardians.

Is secretary to all meetings, whether of the Board, the Valuation Committee, or any other committee. The Valuation Committee met very seldom, but the business was transacted in a great measure by the General Board. Neither the Valuation Committee nor the Board ever met in any place out of Edenderry.

Proceedings relative
to Valuation.

The valuator, as he proceeded, laid the parts valued before the guardians, for their consideration and approval. There was generally more or less discussion at all meetings for that purpose. Mr. Bracken resides at Ballymahon; had fair recommendatory letters; he had valued land before for Mr. Costello; also for Mr. Daniel, and for Mr. White; thinks he also valued for letting under the Court of Chancery; believes he deals in cattle; has a mill, and has land which he farms; he is considered an intelligent man. There were a great many applicants, perhaps 8 or 10; thinks there was only one regularly professional valuator amongst them. His demand was ridiculously extravagant; he required to be supplied with mearsmen, cars, &c. Mr. Bracken proposed to do it for 260*l.*, and 40*l.* more to be allowed to cover expenses of appeals, making in all 300*l.* The Union was advertised to contain 135,000 acres; he contracted for that extent; by his report it appears that it contains some 30 or 40,000 acres more, for which he requires additional payment. It seems to be the opinion of the Board that he should be remunerated for whatever amount exceeds his contract. As the valuation proceeded, does not recollect that the Board expressed any decisive opinion as its being too high or too low, but appeared to be satisfied. But opinions were expressed as to individual tenements being too high and sometimes perhaps too low in comparison. They made slight suggestions to him occasionally to reconsider particular valuations. They did not make any alteration, but sometimes he adopted their suggestions. Sometimes a suggestion was made to alter the valuation of a particular farm or a part of a district.

VALUATION of £10 COUNTY ELECTORS (Registered 1832 to 1840) so far as ascertained.

COUNTY KILDARE.

EDENDERRY UNION.

NORTH DUBLIN UNION.

APPENDIX.

North Dublin.

Extracts from Minute Book.

Extracts from Minute Book of Board of Guardians.

18th July, 1839.

First meeting of the Board—

Present, 9 *ex-officio*, and 33 elected Guardians.

Committee appointed to enquire and report as to existing valuation.

Committee appointed.

Chairman.

Mr. O'Gorman.

Vice-Chairman.

Mr. Baker.

Deputy Vice-Chairman.

Mr. Hennigan.

Mr. Sherrard.

Mr. Rathbourne.

31st July, 1839.

Committee reports resolutions passed by them, as follows:—

1st. Resolved—That we are unanimously of opinion that the valuation adopted by the Commissioners of the Metropolitan Police will be sufficient, so far as the same extends, to enable the Guardians of this Union to form such rates as may be necessary to be raised, particularly so, as they find in the 66th section of the said Act the following power thereby given to the Guardians: namely, to revise and correct any existing survey or valuation; and we feel, from the fluctuation of house property, that any valuation made 10 years since must require revision.

Report of Committee.

2nd. That in the district beyond the Metropolitan Police district, it does not appear that we have anything in the way of valuation to rest upon. We therefore strongly recommend the Board, to request the Poor Law Commissioners to take such steps as may be necessary to procure forthwith a full and fair valuation of the houses and lands in the several rural districts of this Union, and to appoint the most competent persons to make such valuation on the most reasonable terms.

New valuation of rural districts necessary.

Poor-Law Commissioners to be requested to appoint the valuator.

The foregoing resolutions were separately considered by the Board.

The first resolution was received and adopted.

An amendment proposed on the second resolution—

That the Commissioners be solicited that the choice be left with the Guardians of electing the valutors.

On a division, amendment negatived, and second resolution of Valuation Committee received and adopted.

14th August, 1839.

Present, 7 *ex-officio*, and 23 elected Guardians.

Answer of Poor Law Commissioners to report on valuation read—

Answer of Poor-Law Commissioners.

Stating that the Commissioners are of opinion that the Metropolitan Police valuation will be of great service to the Guardians as a ground work of their proceedings; but that the Commissioners apprehend that it does not adhere so closely to the principles in the Poor Relief Act, to be in itself a sufficient valuation without a thorough revision and adaptation to the purposes of that Act, and further stating, with reference to the rural districts, that the tithe valuation might be found useful in framing the valuation.

With reference to the proposal that the Commissioners should appoint professional valutors for the service of the Union, the letter of the Commissioners contained the following passage:—

Poor Law Commissioners decline to appoint the valuator, on the ground that the responsibility ought to rest with the Guardians.

“The Commissioners having bestowed their best consideration upon this proposal, and on the circumstances which might possibly have made such a course appear advisable, they are desirous in every arrangement to comply with the express wishes of the Board of Guardians, and they are always ready to afford them such support and assistance in the administration of the law, as they may stand in need of; but they do not consider themselves at liberty to supersede, in this instance, the ordinary functions of the Board of Guardians, or relieve them from responsibility which the law primarily casts upon them, by taking a measure which the Commissioners conceive to be intended by the legislature only as an exception in very special cases from the general rule. The Guardians are answerable for the correctness of the rate when made, and it is reasonable and consistent with sound principle, that they should, subject to the sanction of the Commissioners, appoint the valutors, by whose professional assistance it will be their duty hereafter, to make and assess the rate.”

In conclusion, the Poor Law Commissioners exhorted the Guardians to address themselves forthwith to this important duty.

The Board, on taking into consideration the answer of the Commissioners—

Resolved—That a new valuation be proceeded with.

New valuation resolved on by the Board.

Resolved—That there should be two classes of valutors, one for the City Electoral Division, the other for the rural divisions of the Union, and that advertisements be published for valutors.

28th August, 1839.

Tenders from fourteen persons proposing to value the Union received.

Decision postponed to 31st August.

31st August, 1839.

Present, 6 *ex-officio*, and 20 elected Guardians.

APPENDIX.

North Dublin.

Extracts from Minute Book.

Valuators appointed.

The fourteen persons who had sent in tenders, were separately examined by the Board, and it was agreed that the tenders of Mr. Bolger and Mr. Vaughan should be accepted. The former for the City, which he undertook to complete by the 30th of November next, for 360/. The latter for the rural portion of the Union, which he undertook to complete by the 30th of November next, for 150/.

11th September, 1839.

Present, 6 *ex-officio*, and 18 elected Guardians.

The Assistant Commissioner informed the Board, that Mr. Vaughan had also undertaken to value the rural portion of the South Dublin Union in the same period.

Resolved—That Mr. Vaughan's security be increased to 300/.

Part of valuation to be laid before the Board as a specimen.

Valuators directed to lay before the Board, on their days of meeting, the portion of the valuation they may have done up to that period.

Valuators directed to give in the names of their assistants on the next day of meeting.

18th September, 1839.

Present, 6 *ex-officio*, and 18 elected Guardians.

Communication from South Dublin Union as to securing uniformity in valuing the two Unions.

Letter from the Guardians of the South Dublin Union read, inclosing a copy of the resolution which passed at their Board on the 3rd instant, to the effect that the valuator be instructed to take the necessary measures to secure an uniformity of principle in the valuation of the North and South Dublin Union, and that the Guardians of the North Dublin Union be requested to co-operate in carrying it into effect.

Letter from Poor Law Commissioners, approving of Messrs. Vaughan and Bolger as valuers, provided they enter into proper securities.

Valuation of one parish to be laid before the Board.

Mr. Vaughan reported progress, and was directed to complete the valuation of a parish or two, and to lay it before the Board at their next meeting.

Assistant valuers.

Mr. Bolger gave in the names of his assistants, reported progress, was recommended where he differed from former valuations to take notice of his reasons, and directed to lay a portion of his valuation before the Board at their next meeting.

The resolution of the Board of Guardians of the South Dublin Union, recommending the adoption of a uniformity of principle in the valuation of the North and South Dublin Unions, was notified to Mr. Bolger.

2nd October, 1839.

Present, 4 *ex-officio*, and 18 elected Guardians.

Specimen of the valuation laid before the Board.

Valuator of Rural Divisions was called in, and produced a specimen of the valuation of the townland of Cruise Rath, which appeared satisfactory to the Board. He reported that he had dismissed Mr. Henely, one of his assistants, and that he had replaced him by Mr. Saunders, which proceeding was approved of by the Board of Guardians.

Mr. Bolger was also examined as to the progress and method he was pursuing, and his statements were considered satisfactory by the Board. Mr. Bolger announced to the Board, that he had employed two new assistants.

28th October, 1839.

Present, 8 *ex-officio*, and 20 elected Guardians.

Specimen of the valuation disapproved of.

Mr. Vaughan produced several valuation sheets partially filled; those examined by Mr. Barlow were incorrect, and it was considered that they would require revision.

Mr. Vaughan was directed to lay before the Board at the next meeting, a portion of the valuation in a complete state.

He stated that in the parishes of Howth, Baldoyle, Raheny, and Clontarf, the contents given by the Ordnance maps differed from that given by the County Cess Returns; directed to give the preference to the Ordnance maps.

Valuation of one street to be laid before the Board.

Mr. Bolger submitted some sheets of the city valuation; directed to produce the valuation completed of one street in each ward, at the next day of meeting.

Resolved—That the valuers be required to submit to the Board, specimens of the plans adopted respectively by them, with regard to demesnes, farms, houses, and every description of rated property within the Union, preparatory to their making out the general valuation by the 30th November next.

13th November, 1839.

Circular of valuation and rating.

Twelve copies of the circulars on valuation and rating were supplied for the use of valuers.

4th December, 1839.

Present, 7 *ex-officio*, and 20 elected Guardians.

Mr. Bolger handed in the valuation of the North City Electoral Division, but it was agreed that it should not be opened to the inspection of the rate-payers until the Guardians reported it to be correct.

Draft valuation distributed amongst the Guardians for examination.

Resolved—That the Board of Guardians accept Mr. Bolger's offer of giving his memorandum books, in order that the Guardians may examine into the correctness of the valuation as now presented; and that he, Mr. Bolger, shall retain in his own safe keeping the original valuation, which he will deliver to the Board of Guardians as soon as the examination by the Guardians of the several wards is finished; and that the memorandum books now taken out by the Guardians of wards shall be returned to the Board on Monday next.

9th December, 1839.

Present, 3 *ex-officio* Guardians, and 20 elected Guardians.

Reports of several Guardians on valuation books of their respective districts.

Mr. Galloway stated he had examined the valuation of St. Thomas's Parish, and that he considered it in general fair, but in some cases rather high.

Mr. Arkins stated that he had examined the valuation of St. Michans' Parish, and discovered in it many inaccuracies; he considered the valuation to be in many cases much too low, and in others too high; he mentioned several houses on Ormond Quay, that in particular occupied by Mr. Cavaragh, the gun-maker, valued at 20*l.*, he considered should be valued at 40*l.*

The valuator gave his reasons—house in bad repair, &c.

Mr. Sherrard stated that several houses in Gardiner Street are erroneously valued, one that lets at 50 guineas a-year is valued only at 27*l.* 10*s.* Others which let at 60*l.* or 65*l.*, are valued at 35*l.*

Mr. Lynnot stated, that he considered the portions of St. Paul's Parish which he had examined was very satisfactory.

Resolved—That on Friday next the Board take into consideration the valuation of St. Michans' and St. Paul's; on Monday, Mary's and Grange Gorman; and on Wednesday, Thomas's and George's; and that the said valuation be referred back to Mr. Bolger for revision in the interval.

13th December, 1839.

Present, 5 *ex-officio*, and 20 elected Guardians.

Mr. Bury stated that he had carefully examined the valuation of St. Paul's Parish, and considered it satisfactory.

Mr. Arkins stated that he had discovered other errors in the valuation of St. Michans' Parish since he made his report.

Mr. O'Higgins' house, in North Anne Street, he considers too high compared with the houses of Mr. M'Nally and Mr. Hunt; Mr. O'Higgins' house is valued at 40*l.*, the other two at 27*l.* 10*s.* each.

Mr. Bolger, the valuator, stated in explanation, that a plot of ground attached to Mr. O'Higgins' house was included in the valuation, that it was in much better repair than the others, and that Mr. O'Higgins refused him admission. After some discussion, the valuation of the three houses was confirmed. Mr. Arkins considered Mr. Hughe's houses, 10 and 10½ Best Lane, to be unequally valued; Mr. Bolger valued one at 35*l.*, the other at 15*l.*

Captain Cottingham, Mr. O'Gorman, and Mr. Gardner, examined the houses, and recommended that they should be valued alike, that is, at 25*l.* each. Mr. Bolger stated that he had added 6*l.* to the value of Mr. Cavanagh's house on Ormond Quay; Mr. Arkins and other Members considered its valuation to be still too low. Most of the houses in Ormond Quay were considered to be valued too low, and a Committee of three Guardians was appointed to examine them.

16th December, 1839.

Present, 1 *ex-officio* Guardian, and 12 elected.

The Committee appointed to revise the valuation of houses on Ormond Quay, recommended the following alterations, namely—the house No. 38, from 50*l.* to 60*l.*; No. 37, from 45*l.* to 52*l.*; No. 35, from 47*l.* to 52*l.*; No. 31, from 40*l.* to 35*l.*; No. 26, from 50*l.* to 70*l.*; No. 24, from 50*l.* to 57*l.*; No. 23, from 75*l.* to 90*l.*; No. 22, from 45*l.* to 50*l.*; No. 21, from 50*l.* to 70*l.*; No. 19, from 50*l.* to 65*l.*; No. 18, from 45*l.* to 60*l.*; No. 16, from 55*l.* to 65*l.*; No. 15, from 55*l.* to 70*l.*; No. 14, from 90*l.* to 100*l.*; No. 13, from 95*l.* to 100*l.*; No. 11, from 80*l.* to 90*l.*; No. 10, from 65*l.* to 75*l.*; No. 9, from 55*l.* to 60*l.*; No. 5, from 40*l.* to 45*l.*; No. 4, from 26*l.* to 35*l.*; No. 3, from 40*l.* to 35*l.*; No. 2, from 35*l.* to 46*l.*

Several other alterations were suggested by the Guardians; they were, in most cases, to reduce the valuation. Mr. Bolger was recommended to take these suggestions into consideration.

20th December, 1839.

Present, 2 *ex-officio*, and 10 elected Guardians.

Mr. Bolger was in attendance, and handed in the valuation of the North City.

Resolved—That Mr. Bolger's valuation be now received, and taken as the valuation of the city portion of the North Dublin Union.

Resolved—That the six books of the valuation of the city portion of the North Dublin Union be sealed up, and deposited in the care of the Poor Law Commissioners until required by the Board.

Mr. Vaughan attended with the valuation of the rural portion of the Union, and he agreed with the Board to produce a copy of each electoral division in a separate book, on the next time of meeting, for 12*l.*

27th December, 1839.

Present, 5 *ex-officio*, and 19 elected Guardians.

Mr. Vaughan handed in copies of the rural portion of the valuation, and they were distributed among the Guardians of the different electoral divisions.

6th January, 1840.

Present, 6 *ex-officio*, and 9 elected Guardians.

Mr. Thompson stated, that there were several omissions in the valuation of Blanchardstown Electoral Division; that the valuation of that division was in general unequal, some places being valued too high, and others too low. Mr. Vaughan was in attendance, and the particular cases alluded to by Mr. Thompson were pointed out to him. Captain Lindsay stated that he, with others, examined the valuation of Glasnevin Electoral Division, and that some small alterations would, in his opinion, make it correct.

APPENDIX.

North Dublin.

Extracts from Minute Book.

Further reports of several Guardians as to valuation of their respective districts.

Committee of inspection appointed.

Report of Committee.

City valuation adopted by the Board.

Valuation books to be sealed up.

Draft valuation of rural districts distributed among Guardians.

Reports of several Guardians as to valuation of their respective districts.

APPENDIX.

North Dublin.

Extracts from Minute Book.

Two electoral divisions considered 10 per cent. too high.

10th January, 1840.

Present, 4 *ex-officio*, and 15 elected Guardians.

Mr. Rorke stated, that he and five other Guardians had examined the valuation of Blanchardstown and Finglas Electoral Divisions, and in almost every case they considered the valuation about 10 per cent. too high.

Resolved—That Mr. Vaughan be required to attend the next meeting of the Board, to hear the objections made to his valuation of the districts of Blanchardstown and Finglas, with the intent either of altering or maintaining the same.

15th January, 1840.

Present, 7 *ex-officio*, and 20 elected Guardians.

Resolved—That Mr. Vaughan be called upon and required to deliver into the Board of Guardians, his valuation of the rural districts, and verify the same on Monday, the 20th instant.

20th January, 1840.

Present, 4 *ex-officio*, and 16 elected Guardians.

Resolved—That Mr. Vaughan be required to bring his valuation to this Board on Monday next, in order to swear to the same.

It was agreed, that Mr. Bolger should be summoned to attend also on Monday, to swear to his valuation.

27th January, 1840.

Present, 4 *ex-officio*, and 19 elected Guardians.

Valuation verified by declaration of valuers.

The valuation of the Union was handed in by Messrs. Bolger and Vaughan, and each signed a declaration regarding the correctness, &c., of the portion valued by him.

Resolved—That the valuation, as now laid before the Board of Guardians by Mr. Vaughan, —same having been declared by said valuator to be in all respects correct, to the best of his skill and knowledge,—be accepted.

It was agreed that notice should be given to the rate-payers, that the valuation would be open to their inspection from Thursday the 30th instant to Tuesday the 25th, Sundays and Wednesdays excepted.

29th January, 1840.

Present, 5 *ex-officio*, and 14 electoral Guardians.

Moved that rural divisions are too highly valued.

On the motion of Mr. Cosgrave—"That the rural valuation be reduced 7½ cent," It was moved as an amendment—"That it is the opinion of the rural Guardians, that the rural valuations are in most cases too high."

(The result of this motion does not appear in the Minute Book.)

5th February, 1840.

Present, 10 *ex-officio*, and 26 elected Guardians.

Letter from Poor-Law Commissioners as to rural valuation.

The following letters were read to the Board.

A letter from the Poor Law Commissioners, acknowledging the receipt of the resolutions of the Board of the 29th ultimo, regarding the high valuation of the rural portion of the Union; and the Commissioners state, that it will be the duty of the Board to make such reductions in the particular cases complained of, as will render the valuation conformable to the Act, &c.

A letter from the Poor Law Commissioners, conveying their approval of the resolution, accepting the valuation delivered by Mr. Vaughan, he having certified that it was correct, according to the best of his skill and knowledge.

A letter from Messrs. Bolger and Vaughan, claiming compensation for additional trouble and expense in making the valuations.

Application for a loan to pay valuers.

19th February, 1840.

Present, 7 *ex-officio*, and 25 elected Guardians.

Application to treasurer for a loan of 600*l.* to pay valuers, to be charged with interest, on the second rate which shall be levied.

It was agreed that the valuers be summoned to inspect the objection-sheets, and to take any copies or extracts from them which they may consider necessary, to enable them to revise their valuations.

26th February, 1840.

Present, 5 *ex-officio*, and 18 elected Guardians.

Hearing of objections.

Resolved—That the objections be sorted into rural and city, and into Electoral Divisions and wards, and that a list of the persons objecting, be sent to the Guardians of the Electoral Divisions and wards, in which the objections exist.

That this Board do sit from day to day, Wednesday excepted, from Monday next, to take the objections into consideration, commencing with the city wards, in the same rotation they stand in, and afterwards with the rural objections in the same way.

The Guardians in city and county, to give notice to the objectors in their respective districts of the days on which their objections are likely to be heard; that while the objections are going on, the Board do sit from 11 to 4 o'clock, and go through as nearly as possible, two wards, or two Electoral Divisions, each day.

Resolved—That a copy of the foregoing resolution be forwarded to the valuers, accompanied by a letter intimating to them, that the Board expects they will attend on the days that their valuation will be under consideration.

It was agreed that notice to objectors be given in the morning papers of the parishes to be

considered on certain days. Mr. Roper gave notice, that he will this day fortnight propose a rate.

APPENDIX.

North Dublin.

Extracts from Minute Book.

4th March, 1840.

Present, 8 *ex-officio*, and 24 elected Guardians.

Read—A letter from the Poor Law Commissioners, approving of the course adopted to defray the expenses of the valuation, and authorising the Board to charge second rate with the repayment of 600*l.* and interest for that purpose.

11th March, 1840.

Present, 6 *ex-officio*, and 22 elected Guardians.

Resolved.—That a rate of 5*d.* in the pound be made on the valuation for the ensuing half year. Rate of 5*d.* in the pound.

Advertisement for collectors of poor-rate.

Ordered to pay Mr. Bolger 360*l.* for valuation of North City Division.

Ordered.—That persons be employed to compute the rate at 5*d.* in the pound on valuation.

16th March, 1840.

Present, 4 *ex-officio*, and 17 elected Guardians.

Resolved.—That the rate of 5*d.* in the pound as agreed to, be now made, and signed by the Chairman and three Guardians; and seven days' notice be given so as to make the rate payable on the 23rd instant.

Rate books signed accordingly.

Mr. O'Gorman gave notice of a resolution to the effect, that Mr. Vaughan, in the peculiarly arduous, laborious, and difficult undertaking of the valuation of the lands and tenements of the Rural Districts, has merited our warmest approbation, and that we deem the valuation as complete and impartial, and as fairly proportioned as the nature of such an undertaking could admit of.

18th March, 1840.

Present, 4 *ex-officio*, and 19 elected Guardians.

A letter from the Poor Law Commissioners, approving of rate at 5*d.* in the pound.

25th March, 1840.

Present, 7 *ex-officio*, and 27 elected Guardians.

Proposals for collecting the rates opened and read; out of the proposals for collecting the City rate, the eight of the lowest selected; the Board then proceeded to vote for four out of the eight, and then for two out of the four. Collectors of rates.

The Collector of Rural Districts elected.

1st April, 1840.

Present, 3 *ex-officio*, and 18 elected Guardians.

Read—Letter from the Poor Law Commissioners sanctioning the appointment of Messrs. Bradshaw and Brennan to collect the City rates, and refusing to sanction the appointment of Mr. Cavanagh to collect the rates of the rural portion of the Union; Mr. Gilbert, County Cess Collector, having proposed to collect them at as low a per centage. Poor Law Commissioners refuse to sanction appointment of rural collector.

Mr. Gilbert appointed collector accordingly.

Mr. O'Gorman withdrew his motion of which he had give notice on the 16th of March, respecting Mr. Vaughan, until he sees how appeals against his valuation may succeed.

25th April, 1840.

Present, 4 *ex-officio*, and 16 elected Guardians.

A letter from the Poor Law Commissioners was read, requesting to be furnished with copies of the instructions which may have been issued from the Board, exclusive of those published by the Commissioners in their printed circulars, relative to the valuation of the rateable property in the Union. Letter from Poor-Law Commissioners as to instructions given to valuers.

4th May, 1840.

Present, 4 *ex-officio*, and 19 elected Guardians.

Letter from the Poor Law Commissioners, accompanying six copies of circulars issued by them on the 25th ultimo, on valuation.

13th May, 1840.

Present, 3 *ex-officio*, and 15 elected Guardians.

Valuator requested to value the portion of the Ballast-office concern, not exempted by the resolution of the 4th March, last; Mr. Arkins gave notice that he will, on the 20th instant, bring before the Board the valuation of the North City, with a view to its revision. Revision of valuation proposed.

The Collector (Mr. Gilbert) stated that there would be much difficulty in the collection of the rate, in consequence of the Christian names not being given.

20th May, 1840.

Present, 4 *ex-officio*, and 26 elected Guardians.

Proposed by Mr. Arkins, and seconded by Mr. Butler, that Christopher Coyne and John McNeile, be employed to revise the valuation of the North City Electoral Division, and that a Committee be appointed to assist the above persons in the revision. It was, however, agreed that the motion be postponed for a month, for further consideration.

It was ordered that the City Collectors bring a list on this day week, of any doubtful assessments they shall have met with, and that a Committee be appointed to examine Collectors to report on valuation.

APPENDIX.

North Dublin.

Extracts from Minute
Book.
Return ordered by
House of Lords.

25th May, 1840.

Present, 13 elected Guardians.

Letter read, from the Poor Law Commissioners, accompanying an order from the House of Lords, that there be laid before the House a return of all houses in the Dublin Unions, valued in the Valuator's returns under the annual value of 10*l.*, the valuation of which was afterwards raised to 10*l.*, and the evidence upon which such addition was made.

Letter from the Poor Law Commissioners, requesting that copies of the circular of the 25th March, on valuation and rating, be returned; in lieu of which, they will immediately send revised copies.

27th May, 1840.

Present, 6 *ex-officio*, and 16 elected Guardians.

The consideration of the collector's lists of doubtful assessments was postponed.

10th June, 1840.

Present, 5 *ex-officio*, and 11 elected Guardians.

The Assistant Commissioner recommended the Guardians to consider, as soon as possible, what alterations it will be necessary to make in the valuation before a new rate is made.

Letter from the Poor Law Commissioners, accompanying the opinion of their law adviser, G. Coode, Esq., as to the legal mode of valuing the rentable property of gas and water-companies. His opinion is, that they are to be valued at the rent which a tenant would give for them, allowance being made for outgoings in repairs, taxes, &c.

Letter from Mr. Bradshaw (the collector), informing the Board that a Mr. Horseman had directed his tenants to resist the payment of the rate, as he would resist it himself.

Warrant to distrain Mr. Horseman's house.

Houses omitted in va-
luation.

Mr. Bradshaw stated that three houses in Liffey Street, and one in Capel Street, were omitted in the valuation.

17th June, 1840.

Present, 2 *ex-officio*, and 20 elected Guardians.

Letter from the Poor Law Commissioners, accompanying six copies of revised circular, of the 25th March, on valuation and rating.

Notice of appeal from Mr. Kerr, from 110, Capel Street, read. Mr. Kerr to be informed that his case will be considered, previous to the next rate being struck.

The consideration of Mr. Green's case, of No. 30, Gardner's Place, complaining of being too highly valued, was postponed.

24th June, 1840.

Present, 5 *ex-officio*, and 20 elected Guardians.

A letter from Doctor Grady, complaining of houses and lands at Howth and Killbarrack being over valued, was read; he was informed that they could not interfere with the present rate; but that his case will be attended to previous to striking the next rate.

A similar letter from Messrs. Williams and Gibton, to which the Board gave the same answer. And in addition, that the valuation of their premises did not appear to the Board too high.

Committee appointed to consider the claims for exemption from rate, by public buildings, hospitals, and charitable institutions.

Committee appointed
to revise the valuation.

Resolved—That a Committee be appointed to revise the valuation, and that such Committee be requested to report on such cases as they may consider improperly rated, and to suggest such alterations as they may consider to be expedient.

15th July, 1840.

Present, 2 *ex-officio*, and 18 elected Guardians.

Unoccupied houses.

Read a letter and minute from the Poor Law Commissioners, on the subject of rating unoccupied houses.

22nd July, 1840.

Present, 2 *ex-officio*, and 16 elected Guardians.

The following were appointed a Committee to revise the last rate, to consider appeals already lodged, or which may be lodged against said rate, to recommend to the Board the amount of rate for the ensuing half year, considering the proportions to be raised on each Electoral Division.

Captain Lindsay, Messrs. Roper, Law, Kearney, Campbell, and Kirwan.

5th August, 1840.

Present, 7 *ex-officio*, and 11 elected Guardians.

Collectors to report on
valuation.

In order to insure, as far as possible, a fair valuation upon which the approaching rate is to be made, resolved that the collectors of the present rate be instructed to make and return to the Board a list of such premises as appear to them to be valued too high, and on the other hand too low; as also of any premises not valued, or omitted to be valued; and such lists be referred to a competent valuator, previous to the making the said next rate.

12th August, 1840.

Present, 5 *ex-officio*, and 14 elected Guardians.

Letters from Messrs. Carolin, Miller, Bradshaw, and Brennan referred to Valuation Committee.

19th August, 1840.

Present, 4 *ex-officio*, and 16 elected Guardians.

Read—Letters from the collectors, Messrs. Brennan and Bradshaw; referred to Valuation Committee.

Notice was given of a motion for that day week, that valuers be appointed to revise the valuation, with the aid of the two city collectors.

26th August, 1840.

Present, 6 *ex-officio*, and 16 elected Guardians.

Resolved—That valuers be appointed to revise the present valuation, who shall be required to inspect, and revalue any houses, premises, or lands which may be laid before them by the Board as requiring alteration, either by increasing or diminishing the existing valuation of said premises, and placing a valuation on any new houses or buildings which may have been completed since said valuation. Messrs. Taylor and Magennis were appointed valuers for the above purpose.

Agreed that the Valuation Committee be summoned to meet the valuers on the 28th instant.

31st August, 1840.

Present, 3 *ex-officio*, and 13 elected Guardians.

The valuers, Messrs. Taylor and Magennis, attended the Board, and they were informed that the Board required the revision of such cases as might be laid before them; and they agreed to revalue any number of cases in the Union, either within the city or rural district, and to value such property within the same, as may appear to have remained without being rated; the valuers proposed to leave the remuneration for said work to the Board.

2nd September, 1840.

Present, 7 *ex-officio*, and 25 elected Guardians.

A letter of agreement, drawn up by the chairman for the valuers, and approved by the Board, was signed by the valuers Messrs. Magennis and Taylor.

Resolved—That an advertisement be inserted in the newspapers, giving notice to the rate-payers within the Union that any objections which may exist to the late rate, be laid before the Board, on or before the 10th instant, when said objections will be considered previous to striking a rate for the ensuing six months.

9th September, 1840.

Present, 5 *ex-officio*, and 14 elected Guardians.

Notices from persons claiming to be rated in pursuance of the Act for the Regulation of Municipal Corporations, laid before the Board, and the consideration of them postponed until this day week.

The objections received to the present valuation, and the reports made by the collectors as to the valuation, were laid before the Board, and the clerk was directed to furnish the valuers with lists of the places to which the objections and reports referred, but not with any information as to their present value, or to what they should be valued at.

16th September, 1840.

Present, 2 *ex-officio*, and 12 elected Guardians.

Letters from collectors, Messrs. Brennen and Bradshaw, read, and referred to valuers.

The valuers, Messrs. Magennis and Taylor, were in attendance, and reported progress made in the revision of the valuation.

Resolved—That the clerk be directed to preserve notices served by claimants under the Municipal Act, and that the rate be amended by the insertion of the names of such persons in all cases in which the rate appears to have been paid. Mr. Law gave notice of a motion, that the foregoing resolution be rescinded on this day fortnight.

23rd September, 1840.

Present, 5 *ex-officio*, and 11 elected Guardians.

Read—A letter from the Poor Law Commissioners, rescinding the resolution passed on this day week, to the effect that the names of persons for whom notices or claims to be rated were sent in, should be inserted in the rate-books.

Resolved—That the Board do meet on Friday to strike a rate for the ensuing six months.

25th September, 1840.

Present, 2 *ex-officio*, and 17 elected Guardians.

Resolved—That the rate for the ensuing six months in the City Division of this Union be 7½*d.* in the pound, no rate to be struck in the rural districts. Passed unanimously.

14th October, 1840.

Present, 4 *ex-officio*, and 16 elected Guardians.

Read—A letter from the Commissioners, calling the attention of the Guardians to an opinion of the law officers of the Crown, as to whether an occupier paying an increased rent in lieu of tithe rent-charge, can be considered the person immediately liable to pay tithe.

28th October, 1840.

Present, 3 *ex-officio*, and 13 elected Guardians.

Read—Notice from Henry Smith, 58½ May's Lane, claiming to be rated, which was referred to valuers.

11th November, 1840.

Present, 6 *ex-officio*, and 13 elected Guardians.

Letter objecting to valuation, ordered to be referred to Valuation Committee.

APPENDIX.

North Dublin.

Extracts from Minute Book.

Revising valuers appointed.

Remuneration of valuers.

Advertisement for objections previous to striking a new rate.

Objections to valuation.

Claims to be rated under Corporation Act.

Resolution of Board rescinded by Poor Law Commissioners.

Rate of 7½*d.* in the pound.

Claim to be rated

APPENDIX.

25th November, 1840.

Present, 5 *ex-officio*, and 20 elected Guardians.

North Dublin.
Extracts from Minute
Book.

Read—Letters from the Poor Law Commissioners relative to statements sent to them by Mr. Walsh, of Sackville Street, respecting the revised valuation.

Read—Letter from Mr. James Bolger, in which he applies for his bond, and for eight guineas for his attendance on the Guardians at the Rotunda, and at the Recorder's Court.

Revision suspended.

Resolved—That the revision of the valuation be suspended, and that a committee be appointed to inquire into the statements contained in Mr. Walsh's letter.

Committee.—Messrs. Roper, Sherrard, Kearney, Kirwan, and Clarke.

2nd December, 1840.

Present, 9 *ex-officio*, and 22 elected Guardians.

Letters, complaining
of valuation, referred
to Committee.

Letters from Messrs. Herron, Fenton, Burnett, Ferguson, Moore, Kertland, Vance, Fox, Barker, Keon, Leckie, Henderson, Ledwick, Williams, Papworth, and Lindley, on the subject of valuation, referred to the Valuation Committee.

The Valuation Committee, appointed this day week, directed to inquire into the statements contained in Mr. Walsh's circular, presented their Report, which was confirmed.

Report of Valuation Committee.

Report of Valuation
Committee.

Gentlemen—Your Committee, to whom it was referred to inquire into the allegations of Mr. N. Walsh, respecting the re-valuation of the houses in Lower Sackville Street, report, that having reviewed the premises, they are of opinion that the following valuations are to the best of their knowledge fair and reasonable, that is to say—

Lower Sackville Street,

No.		Per annum.	No.		Per annum.
12	.	£100	24	.	£110

(Signed)

Charles Roper,
D. H. Sherrard,
J. Kearney,
J. Clarke,
Thomas Kirwan.

Remuneration to va-
luators.

The above Committee were requested to consider the compensation required by Messrs. Taylor and Magennis for their services as valuers heretofore, and to report how far they had used due diligence in executing that valuation; and also whether they are of opinion said valuation should be proceeded with, and upon what terms.

9th December, 1840.

Present, 5 *ex-officio*, and 14 elected Guardians.

Letter from Messrs. Taylor and Magennis, stating that they had completed the cases given to them for revision.

16th December, 1840.

Present, 3 *ex-officio*, and 7 elected Guardians.

Read—A letter from the Metropolitan Police Commissioners, requesting the loan of the valuation books.

Copy ordered to be sent.

6th January, 1841.

Present, 5 *ex-officio*, and 11 elected Guardians.

Read—A letter from Mr. Brennan, collector, applying for remuneration for the time occupied selecting houses, the valuation of which required revision.

27th January, 1841.

Present, 6 *ex-officio*, and 12 elected Guardians.

The Report of the Valuation Committee, on the subject of the claim of Messrs. Taylor and Magennis was read. The Committee recommended that the sum of 122*l.* be allowed for their services, provided they agree to support their valuations on the same terms as the original valuator, Mr. Bolger.

The Board decided that 100*l.* was sufficient for their services, which was ordered to be paid to them, when they agree to the terms recommended by the Committee.

10th February, 1841.

Present, 4 *ex-officio*, and 17 elected Guardians.

72nd Section of Poor
Relief Act.

Resolved—That an advertisement be inserted in the public journals, calling the attention of landlords to the 72nd section of the Irish Poor Law Act, which permits a rebate of 10 per cent. on all payments of rates upon tenements valued under 5*l.*, with a view to encourage them to relieve the very poor occupants from direct payments, and to insure collection of the rate.

APPENDIX.

North Dublin.

Extracts from Minute Book.

17th February, 1841.

Present, 6 *ex-officio*, and 15 elected Guardians.

Read—Letters from the collectors, Messrs. Brennan, Bradshaw, and Cogan.

Mr. Brennan was ordered 20*l.* as remuneration for the information supplied by him respecting the valuation.Mr. Bradshaw was ordered 30*l.* on account.

3rd March, 1840.

Present, 9 *ex-officio*, and 20 elected Guardians.

A resolution of great length was passed by the Board, calling the attention of the Commissioners to the excessive inconvenience arising from the minute subdivision of property in the valuations made for the purposes of the rate, each tenement, no matter how small, being valued separately, and the actual occupiers, in most instances labourers and poor servants, being made liable to the rate, and entered as separate items in the Collectors' books.

Resolution as to impropriety of separate assessments of small tenements.

The same resolution expressed the opinion of the Board, that the separate assessment of each cabin increases the difficulties and expense of the collection, and renders numerous lists of arrears inevitable.

The Board by the same resolution stated, that in general the labouring class in Ireland pay much higher for their habitations in proportion to their cost, than any other class of the community in nine cases in ten; perhaps double what they are valued at; so that if any rate be got for such tenements the landlord is liable for the entire.

Rent of small tenements double the valuation. Landlords liable for entire rate.

The remedy suggested by the Board was, to make the owner in fee of all tenements valued under pounds, or any person deriving under him, and claiming rent for such tenements, or exercising any right of ownership upon it in consequence of its having been attached to a larger holding, or claiming any other interest therein, such person having such interest or exercising such ownership, being himself rateable on a valuation of £ * * or upwards, liable by a summary process to the rate upon such holdings, as are under the value of £ * *.

Remedy suggested.

10th March, 1841.

Present, 7 *ex-officio*, and 19 elected Guardians.Resolved—That the following rates be struck on or before the 23rd instant, *viz.*—5*d.* in the pound on the rural districts.5*d.* in the pound on the North City.Rate of 5*d.* in the pound.

Resolved—That our experience of the collection of the poor rate for the past year, shews that in order to prevent the accumulation of large arrears, a provision in the Poor Law Act is imperatively required, by which the landlords of houses and tenements, let to poor tenants unable to pay the rate, should be rendered primarily liable to the payment of the poor rates.

Resolution as to policy of making landlords of small tenements primarily liable for the Rate.

Evidence.

Mr. JAMES BOLGER, City Valuator, *examined.*

Evidence.

Mr. Bolger, city valuator.

Mr. James Bolger was appointed valuator of the City Divisions of North Dublin Union. Was to complete the valuation within three months for 360*l.*, and it was part of the original agreement that a per-centage should be paid on the valuation of such houses as might be built or finished subsequent to the giving in the books of the first valuation; was appointed sole valuator of that division of the Union. His tender was not the lowest; heard that it was 80*l.* over some others.

Is an architect and valuator. Was partner of his uncle Bryan Bolger, check measurer to the Board of Works. The office is the same as a valuator. Has been for 30 years employed in the valuation of houses in Dublin and elsewhere. Has been in the habit of being employed professionally by private individuals and public companies, to value houses intended to be purchased or rented. About 18 years ago valued a great number of houses for the Privy Council in George's Parish and Thomas's Parish, in Dublin. Was employed by a large number of persons to oppose the police valuation in those localities where they had copied Sherrard's valuation. That was a valuation made about 10 years ago, and the police had adopted it in many cases. Generally speaking, where the police did not adopt Sherrard's valuation, they were fair. Sherrard's valuation was originally too high, in many cases 20 per cent.

Previous experience.

Was furnished with no documents by the Board, except field books; was furnished with the Act of Parliament, with the notes. The Board was bound to furnish the taxation lists, but he was afterwards obliged to get them at his own expense, which was never repaid. Did not get any such book as the "Circular on Valuation and Rating." Never received any such book.

Documents furnished.

The Assistant Commissioner referred him to the printed instructions in the commencement of the field books, and the Act of Parliament with notes. Got no rentals. Has often been applied to for instruction by other valuers. Obtained the police valuation at his own expense.

Appointed six assistants, who were approved of by the Board. Two of them were recommended by members of the Board; considers that they were forced on him. Was acquainted with the other four, and knew them to be competent. The first two were not builders: one of them was a hatter, and the other was a furniture broker. Thinks that those two persons had proposed for the valuation. Two of the other four were builders, and men who had holdings. The other two were not builders, they were clerks. There were six parishes in the whole district. Set the assistants to work in pairs. Mary's, Grange Gorman, and Thomas's, were the parishes in which the valuation was commenced. The assistants who begun with Mary's parish, were those who had been recommended by members of the Board. Those two assistants afterwards did Paul's and Michan's, partially; was obliged afterwards himself to complete Paul's and Michan's. Grange Gorman, and George's parishes, were chiefly by

Classification of streets containing private houses.

the two builders, Thomas's parish was chiefly done by the two clerks, with his assistance. Was in possession, from his former valuation, of the value of the houses in that parish. Was also acquainted, for the same reason, with the value in George's parish. Was also acquainted with the value in the other parishes; it was on that account that he was appointed.

Gave instructions in writing to the assistants,—those instructions consisted of the names of the occupiers in their respective districts, with Sherrard's valuation so far as it went, in one column; the police valuation in another column; the description of the premises in another column; that is 'house and premises,' or 'house and limited rent', as the case might be.

Desired them to value each house at what it would let to a solvent tenant, also to state in the book the state of repair. Did not desire them to put the utmost value that could be got from a solvent tenant, but a fair rent, and from that fair rent to deduct repairs and insurance. Speaking of the fair rent, supposes the tenants to repair and insure, and also to pay the taxes.

Acted as a check on all the valuers. They all, except the two first, sent their valuation-sheets every night; went into each district, and compared their valuation; knew the districts, and classified the houses.

As to streets containing private houses, classified them according to situation. Gardiner-street is in the district valued by himself and the two clerks. A house in Gardiner-street, valued by him at 60*l.* net annual value, would let for about 67*l.* 10*s.* to a solvent tenant, supposing the landlord repaired and insured, or from that to 70*l.* Thinks that if it were let to a solvent tenant who would repair and insure it, would not let for more than 60*l.* Knows many houses in that street which are paying higher rents than the valuations; but believes that in every such instance the house is neglected, and going into bad repair. Generally speaking, in private streets, he has valued on the same principle. Always kept in view, that the tenant should have an interest in keeping the house in repair. In the case above-mentioned of a house valued at 60*l.*, and let to a solvent tenant at 60*l.*; if such a house were held on lease at 60*l.*, the interest in the lease might be sold for from 50*l.* to 100*l.* fine, according to the repair of the house. No. 76 in that street is valued at 60*l.*; if held on lease, thinks it might be sold at that amount. In valuing houses in private streets, took into consideration whether it was a locality falling in value or rising in value.

Mr. Coyne, Assistant-Valuator.

Mr. CHRISTOPHER COYNE, Assistant Valuator, *examined.*

Was appointed assistant valuator about last July or August, 1839, when the valuation of the Union under the Poor Law had been resolved on. Was appointed by Mr. Bolger, the valuator of the City division, and his appointment was approved of by the Board. He (Mr. C.) and Mr. McNeile, who was appointed at the same time, valued three parishes, Michan's, Mary's, and St. Paul's, comprising the greater part of the city division. Agreed specially with Mr. Bolger to do that part of the city, having more local knowledge there than elsewhere. Had acted as a valuator before; had made a valuation of St. Mary's parish, for vestry purposes and for grand jury cess. That valuation was adopted in lieu of the valuation to ministers' money. That was about the year 1836 or 1837.

Valuation 20 percent. under rents.

In valuing private streets, went within about 20 per cent. of the rent at which the house would let to a solvent tenant, who would keep it in repair; a house which would let at 100*l.* he would value at about 80*l.*, sometimes would go higher, if it were a rising neighbourhood; if it was a falling neighbourhood, would not go so near the rent as 20 per cent.; or in localities where the letting of houses is uncertain, made an allowance for that.

Scale of valuation.

In valuing a shop street, a house which would let for 100*l.* a year, to a tenant who would repair and pay the taxes, would value it at about 80*l.* If it would let for 30*l.*, to a tenant who would repair and pay the taxes, would value it at 22*l.* 10*s.*, or 25*l.*, according to the state of repair.

A house which would let at 20*l.* a year, to a tenant who would repair and pay the taxes, he valued at about 17*l.* 10*s.*, or 15*l.*

For a house which was let at 10*l.*, the tenant repairing, he would insert 7*l.* 10*s.* in the net value column; does not know of any such case.

In speaking of all these lettings, refers to yearly rents, and not to the sum of weekly rents.

If a house would let at 7*l.* 10*s.*, the landlord repairing, he would value it at something more than 5*l.*

Houses of so low a rent, are generally let in tenements at weekly rents, which amount to double or treble the valuation.

Speaking of rents paid for houses when let to a single tenant, there are some instances, but very few, of houses let at so low a rent as 7*l.* 10*s.* to a single tenant, in the district valued by him. In some places small houses are let to single tenants at weekly rents amounting to about 13*l.* a year; valued these at about 10*l.* a year. In that class of houses the landlord generally has to pay the taxes and repair. The repairs would amount to about 2*l.*, and the taxes about 30*s.*

Considers that such a valuation is strictly up to the rent which the tenement will fetch. Did not value the higher class of houses up to the rent. Taking repairs and taxes into account, valued the lower class of houses nearer the actual rent which they would fetch, than the higher class of houses.

Valuation of small houses higher in proportion.

It is more difficult to value the higher class of houses up to the rent which they will fetch, than the lower class. In those neighbourhoods which he valued, thinks that the higher class of houses are falling in value, while the lower class of houses are maintaining their value better. That has the effect of bringing the valuation of the lower class of houses nearer the rent than that of the higher class of houses.

There are small houses which are held at 4*s.* or 5*s.* a-week, the landlord repairing, and paying the taxes; valued them at 7*l.* 10*s.*, and sometimes up to 10*l.*

The valuation sent in by him, was afterwards altered by Mr. Bolger in respect to some of

the better class streets, such as Ormond Quay and Capel Street. Mr. Bolger reduced the valuations of some of those houses by 20*l.* a year. Generally speaking, he reduced the valuation of the better class of houses, but did not reduce the valuation of the small class of houses, whereby great injustice was done to the latter.

The opposition is very great to a high valuation on the better class of houses. They belong to a class of persons who are able to exercise more influence. Thinks it would be difficult to maintain a valuation against the opposition which would be created if that class of houses were valued up to the mark. They appeal, and valuers differ so much in opinion, that some can always be brought by occupiers of the respectable class, who declare the houses in their opinion to be much under the value set upon it. Knows the house at the corner of Little Mary's Street; is informed that there was an appeal against the Police Valuation; on appeal it was reduced, on the evidence of a valuator, to 45*l.*; the same valuator afterwards valued it at 60*l.* under the Poor Law. There had been no change in the house in the interval. Knows of a great number of similar instances.

Is certain that the existing valuation is unjust to the smaller class of occupiers in comparison with the higher class. Thinks it is so in the majority of instances. It is impossible to equalize the burden by reducing the valuation of the lower class of houses, because that would disfranchise them. For instance, a house which will let for 100*l.* a year, is often valued as low as 60*l.* or 65*l.* in the present valuation. If that low scale of valuation were applied to the smaller class of houses, it would disfranchise a great number of the persons entitled to be burgesses. Is quite satisfied that the lower class of occupiers pay an unjust proportion of the rate, and knows no remedy but raising the valuation on the higher class of houses, which of course ought to be done relatively. Thinks it ought to be raised nearly to the letting value. But if there is an appeal to the Recorder's Court, there will be conflicting testimony, and the occupier will get it reduced. Thinks the occupiers of the smaller class of houses will not appeal in order to get the valuation raised on the higher class; they pay high rents and often change their residence. Thinks they would not do so.

Mr. GEORGE TAYLOR*, Revising Valuator, *examined*.

Was appointed, in conjunction with Mr. Magennis, to re-value such portions of the Union as the Board considered to require alteration, and to value all the new property which had been built or completed since the former rate. This was on 26th August, 1840. There was an advertisement published in the daily papers giving notice that the Board would receive objections to the existing valuation up to the 10th September. The Board intended to strike a rate on the 25th September. The effect of the advertisement was that a great number of objections were sent in, thinks there were 200 or 300, but cannot positively state the number. The objections came chiefly from the city. There were objections from all parts of the city. Some from tenements of a high class, and others from tenements of a middle class, and some from the lower class,—speaking of the lower class, means houses of the value of 15*l.* and under. There were several classes of objections:—1st. From occupiers complaining of their own tenements being too high. 2nd. From the collectors of the rates who furnished lists of houses improperly valued,—these were almost all objections on the ground of such houses being valued too low. 3rd. Objections from individuals complaining that particular houses were valued on a lower scale than their own and other houses in the same locality.

These objections continued coming in until the 10th September, and until long after. As the objections came in from day to day, visited the tenements with as little delay as possible. Considers that the time allowed for visiting and viewing the tenements, and considering the objections, was much too limited. From the mode of revision adopted, it was impracticable to view and satisfactorily value more on an average than 20 tenements in a day, the objections coming from different quarters at the same time. Continued revising the tenements objected to until the 25th September, and for a long period after that time. The rate was struck on the 25th September, that was the second rate which had been struck in the Union. The revised value of all the tenements which had been re-valued up to the 25th September was introduced into the rate-book. Others, respecting which objections were still pending, remained at their former valuation for the purpose of that rate. This caused considerable dissatisfaction; continued after the rate was struck to visit the tenements objected to until the whole were disposed of, amounting to above 1350 cases.

Was also sent to examine some special cases with respect to which no objections were pending, such as the Custom House stores and docks, the Board of Education, the Police Offices, &c.

About a week after his appointment, he, and Mr. Magennis, waited on the Board, and informed them that, from the scale of valuation which had been adopted, and the prevalence of objections, that they conceived that the result of the revision would be an increase of the valuation of the city to the amount of 10,000*l.*, even supposing that the revised valuation of the tenements which were under consideration did not approach nearer than 20 per cent. under the letting value. The Board inquired what he would consider to be a fair valuation of a house which would let for 100*l.* a-year, replied, that 80*l.* would be a fair valuation. The Board expressed themselves well pleased with that scale of valuation, and he proceeded on that plan accordingly, and followed it out. In speaking of a house which would let at 100*l.* a-year, means a house which would let at that sum to a solvent tenant, who would repair, and insure, and pay the taxes.

Speaking of houses in private streets, those in first class shop-streets, in second class shop-

APPENDIX. — <i>North Dublin.</i> — Evidence.	streets, streets containing a poorer class of shops, and streets chiefly occupied by room-keepers, all require the application of a different rule of valuation. In proportion as the poverty of the occupiers increases, the difference between the amount of rent, and the net annual value, increases. First, because the rent is more uncertain; and secondly, because property in those inferior localities is a disagreeable class of property to have anything to do with. A profit rent of 60 <i>l.</i> a-year in a bad street will not fetch in the market so much as 50 <i>l.</i> a-year in a good street.
Private streets.	In private streets in favourable localities, considers that in the cases which he has revised he has gone nearer to the actual letting value than anywhere else. In Gardiner-street, for instance, thinks he has gone within 10 per cent. of the letting value.
Shop-streets.	In first-class shop-streets has not gone so near the letting value; has gone within 20 per cent., or endeavoured to do so. Considers that to be a more precarious class of property. That applies to first-class shop-streets.
Second-class shop-streets.	In second and third-class shop-streets has not gone quite so near the letting value, but the difference is not great. Would say in such cases that he endeavoured to go within 25 per cent. This applies to all the classes of streets between the second-class shop-streets and the poorer localities, occupied by clerks, workmen, room-keepers, and the struggling classes.
Poor streets.	Houses in those poorer localities are valued about 40 per cent. under the rent which they are held at by the persons who underlet them in lodgings.
Houses in the suburbs.	There is a class of houses distinct from all the preceding, which are situate in the suburbs, and are chiefly occupied by persons of limited incomes—mercantile persons of small means, clerks in counting-houses and public establishments, and the like. The rents of these houses are remarkably well paid, and average about 20 <i>l.</i> a-piece, which is usually paid quarterly. This class of property is rapidly on the increase round Dublin, being more adapted to the present state and the means of the trading classes of the city.
Revision on a defective principle.	Of the 1350 cases revised there were some in all those classes of localities. The result of this revision has not secured a uniform valuation. Is convinced that the present valuation of the North Dublin Union, owing to its being hurriedly done in the first instance, and only partially revised since, is now unequal in many respects. Houses, even in the same street, of equal value, are rated differently, and that to an extent of 20 to 30 per cent.
The valuation of the lower class of houses is on a higher scale than the better class.	Speaking of the original valuation, is of opinion that the lower class of houses are rated at higher sums, in proportion, than the better class. Thinks that the valuator came closer to the rent, with regard to the poorer class of houses, than he did with regard to the better class. Thinks that if the Poor Law valuation were published in a pamphlet form it would greatly tend to its ultimate correction.
Mr. Arkins, elected guardian.	Mr. THOMAS ARKINS, Guardian for the Four Courts' Ward, <i>examined.</i> Is well acquainted with the value of house property in Dublin, and is intimately acquainted with the existing Poor Law valuation of the Union. It became necessary to make a rate as soon as possible, in consequence of the contributions to the mendicity and other voluntary charities having been discontinued as soon as the Poor Law passed.
Valuator limited as to time and assistants employed.	The valuator was limited to three months to make his valuation, in order to complete it within the time. He was allowed to call in assistants, who were to be approved of by the Board. Eight assistants, as he best recollects, were appointed. Mr. Coyne and Mr. M'Neile were the assistants for St. Mary's, St. Michan's, and St. Paul's. They were recommended by him (Mr. A.) and Mr. Clarke. They are most respectable and competent persons, well acquainted with the value of house property in Dublin. They were approved of, and had the confidence of the Board. Never heard a complaint of them from the Board. They are not professional valuers, and does not consider it at all necessary that a professional valuator should be appointed to value house property. Any respectable citizen acquainted with the value and rents of houses in different localities is better qualified to make a valuation for the purpose of the Poor Law than a builder. Mr. Coyne and Mr. M'Neile had made a valuation before; that was of St. Mary's parish, for taxation purposes, and had given great satisfaction. A builder may be better qualified to judge of the value of new work, or to estimate the value of the materials of which houses are composed, but is not so good a judge of the letting value of house property in general. Mr. Coyne and Mr. M'Neile were not forced on Mr. Bolger, but were recommended to him, and voluntarily appointed by him; he refused to pay them, and an action was brought against him. They valued Mary's, Michan's, and Paul's parishes. Thomas's parish was valued partly by a Mr. Fogarty and a Mr. Connelly, as he best recollects. Is more particularly acquainted with the first three parishes mentioned. Mary's is a good business neighbourhood; rents are very high. The value of houses there ranges from 100 <i>l.</i> a-year to 30 <i>l.</i> There are very few of less value than 30 <i>l.</i> It is a locality which contains some private streets, but it is principally occupied by shop-streets.
St. Michan's parish.	Michan's is a falling locality; the houses there are, generally speaking, in the hands of house-jobbers, who let them in tenements to a wretched class of room-keepers. The rent paid by these house-jobbers ranges from 30 <i>l.</i> to 15 <i>l.</i> There are few of less value than 15 <i>l.</i> except in the outskirts of the parish, and in Greek-street, and that vicinity which are not shop-streets, and are occupied by a wretched class of inhabitants. They are let in tenements by house-jobbers who pay a rent of about 12 <i>l.</i> to 15 <i>l.</i> , and receive exorbitant sums from several families sometimes congregated even in the same room. Has seen ten families in the same room, and there were ten rooms in the house. Whole streets are similarly situated.
House-jobbers who exact exorbitant rents.	In Paul's parish the classes of houses are similar to Michan's. There are portions of those parishes occupied by business localities and private streets; but large portions of both parishes are occupied by a miserably poor class of inhabitants. In Michan's parish the houses in the lower class of streets are valued very consistently and
Valuation in St. Michan's.	

fairly; for instance, a house that would let to a solvent tenant or to one of those house-jobbers for 30*l.* a-year is valued at from 20*l.* to 25*l.*; a house that would let for 20*l.* a-year at about 16*l.*; a house that would let for 12*l.* is valued at 9*l.* or 10*l.*, and sometimes up to the 12*l.*; a house that would let for 10*l.* is valued at 8*l.* There are very few houses in Michan's which do not let for more than 10*l.* There are many valued at 10*l.* which would let for 15*l.* and 20*l.* Does not think there is a single house in Michan's parish valued so low as 10*l.*, occupied by any person who could be qualified as a burgess. Such are let in tenements occupied by room-keepers, and therefore cannot give a qualification.

After the valuation had been made by Mr. Coyne, assisted by M^cNeile, Mr. Bolger altered the valuation by reducing the valuation of the better class of houses, and leaving the poorer class at the valuation placed on them by Coyne and M^cNeile. The first rate was struck on that imperfect valuation. Endeavoured to get the injustice remedied, and succeeded to a certain extent. A revision was ordered, but considers that the revision ordered was partial, and not upon proper principles, the revising valuator being ordered to value particular houses that were complained of, without being informed of the valuation of neighbouring houses.

In Mary's parish there are few or no houses that would not let for more than 10*l.*

The same observations as apply to Michan's parish applies to Paul's.

After Mr. Bolger gave in the valuation, the guardians took the valuation books home; found a great many errors in his own ward and in other wards that Mr. Bolger had reduced the valuation of; the better class of houses too low in comparison with the low class of houses.

The revision has added about 10,000*l.* to the net annual value of the property in the city electoral division.

The valuation of Grangegorman parish was originally very defective. The assistant valuator appointed for that parish was very incompetent; houses on the canal bank, and up through Phibsborough and the outlets of the city, which let from 16*l.* to 20*l.* a-year to solvent tenants who repair and pay the taxes, were valued by him at 6*l.* to 9*l.*; houses on Lynch's-terrace let for 32*l.* were valued at from 15*l.* to 17*l.* The persons valued under 10*l.* did not in general complain: every one looks to his taxes, and not to his franchise. However, has known many instances of persons complaining of having been disfranchised by too low a valuation of their houses. Some in Grangegorman parish who were paying 20*l.* were valued at 7*l.*, and complained of being disfranchised. Attributes this merely to the incompetency and carelessness of the person employed as assistant in that district. A great majority of those cases have been remedied by the revision.

In White's-lane, Dorset-street, there are eight or nine houses valued at 10*l.*; thinks that they are valued 50 per cent. higher than the higher class of houses. Cannot say what a solvent tenant would pay for one of those houses. Such houses would not let to solvent tenants at all; but they would let for 12*l.* or 13*l.* a house to men who would pay the rent, and continue to pay it, and keep the house in repair, and pay the taxes.

MR. PATRICK GARDNER, Guardian for Paul's Ward, *examined.*

Considers that Bolger's valuation of Paul's Ward was fair and equal. Bolger was responsible for the valuation, but it was made by his assistants, Cayne and M^cNeile. Does not consider that the lower class of houses were valued on a higher scale in proportion than the higher.

Houses in Queen-street which would let for 45*l.* a-year were valued at about 40*l.* net value. Means by "let at 45*l.* a-year," let to a tenant who would pay the rent and keep it in repair and pay the taxes, and live by his business.

There are a few houses of low value in the parish; for instance, at Blackhall Parade; thinks they let at about 20*l.*; thinks they are valued about the same, but is not certain.

Does not think that there was the slightest reference to the franchise in making the valuation. Considers that the circumstance of the franchise of burgesses depending on the valuation had no effect upon the valutors.

Thinks that the revision which has been made of the original valuation has had the effect of producing inequalities. The revising valutors have raised the valuation of the particular houses which they were sent to revise; thinks they have raised the valuation above what they ought to be valued at under the Poor Law.

MR. CONNELL LOUGHLIN, Guardian for the Custom-House Ward, *examined.*

Is pretty certain that the higher class of houses are not valued on so high a scale as the lower class of houses. Applies that observation to George's Ward.

MR. J. H. CREAN, Clerk of the Union, *examined.*

Was appointed clerk immediately after the first meeting of guardians. The books of the Union are the minute-book—the rough minute-book—the field-books originally used by the valutors: the latter are in the possession of the valutors, both of city and rural districts—the draft valuation books which were submitted to the Board in the first instance: those are considered the originals; they are kept by the Board. The alterations made in consequence of objections were introduced into these books by the valutors both of rural and city divisions. The rate-books were copied from them. There is a book containing a registry of all the objections, and the alterations made on such objections during the period since the first rate. The objections made previous to first rate are preserved, but not entered in a book. There are no other books or records relating to the valuation but those above mentioned.

The city valuator first appointed was Mr. Bolger. He made a valuation with the aid of assistants appointed by him with the approbation of the Board.

Mr. Bolger had access to the existing valuations of the city, such as the police valuation.

APPENDIX.

North Dublin.

Evidence.

The valuator of the north city was desired to communicate with the valuator of the south city, in order to some uniformity.

Mr. Bolger was responsible for the whole valuation. Cannot say how he and his assistants divided the work amongst themselves. When they had completed it it was laid before the Board. The Guardians of each ward in the city and each of the rural divisions revised their respective districts. In some cases they suggested alterations, which the valuator adopted in some cases, and not in others.

Objections.

Notice was given that objections would be entertained; there were printed forms of objection. Rate-payers called and made objections in writing on those forms—a considerable number of objections. In the rural districts the objections were from occupiers complaining of overvalue of their own tenements; in the city generally the same.

These objections were heard by the Board in the presence of the valuator; no alteration was decided on that the valuator did not agree to. The number of alterations were few: applies that observation both to the city and the rural divisions.

The first rate was struck on the valuation so revised. The only appeal was against the rate on the pipe-water.

Register of objections kept.

There were occasional objections after the first rate made to the valuation; those objections were in writing, and a register has been kept of them. Knows of no general objection to the valuation on the ground of being either too high or too low. It was generally considered fair. There were some houses which the city collectors considered too low, in consequence of which revising valuator were employed to inspect those particular cases. No general revision has taken place of the whole valuation. The valuation of no tenement has been revised except where there was a written objection, either on behalf of the occupiers or by the collectors of the city-rate.

Supposes the number of tenements which have been so revised are about 1200.

That revision has ceased. The collectors said that they had brought before the Board all the cases which were undervalued or overrated. There were no other written objections, and the revision ceased.

The revision applied only to the city. The revision was not made by Mr. Bolger, the original valuator. It was made by Messrs. Taylor and Maginnis.

Valuation lower than the rent.

The valuation is lower than the rent. Thinks that observation applies to all classes of tenements.

At the time the revision was resolved on there was an opinion that the more wealthy parts of the city were valued on a lower scale than the poorer parts. Does not consider that the whole scale of valuation on the east side of the city has been raised in order to correct that defect. There having been no revision of the whole, is of opinion that, to a certain extent, it has been altered in that respect.

No objections on the ground of the franchise.

From the commencement of the valuation no objections have come from persons occupying houses valued under 10*l.*, on the ground that they were excluded from voting at city elections by being valued too low. Does not recollect any objections from any one on that ground. Does not recollect any objections by occupiers on the ground of their own tenements being valued too low. Does not recollect any objections by landlords that the tenements in the occupation of their tenants had been valued too low. The valuation is considered a low one. It is considerably under Sherward's. Thinks every one likes a low valuation.

Mr. Vaughan, rural valuator.

Valuation of rural districts.

MR. VAUGHAN,* Valuator of Rural Districts, *examined.*

Undertook the valuation of the North Dublin rural districts for 150*l.* If he had not obtained the South Dublin Union rural districts at the same time, would not have undertaken it for that sum.

The direction passed by the Board on the 11th September, 1839, to lay the valuation before them as it proceeded was not followed; it was out of his power to do it.

Assistants employed.

Was bound to have it done within three months; for that purpose was obliged to take in assistants whom he did not know. Employed a person whom he was afterwards informed had proposed to occupiers in the Union to set down large sums for repairs and insurance, so as to reduce the sum set down as net annual value; dismissed him, and had the whole of the work which he had been doing done over again, which caused a fortnight's delay. The duty of that person was merely to mark the boundaries, so that in fact he had nothing in his power, although he represented otherwise to occupiers, for the purpose of inducing them to buy a work which he was publishing.

Specimen valuations submitted to Board.

At the desire of the Board, produced a specimen of the valuation of each description of property; for instance, the valuation of a demesne, of a fishery, of a ferry, of a farm, and of a cabin. They were read out to the Board, and returned to the valuator. One of these cases was the farm of Cruiserath. That is a farm of 242 acres, with a gentleman's house on it: it is about four miles from town. It was valued at 35*s.* an English acre, and 35*l.* for the house. Mr. Langan is the tenant, Marquis of Lansdowne the landlord. The Board approved of the specimen. At subsequent meetings of the Board some of the Guardians who appeared to know the land said it was too high. Made it up at 33*s.* an acre in consequence of that representation. To this valuation the tenant objected, and to please him the Guardians took off about 30*l.* from the net annual value. It was let in 1814 or 1815; the tenant has laid out a considerable sum; would give the tenant 500*l.* for his interest if held at the valuation as it originally was made, viz., 33*s.* an acre, and 35*l.* for the house. As it originally stood, thinks it was on the same scale as the rest. All the Guardians holding land objected to the valuation of his (*sic in M.S.*) property as

* Mr. Vaughan was also valuator of Naas Union. *vide* his evidence relating to that Union.—App., page 274 *b.*

too high, and each said that the valuation generally was too high. They did not consider it too high because that rent could not be got for it; but they considered it too high for a Poor Law valuation, because they thought the repairs, insurances, and taxes ought to be deducted from the rent at which it would let from year to year, in order to find the net annual value. That was the argument they used.

The Board ordered a copy of the valuation to be made in electoral divisions in separate books, which books the Guardians of each electoral division took home for the purpose of examining. (See Minute Book, 27th Dec., 1839.) There are seven rural divisions, five were returned after being examined at the next meeting: those five reported favourably. They suggested some few alterations when they thought there were errors, and these were clerical errors which were corrected. But the objections were not to the principle of the valuation. There were two electoral divisions, Finglas and Blanchardstown, which were not returned within the week; in respect to which the Guardians objected to the principle as 10 per cent. too high. The property is generally agricultural; there is no considerable house property except gentlemen's seats. It is about half agricultural and half villa property. The objections went more to the valuation of the villa property than to the agricultural property. Mr. Hamilton objected to his, valued at upwards of 1000*l.* a-year, and said that his steward could not make more than half that. Mr. Thompson was also valued at upwards of 1000*l.* a-year, so was Mr. Rorke, for property in their own occupation. They had a strong interest in reducing the valuation. Thinks the valuation of each of those was nearly 1500*l.* a-year. The small farmers did not complain. There have been only about half-a-dozen objections to the valuation, exclusive of those which object on the ground of an over estimate of areas. The latter do not affect the principle of the valuation. The small number of objections proves that the valuation is a low one. It is lower with regard to the smaller holdings than the larger, because the acreable rent actually paid by the small holders is greater than that paid by the large holders. The rents paid by the small holders are rack-rents. Thinks that some of those rack-rents are not always paid; thinks they are paid about nine years out of ten. Confining himself to the actual rent that is constantly paid, thinks that his valuation is about one-fifth under that. Taking a farm of nine Irish acres within four miles of Dublin, for instance, at Brocken, say James McNamara's holding, has valued it at 42*s.* an Irish acre, and 2*l.* 10*s.* for the house. Is informed that that land fetches 4*l.* an acre. The net annual value in the book is 23*l.*: the rent would be 36*l.*, and yet the valuation of Brocken was loudly complained of as being too high: this is in the electoral division of Finglas. The townlands immediately surrounding Brocken are let at about the same rents, though he considers one acre of them worth two of Brocken. Brocken is very much subdivided. Supposes that the rent is paid; believes it is knocked out of them. They don't make it out of the land, but help it out by working with the surrounding farmers.

Mr. Ware is valued at almost exactly the rent he pays, within a shilling or two an acre. That is a large farm of 443 English acres.

Mr. Gerrard's rent is about the valuation, 52*s.* 6*d.*; that farm is 280 English acres.

On the whole, is of opinion that the townland of Ward is valued at about the rent at which it is let, some of them being let within the last twelve months; that townland is let in large farms.

In Bishopswood one Reilly holds 67 acres, for which he pays 3*l.* 10*s.* an Irish acre. He is valued at 2*l.* 10*s.* an Irish acre: that is about five miles from Dublin. It is not as good land as the Ward.

Sheppard's farm at Newton is valued at 300*l.*; it contains 107 Irish acres. He pays 2*l.* 10*s.* an acre, and paid 500*l.* fine within the last two years. He has lodged an objection. He (Mr. Vaughan) is to report on it. Does not know whether it will be reduced.

Widow Coleman, 127 acres, pays 3*l.* an acre: she is valued at 2*l.* 10*s.* an acre.

Aspill, of Shampin Hill, holds 118 English acres; is valued at 2*l.* 16*s.* an acre, pays 3*l.*

There was a great dispute about the electoral divisions of Blanchardstown and Finglas. The valuation was complained of by the Guardians of that electoral division as too high. A farm called Hurtsham was produced as a proof that the valuation was too high; it was said that it had been in the market for some years; and that Mr. Hawkins, the proprietor, could not get the rent he demanded for it, which amounted to less than the valuation. Was about to acquiesce, being overpowered by all the Guardians that appeared to know anything about it. Another Guardian came in and said that Mr. Hawkins was asking a fine of 1000*l.* along with such rent. It was not altered, and the opposition to the valuation of those two electoral divisions ceased.

Was appointed valuator of the rural districts of North and South Dublin Unions about the same time. Is by profession a surveyor and civil engineer: commenced his profession in the year 1824. His father was a surveyor, and so was his grandfather; learned his profession under his father; valued for many years with him for private individuals, and since his death on his own account. Is acquainted with farming, had experience in the management of a farm of 250 acres, held by his father, and afterwards by himself, at a rent of 320*l.* a-year in the county Meath.

With the exception of Blanchardstown and Finglas divisions, the greater proportion of the rural part of North Dublin is villa property; the land about residences varying in extent from demesnes of 100 acres to cottages with no land attached but a little garden.

Clontarf electoral division is occupied in a great measure by houses in which persons from the city reside during the summer months, for the purpose of bathing and ruralizing; and

many of them are empty during six months of the year. The letting depends on the character of the season, whether wet or otherwise. Took into consideration the uncertainty of letting; considered that all those houses would be unoccupied one year out of five; applied that rule to all such houses. Valued a cottage at Dollymount, in that division, at 20*l.* a-year. It is extremely difficult to know what such a house would let for if unfurnished. It is quite unusual to let them unfurnished, and therefore it is very difficult to say. Furnished it would let for about 6*l.* a-month for six months. Finds it very difficult to say why he fixed on 20*l.* as the value. Valuers often give reasons when the question is put, which never entered their heads until the question is put. Comparing that house with other houses that he had already valued, put 20*l.* upon it. Other houses ranged from 1*l.* a-year to 200*l.* Had inquired what the people who make a business of furnishing and letting these houses paid for them by the year to the head landlord. Most of them have leases. Cannot fix the reason why 20*l.* was fixed on as the value, except that he thought that a reasonable sum at which it should be rated. It would be quite impossible to fix the sum at which it would let. A person might be got by accident who might give 25*l.* and keep it in repair. Thinks that no one would give 30*l.* and keep it in repair. But the letting of such houses is so uncertain, and the amount of rent which may be obtained for them varies so much, according to the fancy of the persons who may happen to be looking out for them, that no one can fix a value upon them which can be relied on as certain. Was astonished to find that a house in the electoral division of Howth, which he had valued at 25*l.* a-year, was let furnished for 80*l.* Considers that that was quite an accidental letting. Mr. Barlow said the valuation of that house ought to be raised. It was not raised. There is a villa near Howth which he had valued at 60*l.* a-year; it was occupied by one of the judges, who paid 150*l.* for it. He held it for several years; he has now given it up. The difficulty with respect to such property arises in a great measure from the circumstance that they have no definite marketable value, if supposed to be let unfurnished. A great portion of villa property will not let at all, unless furnished. But the valuation is necessarily made on the supposition of their being let unfurnished. The house above referred to, lately occupied by one of the judges, would be built for about 1000*l.* There is five acres attached to it, which are occupied by pleasure-grounds, and of no value, except as being attached to the house. Valued the land at 16*l.* in addition to the 60*l.* a-year for the house. If the land was let as grazing land it would fetch 16*l.* Dr. Marsh's house is valued at 50*l.*, it would let for 60*l.* or 70*l.* unfurnished, perhaps 80*l.* if a tenant was found whose taste it might suit. It is impossible for a valuator to go up to the mark in valuing such property: the objections would be so numerous, and particular cases would be relied on to reduce the whole valuation. The safest way is to be decidedly under the mark, in order to avoid objections. Considers that the valuers are not sufficiently paid, taking into consideration the difficulties they meet with from objections.

Villa property.

Agricultural land in vicinity of villa property.

As to land used for agricultural purposes, but the value of which is affected by the vicinity of, and being intermixed with, villa property: a great deal of the electoral divisions of Clontarf, Coolock, Drumcondra, and Glasnevin is of that character. It is partly used for grazing, and is partly in tillage. It brings a high rent. The bishop's farm is all grass and meadow. It is a farm of 300 or 400 acres. It is all prime land in that neighbourhood. It is valued at from 2*l.* 16*s.* to 3*l.* 5*s.* an English acre; that is about 4*l.* 1*s.* to 5*l.* 6*s.* an Irish acre. Took that amount because he supposed the whole farm of 300 or 400 acres would let for that to a single tenant. There are three farms there from 20 acres upwards; they are held chiefly by persons occupying villa property in the neighbourhood. In those electoral divisions there are few or none of the small class of farmers. There had been a dispute amongst the city Guardians as to the scale which should be adopted in revising the valuation of the city. Mr. Roper, when the rural valuation came to be revised by the Guardians, proposed that the valuation should be tested by the actual lettings. He found in those two cases that it was within a shilling or two an acre of lettings of the last two years. Mr. Roper said it was very high; he thought that the valuation ought not to come up to the mark. Some of the Guardians were insisting that the whole valuation should be reduced. Mr. Roper was not for a high valuation, but said that the valuator should be supported.

Large and small farms.

Rent value not adhered to.

In proceeding with the valuation, took no account of the size of farms, but put the same acreable value on the small farms as he had already put on large. Thinks it is a bad plan to value small farms higher on the ground that they will fetch a higher rent; therefore valued small farms at the same acreable rent as the large farms. Is aware that small farms bring a higher rent; and that is the reason why the small farmers did not object to the valuation, the small farm being valued much more under their rent than the large farms. Intended that it should be lower than the actual rent which a solvent tenant could pay. Is now speaking of the rent paid for large farms. But the objections to the valuations of those large farms were so numerous that he is bound to think that he was nearer the rack-rent than he intended.

Houses on small farms.

The houses on small farms were valued from 10*s.* to 5*l.*; valued some at 1*s.* A house valued at 10*s.* would have only one room, built of mud and thatched; if it consisted only of a kitchen, never valued it higher than 10*s.*; if it had a room besides the kitchen, valued it at 1*l.*; and if it had a stable or outhouse, valued the whole at 1*l.* 10*s.* If it had two rooms and a kitchen, valued it at 2*l.*; if it had two rooms and a kitchen and a stable, 2*l.* 10*s.*; if it also had a cow-house, barn, and offices, valued it at from 4*l.* to 6*l.* All these valuations apply to houses in the ordinary state of repair; if dilapidated, valued them one-third lower. The cottages he valued at 1*l.* would cost about 10*l.* to build, and let at about 1*s.* a-week. As to *house property* in towns and villages, valued small slated houses containing a room and a kitchen at 2*l.*; if dilapidated, at 1*l.* or 1*l.* 5*s.* Such a house lets at about 1*s.* 6*d.* a-week. Took the locality into consideration in valuing a public-house. Several public-house keepers objected on

House in towns and villages.

the ground of the change produced by the temperance societies: and they were all reduced.

As to localities occupied by small farms sufficient to support a family and pay their rent out of the produce of the farm: there are many of these in the Unions. Anything over three acres in this Union will in general be sufficient for that purpose. There may be about 100 on the hill of Howth,—others at Castleknock,—others at Finglas. At Castleknock valued them at 40s. an English acre,—that would be 3*l.* 5s. an Irish acre. Thinks he was told they pay about 4*l.* an acre.

Crowded localities, the occupiers of which do not pay their rent out of the land.—There are many of this class in Castleknock division, viz., at the Strawberry Beds there are a couple of hundred of them there. They support themselves by the strawberry beds and occasional work in the factories adjoining. They pay from 5*l.* to 7*l.* an Irish acre for their holdings. Valued them from 3*l.* 5s. to 3*l.* 16s. an Irish acre, and added something for the house, which in some cases made it 7*l.* an acre. Does not mean that he valued them up to the rent they pay. Including the houses, thinks he valued them at sums varying from one-third to one-fourth under the rents they pay: that is, the “net annual value” is about one-third or one-fourth under the rents actually received. The tenants do not pay that from the land alone, but help it out by labour in the factories.

Was deceived in respect of the value; did not mean the valuation to be so high as he afterwards found it was: intended it to be low, in order to avoid objections, but found it was not low enough for that purpose. It was the first Union he valued. Adopted a lower scale in the South Dublin Union.

During the twenty-one days that the valuation lay for inspection of the public, a number of objections were sent in,—about 200. Days were appointed to take them into consideration. The rural Guardians formed a committee, which sat in Board-room, to take them into consideration. The parties objecting were required to attend with legal proof to support the objection. Where the objection was to contents, by producing their lease or a survey,—and where the objection was to value, by pointing out a case of land of similar quality valued on a lower scale, or by showing a late letting of land of similar quality at a rent below the valuation. There were no committees of inspection as in South Dublin. They cannot form an opinion of value so well by hearing evidence in that way as by an inspection. The committee made about 30 alterations; made no alterations without his (Mr. V.’s) consent: and thinks the Guardians acted most honourably.

Before the valuation was laid before the public the Guardians of each division took home the field-book of their division to inspect it, and suggest amendments. Some of them kept them a week,—others three weeks. They put alterations in the margin in pencil, for the purpose of submitting them to him (Mr. V.) for his approval. He (Mr. V.) agreed to about 30 of those alterations. The alterations agreed to were principally clerical errors. In Blanchardstown and Finglas the Guardians suggested that the whole valuation of those divisions should be reduced 10 per cent.

Eight months after the rate was struck the Guardians advertised for objections. About 30 objections came in. About the half of them were valid objections. They were chiefly to contents, and in many cases caused by alterations in the occupation of the holdings since the original valuation was made. The alterations do not affect the principle of the valuation.

Thinks that Griffith’s valuation, wherever he has met with it, is about two-thirds of the fair rent. Thinks that Griffith’s valuation is so unequal that there would be more appeals against it than against the Poor Law valuations, were it not for the circumstance that it is on so low a scale that it is far below everybody’s rent, and therefore no individual has a case which appears to be sustainable when his valuation is to be compared with the letting value of his holding. Griffith’s valuation in many cases does not amount to half the rack-rent. In other cases thinks it comes to within one-fourth of the rack-rent. Another reason why the farmers don’t object to it is, that it taxes houses which were not taxed before, and thereby relieves the land.

SOUTH DUBLIN UNION.

Extracts from Minute Book of Board of Guardians.

July 25, 1839.

Present, 10 ex-officio and 32 elected guardians.

Committee appointed to inquire into existing survey and valuations.

August 8, 1839.

Present, 11 ex-officio guardians and 30 elected.

Committee report several existing surveys and valuations, but that it will be necessary to have a new general valuation made.

August 22, 1839.

Advertisement for valuers.

September 2, 1839.

Present, 9 ex-officio and 27 elected guardians.

Eleven tenders from valuers read. Valuers called in and examined.

Mr. Lawrenson, tender for 400*l*. for the valuation of the electoral division of South Dublin, accepted.

September 3, 1839.

Present, 7 ex-officio and 23 elected guardians.

Resolved,—That it be an instruction to the valuers to take all such measures as they shall think necessary to secure the uniformity of principle in the valuation of the South and North Dublin Unions, and that a copy of this resolution be transmitted to the Board of Guardians of the North Dublin Union, with request that they will co-operate in carrying it into effect.

Further advertisement for valuers.

September 10, 1839.

Present, 10 ex-officio and 23 elected guardians.

Ten tenders for valuing the rural divisions; four rejected as exorbitant.

Resolved,—by a majority of one, That Mr. Vaughan's tender to value the rural divisions of the Union, at 390*l*., be accepted; valuation to be completed within three months.

Mr. Lawrenson stated the names of seven assistants employed by him to assist in the valuation of the city division, approved of by Board.

September 26, 1839.

Present, 5 ex-officio and 19 elected guardians.

Mr. Lawrenson, valuator of city division, called in and examined as to the progress made in valuation.

Statement not considered satisfactory; Mr. Lawrenson directed to attend on the 3rd October with a complete schedule of one street.

Mr. Vaughan, valuator of rural divisions, called in and examined as to progress made in valuation, and stated the names of four assistants employed by him.

October 3, 1839.

Present, 4 ex-officio and 15 elected guardians.

Mr. Lawrenson exhibited sheets of his valuation.

Instruction to Mr. Lawrenson not to include the pipe water-rate in the column for taxes.

Memorial to Commissioners to obtain an exemption of unoccupied houses.

Mr. Vaughan summoned to attend with a specimen of a dozen cases of his valuation.

October 10, 1839.

Present, 4 ex-officio and 14 elected guardians.

Mr. Vaughan attended and examined; exhibited two cases of his valuation, and gave satisfactory answers to the questions put to him.

October 24, 1839.

Present, 6 ex-officio and 17 elected guardians.

Resolved,—That authority be given to Mr. Lawrenson and Mr. Vaughan, valuers, in pursuance of 1 and 2 Vict., chap. 56, sec. 67.

December 5, 1839.

Present, 5 ex-officio and 23 elected guardians.

Mr. Lawrenson requested an extension of time for a fortnight.

December 12, 1839.

Mr. Lawrenson and Mr. Vaughan request time to complete the valuation.

December 31, 1839.

Present, 7 ex-officio and 23 elected guardians.

Mr. Lawrenson handed in his valuation. Considered not complete. Copy ordered to be made for use of guardians.

Mr. Vaughan handed in a copy of his valuation for rural districts and copy of part.

Resolved,—That the valuation of the rural divisions be referred to the elected guardians for such divisions, and such ex-officio guardians as find it convenient to attend, and that such committee do meet in some place in such divisions, and do report to the Board as speedily as possible.

APPENDIX.

South Dublin.

Extracts from Minute Book. Committee appointed.

Report. New valuation necessary.

Valuator of city division appointed.

Measures to secure uniformity with North Dublin Union.

Valuator of rural divisions appointed. Seven assistants to city valuator.

City valuator to produce valuation of one street as a specimen. Four assistants to valuator of rural districts.

Unoccupied houses.

Specimen of valuation produced.

1 & 2 Vic. c. 56, sect. 67.

APPENDIX.

*South Dublin.*Extracts from
Minute Book.

January 16, 1840.

Present, 5 ex-officio and 22 elected guardians.

Mr. Vaughan required to attend on the 21st instant.

January 21, 1840.

Mr. Vaughan directed to attend this day week to deliver in and verify his valuation of the rural districts.

January 28, 1840.

Present, 5 ex-officio and 17 elected guardians.

Mr. Vaughan stated valuation of Tallaght not complete. Ordered to attend to-morrow.

Mr. Lawrenson stated that he would attend on Saturday with valuation complete.

Valuation to lie for
inspection of public.

Advertisement that the valuation will lie in the Board-room for the inspection of the public from 3rd February to 2nd March. A rota committee of three, for attending to the valuation, to be formed, consisting of an ex-officio and two elected guardians, one for the city and one for the rural divisions.

January 29, 1840.

Present, 4 ex-officio and 15 elected guardians.

Rural valuation
verified by decla-
ration.

Mr. Vaughan handed in his valuation, which he verified by declaration.

February 1, 1840.

Present, 1 ex-officio and 9 elected guardians.

City valuator requires a further extension of time.

Objection papers.

Resolved,—That the clerk do procure 100 objection papers, and that all objections to the valuation be entered in pencil upon those papers, filed and submitted to the Board upon the days to be appointed for the consideration of objections.

Days for hearing
objections.

Resolved,—That Mr. Lawrenson's assistant, Mr. Seton, be requested to attend the meetings of the Board on such days as they shall appoint, until they shall have disposed of all objections to the valuation.

February 3, 1840.

Present, 3 elected guardians.

City valuation veri-
fied by declaration
of valuator.

City valuator handed in his valuation in 22 books, which he verified by declaration.

February 13, 1840.

Present, 5 ex-officio and 26 elected guardians.

Mr. Vaughan applied for payment of his account for valuation of the rural districts. Ordered that the same be paid in two months from 29th January.

February 27, 1840.

Present, 6 ex-officio and 24 elected guardians.

Board adjourned to Tuesday to consider the course to be taken relative to the objections taken to the valuations.

March 3, 1840.

Present, 5 ex-officio and 24 elected guardians.

Hearing of ob-
jections.
Committees of
Inspection.

The Board proceeded to take into consideration the objections to the valuations.

Resolved,—That the guardians of the several wards be requested to visit their wards, attended by the valuator or by a person competent to discharge the duty appointed by a valuator, for the purpose of informing themselves in cases where objections have been taken to the valuation; and that the guardians of the college ward do proceed to-morrow to the parishes of Saint Mark's and Saint Ann's, and that they do report to the Board on Friday the result of their inspection.

Resolved,—That the Board is of opinion that the guardians should, in their visits of inspection to the wards, intimate their desire to receive information as to cases where persons have been rated below the value of their holdings, or where a valuation has been omitted; and that in such cases the guardians be requested to sign a formal objection on these grounds, in order that each case may be considered by the Board at their meeting.

Resolved,—That the clerk do receive any objections to the valuation which shall be sent in before the guardians proceed to visit their respective wards or electoral divisions.

Resolved,—That the copy made of the valuation of each ward be given to the guardians for their assistance during their investigation.

Police valuation.

Resolved,—That the chairman write to the Commissioners of Police, requesting that they would allow the Board the use of their valuation books in revising the valuation.

March 6, 1840.

Present, 3 ex-officio and 15 elected guardians.

The Board proceeded to take into consideration the objections to the valuation in Mark's and Ann's parishes.

Resolved,—That the Board do not entertain any objection on the ground of over value, where the amount to which it is proposed to have it reduced is less than 8 per cent., except in cases of manifest error.

As to tenements
under-valued.

Resolved,—That it be an instruction to Mr. Seton and the guardians accompanying him, that they value any property that may have been omitted; and that they also report on all property that they consider under-valued.

March 10, 1840.

Present, 2 ex-officio and 13 elected guardians.

Hearing of ob-
jections.

The Board proceeded to take into consideration the objections in Peter's parish.

March 12, 1840.

Present, 6 ex-officio and 23 elected guardians.

Resolved,—That Mr. Vaughan be informed that a great number of objections have been taken to his valuation, many of which the guardians apprehend are well founded, that they are desirous to proceed without delay to investigate these objections, and for that purpose request Mr. Vaughan to attend, otherwise they will on that day employ a paid valuator; and if Mr. Vaughan's valuation proves defective, the guardians will take such proceedings as they may be advised.

Resolved,—That Mr. Lawrenson be requested to appoint two or more persons with Mr. Seton, to assist the guardians in examining into the objections.

Two hundred pounds paid to Mr. Lawrenson on account.

March 13, 1840.

Present, 1 ex-officio and 8 elected guardians.

The Board proceeded to take into consideration the objections taken to the valuations in Bridget, Werburgh, and John's parishes.

March 16, 1840.

Present, 4 ex-officio guardians and 14 elected.

Mr. Vaughan, valuator for the rural districts, and the Board proceeded to take into consideration the objections lodged against his valuation. Hearing of objections.

Resolved,—That Mr. Vaughan be requested to name three persons to attend the guardians in their revision of the valuation of the rural districts.

March 23, 1840.

Present, 2 ex-officio guardians and 15 elected.

Resolved,—That the valuation of the rural divisions of the South Dublin Union having been carefully revised by the several guardians of these divisions, accompanied by Mr. Vaughan the valuator, it appears to the Board that this valuation is generally correct and creditable to Mr. Vaughan. Rural valuation generally correct and creditable to valuator.

April 2, 1840.

Present, 5 ex-officio and 23 elected guardians.

Resolved,—That 5*d.* in the pound be the amount of the rate for the first six months.

Resolved,—That all the assistant valutors be discharged from this day.

Rate of five-pence in the pound.

April 4, 1840.

Accounts of valutors and assistants for re-valuing houses and lands to which objections had been taken, amounting to 26*l.* 19*s.* Expenses of objections.

April 9, 1840.

Present, 5 ex-officio and 21 elected guardians.

City valuator paid 100*l.*, the balance of his account.

Resolved,—That the valuation of the wards of the South Dublin Union having been carefully revised by the several guardians of these wards, accompanied by Mr. Lawrenson or his assistants, it appears to this Board that such valuation is generally correct and creditable to Mr. Lawrenson. City valuation generally correct and creditable to valuator.

April 16, 1840.

Mr. Vaughan, the valuator, ordered to get the gross annual value, &c. put in the rate-books.

April 23, 1840.

Mr. Vaughan paid the amount due to him.

April 30, 1840.

Present, 2 ex-officio and 21 elected guardians.

Read letter from the Poor Law Commissioners, requesting the Board immediately to transmit, for the purpose of being laid before the House of Lords, copies of all instructions which may have been issued by the Board of the South Dublin Union, exclusive of those published by the Poor Law Commissioners in their printed Circulars, relative to the valuation of rateable property in the Union, stating particularly whether any of those instructions, and which, have proceeded immediately from the Board or from the Valuation Committee. Return ordered by House of Lords.

May 7, 1840.

Six copies of a circular on valuation transmitted by Commissioners.

May 21, 1840.

Present, 3 ex-officio and 18 elected guardians.

Resolved,—That the four houses, 178, 179, 219, 220 in the valuation book, and which were altered in said book, be reduced to the original value as put on them by Mr. Vaughan for the next rate, and which valuation was as follows:—Nos. 178 and 179, 20*l.* a-year each; Nos. 219 and 220, 28*l.* each.

May 28, 1840.

Present, 5 ex-officio and 16 elected guardians.

Read letter from the Poor Law Commissioners, stating that the return in pursuance of the order of the House of Lords of the 8th instant, that the clerk of the Union had not in any cases given the names of the occupiers of tenements in full, and had in many cases omitted the occupiers names altogether, and requesting him to amend the return in those respects. Returns ordered House of Lords.

Clerk of the Union ordered to write answers to letters received, containing objections to the valuation, that the Board of Guardians have no power to alter the present rate, but will inquire into the complaint previous to the next rate.

June 3, 1840.

Letter from the Poor Law Commissioners recommending the Board to cause the Christian names of occupiers to be inserted in full in all future rates. Christian names of occupiers to be inserted in rate-books.

APPENDIX.

South Dublin.

Extracts from
Minute Book.
Committee ap-
pointed.

June 11, 1840.

Present 4 ex-officio and 16 elected guardians.

Six copies of revised circular on valuation transmitted to Board.

Resolved that a Committee be appointed to consider and revise all questions of disputed rate, and that it be their duty to have all objections made by parties interested, and to report to the Board their opinion as to objections that should be allowed by the Board, and those which the Board should defend at the sessions when appeals shall be resorted to, (this committee consisted of 3 ex-officio guardians and 16 elected.)

June 18, 1840.

Persons attending on behalf of Commissioners of metropolitan police allowed to take a copy of the valuation books.

June 25, 1840.

Present 2 ex-officio and 8 elected guardians.

Law Committee.
Defence of appeals.

Referred to the Law Committee to take necessary measures for the defence of the appeals, of which notice has been given to come before the chairman of Kilmainham Quarter Sessions.

July 2, 1840.

Present 4 ex-officio and 21 elected guardians.

Report of Revising Valuation Committee.

Mrs. Rees' apartments, valued at 12*l.* to be reduced to 10*l.*Mr. Robinson's house, built since valuation, to be valued at 75*l.*Mr. Smith's house at 60*l.*

July 9, 1840.

Defence of appeals.

Read letter from Poor Law Commissioners in reply to application to Board, stating that Poor Law Commissioners will give instructions to crown solicitor to defend the rate against the appeals made by the Pipe-water Committee, the Grand Canal Company, the Dublin and Hibernian Gas Company.

Read letter of Poor Law Commissioners as to unoccupied houses.

July 10, 1840.

Letter of crown solicitor, requiring clerks attendance with books, to defend appeals before the Recorder, on July 17, by the Grand Canal Company, and the Pipe-water Committee.

July 13, 1840.

Present 3 ex-officio and 16 elected guardians.

Police Valuation.

Application to be made to the Commissioners of Police for a copy of the police valuation of the South Dublin Union for a short period.

Proposal of city
valuator to value
new property at 2*l.*
per cent.

Read a letter from valuator of city division, proposing a continuation of his services on the terms stated therein, which were thus stated:—

"That is to say, that for all new property returned by me, as liable to be rated for relief of the poor, that I shall be paid at the rate of 2*l.* sterling for every 100*l.* of net annual value of such property returned by me. By new property I mean all property not returned in the preceding valuation, the omissions of any houses or land, that I should have returned in the previous valuations, not to be charged for, that is to say, property that was visible and in a finished condition, and overlooked in such previous valuation by me. For the subdivisions of parcels of property of any former valuation I shall make no charge, for the pending valuation of the property of the Hibernian Gas Company, I shall make no charge, nor shall I make any charge for the revision of any former valuation made by me for the next rate."

City valuator's pro-
posal accepted.

Resolved that Mr. Lawrenson be employed to value all new property, and to revalue the property referred to him, on terms proposed by him in his letter of this date.

August 13, 1840.

Read letter from Mr. Vaughan, valuator of rural districts, stating that he was sorry he had not earlier notice of the appeal by Mr. Lynam, and stating that that valuation could have been easily supported.

Revision of valua-
tion.

The revision of St. Stephens and Merrion Wards read and confirmed.

Account received from city valuator, claiming nine days attendance respecting appeals.

August 20, 1840.

Mr. Lawrenson ordered to attend the Board and report progress made in the revision of the valuation.

Revising Valuation
Committee.

The chairman read the Report of the Revising Valuation Committee which was confirmed.

August 27, 1840.

Present 3 ex-officio and 18 elected guardians.

City valuator to
revise valuation.

Resolved that Mr. Lawrenson having proposed to revise the city valuation, including the religious and charitable institutions for the sum of 60*l.*, exclusive of new houses completed since his former valuation,

That 50*l.* be offered him.

Agreed to by Mr. Lawrenson, the agreement being distinct from that referring to the valuation of new property.

City valuator to
correct mistakes of
names but not to
alter value.
Advertisement.

Resolved that Mr. Lawrenson be authorized to correct any mistakes that may appear in the present valuation books as to the names of occupiers, but not to alter the value.

Ordered that the following advertisement be published:—

"It having been communicated to the Board of Guardians, that unauthorized persons have represented themselves as empowered by them to revise the valuation, the guardians hereby apprise the rate payers that no person is so authorized, except Mr. R. Lawrenson for the south city electoral division, and Mr. E. Vaughan for the rural divisions."

Revising Valuation
Committee.

Read Report of Revising Valuation Committee.

September 3, 1840.

Present 2 ex-officio and 13 elected guardians.

Read letter from city valuator as follows:—

"Sir,—In obedience to your resolution of July 30, requiring from me a valuation of the new property in the city division, I proceeded to make a valuation of the same, and in the course of this labour, observed very painfully that much of the property of the late valuation was considerably undervalued by some of my late assistants. The parish of St. Peter presented a very remarkable want of judgment on the part of the valutors, and I have to report that I applied myself to a revision of this entire parish, which I beg now to submit to your Board. My remarks will be found in penciling opposite to the figures of the late valuation.

"I have also to report that an entire revision is indispensable to a correct valuation in those places and parishes, where the assistants already alluded to, had the misfortune to have visited. Any further explanation you may require, will be given by

"Your obedient servant,

"R. LAWRENSON."

Resolved,—That the following be appointed a Committee to report this day week, as to the appointment of a permanent officer, to supervise and control the valuation and collection of rates, to define his duties, and the amount of his salary, &c.

Mr. TAYLOR. Mr. REILLY.
Mr. GAVIN. Mr. DOLAN.

Resolved,—That Mr. Vaughan be informed that several objections had been entered to the rural valuation, and the Board requires to know on what terms he will revise the same, and value all property become rateable since the former valuation.

September 10, 1840.

Present 4 ex-officio and 19 elected guardians.

Read report of committee as to appointment of supervisor of rates.

"Your committee recommend the appointment of a permanent officer, to be called the supervisor of rates, and whose duties shall be as follows:—

"1st. To superintend the valuation of all rateable premises within the Union, to inspect and value all premises which may have been undervalued, or which may be built or otherwise become liable to be rated since the previous valuation, and also all premises which may have been omitted therefrom, and to correct all errors and supply all omissions in the existing valuation, with a view to same being corrected in subsequent valuations.

"2nd. From time to time to direct the collectors to procure during their collection all the necessary information bearing on the following points.

"3rd. To examine and report upon all communications from rate-payers, complaining of overcharges or errors in rates or valuations, and to inspect the premises and report thereon.

"4th. To attend all appeals against rates, and by a previous examination and valuation of the premises, to be prepared to give evidence thereon.

"5th. To exercise a general control over the collectors, with a view to procuring a speedy and efficient collection of the rates, and to adopt means to discover any cases of fraud or negligence which may from time to time be committed in such collection.

"6th. To meet the collectors on some one fixed day in each week, procure from them weekly returns of their collections, check the same with the valuation-books, and compare the returns with the banker's receipts for lodgements.

"7th. To inspect occasionally the premises from which the rate has been collected, and examine the collector's receipts in the hands of the rate-payers, to see if the same corresponds with the returns previously made to him by the collectors.

"8th. To inspect immediately at the close of each half-year all the premises returned by the collector as insolvent or in arrear, so as to ascertain if any fraud or negligence exist on their part, and to bring same under the attention of the Board.

"9th. To superintend the preparation of the collecting-books by the collectors, to check and compare same with the rate-books, and certify in each collecting-book that same is correct.

"10th. To superintend and control the collectors in the performance of the several duties required by the commissioners' orders to be performed by them.

"11th. To report to the Board from time to time all matters of importance as same shall occur, and to offer suggestions to them for the correction of abuses and the introduction of improvements in his department, and generally to perform all such other duties connected with the rating, valuation, and collection, as the Board shall from time to time order and direct.

"Your committee are of opinion, that for the performance of these duties, a salary of 100*l.* a year would be an adequate remuneration, with the additional sum of 50*l.* a year to cover the expenses of car-hire, &c., it being an essential portion of his duties to keep up a continuous inspection of all rateable hereditaments throughout the Union.

"Your committee consider that such officer should be required to give security for the due performance of his duties in a sum of at least 500*l.*

"TERENCE T. DOLAN,

Chairman of Committee."

Resolved,—That a copy of the above report be sent to the Poor Law Commissioners, requesting their concurrence in the appointment of the supervisor recommended.

Read order of recorder, reducing valuation of pipe water works from 6,450*l.* to 1,000*l.*

October 15, 1840.

Read letter from Poor Law Commissioners, containing copy opinion of law officers, as to

South Dublin.

tive wards.
Revision of rural
valuation.

Complaints of valua-
tion of houses in
Brunswick-street.

the persons entitled under the 76th section, to deduct from the tithe owner the whole poundage rate chargeable in respect to the tithe rent charge.

September 22, 1840.

Present 2 ex-officio and 19 elected guardians.

Resolved,—That the valuation of the south city electoral division, as revised by Mr. Lawrenson, be received and confirmed by the Board.

£50 paid to Mr. Lawrenson for revising the valuation of city division.

October 29, 1840.

Present 5 ex-officio, and 13 elected guardians.

Read letter from Thomas Brownrigg, the collector of the rural districts, giving a statement of his observations relative to the valuation generally. Mr. Brownrigg requested to communicate with Mr. Vaughan on the subject, and to point out, as far as he can, such cases as he refers to.

November 5, 1840.

Communication sent to Poor Law Commissioners, calling their attention to the report of the 10th September last, transmitted to them on the subject of the appointment of a supervisor of rates and valuation.

November 19, 1840.

Present 2 ex-officio and 19 elected guardians.

Read letter from Poor Law Commissioners, approving of the appointment of a supervisor of rates only as a temporary officer.

November 26, 1840.

Present 1 ex-officio guardian and 21 elected.

Resolved,—To proceed on this day fortnight to elect a supervisor, and that the usual public notice be given, and that the candidates to send in their testimonials, and attend on the day of election.

3d December, 1840.

Read several communications from persons complaining of the valuation, &c., which were referred to the valutors to make the necessary inquiries, and report thereon.

December 10, 1840.

Present 1 ex-officio and 30 elected guardians.

Resolved,—That a rate of $7\frac{1}{2}d.$ in the pound be struck on the revised valuation of the city electoral division, to meet the estimated expenses of the next six months, from 1st December.

The election for supervisor was postponed by a majority of 20 to 10.

December 17, 1840.

Present 1 ex-officio and 26 elected guardians.

Resolved,—That the expenses of the city valuation be charged to the city electoral division, and the valuation of the rural districts to the several electoral divisions, in proportion to their several valuations.

December 21, 1840.

Letters complaining of valuation of two houses, referred to Valuation Committee.

January 14, 1841.

Several letters from occupiers, complaining of the valuation of their tenements, referred to Valuation Committee.

January 21, 1841.

Read letters from W. Calvert and E. Bermingham relative to valuation of their houses. Board considered value correct, and confirmed it.

January 28, 1841.

Read letter from T. McKane, stating that the value of his house had been reduced 50%. on appeal, and requesting part of a rate which he had paid to be returned; ordered accordingly.

Read letters from four occupiers, complaining of the valuation of their houses. Referred to the guardians of the different wards to report and explain.

City valuator's account further examined.

February 4, 1841.

Present 1 ex-officio and 17 elected guardians.

Read letters from 19 occupiers, complaining of the valuation of their houses. Valuation referred to the guardians of the different wards to report and explain.

Resolved,—That 84*l.* 12*s.* 11*d.* due city valuator, for valuation of new property, be paid.

Ordered,—That Mr. Brownrigg do attend the Board to explain upon what grounds he suggested to the valuator, Mr. Vaughan, to revise the valuations in the rural districts which had not been complained of.

February 11, 1841.

Mr. Brownrigg attended the Board, and produced the Board's letters to him directing him to put himself in communication with Mr. Vaughan, and to point out as far as he could such cases as he referred to in his (Mr. Brownrigg's) letter. Mr. Brownrigg denied having written any such letter to the Board as that alluded to.

Read a letter from Martin Ayre, sending copy of a memorial signed by him and 30 inhabitants of Great Brunswick-street to the Poor Law Commissioners, and the answer of the Commissioners relative to the valuation of their houses.

Resolved,—That the Board see no reason to make any change therein.

March 7, 1841.

Read several letters objecting to the valuation of houses, and referred to the guardians of the different wards.

Read report from Messrs. Andrew and Boileau, and the several letters referred to them objecting to the valuation of 27 houses in the Castle Ward, and recommending the amount at which the future value should be fixed.

Report received and valuation recommended entered for the next rate.

March 11, 1841.

Read several letters objecting to the valuation of houses. Referred to the guardian of the respective wards.

Reports read from Messrs. Moran and Sheridan, and Messrs. Mackey and Smith on the letters objecting to the valuation referred to them.

The reports were received and confirmed.

Ordered,—That the valuation of the house, No. 32, Kildare-street, be reduced to 35*l.* for the next rate.

March 18, 1841.

Present, 1 ex-officio, and 22 elected guardians.

Read several letters objecting to the valuation. Referred to the guardians of the respective wards.

Read report from the guardians of Merrion Ward on letters objecting to the valuation referred to them, which report was confirmed.

Read letter from Poor Law Commissioners calling for a return of the number of rateable tenements classified according to amounts.

Ordered accordingly.

Evidence.

JOHN L. ARABIN, Esq., Chairman of the Union, *examined.*

Is guardian for the rural division of Tallagh, and did not act with reference to the city valuation, except ministerially as chairman, but is acquainted with the valuation of some of the rural districts. Knows Clondalkin and Tallaght better than the others. Thinks that in general, so far as he is acquainted with the rural valuation, it is below the actual rent paid upon late lettings. Corkagh demesne was let for 420*l.* a year or two ago; it is let upon lease. There was a fine paid; believes it was about 700*l.* or 800*l.* The valuation is 391*l.* 7*s.* 6*d.* Considers that taking the fine into consideration, Corkagh is let high at 420*l.*; would not give 700*l.* or 800*l.* for it. Thinks that in general the valuation is lower than the letting value; means by the letting value the rents which are actually paid. Cannot say what test the valuator adopted. The valuation has, in general, given satisfaction. The objections made were easily adjusted. There were some as to quantity, which did not affect the scale of value adopted, and there was only one appeal from the rural divisions; that was compromised. The objections were adjusted in the same manner as in the city division; the guardians of each division went through their own division to inspect the tenements objected to, and report to the Board. The guardians of two divisions, Clondalkin and Tallaght, held public meetings of the rate-payers and objectors in the division; the objections were heard, the guardians took notes of the objections, and reported their opinion to the Board. As to the city division, witness sometimes presided at the Board, which met from day to day for the purpose of revising the valuation, and hearing the reports of the several guardians of the wards and the assistant valuers. The opinion of the guardians and the assistant valuator on each objection was submitted to the Board and was generally adopted, where they agreed; cannot say whether it was or was not always adopted. Only occasionally presided. The Board generally agreed in the opinion expressed by the guardians and assistant valuator, but did not consider themselves bound by it. Does not recollect any instance in which the Board overruled the guardians and the assistant valuator; there may have been instances, though he does not recollect them.

Speaking of the rural valuation, does not know of any difference of opinion between landlords and tenants respecting the valuation; thinks they are all generally satisfied. The principal disputes were about the acreable contents.

Is a guardian of the Celbridge Union; it adjoins the rural division of South Dublin. The valuation was made subsequently to that of South Dublin. That valuation, so far as some divisions are concerned, is vastly higher than South Dublin; it is in many cases in those divisions above the rents, especially in the electoral divisions of Saggard, Rathcoole, and Newcastle. Since the Celbridge Union was valued, the people of the South Dublin Union are better satisfied with their own valuation, seeing that it is so much lower than Celbridge; is now speaking of the rural division of South Dublin. Considers that the ratepayers of a Union are generally better satisfied with a low valuation than a high one; thinks that both landlords and tenants are better satisfied. Says so from his experience of both the Unions of which he is a guardian, and from Celbridge in particular. In the southern division of Celbridge Union the ratepayers consider that they are more highly valued than in the other divisions.

Cannot state the general proportion of the valuation to the rents in the city divisions; knows that his house in Clare-street is valued at 80*l.*; pays 92*l.* It has a good rear and a stable for eight horses; thinks he could get 92*l.* a-year for it.

While acting in the revision of Tallaght, considered that the tenements objected to should be valued so as to bring them to the same scale as those already valued, and which were not objected to; reported their opinion to the Board. Mr. Vaughan, the rural valuator, was very often at the Board; he was made acquainted with the opinion of the guardians on all the alterations.

Evidence.

J. L. Arabin, Esq.,

in city division.

APPENDIX.

*South Dublin.*DAVID C. LATOUCHE, Esq., *ex-officio* Guardian, *examined.*Evidence.
D.C. Latouche, Esq.
Ex-officio Guardian.

That he considers the valuation of the rural districts a satisfactory one; it is not so high as the utmost letting value. It is not on a rack-rent scale. It is, perhaps, about one-sixth under the utmost rent that a solvent tenant could be got to give, but cannot speak with certainty; his own demesne was valued by professional persons some time ago. Their valuation is nearly the same as the poor-law valuation. The latter is, perhaps, something lower, but not much. Thinks the valuation a fair one.

Mr. Lawrenson,
City Valuator.MR. RALPH LAWRENSON, City Valuator, *examined.*Valuator of City
division.Former employ-
ment as valuator.

Mr. Ralph Lawrenson was appointed valuator of the city division of South Dublin Union about 2d September, 1839. Had been engaged as a valuator before; was employed by the Commissioners of Metropolitan Police about the autumn of 1836 or 1837. It was about the time when that force was constituted, as he best recollects, and after his first appointment by the Commissioners of Police continued to act for them from that time. Is not a surveyor. Is not a builder. Had made a local valuation of St. Mary's parish. That was a vestry valuation. That valuation was adopted by the parish both for the purpose of the maintenance of deserted children, and for grand jury purposes to meet the warrant against the parish. That was his first valuation. There were three persons in all appointed for the purpose by the vestry. He (Mr. Lawrenson) was the principal person. Two of the three always acted together in that valuation. It was chiefly on an examination of that valuation by the very intelligent supervisor of taxes at the police office, and partly by the recommendation of the late Mr. Drummond and one of the then law officers of the Crown, the present Lord Chief Baron, that he was appointed by the commissioners of police. Was appointed by the guardians without any canvass previous to the day of election, and merely then by handing his card to the members of the Board as they went up stairs. Was appointed sole valuator of the city division; obtained leave to appoint assistants, as the guardians were in a hurry for the return of the valuation. Was proposed by Mr. Latouche, the vice-chairman, whom he had never seen before, and had no acquaintance with either directly or indirectly till that day.

Was appointed
sole valuator of the
city division, with
power to appoint
assistants.Documents ob-
tained by valuator.

Was furnished with the then last police valuation, of which he availed himself as a mere guide to identify premises and districts; did not make any use of it for the purpose of ascertaining value. Did not think it would be a good guide as to value, being principally a copy of Sherrard's valuation which had been made some years before, and was not considered in accordance with the present value of property in Dublin. The police had been then obliged to adopt Sherrard's valuation, being bound down to it, as far as it went, by the Act of Parliament. Was also supplied with an unfinished map of Dublin prepared by the Ordnance. No other documents were supplied by the Poor Law authorities, except the circular on valuation furnished with the field-books under the head of instruction. Found it necessary in order to arrive at the probable taxation, to apply to the Police Commissioners for a return of their taxation on each house. Made the same application to the Commissioners of Paving; also to the Grand Jury treasurer, Mr. Darley; also applied to Mr. Darley for the Wide Street Tax, and got access to all those documents relating to a period of three years backwards. The Commissioners of Police very kindly furnished the return themselves; in the other cases had to take them by his own clerks. With regard to the pipe water, it was held by the Board of Guardians not to be a local tax, and therefore he was instructed not to consider it in his average of the taxes. Did not apply for or obtain that return; used all the taxation documents that he has referred to only for ascertaining the taxes. Did not refer to the valuation on which those taxes were founded. Did not obtain any other document save those he has mentioned. Was of course furnished with a copy of the Poor Relief Act with notes.

Appointed seven
assistants.
